This visit was for a Federal Recertification and State Re-Licensure survey of a Home Health Provider.  Survey Dates: March 5, 6, 10, 12, 13, 14, and 17, 2025  12-Month Unduplicated Skilled Admissions: 1158  The survey was partially extended on 03/12/2025 at 9:40 AM.  The survey was extended on 03/13/2025 at 4:20 PM.  During this Federal Recertification Survey, Angels of Mercy Homecare was found to be out of compliance with Condition of Participation 484.60 Care planning, coordination of services, and quality of care.  Based on the Condition-level deficiencies during the 03/17/2025 survey, your HHA was subject to an extended survey pursuant to section 1891(c)(2)(D) of the Social Security Act on 03/13/2025. Therefore, and pursuant to section 1891(a)(3)(D)(iii) of the Act, your agency is precluded from operating a home health

	<p>therapy services during the admission visit.</p> <p>A POC for the initial certification period of 2/17/25 – 4/17/25 included orders for an OT evaluation, effective 3/02/25. The record failed to evidence Patient was notified and in agreement with the delayed OT evaluation.</p> <p>The record included an order, dated 2/19/25, for SN evaluation to be completed the week of 2/23/25 – 3/01/25. The record failed to evidence Patient was notified and in agreement with the delayed SN evaluation.</p> <p>A SN evaluation was documented on 2/26/25 by RN 4, which was nine days after Patient had requested services and seven days after an order was obtained.</p> <p>During an interview on 3/13/25 beginning at 2:51 PM, RN 4 reported she was unsure the reason Patient's nursing evaluation was completed nine days after SOC.</p> <p>An OT evaluation was documented on 3/04/25 by OT</p>		<p>Start of Care (SOC), Resumption of Care (ROC), or order referencing Policy # 2.1.002 Patient Assessment, Initial and Reassessment.</p> <p>For any staff unable to attend the mandatory training, 1:1 remediation will be provided by the ED or Clinical Director (CD) prior to resuming patient care.</p> <p>New process that will be implemented to prevent deficiency from re-occurring:</p> <p>Physical Therapist, Speech Therapist, Occupational Therapist, Medical Social Worker, and Dietitian may make initial evaluations of the patient status to determine the need for specific therapies. This initial discipline specific evaluation(s) will occur within 5 days from the Start of care (SOC) date or order date or sooner if medically necessary.</p>	
--	---	--	--	--

	<p>Patient had requested services and the POC was initiated.</p> <p>During an interview on 3/13/25 beginning at 1:20 PM, OT 1 reported an OT evaluation was to be completed within 24-48 hours of being ordered. OT 1 was unsure the reason Patient's OT evaluation was conducted 15 days after SOC, but reported she was the only OT assigned to the branch, and had limited availability.</p> <p>During an interview on 3/17/25 beginning at 10:42 AM, Patient Care Manager 3 reported the agency had 5 – 7 days to conduct evaluation visits after the SOC. The nurse reported after Patient requested SN and occupational therapies at SOC, Patient Care Manager 3 had written the order for SN to start the following week, since the order was obtained on a Wednesday. Patient Care Manager 3 reported the OT evaluation was ordered for the week of 3/02/25 due to staffing availability. The nurse reported the delay in evaluations should have been discussed with Patient during the SOC visit.</p> <p>During an interview on 3/17/25</p>		<p>A "Do Not Move" Buddy Code will be added to the schedule along with the scheduled evaluation visit to alert the clinician that this visit cannot be moved to another date.</p> <p>In event the patient requests to delay the initial therapy evaluation, the request will be documented in the medical record and the physician will be notified.</p> <p>Scheduler will run the Home Care Home Base (HCHB) Scheduling Report daily to ensure all ordered visits have been scheduled.</p> <p>Business Manager (BM) verifying daily.</p> <p>Title of person responsible for implementing plan of correction:</p> <p>Executive Director</p> <p>Monitoring procedures to ensure effectiveness of process</p>	
--	---	--	---	--

	<p>beginning at 12:15 PM, PT 2 reported during the SOC visit, he did not discuss the timeframe Patient's SN and occupational therapy services were to begin, as he was unsure when orders would be obtained and when the staff would be available.</p> <p>3. The review of Patient #5's clinical record indicated Patient was referred to the agency for physical therapy and occupational therapy services. Patient's SOC date was 2/10/25.</p> <p>A POC for the initial certification period of 2/10/25 – 4/10/25 included orders for an OT evaluation, effective 2/16/25. The record failed to evidence Patient was notified and in agreement with the delayed OT evaluation.</p> <p>An OT evaluation was documented on 2/17/25 by OT 3, which was seven days after the SOC.</p> <p>During an interview on 3/14/25 beginning at 2:15 PM, Patient Care Manager 5 reported a therapy evaluation was to be completed within five days of the SOC. The nurse reported Patient's record failed to</p>		<p>compliance:</p> <p>Beginning 4/17/25, the ED, Clinical Director (CD), and/or Patient Care manager (PCM) will review 100% of SOC and ROC to ensure initial therapy evaluations are completed within 5 days of SOC, ROC, or physician order.</p> <p>Monitoring will continue for 3 consecutive weeks and until 100% compliant for 2 consecutive weeks.</p> <p>Once compliance is achieved, the ED, CD, and/or PCM will review 50% of SOC and ROC to ensure initial therapy evaluations are completed within 5 days of SOC, ROC, or physician order.</p> <p>Monitoring will continue for 8 consecutive weeks and until 100% compliant for 4 consecutive weeks.</p>	
--	---	--	--	--

	<p>evidence the reason Patient's OT evaluation was delayed.</p> <p>4. The review of Patient #9's clinical record indicated Patient was referred to the agency for skilled nursing, physical therapy, and home health aide services. Patient's SOC date was 1/31/25.</p> <p>A POC for the initial certification period of 1/31/25 – 3/31/25 indicated a PT evaluation was to be completed, effective 2/02/25 and an OT evaluation was to be completed, effective 02/09/25. The record failed to evidence Patient was notified and in agreement with the delayed PT and OT evaluations.</p> <p>A PT evaluation was documented on 2/07/25 by PT 2, which was seven days after Patient's SOC.</p> <p>The record included orders to reschedule Patient's OT evaluation on 2/11/25 and 3/04/25 by Patient Care Manager 3. The record failed to evidence the reason for the rescheduled visits and failed to evidence Patient was aware and in agreement with the rescheduled visits.</p> <p>The review of the record on</p>		<p>The ED will report monitoring results to the QualityAssessment Performance Improvement (QAPI) Team quarterly until goals areachieved.</p>	
--	---	--	--	--

	<p>3/12/25 failed to evidence an OT evaluation had been completed.</p> <p>During an interview on 3/13/25 beginning at 12:56 PM, Patient reported he/she had needed assistance with ADLs after being discharged from the hospital, but he/she did not have any assistance, so Patient "learned to do it myself." Patient reported they had an OT evaluation that morning, which was the first time he/she had heard from the agency regarding the OT evaluation.</p> <p>During an interview on 3/17/25 beginning at 8:32 AM, COTA 2 reported she had provided home health aide services to Patient. The OT assistant reported Patient did have a need for OT services, as Patient had decreased range of motion and needed assistance with ADLs. COTA 2 stated she thought OT 1 was going to conduct an OT evaluation visit, but was unsure of the reason the evaluation had not been done.</p> <p>During an interview on 3/13/25 beginning at 1:20 PM, OT 1 reported she had not been</p>			
--	---	--	--	--

	<p>assigned an OT evaluation for Patient.</p> <p>During an interview on 3/13/25 beginning at 3:32 PM, Alternate Clinical Manager reported during Patient's SOC visit, the nurse had explained the agency only had one OT working limited hours, so the OT service start could be delayed. The nurse was unable to provide documentation of patient notification and agreement for the delay in OT services.</p> <p>During an interview on 3/17/25 beginning at 10:51 AM, Alternate CM reported the agency had conducted the PT evaluation seven days after the SOC due to Patient request. Alternate CM was unable to provide documentation of this request.</p> <p>During an interview on 3/13/25 beginning at 3:56 PM, Patient Care Manager 3 reported Patient had requested to reschedule the OT evaluation on 2/11/25 and 3/04/25. Patient Care Manager 3 was unable to provide documentation of these requests.</p> <p>5. The review of Patient #12's clinical record indicated Patient</p>

	<p>Clinical Manager reported the agency had to reschedule Patient's OT re-evaluation for the weeks beginning 2/10/25 and 3/06/25 due to staff availability. Alternate Clinical Manager reported she did not document her communication with Patient regarding the schedule changes.</p> <p>During an interview on 3/13/25 beginning at 3:46 PM, Patient Care Manager 3 reported the agency had to reschedule Patient's OT re-evaluation for the week beginning 2/06/25 due to staff availability. Patient Care Manager reported she did not document her communication with Patient regarding the schedule changes.</p> <p>3. The review of Patient #9's clinical record indicated Patient was referred to the agency on 1/23/25 for SN, HHA, and physical therapy services. Patient's primary diagnosis was fracture of the left forearm. Referral documents included an inpatient OT evaluation, which evidenced Patient had deficits with ADLs and IADLs, including "bathing/showering, Toileting/hygiene, Dressing,</p>		<p>notified and orders obtained and visits scheduled to immediately initiate the service (s).</p> <p>For instances of non-compliance, the ED will provide 1:1 remediation up to and including disciplinary action.</p> <p>In addition to the above, refer to G574, G580, and G590.</p>	
--	---	--	--	--

	<p>Functional mobility ... Home establishment/management, Meal prep/clean up." Patient's SOC was 1/31/25, and the POC for the initial certification period of 1/31/25 – 3/31/25 indicated an OT evaluation was to be completed, effective 02/09/25.</p> <p>The record included orders to reschedule Patient's OT evaluation on 2/11/25 and 3/04/25 by Patient Care Manager 3. The record failed to evidence the reason for the rescheduled visits and failed to evidence Patient was aware and in agreement with the rescheduled visits.</p> <p>The review of the record on 3/12/25 failed to evidence an OT evaluation had been completed.</p> <p>During an interview on 3/13/25 beginning at 12:56 PM, Patient reported he/she had needed assistance with ADLs after being discharged from the hospital, but he/she did not have any assistance available, so Patient "learned to do it myself." Patient reported they had an OT evaluation the morning of 3/13/25, which was the first time he/she had heard from the</p>			
--	--	--	--	--

	<p>agency regarding the OT evaluation.</p> <p>During an interview on 3/17/25 beginning at 8:32 AM, COTA 2 reported she had provided home health aide services to Patient. The OT assistant reported Patient did have a need for OT services, as Patient had decreased range of motion and needed assistance with ADLs. COTA 2 stated she thought OT 1 was going to conduct an OT evaluation visit, but was unsure of the reason the evaluation had not been done. During an interview on 3/13/25 beginning at 1:20 PM, OT 1 reported she had not been assigned an OT evaluation for Patient.</p> <p>During an interview on 3/13/25 beginning at 3:32 PM, Alternate Clinical Manager reported during Patient's SOC visit, the nurse had explained the agency only had one OT working with limited availability, so the OT service start could be delayed. The nurse was unable to provide documentation of patient notification and agreement with the delay in OT services.</p>			
--	---	--	--	--

	<p>During an interview on 3/13/25 beginning at 3:56 PM, Patient Care Manager 3 reported Patient had requested to reschedule the OT evaluation on 2/11/25 and 3/04/25. Patient Care Manager 3 was unable to provide documentation of these requests.</p> <p>5. The review of Patient #13's clinical record indicated a SOC date of 8/27/24 and included an order for physical therapy services, effective 11/03/24, with visits once a week for 8 weeks. A PT re-evaluation note, documented 12/06/25 by PT 2, indicated Patient was to continue PT services to improve "strength and mobility ... balance and safety."</p> <p>A PT visit note, documented 12/12/24 by PTA 4, indicated Patient would "continue to benefit from physical therapy to focus on balance activities, endurance training, transfer gait training." The record failed to evidence further PT visits were provided nor was a PT re-evaluation completed.</p> <p>The record included a POC for the recertification period of 12/25/24 – 2/22/25, which</p>			
--	---	--	--	--

	<p>indicated the only ordered service was skilled nursing.</p> <p>During an interview on 3/17/25 beginning at 12:18 PM, PT 2 reported he would "always" do a re-evaluation visit after a new certification period to determine if a patient's PT services should continue or if the patient could be discharged. The therapist could not recall the reason Patient's PT services did not continue nor the reason a PT re-evaluation was not done after Patient's recertification.</p> <p>410 IAC 17-13-1(a)</p> <p>4. Review of Patient #11's clinical record indicated Patient was referred to the agency on 01/06/24 for SN, PT, and OT due to "weakness, balance, and gait training." Patient #11 had a discharge date of 01/21/25 from a skilled nursing facility and a SOC date of 01/22/2025 with the home health agency. Patient #11 was noted to have left shoulder during the initial PT assessment on 01/24/25 with dressing upper extremities, reaching for items above Patient's head, and ADLs being activities with which the pain interfered.</p>			
--	--	--	--	--

	<p>The record included a verbal order entered by OT 3 on 01/23/2025 which included orders to move the OT evaluation to the following week (01/26/2025 to 02/01/2025) due to Patient #11's request. The record included an OT note for the initial OT evaluation conducted on 02/04/2025. The agency failed to conduct an OT evaluation during the period requested by the patient and ordered by the provider.</p> <p>The agency's complaint log included a Complaint Report documented by the Administrator on 02/06/2025. The report indicated Person 1 called the agency on 01/30/2025 and requested an update on when Patient #11's OT evaluation would be conducted. Person 1 reported they were "disappointed" with the delay in the OT evaluation. The log indicated Person 1 called the agency again on 02/03/2025 to follow-up on the complaint "solutions."</p> <p>During an interview on 03/17/2025, OT 3 indicated she normally assesses patients</p>			
--	---	--	--	--

<p>the patient requests the assessment be moved, she will honor the patient's request. OT 3 further indicated she was the only OT for both the parent and branch locations of the agency at the time of Patient #11's SOC. OT 3 also indicated she had been on leave from work for a week at the end of January due to illness.</p> <p>During an interview on 03/17/2025 at 1:47 PM, RN 3 indicated she was Patient #11's RN case manager and indicated therapy evaluations should be conducted within 24 hours of an RN SOC. RN 3 also indicated the only reason she could think of for Patient #11 having a SOC of 01/22/2025 and receiving the initial OT evaluation on 02/04/2025 was the availability of OT 3.</p> <p>During an interview on 03/17/2025 at 1:28 PM, Person 1, caregiver for Patient #11, indicated Patient was home for 11 days with no shower because the OT evaluator was on leave. Person 1 indicated someone came out to assist Patient #11 with showers after they called regarding the delay. Person 1</p>				
---	--	--	--	--

	not communicate with them about the OT evaluation delay until they called to ask about it.

			and including disciplinary action.	
G0682	<p>Infection Prevention</p> <p>484.70(a)</p> <p>Standard: Infection Prevention.</p> <p>The HHA must follow accepted standards of practice, including the use of standard precautions, to prevent the transmission of infections and communicable diseases.</p> <p>Based on observation, policy review, and interview, the home health agency failed to ensure all staff followed standard precautions and infection control policies and procedures for 6 of 7 home visit observations (Patient #1, 2, 3, 4, 5, 6).</p> <p>Findings include:</p>	G0682	<p>Immediate action implemented to correct specific deficiency:</p> <p>Executive Director (ED) instructed and completed skills lab with LPN 1 with emphasis on Peripherally Inserted Central Catheter (PICC) site care and cap cleansing.</p> <p>During a mandatory team meeting held on 4/2/25 and 4/3/25, the Executive Director (ED) instructed all staff on Peripherally Inserted Central Catheter (PICC) dressing changes and flushing with emphasis on glove changes, proper cleansing of site and cap referencing Policy # 10.027 Dressing Change Procedure for Central Venous, Midline, and Peripherally Inserted Central Catheters and Venous Catheter: Flushing and Locking (Home Health Care) - CE/NCPD Clinical Skill.</p>	2025-04-16

<p>1. The agency policy "Hand Hygiene," last revised 5/01/19, indicated staff were to perform hand hygiene "after contact with ... non-intact skin, wound dressings ... if moving from a contaminated body site to a clean body site during patient care, after contact with inanimate objects ... in the immediate vicinity of the patient, before and after removal of personal protective equipment (PPE) ...."</p> <p>2. The agency policy "Dressing Change Procedure for Central Venous, Midline, and Peripherally Inserted Central Catheter [PICC]," last revised 10/01/16, indicated during a PICC line dressing change, staff should don clean gloves, remove the old PICC dressing, remove gloves and perform hand hygiene, then don sterile gloves. After inspecting the catheter site, staff should cleanse the site with chlorohexidine in "a back and forth motion." When povidone-iodine is used, staff should apply the disinfectant in "a circular motion, moving from the catheter insertion site outward in concentric circles."</p>		<p>During a mandatory team meeting held on 4/2/25 and 4/3/25, the Executive Director (ED) instructed all staff on infection control with emphasis on equipment cleaning, hand hygiene, and glove changes during wound care referencing Policy # 8.004 Hand Hygiene, Policy # 8.006 Cleaning of Re-Usable Equipment, and the Wound Care Best Practices Checklist.</p> <p>Following the in-service, a skills lab was completed for all staff completing PICC and wound care to complete competency assessment on infection control, PICC dressing changes, and wound care on 4/2/25 and 4/3/25.</p> <p>For any staff unable to attend the mandatory training, 1:1 remediation will be provided by the ED or Clinical Director (CD) prior to resuming patient care.</p> <p>Clinicians involved in the survey</p>	
--	--	---	--

	<p>3. An untitled agency procedure indicated when flushing a PICC line, staff should scrub the needless connector "using a vigorous mechanical scrubbing for a minimum of 5 seconds with an appropriate disinfecting agent" prior to attaching a flush syringe. Staff should repeat the procedure prior to connecting a heparin lock syringe.</p> <p>4. The agency policy "Cleaning of Re-Usable Equipment," last revised 6/01/22, indicated "non-critical items," such as stethoscopes, blood pressure cuffs, and pulse oximeters, would be cleaned with a disinfectant "after each patient use and before returning to staff bags."</p> <p>5. The manufacturer's instructions for CaviWipes, obtained from <a href="http://www.metrex.com">www.metrex.com</a>, indicated the dry time for the disinfectant wipes was 3 minutes.</p> <p>6. During a home visit observation with Patient #1 on 3/06/25 beginning at 9:04 AM, PTA 1 was observed obtaining Patient's vital signs and measuring Patient's ankles. PTA then failed to perform hand</p>		<p>findings received 1:1 reeducation and competency assessment on 4/2/25 and 4/3/25.</p> <p>New process that will be implemented to prevent deficiency from re-occurring:</p> <p>PICC dressing will be changed using the following procedure:</p> <ol style="list-style-type: none"> <li>1. Identify patient using 2 patient identifiers.</li> <li>2. Explain procedure to patient.</li> <li>3. Perform hand hygiene and don PPE (e.g., clean gloves and mask).</li> <li>4. Place moisture proof pad under patient's arm.</li> <li>5. To remove the old dressing, lift edge of dressing beginning at catheter hub and gently pull dressing perpendicular to the skin toward the insertion site. Remove catheter securement device</li> </ol>	
--	---	--	--	--

	<p>hygiene prior to donning gloves.</p> <p>During an interview on 3/06/25 beginning at 9:52 AM, PTA 1 reported she should perform hand hygiene after contact with a patient and prior to donning gloves.</p> <p>7. During a home visit observation with Patient #2 on 3/06/25 beginning at 10:49 AM, LPN 1 was observed performing a PICC line dressing change. After removing the old dressing, the nurse failed to change her gloves, perform hand hygiene, and don new sterile gloves prior to cleaning the PICC. When cleansing the site, LPN 1 failed to apply the disinfectant to the PICC insertion point. After completing the PICC dressing change, LPN 1 scrubbed the needless connector with an alcohol swab for 2 seconds prior to connecting the initial line flush and prior to connecting the heparin lock flush.</p> <p>During an interview on 3/06/25 beginning at 11:43 AM, LPN 1 reported during a PICC line dressing change, she should change her gloves and perform</p>		<p>and chlorhexidine-impregnated sponge (if present).</p> <p>6. Discard dressing in appropriate receptacle.</p> <p>7. Remove gloves, perform hand hygiene, and don sterile gloves.</p> <p>8. Inspect catheter, catheter exit site, and surrounding skin and patient's arm, chest, and neck area.</p> <p>9. Cleanse the site with chlorhexidine (preferred) in a back-and-forth motion for at least 30 seconds. If povidone-iodine is used, use swabs to apply in a circular motion, moving from the catheter insertion site outward in concentric circles.</p> <p>10. Allow solution to air dry completely (approximately 30 seconds for chlorhexidine; at least 2 minutes or longer for povidone-iodine).</p> <p>11. Consider application of a chlorhexidine-impregnated sponge to the site, particularly if all other institutional efforts to decrease rates of BSI have failed to</p>	
--	---	--	---	--

<p>hand hygiene between removing the old dressing and cleaning the site. The nurse reported she cleaned Patient's PICC line with alcohol then betadine (a povidone iodine solution). LPN 1 stated she did not realize she had failed to clean the PICC insertion site with disinfectant. LPN 1 reported the needless connector should be scrubbed with alcohol for "30 seconds" prior to connecting a flush or lock syringe. When asked if the nurse had done this during the visit, LPN 1 reported she had sung the "happy birthday" song in her head as a method of counting, but had done it "quickly."</p> <p>8. During a home visit observation with Patient #3 on 3/06/25 beginning at 2:38 PM, PT 2 was observed wiping reusable equipment including a stethoscope, manual blood pressure cuff, thermometer, and pulse oximeter with CaviWipes disinfectant wipes. After wiping the equipment, PT 1 placed them immediately into his supply bag, failing to allow the disinfectant to dry.</p> <p>During an interview on 3/06/25</p>		<p>produce the desired reduction.</p> <p>12. Secure the catheter in place. The use of asutureless stabilization device is preferred to tape and sutures.</p> <p>13. Apply a sterile dressing to the site. Use either atransparent, semipermeable dressing alone, or a gauze dressing with tape. If the patient isdiaphoretic or if the site is bleeding or oozing, a gauze dressing is preferred.</p> <p>14. Document the date and time the dressing was applied, and initials on the external dressing.</p> <p>15. Discard used supplies, remove gloves and PPE, and perform hand hygiene.</p> <p>16. Document the procedure in the patient's record.</p> <p>Prior to flushing a PICC line, disinfect theconnection surface and sides of the needless connector using vigorousmechanical scrubbing</p>	
---	--	---	--

	<p>beginning at 3:20 PM, PT 2 reported the dry time for CaviWipes disinfectant wipes was "around 60 seconds."</p> <p>9. During a home visit observation with Patient #4 on 3/10/25 beginning at 9:03 AM, RN 1 was observed performing wound care to an open wound. After cleansing the wound, the nurse failed to change gloves and perform hand hygiene prior to applying a new, clean dressing.</p> <p>During an interview on 3/10/25 beginning at 9:56 AM, RN 1 reported during wound care, she should change her gloves and performed hand hygiene at the start of the procedure, after removing the old dressing, and after completing the procedure.</p> <p>10. During a home visit observation with Patient #5 on 3/10/25 beginning at 11:00 AM, OT 3 was observed conducting an OT re-evaluation visit. The therapist failed to perform hand hygiene after removing gloves on two occasions.</p> <p>During an interview on 3/10/25 beginning at 11:54 AM, OT 3 reported she should perform hand hygiene after removing</p>		<p>isopropyl alcohol oralcohol-based chlorhexidine suitable for use with medical devices. Allow thesolution to dry.</p> <p>Staff are required to perform hand hygiene specifiedtime points during and following patient contact including before and afterremoval of personal protective equipment (PPE). Hand hygiene will be performedusing soap and water or an alcohol – based hand sanitizer.</p> <p>Equipment used for more than one patient is cleanedbetween each patient use and prior to returning to the home care bag.</p> <p>Non-critical items which will encounter intact patientskin will undergo a low-level disinfection between each patient use. Dry timefor low level disinfectant will be allowed before returning the item to thehome care bag.</p> <p>The following procedure will be</p>	
--	--	--	---	--

	<p>gloves if her hands had been soiled while wearing gloves.</p> <p>11. During a home visit observation with Patient #6 on 3/10/25 beginning at 12:56 PM, LPN 2 was observed conducting a SN visit. Patient was noted to have an active shingles rash to the left lateral (side) chest and back. The nurse failed to perform hand hygiene after removing gloves on two occasions, including after assessing Patient's shingles rash.</p> <p>During an interview on 3/10/25 beginning at 2:03 PM, LPN 2 reported she should perform hand hygiene after removing gloves. The nurse stated Patient's shingles rash began draining on 3/07/25, and the nurse noted Patient's T-shirt had drainage from the rash on it.</p> <p>12. During an interview with CM, Alternate CM, and Patient Care Manager 3 on 3/12/24 beginning at 9:20 AM, the administrative staff reported staff should perform hand hygiene before and after changing gloves, with "every</p>		<p>utilized when performing wound care:</p> <ol style="list-style-type: none"> <li>1. Gather supplies for procedure.</li> <li>2. Open dressings, unwrap equipment, apply protective equipment and/or gloves</li> <li>3. Remove dressing and discard.</li> <li>4. Remove gloves and perform hand hygiene</li> <li>5. Apply new gloves</li> <li>6. Assess wound</li> <li>7. Adequately cleanse wound</li> <li>8. Remove and discard gloves and perform hand hygiene</li> <li>9. Apply new gloves</li> <li>10. Apply dressing</li> <li>11. Remove gloves and perform hand hygiene</li> <li>12. Apply new gloves</li> <li>13. Label dressing with date/time of application and clinician's initials</li> </ol>	
--	--	--	--	--

	<p>when hands were soiled. When changing a PICC line dressing, staff should change gloves and perform hand hygiene after removing the old dressing, clean directly at the PICC insertion site, and scrub the needless connector with an alcohol wipe for five seconds prior to connecting syringes. The administrative staff reported staff should allow equipment wiped with disinfectant to dry prior to returning it to their supply bag, and the nurse should change gloves and perform hand hygiene between cleaning an open wound and applying a new dressing.</p> <p>410 IAC 17-12-1(m)</p>		<p>14. Remove gloves and perform hand hygiene</p> <p>Title of person responsible for implementing plan of correction:</p> <p>Executive Director</p> <p>Monitoring procedures to ensure effectiveness of process improvement and continued compliance:</p> <p>Beginning 4/20/25, the ED, Clinical Director (CD), PCM, and/or Quality Department staff will complete 10 random observation visits of patients receiving PICC line or wound care weekly to ensure proper technique and infection control measures are adhered to.</p> <p>Monitoring will continue for 3 consecutive weeks and until 100% compliant for 2 consecutive weeks.</p>	
--	--	--	--	--

			<p>Once compliance is achieved, the ED, Clinical Director(CD), PCM, and/or Quality Department staff will complete 5 random observation visitsof patients receiving PICC line or wound care weekly to ensure proper techniqueand infection control measures are adhered to.</p> <p>Monitoring will continue for 8 consecutive weeks anduntil 100% compliant for 4 consecutive weeks.</p> <p>The ED will report monitoring results to the QualityAssessment Performance Improvement (QAPI) Team quarterly until goals areachieved.</p> <p>For instances of non-compliance, the ED will provide1:1 remediation up to and including disciplinary action.</p>	
--	--	--	--	--

G0706	<p>Interdisciplinary assessment of the patient</p> <p>484.75(b)(1)</p> <p>Ongoing interdisciplinary assessment of the patient;</p> <p>Based on observation, record review, policy review, and interview, the skilled professional failed to use an appropriate sized blood pressure (BP) cuff to assess a patient's BP for 2 of 7 home visit observations (Patient #1, 7), failed to perform a complete assessment of a patient's lung, heart, and bowel sounds for 3 of 7 home visit observations (Patient #2, 3, 5), failed to conduct a complete assessment of a patient's wound and cough for 1 of 3 home visit observations of a SN visit with wound care (Patient #4), and failed to perform a complete medication reconciliation for 1 of 1 home visit observations of an OT re-evaluation visit (Patient #5).</p> <p>Findings include:</p> <p>1. The agency policy "Monitoring Medications," last revised 7/01/24, indicated "all clinicians participating in the patient's care are responsible to assist with the maintenance of accurate patient medication information throughout the episode of care." Staff were to "compare medications [the]</p>	G0706	<p>Immediate action implemented to correct specific deficiency:</p> <p>During a mandatory team meeting held on 4/2/25 and 4/3/25, the Executive Director (ED) instructed all staff on assessment of the patient with emphasis on proper blood pressure (B/P) cuff size and complete patient assessment referencing American Heart Association / American Medical Association Measuring Blood Pressure Accurately presentation, Policy #2.1.002 Patient Assessment, Initial and Reassessment, Policy # 7.003 Home Care Record, and Policy # 2.2.001 Wound Assessment, Documentation, and Photography.</p> <p>During a mandatory team meeting held on 3/27/25, the Executive Director (ED) and Quality Department instructed all staff on medication reconciliation with an emphasis on the procedure, frequency, and staff responsible referencing Policy # 10.008</p>	2025-04-16
-------	--	-------	---	------------

	<p>patient is currently taking with medications ordered for the patient in order to identify and resolve discrepancies."</p> <p>2. The agency policy "Wound Assessment, Documentation, and Photography," last revised 9/01/24, indicated the wound assessment should include a measurement of the wound's depth, taken at "the deepest area using [a] cotton tipped applicator ...."</p> <p>3. An untitled agency procedure on BP measurement indicated the BP cuff's bladder (inflatable tube inside the cuff which expands to measure BP) "should be proportionate to the limb circumference," and "an improperly sized cuff produces an inaccurate BP measurement."</p> <p>4. American Heart Association guidance titled "Measuring Blood Pressure Accurately," obtained from <a href="http://www.heart.org">www.heart.org</a>, indicated the length of the BP cuff's bladder should be "75 – 100%" of the Patient's measured arm circumference.</p> <p>5. During a home visit observation with Patient #1 on 3/06/25 beginning at 9:04 AM,</p>		<p>Monitoring Medications and MedicationReconciliation Tip Sheet.</p> <p>For any staff unable to attend the mandatory training, 1:1 remediation will be provided by the ED or Clinical Director (CD) prior to resuming patient care.</p> <p>New process that will be implemented to prevent deficiency from re-occurring:</p> <p>B/P Assessment:</p> <p>B/P will be assessed utilizing proper size cuff. Cufflength shall be 75- 100% of the patients measured arm circumference and cuffwidth shall be 37- 50% of the patients arm circumference.</p> <p>Provider maintains additional sized B/P cuffs in office for use as indicated.</p>	
--	--	--	---	--

	<p>Patient's BP. The therapy assistant used a standard-sized BP cuff on Patient's upper arm. The cuff's bladder length was less than 75-80% of Patient's arm circumference, indicating the cuff was too small. PTA 1 reported Patient's BP was "96/58."</p> <p>Review of Patient's clinical record evidenced three of Patient's previous blood pressure readings were:</p> <ul style="list-style-type: none"> <li>a. 112/62 on 3/04/25</li> <li>b. 118/68 on 2/26/25</li> <li>c. 142/79 on 2/17/25</li> </ul> <p>During an interview on 3/06/25 beginning at 9:52 AM, PTA 1 reported she only had a standard sized BP available. The PT assistant stated she would take a patient's BP in their lower arm if the cuff was too small.</p> <p>6. During a home visit observation with Patient #2 on 3/06/25 beginning at 10:49 AM, LPN 1 was observed performing a SN visit. The nurse failed to listen for lung sounds in all lung lobes and for bowel sounds in all abdominal quadrants.</p>		<p><b>Physical Assessment:</b></p> <p>Upon admission and reassessments, the qualified clinician performs the following assessment activities and collects the following data: current health status, psychosocial, functional, and cognitive status; and pertinent physical findings, including cardiovascular status, respiratory status, gastrointestinal / elimination status</p> <p><b>Wound assessment:</b></p> <p>Depth is measured at the deepest area using cottontipped applicator (CTA) or foam tipped applicator (FTA).</p> <p><b>Medication reconciliation:</b></p>	
--	--	--	---	--

	<p>During an interview on 3/17/25 beginning at 8:38 AM, LPN 1 reported a SN assessment included listening for lung sounds in all lung lobes, both anteriorly and posteriorly, and listening for bowel sounds in all abdominal quadrants.</p> <p>7. During a home visit observation with Patient #3 on 3/06/25 beginning at 2:38 PM, PT 2 was observed conducting a PT re-evaluation visit. The therapist failed to assess Patient's lung sounds, heart tones, and bowel sounds during the visit.</p> <p>During an interview on 3/17/25 beginning at 12:11 PM, PT 2 reported during a PT re-assessment visit, the assessment would include listening to lung sounds, heart tones, and bowel sounds. PT 2 reported he did not assess these for Patient during the 3/06/25 visit due to Patient reporting during the previous visit on 1/30/25 that Patient "didn't like" the stethoscope on his/her chest and back.</p> <p>The review of PT 2's visit note from 1/30/25 evidenced PT 1 had assessed Patient's lung</p>		<p>A drug regimen review will be performed on allpatients in conjunction with all comprehensive assessments and additionally,all clinicians will participate in medication review and reconciliationthroughout the episode.</p> <p>For patients receiving skilled nursing and therapy services, the skilled nurse is responsible for medication review and reconciliationthroughout the episode. The therapist will participate by monitoring and reporting any identified medication issues or non-compliance to the PatientCare Manager (PCM).</p> <p>For patients receiving only therapy services, the therapist is responsible to facilitate drug regimen review and medicationreconciliation throughout the episode. One therapy discipline will hold theprimary responsibility for medication reconciliation in therapy only episodesof care. When multiple therapy</p>	
--	--	--	---	--

	<p>sounds and bowel sounds during the visit. The record failed to evidence Patient had declined the assessment or had requested no further lung, heart, or bowel sound assessments.</p> <p>8. During a home visit observation with Patient #4 on 3/10/25 beginning at 9:03 AM, Patient reported a productive cough to RN 1. The nurse failed to conduct a further assessment of the cough, including the sputum color, consistency, and amount. RN 1 performed a wound assessment to Patient's right forearm open wound. RN 1 failed to measure the depth of the wound as part of the wound assessment.</p> <p>During an interview on 3/10/25 beginning at 9:56 AM, RN 1 reported Patient had a history of COPD (Chronic Obstructive Pulmonary Disease, a progressively worsening lung disease). The nurse reported she did not assess the color or consistency of Patient's sputum. She reported Patient had previously reported the sputum was "creamy" in color and consistency.</p>		<p>the primary responsibility will be assigned as follows: Physical Therapy if ordered alone or in conjunction with other therapy disciplines; Occupational Therapy if ordered alone or in conjunction with only Speech Therapy; and Speech Therapy if only discipline providing care to patient.</p> <p>Title of person responsible for implementing plan of correction:</p> <p>Executive Director</p> <p>Monitoring procedures to ensure effectiveness of process improvement and continued compliance:</p> <p>Beginning 4/20/25, the ED, Clinical Director (CD), PCM, and/or Quality Department staff will complete 10 random observation visits, to include sample of patients receiving wound care, weekly to ensure proper assessment and medication reconciliation is completed.</p>	
--	---	--	---	--

	<p>During an interview on 3/10/25 beginning at 10:03 AM, Patient reported their sputum was clear to brown in color and had a thin consistency.</p> <p>9. During a home visit observation with Patient #5 on 3/10/25 beginning at 11:00 AM, OT 3 was observed conducting an OT re-evaluation visit. The therapist reconciled Patient's medication bottles against the agency's medication list. OT 3 failed to review the medication bottles or verify if Patient was still taking Melatonin (a supplement used to treat insomnia), Mirtazepine (a medication used to treat depression), Metamucil (a medication used to treat constipation), and Repatha (an injected medication used to treat high cholesterol). The therapist also failed to listen for lung sounds in all lung lobes and for bowel sounds in all abdominal quadrants.</p> <p>During an interview on 3/10/25 beginning at 11:54 AM, OT 3 reported she reconciled Patient's medications by comparing Patient's medication bottles against the agency's medication list. The therapist</p>		<p>Monitoring will continue for 3 consecutive weeks and until 100% compliant for 2 consecutive weeks.</p> <p>Once compliance is achieved, the ED, Clinical Director(CD), PCM, and/or Quality Department staff will complete 5 random observation visits, to include sample of patients receiving wound care, weekly to ensure proper assessment and medication reconciliation is completed.</p> <p>Monitoring will continue for 8 consecutive weeks and until 100% compliant for 4 consecutive weeks.</p> <p>The ED will report monitoring results to the Quality Assessment Performance Improvement (QAPI) Team quarterly until goals are achieved.</p> <p>For instances of non-compliance, the ED will</p>	
--	--	--	--	--

	<p>reported she did not observe a bottle or verify Patient was taking Melatonin, Mirtazepine, Metamucil, or Repatha. OT 3 also reported she assessed Patient's lung sounds by listening to the left upper lobe only and assessed Patient's bowel sounds by listening to the midline upper abdomen only.</p> <p>10. During a home visit observation with Patient #1 on 3/10/25 beginning at 3:18 PM, RN 2 was observed obtaining Patient's BP. The nurse used a standard-sized BP cuff on Patient's upper arm. The cuff's bladder length was less than 75-80% of Patient's arm circumference, indicating the cuff was too small. RN 2 reported Patient's BP was "104/60."</p> <p>Review of Patient's clinical record indicated Patient's three previous blood pressure readings were as follows-</p> <p>a. 140/82 on 3/05/25</p> <p>b. 128/64 on 3/03/25</p> <p>c. 128/68 on 2/26/25</p> <p>During an interview on 3/17/25</p>		<p>provide 1:1 remediation up to and including disciplinary action.</p>	
--	---	--	---	--

beginning at 10:12 AM, RN 2 reported she used a standard sized BP cuff on all patients unless the cuff would not go all the way around a patient's arm and the Velcro would not stick securely.

11. During an interview with CM, Alternate CM, and Patient Care Manager 3 on 3/12/24 beginning at 9:20 AM, the administrative staff reported if a BP cuff was too small, staff should use a larger cuff or take the BP reading on an alternative site. CM reported staff should reconcile the patient's medications at each visit by comparing the medication bottles in the home against the agency's medication list. If a medication was included on the agency's list but not observed in the home, staff should investigate if Patient was still taking the medication. The administrative staff reported the nurse should assess a wound's depth when measuring an open wound, the nurse should assess a patient's cough "quality," including sputum color and consistency, when a patient reported a productive cough, and the therapist should "check all systems" at every visit,

	<p>including listening to all lung lobes, heart tones, and all bowel quadrants.</p> <p>410 IAC 17-14-1(a)(1)(b), 17-14-1(a)(2)(A), 17-14-1(c)(3)</p>
