	<p>7/3/2023, which failed to include information regarding the patient's treatment preferences.</p> <p>During an interview on 7/11/2023, at 10:50 AM, the Clinical Manager indicated the system auto generated the transfer summary, and whatever information was generated goes on the transfer summary. The Clinical Manager indicated the transfer summary should have the treatment preferences on it.</p>			
G0572	<p>Plan of care</p> <p>484.60(a)(1)</p> <p>Each patient must receive the home health services that are written in an individualized plan of care that identifies patient-specific measurable outcomes and goals, and which is established, periodically reviewed, and signed by a doctor of medicine, osteopathy, or podiatry acting within the scope of his or her state license, certification, or registration. If a physician or allowed practitioner refers a patient under a plan of care that cannot be completed until after an evaluation visit, the physician or allowed practitioner is consulted to approve additions or modifications to the original plan.</p> <p>Based on record review and interview, the home health agency failed to ensure patients received all services ordered in the plan of care in 4 of 4 clinical</p>	G0572	<p><b>G0572</b></p> <p><a href="#">For clinical record review of patient #1</a>, the agency immediately identified patient affected with this deficiency and reviewed the patient's home health aide Plan of Care.</p> <p><a href="#">The director of nursing called the aide assigned to care for the patient with this deficiency and Re-in-serviced aide again on the importance of documenting in their notes the hands-on care rendered to the client including but not limited to bathing, wearing briefs, meal preparation, and feeding, dressing, brushing client's teeth, comb hair, etc. and staying to the duration of their scheduled hours of care</a> to address patient needs and to ensure that this deficiency does not reoccur.</p> <p><a href="#">The director of nursing instructed office staff to</a></p>	2023-07-24

records reviewed. (Patient #1, 2, 3, 4)

The findings include:

1. Record review evidenced an agency policy dated 10/26/2011, titled "Plan of Treatment" which stated, "... services are furnished under the ... direction of the ... physician ... An individualized Plan of Care ... signed by a physician shall be required for each [patient] receiving home health and personal care services ...."

2. Clinical record review for Patient #1 was completed on 7/11/2023. Record review evidenced a plan of care for certification period 5/12/2023 - 7/10/2023, which indicated the patient was to receive 6 hours of home health aide services 5 days per week, Monday through Friday. The plan of care indicated the home health aide would assist/prepare daily meals and set up, assist the patient with feeding, assist patient with dressing, change bed linens, empty catheter bag, and remind patient to take their medications.

Record review evidenced a home health aide visit note

printing them out for filing to ensure all hands-on care rendered to the client assigned to them is properly documented in their aide's note prior to printing them out for filing. The director of nursing further instructed office staff to **reject** any home health aide's notes without proper documentation. This will ensure home health aides' accountability and compliance with the regulatory requirements.

The director of nursing will audit 50% of all clients' charts quarterly ensuring proper documentation of home health aide care as outlined in the client's individualized plan of care. Home health aides will receive phone calls on a regular basis reminding them to document the hands-on care rendered to their clients.

The director of nursing will be responsible for monitoring this corrective action scheduled to be completed on 8/31/2023 to ensure 100% compliance and avoid its recurrence.

For clinical record review for patient #2, the agency immediately identified patient affected by this deficiency and reviewed the patient's home health aide Plan of Care.

The director of nursing called the aide assigned to care for the patient with this deficiency and Re-in-serviced aide again on the importance of documenting in their notes the hands-on care

dated 7/1/2023, which indicated the home health aide failed to assist with meals, assist with feeding, assist with dressing, change bed linens, and remind the patient to take their medications.

Record review evidenced a visit note dated 7/5/2023, which indicated the patient received a home health aide visit from 7:00 AM until 12:00 PM (5 hours).

During an interview on 7/10/2023, at 9:35 AM, the Clinical Manager indicated the home health aide was only able to complete 5 hours of a visit on 7/5/2023. The Clinical Manager indicated the patient should receive the hours as ordered on the plan of care. At 11:08 AM, the Clinical Manager indicated the home health aide should have performed all the tasks on the plan of care.

3. Clinical record review for Patient #2 was completed on 7/11/2023. Record review evidenced a plan of care for certification period 5/13/2023 - 7/11/2023, which indicated the home health aide was to take vital signs during visits, ensure the patient had a brief on prior

rendered to the client including but not limited to bathing, ensuring the patient wears briefs prior to getting on the bus, meal preparation, and feeding, medication reminders, dressing, brushing client's teeth, comb hair, etc. to address patient needs and to ensure that this deficiency does not reoccur.

The director of nursing has reached out to the patient's families and in-serviced home health aides that **vital signs will No longer be taken daily** on all stable patients except if there's an immediate medical necessity and it's ordered by their physicians with reporting notification parameters. The director of nursing instructed office staff to go through all home health aide notes prior to printing them out for filing to ensure all hands-on care rendered to the client assigned to them is properly documented in their aide's note prior to printing them out for filing. The director of nursing further instructed office staff to **reject** any home health aide's notes without proper documentation. This will ensure

to getting on the bus, assist patient with bathing, and give verbal medication reminders each visit. The plan of care indicated the home health aide was to call the office if the temperature was below 96 degrees.

Record review evidenced home health aide visit notes dated 6/30/2023, 7/3/2023, and 7/5/2023, which all failed to evidence the home health aide ensured the patient had a brief on prior to getting on the bus, assisted with bathing, and gave verbal medication reminders. These visit notes all had the following vital signs: pulse - 80, blood pressure -123/80, and temperature - 95.

Record review failed to evidence any communication notes or documentation which indicated the home health aide called the office to notify of the temperature of 95 degrees as ordered on the plan of care.

During an interview on 7/11/2023, at 11:34 AM, the Clinical Manager indicated the home health aides should have been performing tasks as were ordered on the plan of care. The

home health aides' accountability and compliance with the regulatory requirements.

The director of nursing will audit 50% of all clients' charts quarterly ensuring proper documentation of home health aide care as outlined in the client's individualized plan of care. Home health aides will receive phone calls on a regular basis reminding them to document the hands-on care rendered to their clients. The director of nursing will be responsible for monitoring this corrective action scheduled to be completed on 8/31/2023 to ensure 100% compliance and avoid its recurrence.

**For clinical record review for patient #3,** the agency immediately identified patient affected with this deficiency and reviewed the patient's home health aide Plan of Care.

The director of nursing called the aide assigned to care for the patient with this deficiency and Re-in-serviced aide again on the importance of documenting in

Clinical Manager indicated the home health aide was probably not checking the vital signs during visits, and copied the vitals from their assessment.

4. Clinical record review for Patient #3 was completed on 7/11/2023. Record review evidenced a plan of care for certification period 7/1/2023 - 8/29/2023, which indicated the home health aide was to assist the patient to turn every 2 hours, assist with meals and feeding, perform grooming assistance, change bed linens, wash dishes, and give verbal medication reminders.

Record review evidenced a home health aide visit note dated 7/1/2023, which failed to evidence the home health aide turned the patient every 2 hours, assisted with meals and feeding, performed grooming assistance, changed bed linens, washed dishes, and gave verbal medication reminders as ordered on the plan of care.

During an interview on 7/11/2023, at 1:19 PM, the Clinical Manager indicated if the home health aide did not perform the tasks on the plan of

care rendered to the client including but not limited to bathing, Turning Patient Every 2 Hours, meal preparation, and feeding, Perform Grooming assistance, wash dishes, medication reminders, dressing, brushing client's teeth, comb hair, etc. to address patient needs and to ensure that this deficiency does not reoccur.

The director of nursing has reached out to the patient's families and in-serviced home health aides that **vital signs will No longer be taken daily** on all stable patients except if there's an immediate medical necessity and it's ordered by their physicians with reporting notification parameters. The director of nursing instructed office staff to go through all home health aide notes prior to printing them out for filing to ensure all hands-on care rendered to the client assigned to them is properly documented in their aide's note prior to printing them out for filing. The director of nursing further instructed office staff to reject any home health aide's notes without proper documentation. This will ensure home health aides' accountability and

care they would be blank on the visit note. The Clinical Manager indicated maybe the patient did not want the home health aide to perform these tasks.

5. Clinical record review for Patient #4 was completed on 7/11/2023. Record review evidenced a plan of care for certification period 5/27/2023 - 7/25/2023, which indicated the home health aide was to assist with dinner, encourage use of cane, assist with bath/shower, dressing, shampoo hair, comb hair, take vital signs and give verbal medication reminders.

Record review evidenced home health aide visit notes dated 6/30/2023, and 7/3/2023, which failed to evidence the home health aide performed a temperature, bath/shower, dressing, shampooed hair, combed hair, gave verbal medication reminders, encouraged the use of cane, and assisted with dinner.

During an interview on 7/11/2023, at 1:30 PM, the Clinical Manager indicated the home health aide should have been performing all the tasks on the plan of care.

compliance with the regulatory requirements.

The director of nursing will audit 50% of all clients' charts quarterly ensuring proper documentation of home health aide care as outlined in the client's individualized plan of care. Home health aides will receive phone calls on a regular basis reminding them to document the hands-on care rendered to their clients. The director of nursing will be responsible for monitoring this corrective action scheduled to be completed on 8/31/2023 to ensure 100% compliance and avoid its reoccurrence.

For clinical record review for patient #4, the agency immediately identified patient affected with this deficiency and reviewed the patient's home health aide Plan of Care.

The director of nursing called the aide assigned to care for the patient with this deficiency and Re-in-serviced aide again on the importance of documenting in their notes the hands-on care rendered to the client including but not limited to bathing, Assist

training to facilitate timely discharge;

(xiv) Patient-specific interventions and education; measurable outcomes and goals identified by the HHA and the patient;

(xv) Information related to any advanced directives; and

(xvi) Any additional items the HHA or physician or allowed practitioner may choose to include.

Based on record review and interview, the home health agency failed to ensure plans of care contained all the required elements in 4 of 4 clinical records reviewed. (Patient #1, 2, 3, 4)

The findings include:

1. Record review evidenced an agency policy dated 10/26/2011, titled "Plan of Treatment" which stated, "... The Plan of Care shall be completed in full to include: ... All pertinent diagnoses[es] ... Type, frequency, and duration of all visits/services ... Specific dietary or nutritional requirements or restrictions ... Medications, treatments ... Medical supplies and equipment required ... Any safety measures to protect against injury ... Instructions to client/caregiver ...."

2. Clinical record review for Patient #1 was completed on 7/11/2023, for certification

[medicalcharts.](#)

The director of nursing will review and update clients' plan of care every sixty days to include all pertinent information regarding their care interventions and provisions from another home health agency. The director will randomly call patients/caregivers, and during supervisory visits to inquire about any changes in patient status to be included in their plan of care and fax to their physician for signature.

50% of the client's records will be quarterly audited by the director of nursing that is responsible for monitoring this corrective action to be completed by 8/31/2023 to ensure 100% compliance and avoid its reoccurrence.

**For clinical record review of patient #2,** the director of nursing reviewed the client affected by this deficiency plan of care and updated the patient's Psychosocial information of whom the patient lives with, the caregiver, and

period 5/12/2023 - 7/10/2023. Record review evidenced a resumption of care assessment dated 7/5/2023, which indicated the patient was receiving home health services from Entity #1 (home health agency) for skilled nursing, physical therapy, and occupational therapy. This assessment identified the following risks for hospitalization: history of falls, unintentional weight loss of 10 pounds or more in the past 12 months, multiple hospitalizations, multiple emergency department visits, decline in mental, emotional, or behavioral status, reported or observed history of difficulty complying with medical instructions, taking 5 or more medications, and currently reports exhaustion. The resumption of care assessment included the following psychosocial information: unable to participate in own care, lack of willing and able caregiver, social isolation, and transportation needs. The resumption of care assessment indicated the patient lived with someone in the home, but they were not able or willing to provide the patient with assistance.

patient information on functional status in the community with the patient plan of care to ensure this deficiency will not reoccur again.

The director of nursing further reviewed other patients' charts likely to be impacted by this deficiency and initiated corrections to include pertinent information about psychosocial information in their plan of care reflecting their care interventions and faxed to their respective physicians for signature and will be logged in the client's medical charts.

The director of nursing will review and update clients' plan of care every sixty days to include all pertinent information regarding their care interventions. The director will randomly call patients/caregivers, and during supervisory visits to inquire about any changes in patient status to be included in their plan of care and fax to their physician for signature.

50% of the client's records will be quarterly audited by the director of nursing that is responsible for monitoring this corrective action to be completed by 8/31/2023 to ensure 100% compliance and

--------------	--	--------------	--	-------------------

Clinical record review for Patient #1 was completed on 7/11/2023, for certification period 5/12/2023 - 7/10/2023. Record review evidenced a resumption of care assessment dated 7/5/2023, which indicated the patient discharged from the hospital on 7/5/2023, and was to hold the following medications for 1 week following hospital discharge: plavix (to prevent stroke and heart attack) and Xarelto (blood thinner).

Record review evidenced a plan of care for certification period 5/12/2023 - 7/10/2023, which included orders for patient to take plavix and Xarelto. Record review failed to evidence the plan of care was updated after the hospital discharge to reflect the medications on hold.

During an interview on 7/11/2023, at 10:42 AM, the Clinical Manager indicated they did not update the plan of care for 5/12/2023 - 7/10/2023, but they updated the plan of care for 7/11/2023 - 9/8/2023. At 11:01 AM, the Clinical Manager indicated they did not update the plan of care with the medication holds, because it

The clinical manager will subsequently review all clients' charts every sixty days ensuring medications are updated according to their physician's order and documented in their plan of care. The clinical manager will randomly call patients, and during supervisory visits inquire about any changes in their medications to be updated and faxed to their physician for signature and logged in their various charts.

50% of client medical records will be reviewed quarterly to ensure all client's medications are monitored and updated per their individual specific physician order and to abide by regulatory standards of practice. The director of nursing is responsible for monitoring this corrective action to be completed by 8/31/2023

	would look like the order was discontinued.

related to the physical care needs of the client ...."

2. Clinical record review for Patient #1 was completed on 7/11/2023. Record review evidenced a home health aide plan of care for certification period 5/12/2023 - 7/10/2023, which indicated the home health aide was to encourage the use of assistive devices, but failed to specify which assistive devices. The plan of care indicated the home health aide was to assist/prepare daily meals, but failed to specify which meals the aide was to prepare/assist with. The plan of care indicated the patient wore briefs/diapers, but failed to include any directions to change the patient's briefs/diapers. The plan of care indicated the home health aide was to empty the urinary catheter bag, but failed to indicate the frequency or indication for when the home health aide was to empty the catheter. This plan of care indicated the home health aide was to assist with bathing, but failed to specify what kind of assistance the patient required while bathing. The plan of care indicated the home health aide

out to clients via phone calls and during supervisory visits to inquire about any updated changes related to their health status. Any changes will be documented in their plan of care and faxed to their physician for signature to ensure this deficiency doesn't recur.

[The director of nursing is responsible for quarterly chart audits of 50% of client medical records to ensure all client's plans of care are monitored and updated per their individual specific needs and to abide by the regulatory standard of practice compliance scheduled to be completed on 8/31/2023.](#)

**For clinical record review patient #2,** the director of nursing identified the client affected by this deficiency and updated the patient plan of care to include meal preparation of Breakfast, changing patient briefs every 2 hours as needed, Bathe patient in the Tub or shower per patient/caregiver preference, Lotion body, and comb hair, and verbally remind the patient to take medication as scheduled. A copy of the updated plan of care was faxed to the physician for signature.

The director of nursing further reviewed other client charts likely to be impacted by this deficiency and

was to assist with grooming, but failed to specify what type of grooming the patient required assistance with.

During an interview on 7/11/2023, at 10:26 AM, the Clinical Manager indicated the home health aide was supposed to empty the catheter bag when it was full. The Clinical Manager indicated the plan of care should have specified the assistive device was a walker and wheelchair. At 10:29 AM, the Clinical Manager indicated the home health aide should have assisted the patient with whatever meals the family prepared for them that day. The Clinical Manager indicated the patient received meals on wheels, so the home health aide was supposed to assist with setting up the meals on wheels meals. The Clinical Manager indicated the home health aide was expected to change the patient's diaper/briefs when soiled. At 11:09 AM, the Clinical Manager indicated the patient was chair bound, so required a bed bath or chair bath. The Clinical Manager indicated this information should have been included in the plan of care.

updated/corrected their plan of care to include required specific care interventions and faxed them to their various physicians for signature and documented in their charts.

The director of nursing will audit all client charts every sixty days. The director of nursing will reach out to clients via phone calls and during supervisory visits to inquire about any updated changes related to their health status. Any changes will be documented in their plan of care and faxed to their physician for signature to ensure this deficiency doesn't recur.

The director of nursing is responsible for quarterly chart audits of 50% of client medical records to ensure all client's plans of care are monitored and updated per their individual specific needs and to abide by the regulatory standard of practice compliance scheduled to be completed on 8/31/2023.

**For clinical record review patient #3**, the director of nursing identified the client affected by this deficiency and updated the patient plan of care

3. Clinical record review for Patient #2 was completed on 7/11/2023. Record review evidenced a home health aide plan of care for certification period 5/13/2023 - 7/11/2023, which indicated the home health aide was to assist with bathing, but failed to specify if the patient required a bed bath, chair bath, or shower. The plan of care indicated the home health aide was to give verbal medication reminders, but failed to specify when the aide was to give the medication reminders.

During an interview on 7/11/2023, at 11:34 AM, the Clinical Manager indicated the plan of care should have specified the patient was a shower assist. The Clinical Manager indicated the frequency of medication reminders should have been included on the plan of care.

4. Clinical record review for Patient #3 was completed on 7/11/2023. Record review evidenced a home health aide plan of care for certification period 7/1/2023 - 8/29/2023, which indicated the patient wore diapers at all times, but

to include meal preparation of Breakfast and Lunch, changing patient briefs every 2 hours and as needed during scheduled shifts, Bathe client in bed/sitting on bath bench, Lotion body, Brush Teeth, and comb hair, and make the bed and change Linens every 2 days or as needed during Aide's scheduled shift. A copy of the updated plan of care was faxed to the physician for signature.

The director of nursing further reviewed other client charts likely to be impacted by this deficiency and updated/corrected their plan of care to include required specific care interventions and faxed them to their various physicians for signature and documented in their charts.

The director of nursing will audit all client charts every sixty days. The director of nursing will reach out to clients via phone calls and during supervisory visits to inquire about any updated changes related to their health status. Any changes will be documented in their plan of care and faxed to their physician for signature to ensure

failed to include instructions for the home health aide to change the diapers when soiled. The home health aide plan of care indicated the aide was to assist the patient with meals, but failed to indicate which meals the patient required assistance with. The home health aide plan of care indicated the aide was to bathe the patient, but failed to specify what kind of assistance the patient required for bathing. The home health aide plan of care indicated the aide was to assist the patient with grooming, but failed to specify which grooming tasks the aide was to complete. The home health aide plan of care indicated the home health aide was to change the bed linens, but failed to specify when the home health aide was to change the bed linens.

During an interview on 7/11/2023, at 1:00 PM, the Clinical Manager indicated the plan of care should have specified which meals the aide was to assist the patient with. At 1:16 PM, the Clinical Manager indicated the plan of care should have specified the home health aide was to change the patient's diapers when soiled.

this deficiency doesn't recur.

The director of nursing is responsible for quarterly chart audits of 50% of client medical records to ensure all client's plans of care are monitored and updated per their individual specific needs and to abide by the regulatory standard of practice compliance scheduled to be completed on 8/31/2023.

#### **For clinical record review**

**patient #4**, the director of nursing identified the client affected by this deficiency and updated the patient plan of care to include meal preparation of dinner, changing patient briefs every 2 hours and as needed during scheduled shifts, Bathe client in bed/sitting on bath bench, Lotion body, Brush Teeth, and comb hair, and make the bed and change Linens every 2 days or as needed during Aide's scheduled shift. A copy of the updated plan of care was faxed to the physician for signature.

The director of nursing further reviewed other client charts likely to be impacted by this

The Clinical Manager indicated the plan of care should have specified what kind of bathing assistance the patient required. The Clinical Manager indicated the plan of care should have specified which grooming tasks the home health aide was expected to perform. The Clinical Manager indicated the home health aide should have changed bed linens when soiled.

deficiency and updated/corrected their plan of care to include required specific care interventions and faxed them to their various physicians for signature and documented in their charts.

The director of nursing will audit all client charts every sixty days. The director of nursing will reach out to clients via phone calls and during supervisory visits to inquire about any updated changes related to their health status. Any changes will be documented in their plan of care and faxed to their physician for signature to ensure this deficiency doesn't recur.

The director of nursing is responsible for quarterly chart audits of 50% of client medical records to ensure all client's plans of care are monitored and updated per their individual specific needs and to abide by the regulatory standard of practice compliance scheduled to be completed on 8/31/2023.

5. Clinical record review for Patient #4 was completed on 7/11/2023. Record review evidenced a home health aide plan of care for certification period 5/27/2023 - 7/25/2023, which indicated the patient was incontinent and used briefs at all times, but failed to include instructions for the home health aide to change the patient's briefs if soiled. The plan of care indicated the home health aide was to assist the patient with a bath/shower, but failed to specify what kind of bath/shower assistance the patient required. The plan of care indicated the home health aide was to change the patient's linens, but failed to specify when the bed linens should have been changed.

During an interview on 7/11/2023, at 1:25 PM, the Clinical Manager indicated the plan of care should have specified when to change the bed linens, when to change the briefs, and what kind of shower assistance was required.

**For clinical record review of patient #2**, the agency reviewed its care plan policy and identified the client affected by this deficiency, and reviewed the patient's home health aide Plan of Care.

home health aides performed the following tasks which were not included on the plan of care: catheter care, mouth care, shave, nail care, and foot care.

Record review evidenced a home health aide visit note dated 7/1/2023, which indicated the home health aide failed to assist with meals, assist with feeding, assist with dressing, change bed linens, and remind the patient to take their medications.

Record review evidenced a home health aide supervisory visit note dated 6/23/2023, which indicated the home health aide followed and implemented the plan of care.

During an interview on 7/11/2023, at 1:40 PM, the Clinical Manager indicated home health aide supervisory visits were conducted every 30 days, by observing the home health aide provide care. The Clinical Manager indicated they did not review the home health aides previous documentation to ensure they were following the plan of care.

3. Clinical record review for

The director of nursing called the aide assigned to care for the patient affected by this deficiency and Re-in-serviced aide again on the importance of performing tasks as outlined in the patient plan of care including but not limited to bathing, assisting with breakfast, ensuring the client has brief on prior to getting on the bus, dressing and medication reminder only, and not rendering services not indicated in the client plan of care and no longer approved by IHCP such as laundry, housekeeping, grocery shopping, vacuuming, dishes, etc.

The director of nursing has reached out to the patient's families and in-serviced home health aides that **vital signs will No longer be taken daily** on all stable patients except if there's an immediate medical necessity and it's ordered by their physicians with reporting notification parameters. The director of nursing instructed office staff to go through all home health aide notes prior to printing them out for filing to ensure all hands-on care rendered to the client

7/11/2023. Record review evidenced a plan of care for certification period 5/13/2023 - 7/11/2023, which indicated the home health aide was to take vital signs during visits, ensure the patient had a brief on prior to getting on the bus, assist patient with bathing, and give verbal medication reminders each visit. The plan of care indicated the home health aide was to call the office if the temperature was below 96 degrees.

Record review evidenced home health aide visit notes dated 6/30/2023, 7/3/2023, and 7/5/2023, which all indicated the home health aide cleaned the bathroom, bedroom, kitchen, and did dishes, which was not covered services under the IHCP benefit, or ordered on the plan of care.

Record review evidenced home health aide visit notes dated 6/30/2023, 7/3/2023, and 7/5/2023, which all failed to evidence the home health aide ensured the patient had a brief on prior to getting on the bus, assisted with bathing, and gave verbal medication reminders. These visit notes all had the

assigned to them is properly documented in their aide's note prior to printing them out for filing. The director of nursing further instructed office staff to **reject** any home health aide's notes without proper documentation. This will ensure home health aides' accountability and compliance with the regulatory requirements. Home health aides will receive phone calls on a regular basis reminding them not to render any services not indicated in the client's plan of care, and to document the hands-on care rendered to their clients appropriately in their aide's notes.

The office staff will audit 50% of home health aides' records quarterly to ensure all home health aides' documentation reflects the client's plan of care to abide by the regulatory standard of practice compliance scheduled to be completed on 8/31/2023. The director of nursing is responsible for monitoring this corrective action.

**For clinical record review of patient #3**, the agency reviewed its care plan policy and

following vital signs: pulse - 80, blood pressure -123/80, and temperature - 95.

Record review failed to evidence any communication notes or documentation which indicated the home health aide called the office to notify of the temperature of 95 degrees as ordered on the plan of care.

Record review evidenced a home health aide supervisory visit dated 6/16/2023, which indicated the home health aide was following and implementing the plan of care.

During an interview on 7/11/2023, at 11:34 AM, the Clinical Manager indicated the home health aides should have been performing tasks as were ordered on the plan of care. The Clinical Manager indicated the home health aide was probably not checking the vital signs during visits, and copied the vitals from their assessment.

4. Clinical record review for Patient #3 was completed on 7/11/2023. Record review evidenced a plan of care for certification period 7/1/2023 - 8/29/2023, which indicated the home health aide was to assist

identified the client affected by this deficiency, and reviewed the patient's home health aide Plan of Care.

The director of nursing called the aide assigned to care for the patient affected by this deficiency and Re-in-serviced aide again on the importance of performing tasks as outlined in the patient plan of care including but not limited to assisting with bathing, turn every 2 hours, meals-breakfast and lunch, dressing both upper and lower body, linen change when soiled and as needed, wash only client dishes after each meal, brush teeth, comb hair, and medication reminder only, and not rendering services not indicated in the client plan of care and no longer approved by IHCP such as laundry, housekeeping, grocery shopping, etc.

The director of nursing has instructed office staff to go through all home health aide notes prior to printing them out for filing to ensure all hands-on care rendered to the client assigned to them is properly documented in their aide's note

the patient to turn every 2 hours, assist with meals and feeding, perform grooming assistance, change bed linens, wash dishes, and give verbal medication reminders.

Record review evidenced a home health aide visit note dated 7/1/2023, which failed to evidence the home health aide turned the patient every 2 hours, assisted with meals and feeding, performed grooming assistance, changed bed linens, washed dishes, and gave verbal medication reminders as ordered on the plan of care.

Record review evidenced a home health aide supervisory visit dated 7/3/2023, which indicated the home health aide was following and implementing the plan of care.

During an interview on 7/11/2023, at 1:19 PM, the Clinical Manager indicated if the home health aide did not perform the tasks on the plan of care they would be blank on the visit note. The Clinical Manager indicated maybe the patient did not want the home health aide to perform these tasks. The Clinical Manager indicated they

prior to printing them out for filing. The director of nursing further instructed office staff to **reject** any home health aide's notes without proper documentation. This will ensure home health aides' accountability and compliance with the regulatory requirements. Home health aides will receive phone calls on a regular basis reminding them not to render any services not indicated in the client's plan of care, and to document the hands-on care rendered to their clients appropriately in their aide's notes.

The office staff will audit 50% of home health aides' records quarterly to ensure all home health aides' documentation reflects the client's plan of care to abide by the regulatory standard of practice compliance scheduled to be completed on 8/31/2023. The director of nursing is responsible for monitoring this corrective action.

**For clinical record review of patient #4**, the agency reviewed its care plan policy and identified the client affected by this deficiency, and reviewed
