TITLE

(X6) DATE

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined other safeguards provide sufficient protection to the patients. (see instructions.) Except for nursing homes, the findings stated above are disclosable following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosed days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

	<p>dementia without behavioral disturbance, psychotic disturbance, or mood disturbance and anxiety.</p> <p>An admission Assisted Living Assessment, dated 6/10/23, indicated the following: -Resident was not always oriented. -He was capable of independent decision making and had no behaviors. -He was on a general diet, regular consistency with thin liquids. -He required standby assistance and cues with bathing, dressing, and grooming. -Resident was totally continent of bladder, continent of bowel and was independent with using the bathroom.</p> <p>A Service Plan, initiated on 6/19/23 and revised 7/24/23, indicated the following: -The resident would be supported to make appropriate decisions about his care and environment. He had moderate dementia with significant short-term memory and possibly long term memory loss. Staff were to provide reminders for activities and meals. -7/24/23: Dementia Behaviors: the resident would be able to identify factors/interventions that helped to prevent/minimize inappropriate behaviors. Staff were to report changes from baseline behaviors to the nurse and he would be allowed to wander but wasn't a disturbance to others. -The resident would maintain appropriate weight and nutritional status. Staff would provide a general diet, regular consistency with thin liquids; food and fluids would be encouraged and reminders given to go to the dining room for meals. -The resident would have his activities of daily living met. Staff would assist with dressing,</p>				<p>semiannually, upon a substantial change or per request of facility or resident. All nursing associates were given an in-service on 11.08.23 regarding the protocols for evaluations and the criteria that constitutes a substantial change in condition. Resident service director, or designee will monitor the completion of evaluations for all residents residing in the facility as well as all new admissions for the next 30 days.</p> <p>4 Resident service plans will be reviewed and trended in the community's weekly risk meetings. Areas of concern will be addressed timely.</p>

	<p>grooming, personal hygiene, and oral care.</p> <p>-The resident would maintain independence for toileting.</p> <p>Progress notes indicated the following:</p> <p>-8/31/23 at 7:19 p.m., the medical NP indicated the resident was seen for increased verbal outbursts. Nursing had tried to obtain a urinalysis but were unable to do so because the resident was incontinent.</p> <p>-9/15/23 at 11:30 a.m., a psychiatric NP note indicated the resident was visited. Since admission, the resident had some difficulty adjusting and had been having verbal outbursts. During the visit, he was delusional with some paranoia, affect was flat, and he had difficulty finding words. He was assessed as having moderate dementia with psychotic disturbance, major depressive disorder, and anxiety. He was to continue on his current medications to treat his dementia, depression, and anxiety.</p> <p>-9/21/23 at 5:13 p.m., the medical NP indicated the resident was seen for frequent coughing when eating, signs and symptoms of aspiration. His diet was changed to mechanical soft with ground up meat and speech therapy was to evaluate and treat the resident.</p> <p>-10/7/23 at 7:38 p.m., the resident slapped the CNA (Certified Nurse Aid) while being assisted to toilet.</p> <p>-10/8/23 at 2:12 p.m., the resident threw a cup of water at the QMA (Qualified Medication Aid) and spit out his medications. He was very agitated with staff and told them to get out of his room.</p> <p>-10/9/23 at 6:08 p.m., the resident called the CNA over to him and punched her in the stomach.</p> <p>-10/17/23 at 10:01 p.m., the resident had been agitated, restless, yelling at others, and throwing food at another resident during supper.</p> <p>-10/19/23 at 2:35 p.m., the resident was very</p>

	<p>agitated at lunch. Redirection was not effective and the resident swung at and cursed at staff. He refused breakfast and lunch.</p> <p>-10/25/23 at 7:04 p.m., the resident refused supper and had been very teary.</p> <p>-10/26/23 at 3:39 p.m., the medical NP visited and indicated the resident had lost 7 pounds over the past month. He was less active and not eating well. The plan was to start another anti-depressant medication to help with his appetite.</p> <p>-10/27/23 at 3:20 p.m., the resident was incontinent of bladder and when staff tried to change him, he came at staff very agitated and confrontational. The psychiatric NP was notified and orders given to start resident on an anti-psychotic medication for behaviors.</p> <p>Review of resident weights indicated significant weight changes from month to month. The resident's admission weight was 163 with his current weight dated 11/1/23 being 122.4; a 41 pound loss in 5 months.</p> <p>There was no re-assessment or evaluation completed following the residents significant change in weight, increasing behaviors, new onset bladder incontinence, change in diet due to signs/symptoms of aspiration, and new use of anti-psychotic medications. There was no documentation to indicate speech therapy had evaluated/treated the resident as recommended by the medical NP on 9/21/23.</p> <p>2. On 11/1/23 at 12:20 P.M., Resident F was observed in the memory care unit dining room. On his plate, were clumps of a breaded meat patty covered with a white thick gravy. He was observed to eat a third of the meat and was coughing as he swallowed the food. He got up</p>

	<p>from the table leaving most of his lunch on the plate.</p> <p>On 11/1/23 at 11:30 A.M., Resident F's record was reviewed. Diagnoses included Alzheimer's disease and aspiration pneumonia (occurs when food or liquid is breathed into the lungs instead of being swallowed).</p> <p>A Semi-Annual Assisted Living Assessment, dated 7/11/23, indicated the resident required reminders and cues for dining assistance. His diet order was left blank and not listed.</p> <p>A Service Plan, last reviewed on 7/11/23, indicated the resident would maintain appropriate weight and nutritional status. Staff were to provide a general diet with regular texture and liquids thin in consistency. Staff were to remind him to go to meals where he was independent with eating and drinking. Staff were to encourage fluid and food consumption.</p> <p>A Nurse Practitioner (NP) progress note, dated 10/12/23 at 12:47 p.m., indicated the resident had been taken to the hospital for acute respiratory distress and was treated for aspiration pneumonia with antibiotics. Speech therapy performed an evaluation and placed the resident on a regular diet with ground meat. The resident was only eating about 20% of his meals. He was able to drink thin liquids without signs/symptoms of aspiration. He needed follow up with speech therapy.</p> <p>There was no re-assessment or evaluation completed following the residents significant change in diet, recent aspiration pneumonia with hospitalization, or decrease in eating meals. There was no documentation of speech therapy follow</p>
