	out for several days. There were one or two occasions where the family member took Resident B to a doctor's appointment without telling staff and he came back late, maybe that was what LPN 7 had been thinking. The DNS was not sure if LPN 7 had called Resident B's family member to verify his location. There were no residents in the facility that were considered elopement risks, not even the residents with dementia were elopement risks. The facility was not a locked facility. The residents could come and go as they please. At no point did staff consider Resident B to be missing before he was found. The facility lacked service plans to address resident's ability to leave the facility. During a telephone interview on 12/21/22 at 12:00 p.m., the county Deputy Coroner indicated, she had been the responding coroner on 12/20/22. Resident B had already been removed from the retention pond by the boat team from the fire department when she arrived, but he still had ice on him. A 3/4 empty bottle of gin alcohol had been found on the retention pond dock. The AL DNS had told the county Coroner that Resident B recently had an uptake of drinking, not extreme, but she was worried about interaction with his schizophrenia meds. AL staff told her the resident could come and go as he pleased, and he was not considered missing. Outings were usually pre-arranged although not on 12/19/22. The Deputy Coroner indicated she had found the suicide note inside Resident B's apartment addressed to his parent and family member, with his reason for committing suicide. The suicide note was sitting on the left side of the TV on a rectangle 10" piece of paper, that was in plain sight. Everything was organized, and a person needed to look, but the note was in plain sight. The Deputy Coroner had spoken that morning
