- Basic, straightforward review of relevant pathophysiology of shock,
- Less emphasis on theory & more on pragmatic concerns.
- Rational guidelines & practical clinical tools for rapid stabilization of the critically injured
- Review of essential principles of transfer of trauma victims to higher levels of care, with anticipation that the critical trauma victim will require no more than 30 minutes.

High-Fidelity Simulation-Based Methods for Learning

- On-Site, Regionally-Based Training
- State of the Art Simulation Methodologies
- Hands-on Skills Review
- Recognized Expert Educators
