	free of interference, coercion, discrimination, and reprisal from the facility in exercising his or her rights and to be supported by the facility in the exercise of his or her rights as required under this subpart. Based on observation, interview and record review, the facility failed to ensure residents had privacy while using the facility telephone. (Swan Unit) Findings include: During an interview with Resident E, on 5/17/24 at 12:22 p.m., she indicated she used the phone at the nurses station and everyone could hear what she talked about. During an interview with the Social Service Director, on 5/17/24 at 2:11 p.m., she indicated she didn't know Resident E needed a phone. They didn't have land lines in the residents' rooms. There was an office phone at the nurses station. She knew while being back in the Swan unit, Resident K would squat down in front of the nurses station to talk on the phone. During an interview with QMA 7, on 5/17/24 at 3:01 p.m., she indicated Resident E talked on the phone at the nurses station when no one was around. Resident E could go as far as the cord would allow her to go to talk privately. During an interview with the Administrator, with the DON present, on 5/21/24 at 11:57 a.m., she indicated some of the residents had cell phones. She had spoken to the Social Service Director about the residents getting government cell phones, and they had some on hand, and just needed to know how to activate them. The residents were able to use the phone at the nurses	F 0550	It is the practice of this facility to ensure residents are given privacy while using the facility telephone. 1 What corrective actions will be accomplished for those residents found to be affected by the deficient practice:a The facility will provide a portal phone for Resident E to use so that privacy can be provided during phone use. 2 How other residents having the potential to be affected by the same deficient practices will be identified and what corrective action will be taken:a All resident have the potential to be affected by the alleged deficiency. b The facility will provide portal phones for each unit for the resident usage so that privacy can be provideed during their phone use. 3 What measures will be put in place and what systemic changes will be made to ensure that deficient practice does not recur:a A resident council was held on 6/6/24 to discuss that portable phones will be provided on each unit so that residents can utilize and be provided with privacy during their phone usage.	06/06/2024

	station, but she didn't want Resident K having to sit on the floor to talk on the phone. During an interview with QMA 7, on 5/21/24 at 2:15 p.m., she indicated there were four residents who used the phone at the nurses station on a regular basis. During an interview with CNA 14, on 5/21/24 at 2:20 p.m., she indicated she sat the nurses station phone on the top of the desk for the residents to use. Sometimes the staff would dial the number for them, or some residents would just pick up the phone and use it. Resident L had a cell phone, but still used the nurses station phone. There was not a private place for the residents to talk on the phone, and they had to stand at the nurses station to talk. During an interview with the Administrator on 5/21/24 at 3:14 p.m., she indicated the facility did not have a policy related to resident's privacy while using a phone. This citation relates to Complaint IN00434131. 3.1-3(f)		b All staff will be in-serviced on 6/6/24 regarding resident's rights for providing privacy during phone usage. The staff were informed that the facility has provided a portal phone for resident use. 4 How the corrective actions will be monitored to ensure the deficient practices will not occur:a A performance improvement tool has been initiated that random audits five (5) residents to ensure that privacy has been given during their phone use. This Quality Assurance Audit Tool will be completed by the Social Service Director/Designee weekly x3 weeks, monthly for 3 months, then quarterly for 2 quarters. Any identified issues will be immediately addressed. The outcomes will be reviewed through the facility Quality Assurance Program. Monitoring will continue as planned or will be increased by the Quality Assurance Committee if needed to obtain 100% compliance. Additional action will be taken by the Quality Assurance Committee if warranted based on the outcome of tools.

	Resident H's documented blood sugars were as follows: On 12/5/23 at 9:57 a.m., it was 245 mg/dL. On 12/9/23 at 10:43 a.m., it was 261 mg/dL. On 12/9/23 at 4:05 p.m., it was 167 mg/dL. On 12/10/23 at 8:14 a.m., it was 151 mg/dL. On 12/10/23 at 10:37 a.m., it was 250 mg/dL. On 12/10/23 at 3:54 p.m., it was 180 mg/dL. On 12/12/23 at 9:24 a.m., it was 257 mg/dL. On 4/19/24 at 8:32 a.m. was 119 mg/dL. A facility fall investigation for Resident H, on 4/25/24 at 10:50 p.m., indicated Resident H was found on the floor face down. The fall was unwitnessed. She was bleeding from the face and could not recall what happened, as she had a diagnosis of dementia. She had a left inferior orbital blowout fracture from the fall. The follow up indicated, upon review of hospital results and video, the resident appeared to pass out after standing up from laying on the couch. She stood up and then fell forward. The hospital added a diagnosis of type 2 myocardial infarction. The nurse practitioner concluded that she likely had a medical event resulting in loss of consciousness. Orthostatic blood pressures would be completed twice a day for seven days. Hospital discharge paperwork, dated 4/29/24, indicated Resident H was admitted for falls, altered mental status, and orbital fracture noted on a CAT scan. She was given intravenous fluids		week for the next four (4) weeks, then one (1) time per weekfor the next quarter, and then every two (2) weeks for the next quarter. This will continue until substantial compliance is obtained. This Quality Assurance Audit Tool will be completed by the Director of Nursing and/or Designee weekly x 3 weeks, monthly for 3 months, then quarterly for 2 quarters. Any identified issues will be immediately addressed. The outcomes willbe reviewed through the facility Quality Assurance Program. Monitoring will continue as planned or will be increased by the Quality Assurance Committee if needed to obtain 100% compliance. Additional action will be taken by the Quality Assurance Committee if warranted based on the outcome of tools. b A performance improvement tool has been initiated to ensure documentaton completed for the bowel management program and if further treatment is needed on five (5) random residents five (5) times per week for the next four (4) weeks, then two (2) times per week for the next four (4) weeks, then one (1) time per wwek for the next quarter, and then every two (2) weeks for the next quarter. 	and an antibiotic for urinary tract infections, as she was being treated prior to admission to the hospital. She had hypoglycemia (low blood sugar) and needed dextrose-containing intravenous fluids. Her insulin was held. She was discharged on 4/29/24 after her oral intakes improved, her mental status was back to her baseline, and her sugars were stabilized. Her insulin was decreased to 5 units daily on discharge and her blood sugars should be checked at the facility and monitored closely. The resident's clinical record lacked current orders for blood sugar checks/monitoring. During an interview with the DON and with the Administrator present, on 5/21/24 at 11:57 a.m., she indicated the nurse practitioner put the order in for Resident H to have her blood sugars monitored on 9/15/23 and it didn't flow over to the medication/treatment administration records. When they had an admission or readmission, the DON made a copy of the packet, entered the orders and medication into the computer, took a copy to the MDS Coordinator and then went through the packet and double checked it. Then the original packet got scanned into the clinical records. The packet should have been reviewed. The Administrator indicated they must have missed the order for the blood sugars in September. B.1. Resident B's clinical record was reviewed on 5/17/24 at 10:20 a.m. Diagnoses included ventral hernia without obstruction or gangrene and obesity. Resident B's physician's orders included polyethylene glycol powder (treat constipation) give 17 grams as needed for constipation.		be completed by the Director of Nursing and/or Designee weekly x 3 weeks, monthly for 3 months, then quarterly for 2 quarters. Any identified issues will be immediately addressed. The outsomes will be reviewed through through the facility Quality Assurance Program. Monitoring will continue as planned or will be increased by the Quality Assurance Committee if needed to botain 100% compliance. Additional action will be taken by the Quality Assurance Committee if warranted based on the outcome of tools.

An admission Minimum Data Set (MDS) assessment, dated 4/17/24, indicated he was cognitively intact. He required limited assistance with toileting. His bowel continence and constipation were not assessed.

He had a care plan problem of potential for constipation (5/20/24). His goal was he would have a movement at least every three days. His interventions included administer medications per physician orders (5/20/24), follow facility bowel protocol for bowel management (5/20/24), he would report and staff would observe for any changes in bowel patterns (5/20/24), and observe/document/report PRN sign and symptoms of complications related to constipation: change in mental status, new onset: confusion, sleepiness, inability to maintain posture, agitation, bradycardia (slow, low pulse), Abdominal distension, vomiting, small loose or stools, fecal smearing, bowel sounds, diaphoresis, abdomen tenderness, guarding, rigidity, and fecal compaction (5/20/24).

Resident B's clinical record lacked bowel movement monitoring documentation on the following dates in April and May 2024: 4/11/24, 4/12/24, 4/13/24, 4/14/24, 4/15/24, 4/16/24, 4/17/24, 4/18/24, 4/19/24, 4/20/24, 4/21/24, 4/22/24, 4/23/24, 4/24/24, 4/25/24, 4/26/24, 4/27/24, 4/28/24, 4/29/24, 4/30/24, 5/1/24, 5/2/24, 5/3/24, 5/4/24, 5/5/24, 5/6/24, 5/7/24, 5/8/24, 5/9/24, 5/10/24, 5/11/24, 5/12/24, and 5/13/24.

B.2. Resident E's clinical record was reviewed on 5/20/24 at 10:48 a.m. Diagnoses included constipation.

Physician's orders included refer to

bedtime, sodium phosphates rectal enema 133 ml every 24 hours as needed.

A quarterly MDS assessment, dated 3/18/24, indicated she was cognitively intact and required extensive assistance from one staff member for toileting. She was always continent of bowel.

She had a current care plan problem of potential for constipation (3/18/22). Her goal was she would have a bowel movement at least every three days utilizing care plan interventions. Her interventions included administer medications per physician orders (3/18/22), encourage consumption of fluids (3/18/22), she would report and staff would observe for any changes in bowel patterns (3/18/22) and observe/document/report PRN signs and symptoms of complications related to constipation: change in mental status, new onset: confusion, sleepiness, inability to maintain posture, agitation, bradycardia (slow, low pulse), abdominal distension, vomiting, small loose or stools, fecal smearing, bowel sounds, diaphoresis, abdomen tenderness, guarding, rigidity, and fecal compaction (3/18/22).

Resident F's bowel movement monitoring documentation for 4/17/14 through 5/18/24 indicated the following:

On 4/27/24, 4/28/24, and 4/29/24, she did not have a bowel movement.

On 5/14/24, 5/15/24, 5/16/24, and 5/17/24, she did not have a bowel movement.

On 5/18/24, she was incontinent of bowel.

B.4. Resident H's clinical record was reviewed on 5/21/24 at 9:42 a.m. Diagnoses included moderate

	protein-calorie malnutrition. Physician's orders included sodium phosphates rectal enema 133 ml every 24 hours as needed, loperamide (treat diarrhea) 4 mg every eight hours as needed, glycerin (treat constipation) suppository one rectally as needed every 24 hours if no results after milk of magnesia (treat constipation), and magnesium hydroxide 30 ml every 24 hours as needed. A quarterly MDS assessment, dated 3/18/24, indicated she was severely cognitively impaired and required extensive assistance from one staff member for toileting. She was frequently incontinent of bowel. The resident did not have a care plan for bowel management or constipation. Resident H's bowel movement monitoring documentation indicated the following: On 5/1/24, 5/2/24, and 5/3/24, she did not have a bowel movement. On 5/4/24, she was incontinent of bowel. On 5/17/24, 5/18/24, 5/19/24, and 5/20/24, she did not have a bowel movement. During an interview, on 5/17/24 at 3:01 p.m., QMA 7 indicated Resident E had bowel movements every day and facility staff should document the bowel movements in the clinical record. During an interview, on 5/20/24 at 11:59 a.m., CNA 18 indicated she would document the bowel movements at the end of the day. If the resident was continent, she would ask the resident if they

	had a bowel movement. During an interview, on 5/21/24 at 1:03 p.m., the ADON indicated she monitored the resident's bowel movements when she pulled the information up on the electronic health record dashboard daily. If a resident did not have a bowel movement, they would follow the facility's bowel protocol. The first day after not having a bowel movement for three days, they would give the resident 30 ml of Milk of Magnesia. If that was not successful, on day 2 or three days without a bowel movement, they would give the resident a rectal suppository. If that didn't work, they would complete a bowel assessment and contact the doctor. Resident E did have bowel movements, and the ADON had spoken to the CNAs who had found evidence that Resident E had a bowel movement. Resident F took Milk of Magnesia every night and had not reported constipation. The facility's bowel movement documentation was not completed as it should have been. During an interview with CNA 14, on 5/21/24 at 2:20 p.m., she indicated she charted the consistency and continence of the resident's bowel movements in the clinical record. She charted the bowel movements right after the resident had a bowel movement. If a resident was able to tell her if they had a bowel movement, she would ask them in private. During an interview with LPN 5, on 5/21/24 at 2:24 p.m., she indicated she normally looked at the bowel movement charting, and then the resident for abdominal discomfort. If the resident had not had a bowel movement for three days, the facility would address it. A current facility policy titled "Bowel
