(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES...	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION...	(X5) COMPLETION DATE
R 0000	INITIAL COMMENTS This visit was for a State Residential Licensure Survey. Survey dates: May 6 and 7, 2026 Facility number: 013578 Residential Census: 26 This State Residential Finding is cited in accordance with 410 IAC 16.2-5. Quality review completed May 12, 2026.	R 0000		
R 0410	Infection Control - Noncompliance 410 IAC 16.2-5-12(e)(f)(g) (e) In addition, a tuberculin skin test shall be completed within three (3) months prior to admission or upon admission and read at forty-eight (48) to seventy-two (72) hours. The result shall be recorded in millimeters of induration with the date given, date read, and by	R 0410	R0410-All residents had the potential to be affected by this deficient practice. The action taken with residents 18, 23, & 28; was placing all residents at risk. Any of these three residents could have had TB & potentially affected the other residents due to incorrect reading &/placement times. The following corrections for the	05/13/2026

whom administered and read.

(f) For residents who have not had a documented negative tuberculin skin test result during the preceding twelve (12) months, the baseline tuberculin skin testing should employ the two-step method. If the first step is negative, a second test should be performed within one (1) to three (3) weeks after the first test. The frequency of repeat testing will depend on the risk of infection with tuberculosis.

(g) All residents who have a positive reaction to the tuberculin skin test shall be required to have a chest x-ray and other physical and laboratory examinations in order to complete a diagnosis.

Based on record review and interview, the facility failed to ensure a tuberculin (TB) skin test was read at 48 to 72 hours according to professional standards and facility policy (Residents 23 and 28) and a second test was administered one to three weeks after the first test according to professional standards and facility policy (Residents 18 and 28) for 3 of 7 residents reviewed for TB administration.

Findings include:

Resident 23's clinical record was reviewed on 5/6/26 at 11:20 a.m. A first step TB skin test was administered on 9/30/25 at 3:15 p.m. and was

deficient practice are as follows:

1. The Health Services Director (D.O.N.) will take & pass the Written TB Certification on the state website.
2. The three residents who did not have the TB tests given &/read correctly will receive the 1st & 2nd TB tests again.
3. The Administrator will be with the D.O.N. during administration & reading of the TB tests for residents 18, 23, & 28, to verify proper reading & administration. The TB forms for these three residents will be updated to show verification from the administrator.
4. The administrator will audit TB administration from May 14, 2026, through the next 6 months/November 142026.

This TB certification, TB tests, & completed form will be completed by 5/30/26.

read on 10/2/25 at 9:00 a.m. A second step TB skin test was administered on 10/13/25 at 9:30 a.m. and read on 10/15/25 at 8:15 a.m.

Resident 18's clinical record was reviewed on 5/6/26 at 11:45 a.m. A first step TB skin test was read on 11/24/25. A second step TB skin test was administered on 11/28/25.

Resident 28's clinical record was reviewed on 5/6/26 at 3:32 p.m. A first step TB skin test was administered on 9/22/25 at 1:50 p.m. and was read on 9/24/25 at 9:00 a.m. A second step TB skin test was administered on 9/29/25 at 9:15 a.m. and read on 10/1/25 at 9:00 a.m.

During an interview, on 5/7/26 at 11:44 a.m., the DON indicated she was TB skin test certified. TB skin tests were to be read between 48 to 72 hours after administration and a second step TB skin test was to be administered within two weeks. She confirmed Resident 18, 23, and 28's TB skin test administrations were completed incorrectly.

A "TB Basic Validation" card, provided by the DON, on 5/7/26 at 12:07 p.m., indicated the following: "American Lung Association. Tuberculosis Education ...has successfully

completed both the Indiana Department of Health IN-Train online program as well as the American Lung Association Mantoux tuberculin skin test validation course ...Issue Date : 3/5/24 Expiration Date: 3/5/27 ...."

A policy, dated 6/17/24, titled RESIDENT TB SCREENING", provided by the DON, on 5/7/26 at 12:07 p.m., indicated the following: "POLICY: The facility will administer and interpret tuberculin skin test (TST) in accordance with recognized guidelines and pertinent standards. PROCEDURE:..3. The intradermal skin test will be administered and read at 48 to 72 hours ...4 ... a second test should be performed within one (1) to three (3) weeks after the first test ...."

The Center for Disease and Control (CDC) website, accessed on 5/7/26 at 2:30 p.m., indicated the following: "...The skin test reaction should be read between 48 and 72 hours after administration...a second-step TB skin test is given one to three weeks after the first test is read...."

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting provided it is determined that other safeguards provide sufficient protection to the patients. (See instructions.)
