E0000	<p>Initial Comments</p> <p>An Emergency Preparedness Survey was conducted by the Indiana Department of Health in accordance with 42 CFR 484.102.</p> <p>Survey Dates: December 3, 4, 5, and 6, 2024</p> <p>Active Census: 77</p> <p>During this Emergency Preparedness survey, Total Home Health Services, Inc. was found to be in compliance with the Emergency Preparedness Requirements for Medicare Participating Providers and Suppliers at 42 CFR at 42 CFR 484.102.</p>	E0000			
G0000	INITIAL COMMENTS	G0000			

This visit was for a Federal Recertification and State Re-Licensure survey of a Home Health Agency.

Survey dates: December 3, 4, 5, and 6, 2024

12 Month Unduplicated Skilled Census: 315

	<p>This deficiency report reflects State Findings cited in accordance with 410 IAC 17.</p> <p>A1 12/17/2024</p> <p>Abbreviations used in report: Home Health Aide [HHA], Director of Nursing [DON], Clinical Supervisor [CS], Registered Nurse [RN], Plan of Care [POC], Start of Care [SOC], Occupational Therapist [OT], Skilled Nurse [SN], Physical Therapist [PT], Certified Occupational Therapy Assistant [COTA], and centimeters [cm].</p>			
G0374	<p>Accuracy of encoded OASIS data</p> <p>484.45(b)</p> <p>Standard: The encoded OASIS data must accurately reflect the patient's status at the time of assessment.</p> <p>Based on record review and interview, the agency failed to ensure Outcome and Assessment Information Set (OASIS) accurately reflected the patient's status at the time of assessment in 1 of 2 active clinical records reviewed with a staged wound and a home visit (Patient #2).</p>	G0374	<p>1. How the deficiency will be or has been immediately corrected.</p> <p>As it relates to patient #2, the agency is unable to modify the cited OASIS currently. The patient is receiving appropriate wound care per physician orders currently. The agency will ensure the accuracy of patient # 2's future OASIS as it relates to wounds and wound care.</p> <p>The Agency Administrator and Clinical Manager met with the</p>	2025-01-02

	<p>Findings include:</p> <p>The clinical record of Patient #2 included an initial comprehensive assessment completed on 10/11/2024 by RN 2. The primary diagnosis was a stage 2 pressure ulcer (partial thickness open wound where skin wears away) wound of the right buttock, and a secondary diagnosis included a stage 2 pressure ulcer of the left buttock. The wound care documentation of the comprehensive assessment included a stage 2 left buttock pressure ulcer that measured 3.4 cm long X 3.5 cm wide X .2 cm in depth and stage 2 right buttock pressure ulcer that measured 3 cm long X 4.5 cm wide X .2 cm deep. OASIS documentation at M1324 asked the stage of the most problematic unhealth pressure ulcer /injury that is stageable; the M1324 failed to evidence documentation of staged pressure ulcers, documentation was N/A (not applicable).</p> <p>During an interview on 12/05/2024 beginning at 12:30 PM, RN 2 relayed the reason for home health for Patient was due to pressure ulcers on the</p>		<p>12/23/24 to discuss the survey findings and the need for thorough review of all submitted OASIS documentation.</p> <p>2. How the deficiency will be prevented from recurring i.e. measure put into place or systematic changes made to ensure the deficiency will not recur.</p> <p>The agency will conduct mandatory in-service training for all clinical staff on proper OASIS documentation, focusing on accuracy, completeness, and the importance of assessment in care planning. Initial in-service date is scheduled for January 2nd, 2025</p> <p>The Quality Assurance team will review 100% of all submitted OASIS documentation for accuracy and completeness. In the event an OASIS assessment appears incomplete or inconsistent with other available collaboration, the QA team will confer with the assessing clinician and request revisions as appropriate. This 100% auditing will be ongoing. If the quality assurance review</p>

--	--	--	--	--

	<p>consent documentation had not been scanned into the electronic medical record and was not available for review.</p> <p>410 AC 17-12-3(b)(2)(D)(i)(AA)</p>			
G0458	<p>Outcomes/goals have been achieved</p> <p>484.50(d)(3)</p> <p>The transfer or discharge is appropriate because the physician or allowed practitioner, who is responsible for the home health plan of care and the HHA agree that the measurable outcomes and goals set forth in the plan of care in accordance with §484.60(a)(2)(xiv) have been achieved, and the HHA and the physician or allowed practitioner, who is responsible for the home health plan of care agree that the patient no longer needs the HHA's services;</p> <p>Based on record review and interview, the agency failed to evidence the discharge was appropriate and the allowed practitioner, responsible for the home health plan of care, agreed that the patient no longer needed the services set forth in the plan of care for 1 of 1 discharged record reviewed for goals met. (Patient 9)</p> <p>The Findings Include:</p> <p>The record reviewed on 12/5/24 for Patient 9 included a discharge comprehensive</p>	G0458	<p>1. How the deficiency will be or has beenimmediately corrected.</p> <p>As it relates to patients #9 a corrected DC summary was sentto physician requesting signature & date. Additionally, an order of correction waswritten informing the physician that all goals were met.</p> <p>2. How the deficiency will be prevented fromrecurring i.e. measure put into place or systematic changes made to ensure thedeficiency will not recur.</p> <p>On 12/9/24 the agency revised their process of requesting DCinstructions\orders when a patient has not met frequency or goals prior to discharging.Additionally, the agency is committed to requesting physician date and signatureof all DC summaries in the event the patient has not met all goals prior</p>	2025-01-02

	<p>assessment, dated 8/23/24, indicated Patient was discharged with goals met. The discharge summary dated 9/5/24 indicated 6 of the 14 physical therapy goals were not met.</p> <p>During an interview on 12/6/24 beginning at 1:00 PM, the clinical manager indicated Patient was discharged with goals met and that the PT made an error in documentation. The clinical manager was unable to provide the order for discharge. No further documentation was provided prior to survey exit.</p>		<p>to discharging.</p> <p>As part of the agency QAPI program, Clinical Manager or designee will review 100 % of DC charts to ensure compliance with this above procedure. In the event the agency identifies noncompliance a performance improvement plan will be initiated.</p> <p>3. Who is responsible to ensure the deficiency will be/has been corrected and compliance maintained at 100%.</p> <p>Administrator or designee</p>	
G0514	<p>RN performs assessment</p> <p>484.55(a)(1)</p> <p>A registered nurse must conduct an initial assessment visit to determine the immediate care and support needs of the patient; and, for Medicare patients, to determine eligibility for the Medicare home health benefit, including homebound status. The initial assessment visit must be held either within 48 hours of referral, or within 48 hours of the patient's return home, or on the physician or allowed practitioner - ordered start of care date.</p> <p>Based on record review and interview, the agency failed to ensure a registered nurse conducted an initial assessment visit to determine the</p>	G0514	<p>1. How the deficiency will be or has been immediately corrected.</p> <p>The Administrator and Clinical Manager spoke with RN case manager to investigate why patient wasn't seen within 48 hours of referral. RN case manager stated the delay was due to patient and spouse request. Late entry communication note, and verbal order were written and sent to physician for signature.</p> <p>2. How the deficiency will be prevented from recurring i.e.</p>	2025-01-02

	<p>immediate care and support needs of the patient within 48 hours of referral for 1 of 1 active records reviewed that included a recertification period. (Patient #6)</p> <p>The Findings Include:</p> <p>The record reviewed on 12/5/24 for Patient 6 included a referral dated 5/31/24. The record included a start of care comprehensive assessment dated 6/6/24.</p> <p>During an interview on 12/6/24 beginning at 11:50 AM, the administrator indicated they did not know why there was a delay and there was no documentation related to the delay.</p>		<p>measure put into place or systematic changes made to ensure the deficiency will not recur.</p>	
--	---	--	---	--

			<p>The agency will conduct mandatory Inservice training for all clinical staff on 1/2/25 on the importance and necessity of performing an initial assessment visit within 48 hours of referral or within 48 hours of patients return home. The agency re-educated all clinical staff on agency policy "5-B Initial Assessment" to include: The initial visit shall be made within 48 hours of referral acceptance from a physician or from discharge from an inpatient facility, or on the physician-ordered start of care date. If the initial visit is delayed for reasons such as an inability to contact the patient or at the patient's request, the physician shall be notified, and documentation shall be completed reflecting the physician's approval of the patient's request for the delay. If the physician specifies a specific start of care date or authorizes a date greater than 48 hours, the plan of care or a separate verbal order shall specify this.</p> <p>As part of our QAPI program Clinical manager or designee will conduct an audit on all</p>	
--	--	--	---	--

			<p>ensure compliance of SOC being completed within 48 hours ora verbal order written to notify physician. In the event, there is furthernoncompliance the agency will expand the audit scope and open a performanceimprovement plan for this issue.</p> <p>3.Who isresponsible to ensure the deficiency will be/has been corrected and compliancemaintained at 100%.</p> <p>Clinical Manageror designee</p>	
G0536	<p>A review of all current medications</p> <p>484.55(c)(5)</p> <p>A review of all medications the patient is currently using in order to identify any potential adverse effects and drug reactions, including ineffective drug therapy, significant side effects, significant drug interactions, duplicate drug therapy, and noncompliance with drug therapy.</p> <p>Based on record review and interview, the comprehensive assessment failed evidence a review of all medications the patient was currently using, to identify any potential adverse effects and drug reactions, including ineffective drug therapy, significant side effects</p>	G0536	<p>1. How the deficiency will be or has beenimmediately corrected.</p> <p>As it relates to patient #1, #2, #5 and #6 drug interactionswere faxed to physician with fax confirmation received as of 1/2/25.</p> <p>2. How the deficiency will be prevented fromrecurring i.e. measure put into place or systematic changes made to ensure thedeficiency will not recur.</p> <p>Agency has amendedpolicy "5-D Drugs & Biologicals" to include the following:</p>	2025-01-02

	<p>and or drug interactions, duplicate drug therapy, and noncompliance in 4 of 4 active records reviewed with severe drug-drug interactions (Patient #1, 2, 5, and 6).</p> <p>Findings Include:</p> <p>3. The record reviewed on 12/4/24 for Patient 5 included a start of care comprehensive assessment dated 11/19/24 which indicated medications were reconciled with serious interactions. The record failed to evidence notification to the provider of the major drug-drug interaction between Diltiazem (a medication used to treat high blood pressure and Atorvastatin (a medication used to treat high cholesterol).</p> <p>During an interview on 12/4/24 beginning at 2:40 PM, the Clinical Supervisor (CS) indicated the drug-drug interaction report had not been completed and therefore was not sent to the provider for notification.</p> <p>4. The record reviewed on 12/5/24 for Patient 6 included a recertification comprehensive assessment dated 11/29/24 which indicated medications</p>		<p><i>information shall be recorded in the patients record and reported to the physician as a major drug interaction.</i></p> <p>Clinical Manager or designee will send the major drug to drug interaction report to the primary care provider at the time of the completion of the comprehensive assessment.</p> <p>Clinical Manager or designee will review completed comprehensive assessments daily and major drug to drug interaction reports will be faxed to the provider.</p> <p>As part of the agency QAPI program agency will add review of timely submission of major drug interactions at time of comprehensive assessment. If further noncompliance persists the agency will add a performance improvement plan.</p> <p>3. Who is responsible to ensure the deficiency will be/has been corrected and compliance maintained at 100%.</p> <p>Clinical Manager or designee</p>	
--	--	--	---	--

were reconciled with serious interactions. The record failed to evidence notification to the provider of the major drug-drug interaction between Amiodarone (a medication used to treat irregular heartbeat) and Beta-Adrenergic Blockers (a medication used to treat high blood pressure and irregular heartbeat). During an interview on 12/6/24 beginning at 11:50 AM, the clinical supervisor indicated they do not send the drug-drug interaction report to the provider, at the time of the comprehensive assessment. The CS relayed they send the interaction report with the plan of care, regardless of interaction level. The administrator indicated record did not include documentation that the provider was notified of the drug-drug interaction. 1.The clinical record of Patient #1 revealed an initial comprehensive assessment, dated 11/23/2024, indicated the medications were reconciled and no issues were found during the review. Patient's medications included: Breo				
--	--	--	--	--

	<p>Ipratropium-Albuterol, Lasix, Lorazepam, Lyrica, Metoprolol, MiraLAX, Oxcarbazepine, Oxygen, Pantoprazole, Potassium Chloride, Prednisone, Prozac, Pulmicort, Singulair, Spironolactone, Theophylline, Tramadol, and Trazodone.</p> <p>The medication interaction report on the electronic medical record [EMR] revealed major interactions between the following: Lorazepam and Tramadol, Tramadol and Lyrica, Lorazepam and Tramadol, Prozac and Tramadol, Trazodone and Tramadol, Prozac and Trazadone, and Potassium and Spironolactone. The clinical record failed to evidence physician notification of major drug interactions within Patient's home medication list.</p> <p>During an interview on 12/04/2024 beginning at 12:15 PM, Clinical Manager relayed the major medication interactions were not provided to the physician.</p> <p>2. The clinical record of Patient #2 revealed an initial comprehensive assessment,</p>			
--	--	--	--	--

	<p>Patient's medication list included Omeprazole and Plavix. The EMR drug interaction report identified a major drug interaction between Plavix and Omeprazole. The clinical record failed to evidence the drug interaction report, from the comprehensive assessment at start of care dated 10/11/2024, was provided to Patient's primary care physician until 11/05/2024.</p> <p>During an interview on 12/04/2024 beginning at 12:25 PM, Clinical Manager relayed the medications interactions were usually sent to the physician with the plan of care.</p>			
G0544	<p>Update of the comprehensive assessment</p> <p>484.55(d)</p> <p>Standard: Update of the comprehensive assessment.</p> <p>The comprehensive assessment must be updated and revised (including the administration of the OASIS) as frequently as the patient's condition warrants due to a major decline or improvement in the patient's health status, but not less frequently than-</p> <p>Based on record review and interview, the agency failed to ensure the comprehensive assessment was updated and</p>	G0544	<p>1. <p>revised as frequently as the patient's condition warrants due to a major decline or improvement in patient's health status in 1 of 2 active clinical records with home visits and wounds (Patients #2).</p> <p>Findings include:</p> <p>The clinical record of Patient #2 revealed an initial comprehensive assessment, dated 10/11/2024, authored by RN 2, included the primary diagnosis Stage 2 pressure ulcer (partial thickness open wound) wound of the right buttock, and a secondary diagnosis of Stage 2 pressure ulcer of the left buttock. The comprehensive assessment included documentation that a stage 2 left buttock pressure ulcer measured 3.4cm long x 3.5cm wide X .2 cm in depth and the stage 2 right buttock pressure ulcer measured 3 cm long x 4.5 cm wide x .2 cm deep.</p> <p>Documentation included 1) a skin tear to the left forearm measuring 7 cm long x 2 cm wide X .2 cm deep and 2) a skin tear to the left lower leg measuring 6.5 cm long X 3.8 cm wide X .2 cm deep.</p> <p>Documentation from skilled nurse visit notes dated 11/04/2024, 11/08/2024,</p>		<p>accurate wound measurements.</p> <p>2. How the deficiency will be prevented from recurring i.e. measure put into place or systematic changes made to ensure the deficiency will not recur.</p> <p>The agency will conduct a mandatory Inservice training on 1/2/25 for all clinical staff focusing on the need to perform comprehensive assessments as frequently as the patient's condition warrants due to a major decline or improvement in patients health status to include when to perform initial wound measurements. All clinical staff were reeducated on reporting any declines or improvements in patients' health status to the Clinical Manager in real time so that a updated comprehensive assessment can be completed at this time including physician notification.</p> <p>3. Who is responsible to ensure the deficiency will be/has been corrected and compliance maintained at 100%.</p> <p>Clinical manager or designee</p>	
--	--	---	--

<p>11/11/2024, 11/14/2024, and 11/19/2024 measure the right buttock wound as 0 cm X 0 cm X 0 cm, indicating a healed wound. The clinical record failed to evidence a comprehensive reassessment to reflect the change in Patient's condition. On 12/04/2024, SN visit note documentation revealed a newly opened wound, a stage 2 right buttock ulcer, that was treated, and a new skin tear was documented to the right lower leg skin tear that was treated. The RN failed to evidence measurements of the new wounds to the right buttock and right lower leg. The clinical record failed to evidence a comprehensive reassessment to reflect the new wounds to right buttock and right lower leg.</p> <p>During an interview on 12/05/2024 beginning at 3:30 PM, Clinical Manager relayed comprehensive assessment includes Outcome and Assessment information set (OASIS) information and the agency does not revise the comprehensive assessment except for every 60 days.</p> <p>During an interview on</p>				
--	--	--	--	--

	<p>PM, RN 2 relayed the right lower leg skin tear was new and the reopening of the right buttock was new at the 12/04/2024 visit. RN revealed the two new wounds were not measured and should have been.</p> <p>410 IAC 17-14-1(a)(1)(B)</p>			
G0572	<p>Plan of care</p> <p>484.60(a)(1)</p> <p>Each patient must receive the home health services that are written in an individualized plan of care that identifies patient-specific measurable outcomes and goals, and which is established, periodically reviewed, and signed by a doctor of medicine, osteopathy, or podiatry acting within the scope of his or her state license, certification, or registration. If a physician or allowed practitioner refers a patient under a plan of care that cannot be completed until after an evaluation visit, the physician or allowed practitioner is consulted to approve additions or modifications to the original plan.</p>	G0572	<p>1. How the deficiency will be or has been immediately corrected.</p> <p>As it relates to cited observation relating to Patient #6, the agency is committed to completing and updated comprehensive assessment to include measurable pain goals and interventions. This assessment will be completed upon patient #6 return to caseload and will be reviewed and approved by Clinical manager. Ongoing education including proper OASIS documentation, focusing on accuracy, completeness, and the importance of the assessment in care planning with emphasis on pain assessment with measurable goals relating to pain management will be provided to all clinical staff</p>	2025-01-02

	<p>Based on record review and interview, the agency failed to ensure each patient received the home health services that are written in an individualized plan of care that identifies patient-specific measurable outcomes and goals for 1 of 1 active records reviewed for a recertified patient. (Patient 6)</p> <p>The Findings Include:</p> <p>The clinical record for Patient 6 included a recertification comprehensive assessment dated 11/29/24 which identified pain that interfered with activity. The plan of care for the recertification 12/03/2024 – 01/31/2024 failed to include interventions or measurable goals related to pain.</p> <p>During an interview on 12/6/24 beginning at 11:50 AM, the CS indicated the POC was not complete, there were no goals or interventions for pain.</p>		<p>noless than quarterly as of 01/02/2025.</p> <p>The Quality Assurance team will review 100% of all submitted OASIS documentation for accuracy and completeness. If an OASIS assessment appears incomplete or inconsistent with other available assessment data, the QA team will confer with the assessing clinician and request revisions as appropriate. This 100% auditing will be ongoing. If the quality assurance review team identifies trends in a specific clinician's assessment documentation, the quality assurance review team will provide additional one-on-one education to that clinician.</p> <p>2. How the deficiency will be prevented from recurring i.e. measure put into place or systematic changes made to ensure the deficiency will not recur.</p> <p>Ongoing education including proper OASIS documentation, focusing on accuracy, completeness, and the importance of the assessment in care planning with emphasis</p>	
--	--	--	--	--

			<p>development of measurable goals will be provided to all clinical staff no less than quarterly as of 01/02/2025.</p> <p>As part of our QAPI program the quality assurance team will review 100% of all submitted OASIS documentation and associated plan of cares for patient-specific, measurable outcomes and goals that address the patient's need for skilled services, disease processes and symptoms. If the quality assurance team identifies a plan of care that includes broad or generic goals and/or fails to address patient-specific disease processes and/or symptoms, the QA team will confer with the assessing clinician and request revisions and/or collaboration with the MD as appropriate. This 100% auditing will be ongoing. If the quality assurance review team identifies trends in a specific clinician's established goals and outcomes, the quality assurance review team will provide additional one-on-one education to that clinician.</p>

			<p>3. Who is responsible to ensure the deficiency will be/has been corrected and compliance maintained at 100%.</p> <p>Clinical Manager or designee</p>	
G0574	<p>Plan of care must include the following</p> <p>484.60(a)(2)(i-xvi)</p> <p>The individualized plan of care must include the following:</p> <ul style="list-style-type: none"> (i) All pertinent diagnoses; (ii) The patient's mental, psychosocial, and cognitive status; (iii) The types of services, supplies, and equipment required; (iv) The frequency and duration of visits to be made; (v) Prognosis; (vi) Rehabilitation potential; (vii) Functional limitations; (viii) Activities permitted; (ix) Nutritional requirements; (x) All medications and treatments; (xi) Safety measures to protect against injury; (xii) A description of the patient's risk for emergency department visits and hospital re-admission, and all necessary interventions to address the underlying risk factors. (xiii) Patient and caregiver education and training to facilitate timely discharge; (xiv) Patient-specific interventions and 	G0574	<p>1. How the deficiency will be or has been immediately corrected.</p> <p>As it relates to patient #1, The agency has amended the Plan of Care to reflect Patient #1's residence at Entity F. Patient #1's physician has also been notified in this process.</p> <p>As it relates to patient #2, the Occupational Therapy Plan of Care has been incorporated into the patient's medical Plan of Care. Patient # 2's Plan of Care has also been updated to include bleeding precautions as a safety need. Home Health Aide services were discontinued per family request on 10/22/24 and is reflected as such in current POC. Patients #1's physician has also been notified of each if these occurrences.</p> <p>As it relates to patient #3, the patients POC was updated to include additional diagnosis and</p>	2025-01-02

	<p>education; measurable outcomes and goals identified by the HHA and the patient;</p> <p>(xv) Information related to any advanced directives; and</p> <p>(xvi) Any additional items the HHA or physician or allowed practitioner may choose to include.</p> <p>Based on record review and interview the agency failed to ensure the individualized plan of care included the types of services, supplies, equipment required, nutritional requirements, medications and treatments, and or safety measures to protect against injury for 6 of 7 active records reviewed. (Patient 1, 2, 3, 4, 5, and 7)</p> <p>The Findings Include:</p> <p>5. The record reviewed on 12/5/24 for Patient 7 included a comprehensive assessment dated 11/12/24 indicated the patient was on hemodialysis three times per week. The plan of care failed to evidence safety measures for fistula care nor dietary restrictions for a dialysis patient.</p> <p>During an interview on 12/5/24 beginning at 1:30 PM, staff nurse at Other Entity G indicated Patient 7 had a 36-ounce daily fluid restriction and received hemodialysis every</p>		<p>need for admission to home health services as reflected in the survey citation. Patient #3's physician has also been notified of these updates to Plan of Care.</p> <p>As it related to patient #4, The patient's POC was updated to include the use and frequency as INR test meter as part of the patient's DME. Additionally, the patient's POC was updated to include information regarding the ancillary caregiver's role, services provided and the company providing the caregiver services. Finally, the POC has been updated to include the urostomy supplies (under DME) and treatment orders. Patient #3's physician has also been notified in these updates to Plan of Care.</p> <p>As it related to patient #5, Rivaroxaban, a generic alternative to Xarelto is currently reflected on the patient's POC and Medication list. An order correction updating bleeding precautions has been added under safety. Patient #5's physician has also been notified of these updates to Plan of Care.</p>	
--	--	--	---	--

	<p>Tuesday, Thursday and Saturday.</p> <p>During an interview on 12/6/24 beginning at 11:15 AM, the Clinical Supervisor indicated they would expect the plan of care to include safety measures for fistula care and any dietary restrictions. The Clinical Supervisor indicated they were not included on the plan of care for Patient 7.</p> <p>The clinical record of Patient #1 revealed an initial POC dated 11/23/2024 to 01/21/2025. The POC, signed by RN #1, included the ordered services for SN, PT, and OT; the POC did not include Entity F, the assisted living facility [ALF] where Patient #1 resides, nor did it specify the services provided by Entity F for Patient.</p> <p>During an interview on 12/04/2024 at 12:15 PM, the Clinical Manager stated that Patient #1 resided in Entity F, an ALF. She revealed that the initial POC for Patient #1 had not yet been reviewed and that she did not know if Entity F or the services they provided were listed in the POC.</p> <p>On 12/05/2024 at 3:30 PM, RN</p>		<p>As it relates to Patient #7, safety measures relating to fistula care and Dietary restrictions (fluid restrictions) have been updated on POC. Patient #3's physician has also been notified of these updates to Plan of Care.</p> <p>2. How the deficiency will be prevented from recurring i.e. measure put into place or systematic changes made to ensure the deficiency will not recur.</p> <p>The agency will conduct a mandatory in-service training on January 2nd, 2025 for all clinical staff on creating an individualized plan of care that captures all of the following: services, supplies, equipment required, nutritional requirements, medications and treatments, and safety measures to protect against injury.</p>	
--	--	--	---	--

	<p>1 confirmed that Patient #1 required assistance with activities of daily living and received health services from Entity F.</p> <p>2. A review of Patient #2's clinical record revealed an initial POC dated 10/11/2024 to 12/9/2024. The POC included orders for the following services: SN once a week for one week, twice a week for four weeks, and once a week for one week, PT twice a week for four weeks, then once a week for four weeks, and OT with a frequency of "evaluate and treat." The medical POC did not specify OT frequency or individualized OT goals.</p> <p>An OT evaluation was completed on 10/18/24, and a separate OT POC dated 10/11/2024 to 12/9/2024 listed OT visit frequency as once a week for one week, then twice a week for six weeks starting on 10/18/24. The OT POC included Patient #2's OT goals.</p> <p>The POC also included a medication list that with Plavix (a blood thinner) for daily use; the POC failed to specify bleeding precautions as a safety</p>		<p>Additionally, specific education will be provided regarding including the following into all patients' plan of cares: safety measures such as bleeding precautions for patients on blood thinners; listing all DME such as INR machines, ostomy supplies; documentation of the caregiver's role, availability and willingness; all skilled services to be performed.</p> <p>Agency administrator and Clinical manager met with the quality assurance reviewer on 12/23/24 to discuss the survey findings and need for thorough review of all submitted plan of cares to ensure that the plan of cares are individualized to the patient and capture all of the required elements.</p>	
--	--	--	--	--

	<p>need.</p> <p>An order for home health aide (HHA) services, signed by RN 2 on 10/11/24, ordered HHA twice a week for seven weeks starting the week of 10/20/2024; the medical POC failed to include HHA services or frequency.</p> <p>During an interview on 12/4/2024 at 12:25 PM, the Clinical Manager stated that Patient #2's POC did not include OT frequency, care, or goals, noting that OT had a separate POC. She also confirmed that bleeding precautions were not included as a safety measure on Patient #2's POC but should have been.</p> <p>3. A review of Patient #3's clinical record revealed an initial POC dated 11/22/24 to 1/20/25. The POC included ordered services for skilled nursing (SN) once a week for two weeks, twice a week for two weeks, and once a week for five weeks. The POC identified the principal diagnosis as hypertension. However, a referral for home health services dated 11/19/24 and signed by the patient's primary care physician listed</p>		<p>Ongoing education including creating an individualized plan of care that captures all of the following: services, supplies, equipment required, nutritional requirements, medications and treatments, and safety measures to protect against injury will be provided to all clinical staff no less than quarterly as of 01/02/2025.</p> <p>The quality assurance team will review 100% of all submitted plan of cares for accuracy and completeness. In the event a plan of care fails to encompass all of the required elements or is not individualized to the patient, the QA team will confer with the assessing clinician and request revisions as appropriate.</p> <p>If the quality assurance review team identifies negative trends in a specific clinician's plan of care development, the quality assurance review team will provide additional one-on-one education to that clinician.</p> <p>The agency is also committed to incorporating the accuracy of care planning into the Agency</p>

	<p>patient's home.</p> <p>A review of Patient #4's clinical record revealed a POC dated 11/12/2024 to 1/10/2025. The POC listed Warfarin (a blood thinner) under the patient's medication list. However, the POC did not document the use of an INR test meter as part of the patient's durable medical equipment (DME) nor the frequency of INR testing. The POC also failed to include documentation of the caregiver's role, the services provided by the caregiver, or the company providing the caregiver services. Additionally, the POC did not include documentation of urostomy supplies under DME or supplies, nor did it contain treatment orders for urostomy care or stoma care.</p> <p>During an interview with Patient #4 on 12/4/2024 at 4:00 PM, the patient stated that RN #5 provided urostomy care, including changing the urostomy bag once a week. The patient also revealed that the INR test meter was used to conduct a blood test using a finger stick once a week and stated they were trained and</p>

	<p>visit notes, evaluations and assessments, physician orders, and communications were expected within 48 hours of visit date and times.</p> <p># The clinical record for Patient #1 included an initial POC dated 11/23/2024 to 01/21/2025 with ordered services as SN once a week for one week then three times a week for eight weeks, PT twice a week for 8 weeks, and OT once a week for eight weeks. On 12/03/24, the SN visit note for the 11/30/24 visit was undocumented. On 12/06/2024, the SN visit note for 12/02/2024 was not completed.</p> <p>During an interview on 12/04/2024 beginning at 12:15 PM, Administrator relayed the 11/30/2024 there was no SN visit made, the visit was missed, and the skilled nurse visit on 12/03/2024 was completed, yet not documented.</p> <p># # The clinical record of Patient #2 revealed an initial comprehensive assessment completed on 10/11/2024 by RN 2 that included the primary diagnosis indicated stage 2 pressure ulcer (partial thickness open wound where skin wears</p>		<p>2. How the deficiency will be prevented from recurring i.e. measure put into place or systematic changes made to ensure the deficiency will not recur.</p> <p>Agency Administrator and Clinical Manager met with the quality assurance reviewer on 12/23/24 to discuss the survey findings and need for monitoring of all visit notes that are not documented in a timely fashion as well as thorough review of all notes for completeness and accuracy. As an improvement to our current practice, the Clinical manager will run a weekly report of any visits that are not yet documented and are 2 business days or older. The clinical manager will contact each clinician who has outstanding notes and request that the notes be submitted within 24 hours. The Clinical Manager will continue following up with the assessing clinician daily until these notes are resolved.</p> <p>The agency will conduct mandatory in-service training for all clinical staff on</p>

	<p>away) wound of the right buttock, and a secondary diagnosis included stage 2 pressure ulcer of the left buttock. The wound care documentation of the comprehensive assessment included a stage 2 left buttock pressure ulcer that measured 3.4cm long X 3.5cm wide X .2 cm in depth, a stage 2 right buttock pressure ulcer that measured 3 cm long X 4.5 cm wide X .2 cm deep, a skin tear to the left forearm measuring 7 cm long X 2 cm wide X .2 cm deep, and a skin tear to the left lower leg measuring 6.5 cm long X 3.8 cm wide X .2 cm deep. Right buttock wound was measured at 0 cm X 0 cm X 0 cm for SN visits on 11/4/24, 11/08/2024, 11/11/2024, 11/14/2024, and 11/19/2024. On 12/04/2024, SN visit note documentation revealed a stage 2 right buttock ulcer that was treated and not measured, only noted as pea sized. A new skin tear was documented to the right lower leg skin tear that was treated and not measured. The clinical record failed to evidence measurements of newly opened right buttock pressure ulcer nor the new right lower leg skin tear.</p>		<p>and timely documentation of clinical notes. During this training, agency policy entitled "Documentation of Patient Services" will be reviewed with all clinical staff. Additionally, agency clinicians will be educated on the importance of comprehensive documentation as it relates to new or worsening symptoms (i.e. new wounds) and that if their assessment reveals as such, the assessing clinician must contact the agency supervisor and the patient's MD. Initial in-service date is scheduled for January 2nd, 2025</p> <p>Ongoing education regarding appropriate, comprehensive and timely documentation of clinical notes will be provided to all clinical staff no less than quarterly as of 01/02/2025 as well as during all onboarding procedures.</p> <p>The quality assurance review team will review 100% of all submitted visit notes for timeliness, comprehensiveness and accuracy. If the quality assurance team notes a change to the patient's condition during review, the clinical manager will be notified, and the note will be returned to the clinician requesting</p>

The clinical record of Patient #2 revealed a skilled nurse note dated 12/04/2024 with documentation of two new wounds, a pea sized opening noted in a previously healed right buttock area on 11/05/2024, and a new skin tear was noted to the right lower extremity. The right buttock and right lower leg wounds were treated but the record failed to evidence wound measurements.

During an interview on 12/03/2024 beginning at 2:30 PM, Clinical Manager relayed there was not wound care policy, the clinicians were instructed to measure wounds weekly.

During an interview on 12/05/2024 beginning at 12:38 PM, Registered nurse (RN) 2 relayed the right lower leg skin tear was new and the reopening of the right buttock was new at the 12/04/2024 visit. RN revealed the two new wounds were not measured and should have.

standards of practice as it relates to the identification, assessment and measurement of all new and unresolved wounds. Initial/Inservice date is scheduled for **1/2/25**.

Ongoing education including current clinical practice guidelines and standards of practice will be provided to all clinical staff no less than quarterly as of 1/2/25.

Clinical manager or designee will review 100 % of all clinical notes for any new wound assessments and documentations to ensure inclusion of wound measurements. If the Clinical manager or designee identifies trends in a specific clinical wound assessment the clinical manager will provide additional one on one education to that clinician. Findings from 100% clinical review will be reported to QAPI team for further consideration and need for additional audit activities and correction action.

3. Who is responsible to ensure the deficiency will be/has been

corrected and compliance
maintained at 100%.

Clinical Manager or designee

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See reverse for further instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
