(1) Hoosier Park wagered \$1,290,876 on Indiana Downs' Thoroughbred and Quarter Horse simulcast signal. Indiana Downs wagered \$673,282 on Hoosier Park's Standardbred simulcast signal. These handle numbers are included in the "**Export Handle**" above by source of signal and in "**In-State Handle**" by location of wager.

(2) Handle at Indiana OTB's on racing originating in-state is accounted for in "**In-State Handle**" source of wager (i.e. Hoosier Park's OTB handle on Hoosier Park's live racing is attributed to Hoosier Park).

# Total In-State Handle

(Handle - money wagered by the betting public on pari-mutuel races.)

# Distribution of the Wagering Dollar

The following is a breakdown of the distribution of all monies wagered at both Hoosier Park and Indiana Downs and their satellite facilities:

\*Pari-Mutuel Tax - includes satellite facility tax.

\*Breakage - the difference in the rounding off of pari-mutuel payoffs.

## State Revenues

The following revenue is collected in accordance with pari-mutuel statute IC 4-31, and is directed to the general fund unless otherwise noted:

| Hoosier Park                                           |                    |

**Total State Revenue \$ 3,427,763**

\*50% to livestock industry promotion and development fund and 50% to State Fair Commission

The direct revenue received by the State of Indiana exceeded the cost of regulation. Indiana Horse Racing Commission operating expenditures for calendar year 2013 were \$1,814,590.

# Occupational Licensing

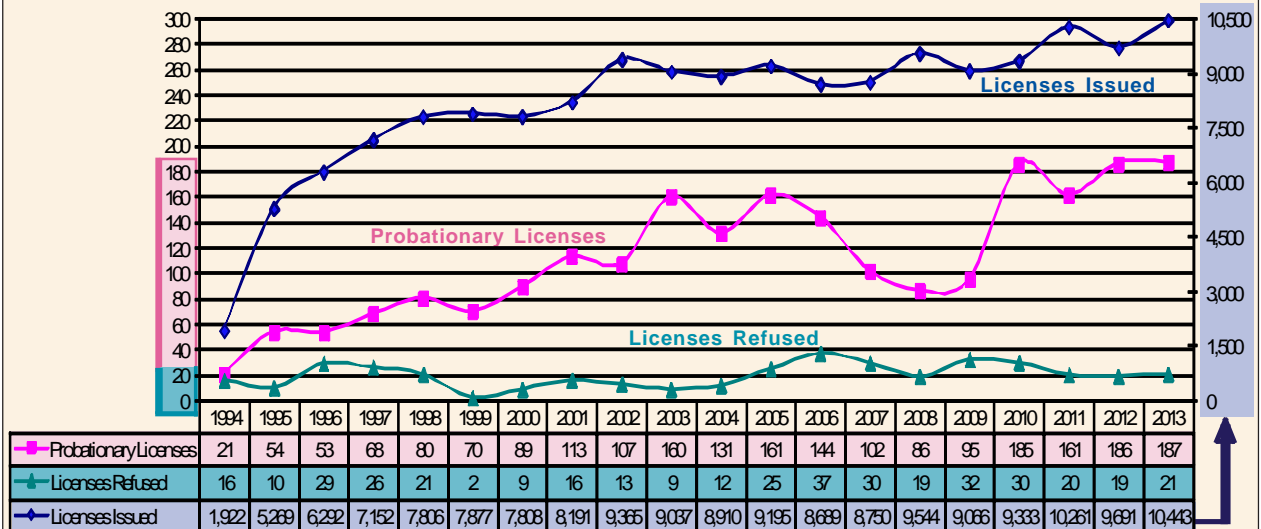

Pursuant to IC 4-31-6 and 71 IAC 5-1-1, all persons participating in pari-mutuel racing under the jurisdiction of the Commission are required to be licensed. The licensing process is the backbone of the Commission's regulatory efforts. Each prospective licensee is fingerprinted.

The Federal Bureau of Investigation (FBI) provides the Commission with criminal histories of all applicants. The Commission may refuse or deny the application for licensure of any person whose criminal or racing violation record is contrary to the public's best interest.

# Equine Drug Testing

Pari-mutuel horse racing can succeed as a legitimate major league sport only if its races are perceived by the wagering public to be honest, competitive contests, free from manipulation by man or drugs. The Commission's drug detection program is one of the nation's most comprehensive and its laboratory, one of the most respected in the racing industry.

| Breed                      | Race Dates | Urine | Blood | Positive Tests |
|----------------------------|------------|-------|-------|----------------|
| Standardbred               | 160        | 2030  | 2313  | 4              |
| Thoroughbred/Quarter Horse | 120        | 2016  | 2136  | 1              |
| Total                      | 280        | 4046  | 4449  | 5              |

Truesdail Laboratory in Tustin, California, serves as the primary testing laboratory for the Indiana Horse Racing Commission. Truesdail Laboratory has been a leader in racing chemistry and drug-related research for over 50 years. For

each positive test, the offending horse was disqualified and placed last. In accordance with the pari-mutuel statute, all purse money earned is ordered returned and redistributed.

The following table represents a further breakdown, by breed, of the name and types of drugs reported by the laboratory.

| Number of Violations by Breed |    |    | ARCI Drug Classification | Drug Type                      | Drug Class | Penalty Class |

# Human Drug Testing

# Competitive Status

The competitive status of Indiana's horse racing industry can best be determined by comparing purses offered by Indiana tracks with tracks racing the same breed in adjacent states. The average daily purse distribution is the best indicator, followed by the track's total purse distribution. The average daily purse distribution is a better indicator because a track's total purse offerings can be diluted by an over abundance of race dates which can lead to inferior or low quality racing. Also included in this report are yearling sale figures for standardbreds and thoroughbreds.

## Standardbred Racing

### Comparison of Indiana with its Neighboring States

Indiana's standardbred industry is a regional powerhouse. As shown below, in 2013 Hoosier Park ranked #1 among tracks in surrounding states in both average daily and total purse distribution. Nationally, Hoosier Park is an elite track – ranking 5th in daily average purses and total purse distribution.

| Average Daily Purse Distribution     |            | Total Purse Money                    |              |

### Comparison of Indiana with its Neighboring States

Indiana's Thoroughbred industry is well respected regionally. Indiana Downs is ranked #4 – behind only the prestigious Keeneland Race Course, Churchill Downs and Arlington Park.

## Quarter Horse Racing

### Comparison of Indiana Nationally

Indiana's Quarter Horse racing industry is unique in both its size and location. Indiana Downs averages slightly more than 200 races per year, which makes its Quarter Horse racing program relatively small. But it offers one of the most lucrative stakes and overnight purse programs in the country. There are few racing opportunities in the Midwest, as Quarter Horse racing in the United States is concentrated primarily in the West and Southwest. Consequently, the comparisons made below are with all U.S. tracks.

### Pari-Mutuel Handle

Fifty years ago, track attendance and pari-mutuel handle were the primary metrics followed by the horse racing industry. Beginning with the advent of off-track betting in the 1970's and excellerating in the 1980's and 1990's, bettors were in increasing number, wagering away from the track. Track attendance numbers became less meaningful. Some tracks stopped publicly reporting daily attendance. Other tracks stopped charging an admission fee, and as a consequence, stopped even counting visiting patrons.

Pari-mutuel handle in states with racinos, like Indiana, have ceded its importance to adjusted gross receipts (AGR) of slot play. Most of Indiana track's revenue and purses are now derived from slot machines. Comparing pari-mutuel handle between states yield little by the way of competitive status or the underlying health of a state's racing industry. The 2011 handle listed in this box is the latest national data available from the ARCI.

| State       | Handle        |
|-------------|---------------|
| 1. Illinois | \$578,429,825 |
| 2. Kentucky | \$383,636,673 |
| 3. Ohio     | \$235,621,567 |

# Breed Development

## Overview

Pursuant to IC 4-31-11, breed development funds have been established to promote the breeding of horses while stimulating the agri-business sector of the state's economy.

Historically, breed development funds have consisted of breakage (the difference in the rounding off of pari-mutuel payoffs), outs (all uncashed tickets), and riverboat admissions tax allocation. This same funding mechanism has been in place until racinos opened at Indiana's

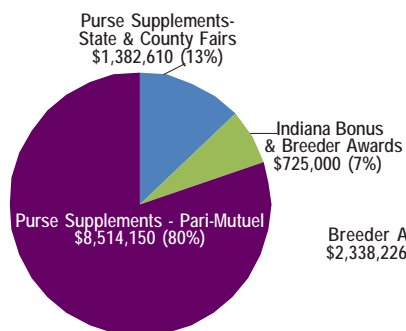

two racetracks in June of 2008. At this time, riverboat allocation was replaced by an allocation from slot machine wagering at racinos in accordance with 71 IAC 4-35-7-12.

By visiting the commission website ([www.in.gov/hrc](http://www.in.gov/hrc)), information can be obtained regarding eligibility requirements for racing awards such as those described in the charts below. There are detailed instructions on how to register a foal/horse, what applications to use and what type of deadlines apply.

# Racino Slot Revenue

The 2007 Indiana Legislature approved slot machine wagering at the State's two pari-mutuel racetracks in accordance with 71 IAC 4-35-7-12. Racino slot revenue began replacing riverboat revenue June, 2008. These funds are distributed to various segments of the racing industry in accordance with Commission rule IC 4-35-7-12. Detailed racino slot revenue distribution is noted in the chart below.
