

Indianapolis (Indy) STEAM Academy

A Proposed K-8 Charter School

Proposed Location:

Far Eastside of Indianapolis, IN

Submitted by:

**Dr. Yvonne Bullock, CEO/Founder/Head of School &
Educating Children Matters, Inc. Board of Directors:**

Tanya Peterson, President
Kamia Jackson, Vice-President
Brandon Warren, Secretary
Keith Wilson, Treasurer
Davita Johnson, Director
Pamela Grant-Taylor, Director

September 3, 2018

“Preparing Today’s Students for Tomorrow’s Careers!”

PROPOSAL OVERVIEW

(EXHIBIT B)

Page 1 of 2

Exhibit B

Proposal Overview

The applicant group's **designated representative** will serve as the contact for all communications, interviews, and notices from the ICSB regarding the submitted application.

IMPORTANT NOTE: The full application, including this form, will be posted on the ICSB website. Applicants are advised that local community members, including members of the media, may contact the designated representative for questions about the proposed school(s).

Name of proposed Charter School: Indianapolis (Indy) STEAM Academy

Proposed Charter School location:* Far Eastside Indianapolis, IN 46226

*Please indicate the city/town and, if known, potential address or neighborhood of the school location. Virtual operators should indicate the relevant geographies the operator intends to serve.

School district of proposed location: Indianapolis Public Schools

Legal name of group applying for Charter: Educating Children Matters, Inc.

Designated representative: Yvonne Bullock

Contact Information (Phone & Email): 317-797-5936/ymbullock@outlook.com

Planned opening year for the school: July 2019

Model or focus of proposed school: Science, Technology, Engineering, Arts, Mathematics (STEAM)
(e.g., arts, college prep, dual-language, etc.)

Proposed Grade Levels and Student Enrollment

Indicate the grade levels the school intends to serve. Specify both the planned and maximum number of enrolled students by grade level for each year.

Academic Year	Grade Levels	Student Enrollment (Planned/Maximum)
Year 1	K-2	200
Year 2	K-3	275
Year 3	K-4	350
Year 4	K-5	425
Year 5	K-6	500
At Capacity	K-8	650

Target student population (if any): Low-income, underrepresented minorities, and underserved students.

PROPOSAL OVERVIEW

(EXHIBIT B)

Page 2 of 2

Will an application for the same charter school be submitted to another authorizer in the near future?

Yes ☐ No ☒

If yes, identify the authorizer(s):

Planned submission date(s):

Please list the number of previous submissions (including withdrawn submissions) for request to authorize any charter school(s) over the past five years, as required under IC § 20-24-3-4. Include the following information:

Number of Previous Submissions:

2-Prospectuses, 2-Full Applications

Authorizer(s):

Indianapolis Mayor's Office of Education and Innovation and Education One-Trine University

Submission date(s):

Fall 2015, Fall 2017, Spring 2018

Signature of Applicant's Designated Representative

Yvonne Bullock

PROPOSAL NARRATIVE

EXECUTIVE SUMMARY

Mission

The **mission** of Indianapolis STEAM Academy is to nurture the academic and creative talents of students through Science, Technology, Engineering, Arts, and Mathematics (STEAM) with a strong literacy foundation to ensure the achievement of all students, and prepare them for high school, college, and careers in a 21st century global workforce.

Vision

The vision of the proposed Indianapolis (Indy) STEAM Academy is to provide a high-quality educational option for parents and students. To help students develop an awareness of careers in STEM fields and prepare them to take advance coursework in high school and college that will prepare them get jobs in the fastest growing industry in the nation. Students from low income families will understand that education is a means to escape poverty. Minority students will be trained and qualify to acquire jobs at STEM industries right here in Indianapolis and/or compete for jobs across the nation. Underrepresented students like girls will aspire to take on non-traditional roles and careers in STEM fields. Students will become life-long learners and productive citizens in their communities and continue to develop the next generation of learners. Indy Steam Academy's mission and vision are aligned with the **Indiana Charter School Board's mission** to authorize high performing charter schools and hold them accountable for high levels of student achievement and growth that will prepare them for high school college and careers.

Indy STEAM Academy is committed to address local community needs to overcome generations of poverty, violence, and illiteracy and significant workplace demands to develop students who are qualified to fill high technological and scientific jobs by: **(1) building a strong literacy foundation** in the early grades to ensure that all students are able to demonstrate proficiency in reading by third grade; **(2) developing a deeper understanding** of Indiana State Standards across core content areas through the integration and practical application of science, technology, engineering, and mathematics and enhance critical thinking, analytical, reasoning, and problem solving skills needed to address real world problems and challenges for the future; **(3) fostering creativity, imagination, and innovation** through the arts that enhance collaboration, communication, perseverance, and resilience which are 21st century skills needed to be successful in STEAM work environments.

Educational Need

Science, technology, engineering, and mathematics are skills students need to be competitive in a global marketplace and to enhance the economy. On a **global level**, the Program for International Student Assessment (PISA) suggests that students in the United States lag behind their peers in many countries. The U.S. ranked 38th out of 71 countries in math and 24th in science (National Center for Education Statistics, 2015). These results support the need for students to become more proficient in math and science to meet global workforce demands.

On a **national level**, the National Assessment of Educational Progress (NAEP) 2015 results show that the average math scores for 4th and 8th grade students have dropped for the first time since 2009. The proficiency rates for students scoring at or above in math is 40% at grade 4, 33% at grade 8, and 25% at grade 12. Approximately 18% of 4th grade students and 29% of 8th grade students were rated "below basic" in math. The proficiency rates for students scoring at or above in science is 38% at 4th grade, 34% at 8th grade, and 22% at 12th grade. Approximately 24% of 4th grade students and 32% of 8th grade students were rated "below basic" in science. This clearly demonstrates the need to build a strong foundation in higher level math and science concepts in the earlier grades to help students become proficient before entering high school and college. There is a need to increase the number of African American and Hispanic students participating in STEM college programs and careers. There is a need to increase the number of females in STEM college programs and careers. Research indicates that women represent nearly 50% of the workforce, but represent only 25% of the STEM workforce. Research indicates that in addition to the underrepresentation of women in the STEM jobs, African-Americans and Hispanics are significantly

underrepresented in STEM jobs. In 2011, 6% of STEM workers were African- American, which is a 4% increase over the last 40 years. Hispanics represent 7% of STEM workers, which is a 5% increase since 1970 (Brooks, 2013). It is projected that by 2018, there will be 8.6 million STEM jobs available worldwide. It is also estimated that 3 million of those jobs will go unfilled due to the lack of highly skilled workers (U.S. Department of Commerce, 2011). The STEM workforce is the fastest growing industry in the United States. The annual salary of STEM workers is approximately \$75,000+ annually compared to non-degree jobs that pay approximately \$16,000 per year (U.S. Bureau of Labor Statistics). It is projected that 92% of STEM jobs will require some level of higher education. Advanced math and science content knowledge are critical to the success of students beyond high school to expand their career options and increase their earning power.

On a **state level**, the percentage of students rated proficient or above as measured by the NAEP 2015, is 50% at 4th grade and 39% at grade 8 in math, 42% at 4th grade and 36% at 8th grade in science. These proficiency rates were higher than the national proficiency rates and Indiana ranked fourth in the nation on 4th grade math and eleventh in the nation on 8th grade math proficiency rates as many other states saw significant drops in math proficiency rates.

On a **local level**, Indianapolis has many STEM industries including Lilly, Dow, Roche, Rolls Royce, Cummins, and Raytheon. According to Georgetown University Center on Education and the Workforce, there will be a total of 115,570 STEM jobs by 2018 in Indianapolis, which is an increase from 105,560 jobs in 2008. The Indiana Department of Workforce Development projections of future demands in STEM fields by the year 2020, indicate that there will be 401,408 STEM occupations in Indiana. It is projected that there will be approximately 7,000 new STEM jobs each year in addition to replacements and retirements, yet many of these jobs will go unfilled.

Target Community

The **target community** is the Far Eastside of Indianapolis, Indiana which includes the 46226, 46229, 46235 and 46219 zip codes. The total population is approximately 88,033 of which 50% is Caucasian, 44% is African American and 14% is Hispanic. There are 32,588 households in this community of which 36% are households with children. Twenty-three percent of the population is school age children. Approximately 46.29% of children live in poverty and 50.57 of adults ages 18 to 64 live in poverty. Approximately 21% of households are single parent families with children under the age of 18 years old. Approximately 19.38% of the population ages 25 years+ do not have a high school diploma, 34.93% have a high school diploma only, 4.48% of the population has some college, 7.07% have an Associate's degree only, and 14.14% have a Bachelor's degree or higher. There is an unemployment rate of 13.89%. Approximately 33.77% of households have an income below the poverty level. The average income per household is approximately 37,000 (Polis Center at IUPUI, 2015). Indy STEAM Academy will put education at the forefront in this community to reduce poverty by enhancing the literacy of students in this community, increasing the number of students graduating from high school, entering college, and assuming STEM jobs in the Indianapolis area, state, nation, or global workforce. The Indianapolis STEAM Academy is a great fit for this community because it will support the economic advancement of the community and a better quality of life for students and their families.

Target Student Population

The **target student population** will include children from low-income families, underrepresented minorities, and underserved students in the STEM workforce. The academy plans to open with approximately 200 students in grades K-2 and increase the enrollment each year by adding one grade level each year until it reaches maximum capacity. The Far Eastside community is ranked 7 out of 10 as a high needs area, and has a 70% service gap for students in grades K-5. This means there is a need to provide high quality education choices for parents due to the low performance of some schools in this target community (Illinois Facilities Fund, 2017). Indy STEAM Academy is committed to providing students and their families with instructional programs and services to ensure their academic success. The STEAM focus will enrich learning beyond the traditional classroom instruction focus provided in the current neighboring schools.

Community Engagement

Indy STEAM Academy Head of School has met with several community resources and has received letters of support from **IUPUI Urban Center for the Advancement of STEM Education (UCASE)**, **I-STEM Resource Network**, **Big Brothers and Big Sisters of Central Indiana**, **Community Alliance of the Far Eastside (CAFÉ) Neighborhood Association**, **Marian University Klipsch Educators College and Center for Community and School Success**, **Teach for America** and **Cummins Behavioral Health Systems**. **Cummins Behavioral Health Systems** will provide wraparound mental health services for identified students and their families. Cummins will be on site all day at least one to two days per week. **Marian University** will provide Teacher Clinical Residents who will gain teaching experience as they pursue their Master's Degree in Education. This partnership will increase our access to the teacher pool. **The Center for Community and School Success** will provide professional development and support over the first two years of operations to ensure our success. **Teach for America** will provide certified/licensed Novice teachers who are working on Master's Degrees in education. This partnership will also enhance our access to the teacher pool. **The Urban Center for the Advancement of STEM (UCASE)** will provide mobile resource science labs, graduate students to help students in the afterschool tutoring and homework help programs, and assist classes with service learning projects; work with the academy to develop a STEAM summer camp program, and provide continuing education for teacher certification renewal, or training with math and science content areas. **The I-STEM Resource Network** will provide professional development and support for teachers with the implementation of the Indiana Science Standards and the use of science kits to support physical, earth, space, and life sciences instruction. **The Big Brothers Big Sisters of Central Indiana** will provide mentoring for students and support the school-wide implementation of the "Character Counts" character education program and social skills development of students. **The Community Alliance of the Far Eastside (CAFÉ) Neighborhood Association** will assist with community outreach and support for parents to meet the needs of students in the school community. CAFÉ has been very instrumental with providing a meeting space for our Board of Directors and a contact list of community pastors to seek support with reaching out to parents in their church congregations. The Head of School visited several Head Start and Preschool programs on the far eastside and spoke with parents to determine their interest in a STEAM curriculum. Indy STEAM Academy received overwhelming parent responses to our curriculum and instructional model as an educational choice for their children. Based on responses: 60 parents signed Letters of Intent to Enroll their children on site; We conducted a survey in the community and 15 parents were "Very Interested" 15 parents were "Interested" and 2 parents responded "Maybe". Indy Steam Academy will continue to provide follow-up responses via email for all parents who expressed an interest in our Academy. Community meetings and focus groups will also be conducted in the upcoming months at local churches, public library, and apartment complex clubhouses to solicit parent interests in the academy and to gather feedback or input regarding desired programs and services for the academy. The website for the academy has been developed (visit www.indysteamacademy.org) and will serve as a digital resource to connect with parents and the community.

Education Plan/School Design

The Indy STEAM Academy will provide a traditional school year of 180 full-days of student instruction and an extended 7-hour school day, which is two hours above the State requirement of a 5-hour school day. This is a total of 360 additional hours of instruction, which equates to a total of an additional 72 days of instruction per school year. Daily instruction will include 90-minute blocks of reading, math, and STEM instruction each day. Art, music, physical education and library will be 60 minutes which coincides with teacher plan periods. Health and Wellness and Social Studies and Charter Education curriculum will be 60 minutes which rotates every two days. There will be an hour of afterschool activities which include tutoring (three days per week), daily homework help, and daily extracurricular activities such as instrumental, drama, dance, choir, athletics, Lego, and robotics. Fall, Winter, and Spring Breaks will be two weeks which are embedded in the academic calendar year. Identified students will participate in a three-weeks summer school program, and enrichment programs will include STEM camps and competitions.

Instructional Model

Indy STEAM Academy will provide a rigorous **standards-based curriculum** to ensure that students are prepared to take advanced coursework in high school and college. Multiple layers of support for new and beginning teachers will

be provided including STEAM and Literacy Coaches, Lead Teacher Mentors at each grade level and ongoing professional development. Teachers will work with their grade level team leaders, and STEAM/ Literacy coaches to plan their instruction using curriculum maps and pacing guides that align the curriculum with the standards. Teachers will deconstruct the standards to determine what they need to teach, and what students will know and be able to do as a result of the lesson. Indy STEAM Academy will set **high, yet attainable performance goals** to ensure the academic success of all students. Teachers will use data from diagnostic, formative, and summative assessments to determine what students already know about content and create rigorous highly effective lessons. Teachers will use quarterly benchmark assessments to monitor student learning and differentiate instruction during small group reading and math instruction. Teachers will use evidence-based instructional strategies that build a deeper understanding of content through the practical application of skills using authentic and relevant learning activities that enhance critical thinking and problem-solving skills.

Learning Environment

Classrooms are student-centered where the teacher serves as a “facilitator” of learning. During reading and math instruction, the teacher provides whole group, flexible small groups, paired, and independent work instruction. During the STEM block of instruction, students work in learning teams and collaborative groups that rotate each quarter. This model builds students’ self-confidence and encourages them to take ownership for their learning by completing design challenges from start to finish. This model develops critical thinking, creativity, collaboration, communication, team building, and respect for diverse or alternative viewpoints needed to be effective in a STEM workplace. Indy STEAM Academy will develop **Academic, Behavior, and Career Pathway (ABC) Plans** at the beginning of the school year with the students and their parents during the orientation time. Academic, Behavioral and Career Pathway Goals will be established to ensure the success of each student based on needs addressed by parents and students with the input from their teachers to help them to become well-rounded and productive members in our learning environment.

Class Size and Structure

The minimum class size will be 18 students and the maximum class size will be 25 students per classroom. The projected enrollment is 200 students grades K-2 for Year 1. There will be three teachers at grades K-1 and two teachers at grade 2. Teacher assistants will work with a pair of teachers at each grade level. Additional teachers and teacher assistants will be added each year as students transition to the next grade level.

Instructional Strategies

Project Based Learning. This hands-on instructional approach is integrated with the science inquiry approach. Students work in learning teams or collaborative groups that rotate each quarter during the STEM Instructional block. Projects are provided using Science and Engineering Modules from Project Lead the Way and Engineering Is Elementary that are aligned with core science concepts. Each grade level has specific science and engineering concepts to investigate. The project is framed by meaningful problems to solve or questions to answer. Students engage in a rigorous, extended process of asking questions, finding resources, and applying information across content areas. Students give, receive, and use feedback to improve their design process and design models. Students present their work to their classmates at STEAM assemblies and to parents at STEAM family night activities. Research suggests that project based learning and hands-on activities engage students with learning, helps students make connections with new knowledge, increases retention of information, improves students’ attitudes towards learning, and fosters a sense of accomplishment when projects are completed which makes these instructional strategies a good “fit” for the targeted population.

21st Century Learning. This instructional approach fosters a broad set of knowledge, skills, work habits and character traits that are critical to the success of students in the STEM workplace. Students learn the 4Cs - critical thinking, communication, collaboration, and creativity which are fostered through the integration STEAM. Students develop positive mindsets about learning and take responsibility for their learning.

Science Inquiry Approach. This instructional approach is integrated with the project-based learning approach. Students work in learning teams to solve research problems during the STEM Instructional block. The I-STEM Resource Network provides science kits for experimentation with Physical, Life, and Earth/Space concepts. Students gain scientific knowledge by observing making predictions, performing investigations and experiments, testing predictions with multiple trials, collecting data, evaluating investigations, and communicating their findings.

Engineering Design Process. Teachers guide students through the five-step approach to plan and construct their design models: Students read stories about real-world problems to engage them in the design process:

ASK: What is the need or problem? How have others approached it? What are your constraints?
IMAGINE: What are potential solutions? Brainstorm ideas. Choose the best one.
PLAN: Draw a diagram. Make lists of materials you will need.
CREATE: Follow your plan and create a prototype. Test it out!
IMPROVE: What works? What doesn't? What could work better? Modify your designs to make it better. Test it out! Evaluate the design.

The engineering design process fosters critical thinking, creativity, communication, collaboration, and team building skills. Students take responsibility for developing a model from start to finish. Student use technology to plan their models and to create their presentations.

Vision for Growth

The **vision for growth** of the proposed Indianapolis (Indy) STEAM Academy is to provide a K-8 public charter school on the far eastside of Indianapolis starting July 30, 2019 with a projected enrollment of 200 students grades K-2. The academy will grow its enrollment each year by adding one additional grade level until it reaches eighth grade and a maximum capacity of 650 students. Indy STEAM Academy understands the research on the national phenomenon of the “Middle School Drip” where students, especially girls lose interest in science and tend to drop out of STEAM programs at the end of their middle school years (Williams, 2017). To combat this phenomenon, the academy desires to maintain its students by creating a STEAM High School in year 7 to ensure that its students remain in the STEAM pipeline for college and careers in the workplace.

Governance and Leadership

Indianapolis STEAM Academy Board of Directors will maintain oversight of the operations of the academy, including but not limited to: mission and vision of the academy; academic performance; implementation of the academy’s educational model and curriculum; policymaking; business; finances; human resources; and vendor selection and accountability. The Founding Board of Directors will bring a diverse range of skills and expertise needed to support a high-performing academy including organizational management; curriculum, instruction, and assessments; marketing, recruitment and community engagement; business and financial management and philanthropy; facilities management and compliance. Below are some of the ways in which the Board of Directors will help ensure a high-quality educational experience for students:

- Hold monthly board meetings;
- Develop a Strategic Plan that focuses on the goals of the academy;
- Review and approve annual budgets, and quarterly receipts and expenditures;
- Establish and oversee policies to ensure effective academy operations;
- Provide feedback on student academic performance results and State accountability;
- Perform annual evaluation of the academy Head of School (Superintendent/Principal);
- Advocate on behalf of the academy through fundraising, marketing, and community partnerships;
- Support the success of the school, using their expertise and networks; and
- Participate in professional development to ensure effective governance

The Board of Directors has full confidence in its CEO/Founder/Head of School. Dr. Bullock has 35 years of experience in education and has served as a teacher, school administrator, and district executive including superintendent. Dr. Bullock’s passion for teaching and learning is inspiring. Dr. Bullock is highly qualified and capable of addressing all aspects of school leadership and will ensure that this model is implemented with fidelity.

SECTION I: EVIDENCE OF CAPACITY

APPLICANT GROUP

1. Founding Board of Directors.

The **Founding Board of Directors** is comprised of six professionals who are respected in the community and have a diverse portfolio of expertise needed to provide governance and oversight for the academy to ensure its success. The Board of Directors will uphold the mission and vision of Indy STEAM Academy to provide rigorous integrated core content knowledge through hands-on learning experiences that will prepare K-8 students on the far eastside of Indianapolis for high school, college, and careers in STEM fields. The Board of Directors are committed to the academic success of students and the community they will serve. Key members of the applicant group are:

Yvonne Bullock: Ex-Officio of the Board. CEO, Founder, and Head of School.

Yvonne Bullock holds a Doctorate Degree in Educational Administration and Leadership from Ohio University, Master's Degree in Curriculum and Instruction from the University of Cincinnati, and a Bachelor's Degree in Elementary Education with a minor in Piano from the University of Cincinnati. Dr. Bullock has over 35 years of experience in education and has served as a classroom teacher, assistant principal, principal, Assistant to the Director for School Improvement, Director for Teaching and Learning, Executive Director for Curriculum and Instruction, and Superintendent. Dr. Bullock's experiences with curriculum, assessments, academic achievement, school turnaround, parent and community engagement, grant writing, and administrative leadership in a variety of school settings will be an asset to Indy STEAM Academy.

Tanya Peterson Mack: President of the Board. Chair of Governance and Development

Tanya Peterson Mack holds a Master's of Arts Degree in Management from Antioch University and a Bachelor's Degree in Chemical Engineering from Tuskegee University. Tanya serves as the Supply Network Operations Manager with Procter and Gamble. Tanya's experiences with engineering, marketing, manufacturing, consumer product research and development, organizational management, grant writing and philanthropy and as a small business owner will be an asset to the Indy STEAM Academy Board.

Kamia Jackson: Vice-President of the Board. Chair of the Marketing and Recruiting Committee and Member of the Academic Achievement and Accountability Committee.

Kamia Jackson holds a Master's Degree in Business Administration from Indiana Wesleyan. Kamia's service with higher education at the University of Phoenix and Martin University, and experiences with strategic planning, academic program development, program evaluation, staff professional development and evaluation, community service, and previous board work will be an asset to the Indy STEAM Academy Board.

Brandon Warren: Board Director. Chair of the Academic Achievement and Accountability Committee, Member of the Climate and Culture Committee, and Member of the Recruitment and Retention of Highly Qualified Teachers Committee.

Brandon Warren holds a Master's Degree in Educational Leadership and a Bachelor's of Science in Elementary Education. Brandon serves as a lead teacher/instructional coach with the Indianapolis Public Schools. Brandon's experiences with curriculum, instruction, assessments, analysis of data, Response to Intervention (RTI), mentoring and professional development will be an asset to the Indy STEAM Academy Board.

Keith Wilson: Treasurer of the Board. Chair of Finance Committee; Co-Chair of the Governance Committee, and Member of the Facilities Committee.

Keith Wilson holds a Master's Degree in Business Administration, Financial Planning and Management from Regent University. Keith works with the Department of Defense Finance and Accounting Services. Keith's experiences with finance and accounting, business operations, project management, asset management, retirement plan management, and insurances will be an asset to the Indy STEAM Academy Board.

Davita Johnson: Board Director. Chair of the Facilities Committee, Member of the Finance Committee and Culture and Climate Committee.

Davita Johnson holds a Master's of Science Degree in Management and a Bachelor's of Science Degree in Science Construction, Engineering, Management and Technology and from Indiana University Purdue University Indianapolis and is OSHA certified. Davita serves as a project manager for Shrewsberry & Associates. Davita's experiences with project management and oversight, budget management and costs estimation for construction projects, and volunteer community service will be an asset to the Indy STEAM Academy Board.

Pamela Grant-Taylor: Board Director. Chair of Climate and Culture and Member of the Academic Achievement and Accountability Committee.

Pamela G. Grant-Taylor holds a Doctor of Jurisprudence from Indiana University Robert H. McKinney School of Law, a Master's of Science Degree from Indiana University Purdue University at Indianapolis (IUPUI) in Secondary Education Curriculum and Instruction, and a Bachelor of Science Degree from Purdue University in Chemical Engineering. Pamela's experience as an Attorney, Deputy Public Defender, Adjunct Instructor along with her knowledge of curriculum, instruction, and chemical engineering will be an asset to the Indy STEAM Academy Board.

2. Founding Board of Directors Qualifications and Experience

The table below highlights the qualifications and experiences of the Founding Board of Directors with establishing a high-quality public charter school in Indiana and their abilities to assume stewardship of public funds.

Founding Members	Governance Roles	Qualifications and Experiences
Yvonne Bullock	CEO, Founder, and Head of School, Ex-Officio of the Board	School Leadership, Administration, Governance, Curriculum, Instruction, Assessment, Financial, Business, Human Resources, Performance Management, Parent and Community Engagement, Facilities Management, and School Legal Compliance.
Tanya Peterson	Board President	Governance, Financial Business, Performance and Operations Management, Parent and Community Engagement, Marketing, Recruiting, Branding, and Fundraising.
Kamia Jackson	Board Vice-President	Governance, Higher Education Administration, Curriculum, Instruction, Performance and Operations Management, Community Engagement, Marketing, and Recruiting, and Human Resources
Brandon Warren	Board Secretary	School Leadership, Administration, Curriculum, Instruction, Assessment, Performance Management, Parent and Community Engagement
Keith Wilson	Board Treasurer	Governance, Financial, Business, Performance and Operations Management, and Facilities Management.
Davita Johnson	Board Director	Facilities Management and Legal Compliance, Performance and Operations Management, Parent and Community Engagement, and Curriculum and Instruction.
Pamela Grant-Taylor	Board Director	Legal Compliance, Curriculum, Instruction, Assessment, Performance Management

The attorney for the academy is Howard Stevenson from Stevenson Legal Group, LLC. Howard Stevenson has 25 years of experience as an attorney and experience as a Board of School Trustee and President of the Board for the Hamilton Southeastern School District. Attorney Stevenson prepared Articles of Incorporation and 501 (c)(3) non-profit status for the academy.

3. Resumes

Full resumes of the Board of Directors and Head of School are provided in **Attachment 1**.

GOVERNANCE STRUCTURE

4. Size and Composition of the Governing Board

Indy Steam Academy currently has a team of six committed founding members with diverse expertise who serve as governing Board of Directors. The team has worked collaboratively with the CEO/Founder to develop the charter school proposal that aligns the mission and vision of the academy with the needs of the community and targeted student population. The founding team has established governance structures to ensure effective oversight of the academy that supports high student academic achievement and financial controls to ensure sound management of public funds, fiscal stability, and program sustainability. The Bylaws suggests a range of a minimum of five (5) and a maximum of nine (9) Board members. Once the academy is authorized, the Board Directors plan to seek two additional members to help the academy accomplish its goals. The Statements of Economic Interest and Conflict of Interest forms for each Director responsible for oversight of the academy are provided in **Attachment 2** (Exhibit C).

Roles and Responsibilities of the Governing Board

The Board of Directors participated in training provided by Marian University Center for Schools and Community Success to understand their roles and responsibilities as a governing board. The Board of Directors have reviewed documents such as “Board Structure: A Guide to Bylaws, Officers, Committees, Responsibilities and More for Exceptional Charter Schools” and “Board Meetings: A Guide for Charter Schools” by Marci Cornell-Feist. Board Directors diligently accept their roles and responsibilities to ensure effective governance and oversight of the academy including: Establishing the mission and vision of the academy; creating the job description of for the Head of School; hiring and evaluating the Head of School; developing academic and non-academic goals for the academy; establishing policies to enhance day-to-day operations of the academy; approving preliminary and annual budgets; approving revenues and expenditures; approving vendors and service contracts and agreements; participating in training to enhance governance and oversight; and conducting Board self-evaluations.

Role and Responsibilities of Board Officers

In addition to the books provided by Board on Track, Board Directors have job descriptions that identify their roles and responsibilities as Board Officers. Board Directors have worked as a team for almost a year now and have faithfully assumed their roles and responsibilities as described in the chart below:

Board Officers	Role and Responsibilities
President	<ul style="list-style-type: none"> • Works with the CEO, other Board officers, and committee chairs to develop the agenda for board meetings; and presides at all board meetings; • Serves as the Ex-Officio of all standing committees; • Appoints Ad Hoc committees and focus groups; • Ensures effective and efficient communication between committees and the Board; • Oversees the implementation of board and organizational policies; • Ensures that appropriate administrative practices are established and maintained; • Ensures an effective system for the hiring and evaluation of the Head of School; • Reviews the operation effectiveness and sets priorities for further development; • Works in conjunction with the governance committee to manage the development of the Board; • Represents the Board in the community and at academy events and activities; and • Assumes major role in fundraising activities.
Vice-President	<ul style="list-style-type: none"> • Discharges the duties as required in the absence of the President; • Works with the President to assist in developing the agendas for meetings; • Advises the President on appointing volunteers and key committee chairs; • Supports and challenges the President in his/her responsibilities to address organizational priorities and governance concerns; • Represents the Board in the community and at academy events and activities when the President cannot attend; and assumes other duties as delegated by the President.

Secretary	<ul style="list-style-type: none"> • Provides direction for keeping legal documents including minutes of all meetings of the Board. • Certifies and keeps the original or copy of By-Laws as amended or otherwise altered up-to-date • Records the minutes of all meetings of the Board and meetings of committees. Minutes will record the time, and place of the meeting, the type of meeting (regular or special), how the meeting was called, how the notice was given, the names of member present or represented at the meeting and the proceedings thereof; • Presents all minutes of the meeting to the board for approval; • Ensures that all notices are provided in accordance with the By-Laws or as required by law; and • Ensures the keeping and posting of meeting minutes according to Public Access laws.
Treasurer	<ul style="list-style-type: none"> • Serves as the Chair of the Finance Committee; • Provides direction for the financial management of the academy; • Provides direction for the oversight of the academy's record keeping and accounting policies; • Ensures the presentation of timely financial reports to the Board; • Oversees the development and review of financial policies and procedures adopted by the Board; • Ensures that assets are protected and invested according to Board policy • Leads the Board in assuring compliance with federal and state financial reporting requirements; • Presents recommendations of the auditor to the Board for approval; • Plays a major role in fundraising activities; and • Takes responsibility with assessing the financial health of the academy.

GOVERNING PROCEDURES

Standing Committees

Standing committees are an essential function for effective operations of the charter school. Board Bylaws provide guidelines for how committees will function. The Board President in collaboration with the CEO/Head of School appoint committee chairs. The Board President and CEO/Head of School are ex-officio members of all committees except for the governance committee. Indy STEAM Academy has five main standing committees as identified in the chart below:

Board of Director Committees	Descriptions
Academic Achievement and Accountability	To ensure the academic achievement of all students and with accomplishing the academic and non-academic goals of the academy.
Climate and Culture	To ensure a safe, nurturing, engaging, and collaborative school environment.
Governance and Development	To ensure the effective governance of the board. Facilitates the development of the strategic plan. Plans board trainings and facilitates board self-evaluations. Facilitates the evaluation of the CEO/Head of School. Plans board fundraisers.
Finance	To ensure a stable and sustainable fiscal health of the academy
Facilities	To ensure that a facility is secured that will accommodate the needs of staff and students and support effective implementation of the instructional model.
Ad Hoc Committees	Descriptions
Marketing, Recruitment, and Enrollment of Students and Non-Certified Staff	To ensure marketing and branding of the academy, to recruit qualified non-certified staff and recruit students to achieve the staffing and enrollment targets.
Recruitment and Retention of Highly Qualified Teachers	To ensure the recruitment and retention of highly qualified certified staff, to achieve staffing targets, and establish effective human resources onboarding processes during the planning phase of the academy. This committee will be dissolved once the school opens and staff are hired to participate on the Recruitment and Retention committee.

Standing committees are chaired by a Board Director. Committee chairs recruit their committee members. Committee members may include non-board members as well as board members. Committee chairs coordinate committee dates with the CEO/Head of School, establish agendas for committee meetings, make sure that minutes are recorded, distribute materials needed for their meetings, provide reports of committee meetings at monthly board meetings and make recommendations for Board actions. The Board President appoints temporary Ad Hoc committees and/or task forces as needed. The Board has two ad hoc committees to assist with recruitment and marketing efforts to support the CEO/Founder/Head of School until staff can be hired to serve on these committees. The Head of School has identified several retired teachers to serve on the recruitment of staff committees.

Meetings

The Board of Directors have met monthly since its inception August 2017. The Board of Directors usually meet the second Tuesday of each month at 6:00 PM at various locations including Ivy Tech Community College, Public Library, Community Alliance of the Far Eastside (CAFÉ) office and Township Offices. Subcommittees meet monthly or as needed as determined by subcommittee chairs. The Board of Directors have also conducted study sessions to carefully review and revise the charter school application. The CEO/Founder/ Head of School provides Weekly Updates for the Board Directors to keep them abreast of the progress with the development and charter plans and communication with community partners and service providers. Current Board meetings focus on planning and development of the Charter School.

Board Agenda Outline: *Call to Order, Roll Call, Action Items, Subcommittee Reports, CEO/Founder//Head of School Report, Discussion Items, Next Steps, Adjournment*

The Secretary of the Board documents discussions, actions and reports during meetings and provides minutes of meetings within five days after the meeting, distributes the minutes to all Board members, and retains minutes in the Board files. Once the academy is authorized, the Board will place all Board meeting dates, agendas, and minutes on the academy's Website. After the planning phase of academy, the focus of meetings will be geared toward the implementation of the budget plan, instructional model, and achieving the academic and non-academic goals of the academy to ensure its success.

Board of Directors Meeting Dates

Public Access Laws

The Board of Directors will comply with Indiana Public Access Laws by notifying the Indianapolis Star Newspaper at least 48 hours (excluding weekends and legal holidays) in advance of meetings once authorized; posting the notice of meetings at the entrance of the academy, posting a notice on the academy's website and on the authorizer's website; holding meetings in public; allowing the public to attend meetings except when the Board is in executive session; requiring at least a quorum of members to be physically present at the location where the meeting is conducted; and making copies of the minutes and other non-privileged documents available upon request and on the academy's website.

5. Advisory Councils

Indy STEAM Academy aims to create a positive school culture that promotes community and family engagement to accomplish the mission and vision of the academy. The academy will establish two advisory councils:

STEAM Community Advisory Council (SCAC)

The **STEAM Community Advisory Council** will be comprised of approximately 10 key community stakeholders including representatives from businesses, higher education institutions, social and civic organizations, community leaders, and representatives from established community partners. The SCAC will meet once per quarter to provide feedback to enhance the academic performance, culture, and climate of the academy. The SCAC will provide resources including monetary and/or in-kind resources including mentoring, career fairs, job-shadowing, industry

tours and college tours; help with fundraising projects, community service projects, and assist the academy with networking to solicit other community partnerships and resources to support the implementation of the STEAM instructional model and accomplish the academic and non-academic goals of the academy.

STEAM Parent Advisory Council (SPAC)

The **STEAM Parent Advisory Council** will serve as the official representative for parents and will be charged with understanding parent concerns and interests. SPAC will be comprised of two parents from each homeroom at each grade level to serve in this advisory capacity. We realize that parents are students' first and most impressionable teachers, so the academy is committed to establishing a viable relationship with parents to actively engage them in the facets of our instructional program to ensure the success of all students. SPAC will provide feedback and support with instructional and extra-curricular programs, fieldtrips, and fundraising. We also believe that parents are more effective in supporting the goals of the academy, if they know more about the academy and have spent some time in the building supporting the school's work. All parents will be asked to sign a contract committing at least 12 hours (3 hours per quarter) of volunteer work throughout the school year. Both advisory councils will participate in focus group sessions with the Board of Directors for the development of the strategic plan and participate in end-of-the-year surveys, which will be used to gauge the attitudes and perceptions of constituents. These advisory councils will report to and be led by the CEO/Head of School.

GRIEVANCE PROCESS FOR PARENT AND STUDENT COMPLAINTS

6. Grievance Process

It is the desire of the Indy STEAM Academy to resolve any complaints in a fair and prompt manner. Prior to the initiation of a grievance, the parent or student will discuss the concern/problem with the person directly involved in an attempt to resolve the problem. If the matter is not resolved, the matter shall be presented in writing to the Head of School using the Complaint Form and follow the resolutions steps are identified as follows:

First Resolution Step: Submit a Complaint Form

The parents or student should initiate a complaint by requesting a complaint form from the officer manager, completing the form and returning it to the office manager or completing and submitting the complaint form on the academy's website. The petitioner is to state the claim, provide a detailed statement of the facts in support of the claim, and identify their desired resolution of the matter. After submitting the form to the CEO/Head of School for review, the CEO/Head of School will provide a written or electronic response acknowledging receipt of the complaint. The CEO/Founder will advise the petitioner of the grievance process and timeline.

Second Resolution Step: In-Person Meeting

The CEO/Head of School will meet individually with all parties to get a clear understanding of the complaint. The CEO/Head of School may determine that it is necessary to meet with both parties involved (if applicable) to resolve the dispute and collaborate on a solution to amicably resolve the matter. The CEO/Head of School will provide a written response on the Complaint form and return it to the parent or student within five (5) business days of the initial meeting decision. If the parent or student is not satisfied with the decision of the CEO/Head of School, the petitioner may appeal to the Policy and Governance Committee (Proceed to the Third Resolution Step).

Third Resolution Step: Decision and Appeal Process

The parent or student may appeal in writing the decision of the CEO/Head of School to the Board of Directors Governance Committee. The CEO/Head of School will forward the Complaint Form with the enclosed resolution to the Governance Committee. The Governance Committee will review all information relative to the complaint and request a meeting with the complainant within (5) five business days. The Governance Committee will meet with the parent or student and any parties involved to review the complaint and shall provide a written decision to the parent or student within five business days of the meeting. If further discussion is needed to resolve the complaint, the Governance Committee may refer the parent or student to the Board of Directors or if the parent or student is not satisfied with the decision of the Governance Committee, the parent or student may appeal to the Board of Directors (proceed to the Fourth Resolution Step).

Fourth Resolution Step: Meeting with the Board of Directors

The parent or student may request to meet with the Board of Directors in Executive Session. The Board Secretary will contact the parent, student and other persons involved with the meeting date and time of the hearing. The Board of Directors has the power and duty to act as deemed appropriate to resolve the matter. The Board of Directors will work diligently to amicably resolve the matter. If the school or school governing board fails to address the grievance, or if you believe additional notification is warranted, you may contact the Indiana Charter School Board regarding your complaint at indianacharterschoolboard@icsb.in.gov. Please be prepared to complete a complaint form and to provide documentation that describes the issue and any complaint procedure you have followed with the school.

SCHOOL LEADER AND LEADERSHIP TEAM

7. School Leader /Head of School

Dr. Yvonne Bullock, CEO/ Founder will serve as the Head of School for Indy STEAM Academy. Dr. Bullock holds multiple degrees including a Bachelor's Degree in Elementary Education from the University of Cincinnati; Master's Degree in Curriculum and Instruction from the University of Cincinnati; and a Doctorate Degree in Educational Administration and Leadership from Ohio University. Dr. Bullock has worked in urban, suburban, and rural school settings. Dr. Bullock has over 35 years of experience in education and has served as a classroom teacher, assistant principal, principal, assistant to the Director for School Improvement, Director for Teaching and Learning, Executive Director for Curriculum and Instruction, and Superintendent. Some of Dr. Bullocks accomplishments as a school administrator include working with one of five schools designated as the lowest achieving schools temporarily (LAST), which had a 19% achievement rate. Over a two-year period, the school improved from 19% to 56% and received the Blue Ribbon Award. Dr. Bullock, worked with her mentor (Deputy Superintendent) to revise the District-Wide Discipline Plan, and served on the team that created an alternative school (Project Succeed) for students that were suspended or expelled from school. She has written and was awarded millions of dollars in funds for numerous grants to provide additional resources for reading and math instruction and the integration of technology for instruction. Dr. Bullock assisted one middle school and two high schools that were designated to be taken over by the IDOE after many persistent years of academic failure. The high schools improved from "F to A" status in one year. The middle school improved from "F to A" status in 9 months and was recognized by Governor Pence for these accomplishments. Dr. Bullock has made several public presentations including "Closing the Achievement Gap in the Midst of Restructuring" at the Illinois Department of Education No Child Left Behind Conference, "Closing the Achievement Gap" at the Superintendents Conference on Demographics, and "The Condition of Education in America" for the Regional Drifters conference. She serves on the Board of the Children's Policy and Law Initiative of Indiana, is a volunteer for the Center for Leadership Development, is a member of the National Alliance of Black School Educators and other educational organizations. Dr. Bullock is an active member of the Eastern Star Church. Dr. Bullock has worked in every realm of public schooling and she is capable of addressing all aspects of school leadership. Dr. Bullock's educational experiences and leadership accomplishments reflect her capacity to design, launch, and manage a high performing charter school. The resume for Dr. Bullock is included in **Attachment 2**.

SCHOOL LEADERSHIP /MANAGEMENT TEAM ROLES AND RESPONSIBILITIES

The school leadership and management team beyond the Head of School will include the following persons:

School Leadership Team	Role and Responsibilities
Assistant Principal (Hired -Year 3)	Assist the CEO/Head of school with the day-to-day operations of the school. Oversee the coaching and mentoring of classroom teachers and supports provided by coaches and lead teachers. Evaluate non-certified instructional staff.
STEAM and Literacy Coaches	Develop Curriculum Maps and Pacing Guides to support lesson planning and the implementation of the STEAM instructional model. Assist teachers with lesson planning and instructional strategies. Coach teachers, model/demonstrate science, engineering, and math lessons.

	<p>Provide informal classroom observations.</p> <p>Assist teachers with implementing assessments and analysis of data to make instructional decisions.</p> <p>Assist with planning Tier II Interventions "Success Time."</p> <p>Assist with planning instruction for students in the Afterschool Tutoring Program.</p> <p>Assist with coordinating instruction for Summer School.</p> <p>Meet weekly with the Head of School, participate in weekly leadership team meetings and monthly staff meetings.</p>
Lead Teachers	<p>Mentor new and beginning teachers (Novice and Teacher Clinical Residents).</p> <p>Meet at least 2 times per week with mentee.</p> <p>Facilitate grade level team meetings.</p> <p>Assist new and beginning teachers with classroom management and instructional strategies and non-instruction activities to acclimate to the school environment.</p> <p>Participate in weekly leadership team meetings.</p> <p>Participate in RTI Team meetings and monthly staff meetings.</p>
Director of Special Education (Hired Year 3, .25 FTE)	<p>Coordinate efforts of the Special Education team and related services.</p> <p>Facilitate Special Education Team meetings.</p> <p>Coordinate Multidisciplinary team meetings.</p> <p>Manage State and Federal Special Education reports and ensure compliance with Special Education guidelines.</p> <p>Assist Special Education teachers with completing IEP's and annual reports.</p> <p>Assist with Multi-Tiered Systems of Support (MTSS) and RTI Team process.</p> <p>Work collaboratively with CEO/Head of School and school leadership team.</p>
Business Manager	<p>Set-up financial accounting process using "QuickBooks" software.</p> <p>Manage payroll for all staff.</p> <p>Handle daily record keeping of all revenue and expenditures.</p> <p>Assist with all vendor bids for services and oversees all vendor contracts.</p> <p>Assist with ordering all supplies, materials, and equipment.</p> <p>Committee with the development of the preliminary and annual budgets.</p> <p>Provides monthly financial reports to the CEO and Board of Directors.</p> <p>Supervise Custodians, Cafeteria worker, and Technology Specialist.</p>
Office Manager	<p>Serve as the front desk office manager and perform general receptionist duties.</p> <p>Manage incoming and outgoing communication.</p> <p>Assist the Business Manager with ordering supplies, materials and equipment.</p> <p>Maintain staff workroom, handles mail and communication to and from staff.</p> <p>Assist CEO with communication and materials for Board of Directors and meetings.</p> <p>Assist with registration materials and student enrollment process.</p> <p>Maintain all hardcopy and electronic student records.</p>
Parent Coordinator and Enrollment Specialist	<p>Coordinate parent and student recruitment efforts.</p> <p>Assist parents with the student registration process.</p> <p>Conduct Parent Orientation Meetings.</p> <p>Coordinate monthly Parent meetings.</p> <p>Assist with end-of-year parent surveys.</p> <p>Serve on Parent and Community Advisory Councils.</p>
Technology Specialist	<p>Assist with the set-up and implementation of Student Information Management System.</p> <p>Assist with the installation of classroom computers and other technology equipment.</p> <p>Provide technology instruction for staff and students using hardware and software programs.</p>

8. Leadership After Authorization and Before Opening

The CEO/Head of School will lead the development of the school between the time of authorization and opening. All instructional staff will participate in professional development 10 days (July 15-26, 2019) prior to the first day of school. The proposed first full work day for teachers will be July 29, 2019, and the first day of school for students will be July 30, 2019. During this start-up and preopening planning time, Dr. Bullock will work with Management and Leadership team members identified below. The role and responsibilities of these staff members are described below and in the Start-up Plan (**See Attachment 14**). Indy STEAM Academy was awarded the Charter School Program grant in March 2018, but these funds were withdrawn by the Indiana Department of Education in June 2018 due to lack of authorization. Indy STEAM Academy to reapply for CSP grant funds to support start-up and preopening activities and pay for salaries of start-up staff. The academy also intends to apply for a grant through the Walton Foundation to assist with initial start-up costs. The academy will pursue any other resources available through foundations and STEM organizations.

Dr. Bullock/Head of School will work full-time directly after the authorization of the academy starting in November, 2018 and will work on marketing and recruitment of staff and students; soliciting additional partnerships to support the implementation of the STEAM model; soliciting bids and identifying vendors for office and classroom equipment; ordering supplies and materials for the start of school; The Head of School will work with IFF and Charter Schools Capital to prepare the school facility; conduct fundraisers and solicit donations to support programs, services and extra-curricular activities. The Head of School will participate in community events and conduct parent information and orientation meetings.

Business Manager (TBD) will work part-time prior to the opening of school starting January 2, 2019 to assist with setting up all financial accounts including payroll for record keeping and managing all revenues and expenditures of the academy. The business manager will assist with the ordering of instructional and non-instruction resources for the academy, assist with vendor bids for services, and participate in the hiring of the custodial and cafeteria staff.

Office Manager (TBD) will work part-time prior to the opening of school starting January 2, 2019 to assist with setting-up the office and school files; assist the parent coordinator and enrollment specialist with enrollment and registration forms; assist with communications to staff, parents, and community members; and assist the business manager with ordering equipment, supplies, and materials for the start of school.

Parent Coordinator and Enrollment Specialist will work full-time prior to the opening of school starting January 2, 2019 with the recruitment and marketing team to implement marketing strategies and community engagement activities to meet our student enrollment targets. The Parent and Community Engagement Coordinator will participate in community events to share information about the academy and assist with planning and implementing parent information and orientation meetings.

STEAM and Literacy Coaches will work 6 months on a stipend prior to the opening of school starting January 2, 2019 to assist with the alignment of the STEAM curriculum and Indiana Academic Standards; develop curriculum maps and pacing guides to support teachers with instructional delivery; the STEAM Coach will participate in Project Lead the Way professional development for the "Train the Trainer" model; the Literacy Coach will participate in Balanced Literacy "Train the Trainer" model; both coaches will participate in training for Instructional Coaching to support classroom modeling and demonstration lessons, observing specific teaching practices, providing supportive feedback, and providing opportunities for teachers to reflect on teaching practices. Coaches will assist with planning professional development and trainings that will begin the first two weeks prior to the start of school, and with planning ongoing professional development 10 days during the school year.

Technology Specialist will work 6 months on a stipend prior to the opening of school starting January 2, 2019 to assist with the installation of technology for office, classroom, staff, and student use. The technology specialist will assist the Parent and Community Engagement Specialist to assist with the electronic registration of students and participate in training of PowerSchool with the data entry for the student information management system, data warehouse, teacher gradebook system and parent portals.

9. SCHOOL ADMINISTRATIVE AND MANAGEMENT STAFF TO BE HIRED

The following school leaders and managers will be hired January 2, 2019. The Business Manager, Office Manager. Parent Coordinator/Enrollment Specialist, STEAM and Literacy Coaches, and Technology Specialist. Grade Level Teacher Leaders will be hired in March 2019; however, their first contractual day will not be until the first day of school for teachers.

Recruitment and Hiring Process

The academy will advertise open positions on the Teacher-Teacher.com website, provide postings at University and College Career Development Centers, in the local newspaper, Job Banks, and on the academy's website to recruit staff. The process for hiring includes the online application process. Applications for these positions should be submitted within 30 days of the posting date. Applications will be reviewed by the Interview Committee. Potential candidates will participate in an informal telephone screening process. Candidates recommended to move forward in the selection process will be invited to interview. The formal interview process will be comprised of three steps: (1) Writing Assessment where candidates respond to school related scenarios; (2) Question and Answer session where candidates provide oral responses to questions essential to their role and responsibilities, and interpersonal skill sets which are rated using a rubric; (3) Demonstration of Skills and Presentation relative to their role and responsibilities and the use of technology to support their roles which are rated using an interview rubrics. A complete background and references check will be conducted for candidates designated to move forward in the selection process. Candidates will be notified of their status in the application process within 5-10 business days following the formal interview. Candidates recommended for hire will be submitted to the Board of Directors for review and potential approval. New hires will participate in an onboarding process which includes the new employee orientation with the leadership team, review of the staff handbook, school policies and procedures, emergency plan, security and safety plan, technology equipment check-out, integration of technology (emails, passwords for student information system).

The following school documents will be distributed during onboarding and orientations:

Parent and Student Handbook; Teacher and Staff Handbook; School Emergency, Security, and Safety Plans; and Curriculum Maps and Pacing Guides for Instructional Staff.

10. EDUCATIONAL SERVICES

Educational Services				
Companies & Consultants	Goals	Persons Responsible	Cost of Service	Funding Source
Power School Student Information System	Provide software program and host student information system.	Technology Specialist Head of School	\$15,554	Basic State Aid
Marketing 360	Assist with the development and maintenance of the website, social media marketing and recruitment	Head of School	\$2,500	CSP Grant
Auditor	Provide annual audit and financial reports.	Business Manager Head of School	15,000	Basic State Aid
Legal Services	Assist the academy with legal needs and staff employment contracts.	Head of School	10,000	Basic State Aid
Miller Insurance Group	Provide insurance coverage to safeguard the academy, Board and authorizer from potential risks. Provide health and retirement benefits.	Business Manager	\$23,745 See quotes	Basic State Aid

BD Managed Services	Provide wireless access, network equipment devices, telephones and intercom equipment, video surveillance and door access controls.	Business Manager	\$15,000	Basic State Aid
TriNet	Provide service for payroll, direct deposits and insurance benefits	Business Manager	\$100.00 per staff	Basic State Aid
Teach for America	Provide licensed classroom teachers.	Head of School	\$4,000 per Teacher	Basic State Aid
Marian Center for Schools and Community Success	Provide consulting services to assist the academy with special education services and reporting, and state compliance reporting	Head of School	\$23,000 Service agreement	CSP Grant
Marian University	Provide licensed classroom teacher residents.	Head of School	\$3,000 per Teacher Resident	Basic State Aid
Cummins Behavioral Health Systems, Inc	Provide mental health wraparound services for students and their families.	Head of School	\$2,000 per month	Basic State Aid

1. Decision-Making Authority

Decision-making authority as it relates to key functions relative to governance and oversight provided by the governing board and management provided at the school level are clearly delineated in **Attachment 3** (Exhibit D): Governance and Operational Structure.

SECTION II: SCHOOL DESIGN

EDUCATION PLAN

Innovation

1. Unique Model

Indy STEAM Academy will brand itself as being uniquely different from traditional public, charter and local STEM schools by provided the following instructional resources and supports that contribute to a high-quality educational option for parents and students:

School Days and Extended Hours. Indy STEAM Academy will provide 180 full student instructional days of school each year with an extended **7-hour instructional school day**, which is two hours more than the state requirement and traditional 5-hour school day in some surrounding elementary schools. This additional learning time is a total of 1,260 hours and a total of 75,600 minutes per school year compared to a traditional 5-hour school day (54,000) minutes and 6-hour school day (648,000) minutes. These additional hours of instruction equate to 21,600 additional minutes of instruction (360 hours) which equates to a total 51.5 additional days of student instruction per school year.

Additional Learning Time for Science. Indy STEAM Academy will be fundamentally different from typical STEM models and traditional public schools by providing a **90-minute block** of science/engineering instruction **five days per week** which is 450 minutes of science per week and a total of 16,200 minutes of science instruction per school year. Most traditional public schools provide 30-60 minutes of science instruction two to three days per week.

Project Based Learning Approach. Students will be able to apply what they learn in the core content areas (Reading, Math, and Science) during engineering instruction. Student learning will be reimaged by providing **STEAM Design Challenges** using a **project-based approach** to learning where students read a story (or watch a video) about a real-world problem. Students work in **collaborative learning teams** to create models or prototypes of their innovations that solve problems using the engineering design five-step process. Models and prototypes will be

peer reviewed by their classmates and critiqued by engineers in their respective fields. Students may request a patent for some of their design models. Students will make presentations to the community and their families at STEAM Design Challenge Nights. Through these design challenges students will be able to make connections with a variety of engineering disciplines to make program choices for a career pathway.

Mentoring and Career Exploration. Each classroom will have an industry sponsor that provides information and materials about their company. Industry sponsors send speakers to visit classrooms to speak with students about STEM careers at their companies. Students are mentored by college student STEM ambassadors. STEM Ambassadors share information about their college experiences that support students with making college program choices. Technology industries like: Macalister (Caterpillar), Cummins, Royce, Rolls Royce, Raytheon, Lilly, Dow, Duke Energy, Citizens Water, Exxon, Apple and Microsoft, will be invited to share opportunities for students to interface with their companies through job shadowing, and “Jr. Internships” during fall, winter and spring breaks. These companies and STEM mentors will also help the academy create an annual STEAM Career Fair, where students and their families learn more about career pathways in STEM.

Integration of the Arts with STEM. Students will receive art instruction during the school day that supports them with the creation of their engineering design models and prototypes. In addition to this instruction, students will be able to participate in Visual Arts, Drama, Dance, Choir, and Instrumentals one hour after school every day during our extra-curricular programming.

Exposure to STEM Industries, Science Museums, and Competitions. The academy will brand itself by providing Industry Visits, College Tours, and Science Museum Fieldtrips during Fall, Winter, and Spring Breaks. Students will have an opportunity to visit science museums. Students will visit colleges to explore college life and STEM programs. Our students will participate in STEAM Competitions such as Robotics, Lego, Google Science, NASA Mission, ExploraVision, Samsung Solve for Tomorrow, STEM Video Games, and Coding.

ABC Plans. Indy STEAM Academy will brand itself on the promise “Every Child Will Succeed” and perform at high levels to ensure academic success. The academy will develop an Academic, Behavior, and Career Plan (ABC Plan) for all students with “wrap around” services as needed in partnership with Cummins Behavioral Health Systems. Adaptations will be made for students who have Individualized Education Plans. Individual academic, behavior, and career goals will be established with parents and students during our parent/student orientation time before the start of the school year. Goals will also be established for student behaviors to support their social and emotional well-being in addition to developing positive academic mindsets for learning. Goals will be established for transition to high school. College and career aspirations will be identified along with resources to help students maintain goals in their desired career pathways. ABC Plans will be updated at parent, student, teacher conferences.

Coaching and Mentoring for Teachers. Research suggests that “when new teachers enter the STEM classroom for the first time, they need support with the pedagogical and subject matter content knowledge to effectively implement the curriculum that is aligned with practices in the Indiana Academic Standards,” (Indiana Science Initiative, 2008). To address this concern, Indy STEAM Academy will provide multiple layers of support to help teachers with the implementation of the STEAM model.

Levels of Teachers

Levels of Support

The academy will provide **STEAM and Literacy Coaches** who are experienced master teachers with content area specialist certification who will support all teachers with the implementation of the STEAM Instructional Model. Coaches will provide demonstration (model) lessons, share instructional best practices, engage in ongoing conversations about instructional practices, and provide feedback with opportunities for teachers to reflect on their instruction during debriefing sessions. Coaches will help teachers with lesson planning and the analysis of data to make instructional decisions during their weekly grade level team meetings. The academy will use the “Train the Trainer” model by providing an opportunity for coaches to be trained during the summer. Our coaches will work on curriculum mapping, pacing, and alignment of instruction with the Indiana Academic standards six months prior to the start of school using CSP grant funds. The academy will provide **one Lead teacher at each grade level**. Lead Teachers are experienced classroom teachers with a Master’s Degree, Lead Teachers work closely with coaches to help **Novice** (new) **teachers** with implementing the instructional model. Lead Teachers **will serve as mentors** for Novice teachers to help them acclimate as new and beginning teachers and support them as they learn to juggle instructional and non-instructional responsibilities.

2. Evidence for Efficacy

STEAM Pedagogy. STEAM is an acronym for Science, Technology, Engineering, Arts and Mathematics. STEAM is the integration of these content areas while leading students through design and inquiry processes that include investigating, planning, problem solving, creating, evaluating, reflecting, and retooling design models and prototypes that solve real world problems and challenges. This process helps students make connections between what they are learning in school with their real-life environment which makes this model a good “fit” for the targeted population. One of the greatest concerns in workplace is the need to enhance creativity and innovation. The emerging STEAM pedagogy is supported by research which suggests that by adding the “A” for Art to bridge STEM to STEAM will increased student engagement, creative thinking, and innovation skills. Including the arts will help students make connections with traditional content area subjects. This learning approach helps to develop the “whole” child and helps students develop a deeper understanding of the subject matter through the practical application of skills while experiencing the joy of expressing themselves through music, drama, dance, and the visual arts.

	Science	Science is everywhere in today’s world. It is part of our daily lives from cooking, gardening to recycling. We embrace the significance of science in things we do every day.
	Technology	Technology is transforming how we learn, work and play. We live in a digital word with a global economy, so we embrace our world today and future technologies.
	Engineering	Engineering is the practical application of science, technology, and math which emphasizes how to solve real word issues using hands-on learning by designing models and prototypes ...It’s Fun and Engaging!
	Art	Fine Arts develop the imagination, creativity, and critical thinking skills of students across content areas.
	Math	Mathematics is the foundation of science, engineering and technology and helps students develop problem-solving, analysis, and reasoning skills.

Student Centered and Constructivist Approach to Learning. Student centered learning shifts the focus of instruction from the teacher to the student. Student-centered learning theory and practice are based on the constructivist learning theory which emphasizes the role of the student in constructing meaning from new information and prior experiences. This approach fosters learning by doing and encourages student to take responsibility and ownership for their learning. Students learn important communication and collaborative skills as they work in learning teams. Students learn to ask questions and complete tasks independently, students are more motivated and engaged with learning as they find solutions to real life problems.

Project Based Learning. Project based learning is implemented during the STEAM Block. This hands-on instructional approach is integrated with the science inquiry approach and engineering design process, and is embedded in the Indiana Academic Standards. Directions for facilitating learning are provided for teachers in the Project Lead the Way and Engineering is Elementary module instructional guides. Key components of project-based learning include:

- **Key Knowledge, Understanding and Success Skills** – The project is focused on critical thinking, problem solving, communication, collaboration, and self-discipline.
- **Challenging Problem or Question** – The project is framed by a meaningful problem to solve or question to answer at an appropriate level of challenge.
- **Sustained Inquiry** – Students engage in a rigorous, extended process of asking questions, finding resources, and applying information.
- **Authenticity** – The project features real-world context, task and tools, quality standards, and addresses students' personal concerns, interests, and issues in their lives.
- **Student Voice and Choice** – Students make some decisions about the project, including how they work and what they create.
- **Reflection** – Students and teachers reflect on learning, the effectiveness of their inquiry and project activities, the quality of student work, and obstacles faced during the development of the project explanations of how to overcome them.
- **Critique & Revision** – Students give, receive, and use feedback to improve their design process and products.
- **Public Product** – Students make their project work public by explaining, displaying and/or presenting it to their parents at design challenge nights and science/engineering fairs.

Engineering Design Process. This five-step process will support students with planning and constructing their design challenge models. Students ask: What is the problem? How have others approached it? What are the constraints? Students brainstorm ideas and possible solutions then choose the best solution to the problem. Students create a diagram of the model or prototype and make a list of materials they will need to create the design. Students create a plan to develop the model or prototype then test it out. Students receive feedback from their peers and engineers in the field. Students reflect on what works or why it does not work, and identify ways to make their models better then test them out again. Students learn presentation skills by demonstrating their models or prototypes to their classmates and families. Students use technology to plan and design their models and to make their presentations. The engineering design process is an instructional approach that fosters critical thinking, creativity, communication, collaboration, and perseverance. Students take responsibility for developing a model to solve a real-world problem from start to finish.

Science Inquiry Approach. Teaching science using the science inquiry approach is the cornerstone for good teaching. Students conduct experiments where they solve research problems using five steps:

- **Engagement.** The learner through observation, raises a research question; e.g., Does air take up space?
- **Planning.** The learner uses previous research and background knowledge to plan an investigation;
- **Investigating.** The learner performs guided investigation, experimentation, and observations in an attempt to answer the research question
- **Analyzing.** The learner analyzes findings, organizes the data, and makes predictions
- **Communicating.** If the conclusions do not require the learner to repeat the inquiry cycle, the learner will communicate and justify an explanation for the conclusion (answer to the question).

21st Century Learning. The P-21 Century Framework identifies skills students need to be successful in the workplace and life in general. Our instructional model will focus on the Learning and Innovation component of this framework. Learning and innovation skills prepare student for increasingly complex lives and workplaces. Indy STEAM Academy's instruction model will provide learning activities that foster creativity and innovation, critical thinking and problem solving, communication, and collaboration as they learn in their STEM Instructional Block.

Hold Academy Accountable

This innovative model will allow the Indiana Charter School Board (ICSB) to hold Indy STEAM Academy accountable for the same high accountability standards that it holds all authorized schools using the goals established for academic achievement and levels of proficiency in reading, math, and science which are set at 75% and above. In addition to proficiency measures, students will demonstrate 2-3 percentile gains for annual measurable growth targets each year. During Year One, the academy will use NWEA MAP Growth K-2 and IREAD K-2 to measure student levels of proficiency and growth. Year Two will serve as a baseline, since students do not take the State Standardized Tests (ILEARN and IREAD) until third grade.

CURRICULUM AND INSTRUCTIONAL DESIGN

1. Framework

The framework below identifies key components of the curriculum and instructional design for the academy to meet the needs of the targeted population and ensure that all students meet or exceed proficiency of the Indiana College and Career Ready Academic Standards.

Framework for the STEAM Instructional Design Model

COMPONENT ONE: ENGAGES STUDENTS FROM DIVERSE ACADEMIC BACKGROUNDS

Engaging the minds of imaginations of students from diverse academic backgrounds such as students from low-income families, minority students, and underserved students in STEM career fields. Demographic student make-up: 75% African American, 15% Hispanic, 10% Caucasian, 85% Free and Reduced Lunch, 10% Special Needs, and 15% English Language Learners.

COMPONENT TWO: INTEGRATES STEAM

Learning experiences integrate knowledge and skills from science, technology, engineering, arts, and math with a strong foundation in literacy (STEAM Instructional Block, Reading and Math Blocks). Project based learning takes place during the STEAM Block where students conduct experiments and create prototypes or models that solve real world problems. Engineering Modules provide opportunities for student to apply science and math content. STEAM Engineering Design Challenge experiences might take the form of one-class-period, one-week unit, four-week unit or quarter-long project depending upon the module and design components. The integration and practical application of content will help students from our targeted population develop a deeper understanding of concepts across content areas.

COMPONENT THREE: PROVIDES CONNECTIONS WITH NON-STEM DISCIPLINES

Learning experiences help students connect STEM knowledge and skills with academic standards from other disciplines including art, music, physical education, social studies, and health (Cross Curricular). Connections with non-stem disciplines reinforce concepts taught in core content areas and help our students retain information.

COMPONENT FOUR: PROVIDES ACADEMIC CONTENT BASED ON THE STANDARDS

Learning experiences are connected across content areas and are anchored to the Indiana Standards and focused on the big ideas and foundational skills critical to future learning in the targeted disciplines. (Standards Based Curriculum). The focus on standards will enhance the ability of our students to demonstrate proficiency and close the achievement gap.

COMPONENT FIVE: PROVIDES COGNITIVE TASKS AND PRACTICAL APPLICATION OF SKILLS

Learning experiences challenge students to develop higher-order thinking skills through processes such as science inquiry, problem solving, and creative thinking (Science Inquiry Approach AND Project Based Learning). These cognitive tasks will help our students develop a deeper understanding of content and enhance practical application of skills learned. Learning experiences require students to demonstrate knowledge and skills fundamental to the engineering design process (e.g., brainstorming, researching, creating, testing, improving, etc.). These experiences

will provide practical application of content and help students make connections with new knowledge and develop problem solving skills and solutions for real world issues.

COMPONENT SIX: PROVIDES A VARIETY OF LEARNING OPPORTUNITIES AND EXPERIENCES

Learning experiences provide opportunities for students to learn through whole group instruction, guided practice, flexible groups, paired work, learning teams, workstations, and independent practice. Learning experiences provide multi-tiered system of supports using the RTI process to enhance student achievement during the school day and through “Success Time.” Learning experiences provide opportunities to intervene after school tutoring and during summer school. Enrichment is provided during “Success Time,” after school extra-curricular activities and clubs, visits to science museums during Fall, Winter and Spring Breaks, STEM competitions throughout the school year, and summer camp outreach experiences. Our students are able to participate in learning activities and experiences that they would not normally have exposure to at home or in their immediate communities.

COMPONENT SEVEN: PROVIDES A COLLABORATIVE CLIMATE AND CULTURE

Learning experiences often require students to work and learn in collaboration with others using effective interpersonal skills (21st Century Learning Skills, Positive Behavior Interventions and Supports, Citizenship and Character Education). Our students will develop social skills and positive mindsets that enhance their learning.

COMPONENT EIGHT: IMPLEMENTS ASSESSMENTS TO MONITOR STUDENT LEARNING

Learning experiences require students to demonstrate knowledge and skill, in part, through performance-based tasks including formative, diagnostic, and summative assessments. (Assessments to Monitor Student Learning) Teachers, students and parents will be able to track and frequently monitor progress and set goals (ABC Plans) to support academic achievement and growth as measured by our state standardized assessments.

COMPONENT NINE: PROVIDES CONNECTIONS TO STEM CAREERS

Learning experiences place students in learning environments that help them to better understand and personally consider STEM careers (Extended Learning Opportunities, Career Fairs, Industry visits, Job Shadowing and College Tours). Students will have an opportunity to gain experiences outside of the classroom may not be afforded by their families.

COMPONENT TEN: INTEGRATION OF TECHNOLOGY

Learning experiences provide opportunities for students to use multiple technologies. (Examples: computer hardware and software, calculators, probes, scales, microscopes, rulers, and hand lenses to name just a few.) (Integration of Technology to Support Instruction). Students will learn how to use the internet and a variety of software programs to support their learning. The use of technology, especially computers/l-pads at school provides opportunities that some students may not have access to at home.

a) Learning Environment

Classrooms are student-centered where the teacher serves as a “facilitator” of learning. During reading and math instruction, the teacher provides whole group, flexible small groups, paired, and independent work instruction. During the science, technology, and engineering block of instruction, students work in learning teams and collaborative groups that rotate each quarter. This model builds students’ self-confidence and encourages them to take ownership for their learning by completing design challenges from start to finish. This model develops skills such as critical thinking, creativity, collaboration, communication, team building, and respect for diverse or alternative viewpoints needed to be effective in a STEM workplace.

b) Class Size and Structure

The minimum class size will be 18 students and the maximum class size will be 25 students per classroom. The projected enrollment is 200 students grades K-2 for Year 1. There will be three teachers at each grade level K and 1 and two teachers at grade 2. Seventy-five new students and three additional teachers will be added each year as the academy grows organically and students transition to the next grade level. There will be paraprofessionals assigned to each grade level team to assist classroom teachers with instruction and ensure that all students demonstrate proficiency on NWEA benchmark assessments and IREAD/ILEARN state standardized assessments.

Contingency Plan A: If in the event there are only 10-12 students for a given class, it will be the decision of the Head of School to combine students by grade spans (for example combine grades 1-2) to make a full class or use Title II funds (within guidelines) for Class Size Reduction purposes to accommodate the smaller class size. The number of teachers may be reduced, if there are not enough students to make a full class. To avoid losing a teacher, that teacher may serve as the Long-term Substitute teacher until a class is full. The Head of School will also use the wait list to create full classes. All classes will be balanced by September 15th (count day) of a given school year.

Contingency Plan B: If in the event there are more than 25 students assigned to a class, but not enough students to make a new full class, it will be the decision of the Head of School to use Title II funds for Class Size Reduction to create smaller class sizes than the proposed minimum. The wait list may be used to make a full class.

c) Curriculum Overview

Balanced Literacy. Teachers will provide 90 minutes of reading/language arts instruction each day. During this block of time, teachers will provide direct, explicit, and modeled instruction with whole groups, guided practice instruction with small groups during guided reading time, and collaborative learning during shared reading instruction and independent reading practice. Components of the balanced literacy block: word study, read aloud, shared reading, guided reading, independent reading, and writing. Other learning opportunities during the literacy block include learning centers and computer assisted reading instruction. The academy will use Houghton Mifflin Journey's series as its core language arts program. Our balanced literacy curriculum builds a strong foundation for reading by focusing on the essential elements of reading: phonemic awareness, phonics, vocabulary, text comprehension, fluency, spelling, writing and grammar with the integration of critical thinking, listening, speaking, reading and writing skills that prepare students to progress from learning to read to reading to learn for a lifetime.

Balanced Mathematics. Teachers will provide 90 minutes of math instruction each day. During this block of time, teachers will provide direct/modelled instruction with whole groups, guided practice with small groups, collaborative learning with shared math activities and independent practice worktime. Additional learning opportunities include working in math learning centers and using computer assisted instruction. The academy will use the Pearson enVision math as its core instructional program. Our curriculum will provide a strong foundation in elements of math knowledge such as: number sense and numeration, operations and computations, patterns and functions, data and probability, measurement, geometry, and algebra. Our instruction will help students develop a deeper understanding of math concepts through practical application using real life situations and activities that are integrated with project design challenges and development of authentic engineering models.

Science, Technology, and Engineering. Teachers will provide 90 minutes of science and engineering instruction with the integration of technology to support instruction and student learning. Teachers will provide whole and small group instruction where students are organized in collaborative learning teams while they work on grade level content modules to develop a deeper understanding of concepts through hands-on, practical application of knowledge to solve real world problems and challenges by creating authentic models. A sample integration of science and engineering concepts is provided in **Attachment 4: Curriculum Scope and Sequence**.

Science Curriculum. (FOSS, Indiana Science Initiative/ I-STEM Resource Network) will focus on physical, earth, space, life, environmental science concepts. Students gain scientific knowledge by observing the natural and constructed world, performing and evaluating investigations, communicating their findings, and sharing their models.

Engineering Curriculum. (Project Lead the Way and Engineering is Elementary) will focus on chemical, mechanical, electrical, and biomedical engineering concepts organized in learning modules by grade levels. Teachers provide design challenges where students work in learning teams to create solutions to real world problems and issues. Students use the engineering design process to create design models. Students take ownership for their learning by completing projects from start to finish. The academy will use Project Lead the Way and Engineering is Elementary to implement this curriculum. Engineering modules provided with these programs are aligned with the physical, life earth and space, and computer science concepts.

Project Lead the Way (PLTW). Teachers will implement PLTW during the 90 minutes STEM Instructional Block. Indy STEAM Academy will partner with Project Lead the Way to provide the Launch (Grades K-5) and Gateway

(Grades 6-8) programs. Project Lead the Way captures the curiosity of students and engages them in hands-on activities that build knowledge and skills in the areas of computer science, engineering and biomedical science. These programs help students develop skills such as problem solving, critical and creative thinking, communication, collaboration, and perseverance to be successful in high school, college, and careers. Project Lead the Way has leading Modules that guide instruction at each grade level that are aligned with the academic standards.

Engineering is Elementary (EiE). Teachers will implement Engineering is Elementary (EiE) during the 90 minutes STEM Instructional Block. Engineering is Elementary is a nationally recognized engineering curriculum developed by the Boston Museum of Science. This curriculum will be used in conjunction with the PLTW to ensure that there are enough engineering activities at each grade levels from which to choose to support the design challenges each quarter. The EiE curriculum is also aligned with the Indiana Science Standards and will be implemented along with the I-STEM Resource/Indiana Science Initiative curriculum. The Engineering Design Process is embedded in the curriculum modular units (**Attachment 4**).

Technology Curriculum will focus the use and integration of technology to support instructional delivery enhance student learning. Students will have additional computer lab time (60 minutes) to learn keyboarding, email, internet use, educational websites, digital library, and coding skills. Students will use technology tools to collaborate with others, connect new information to prior knowledge, link learning to the world beyond the classroom setting, and to use their creativity for animation, video, narration, music, images, and text to support their projects and assignments. Students will have laptops or I-Pads that are assigned for use at school. Classroom teachers will have interactive whiteboards and laptops to support instructional planning and delivery, administering assessments, monitoring student progress, maintaining data to make informed instructional decisions, collaborating with colleagues, and communicating with parents.

Fine Arts Curriculum. Teachers will provide 60 minutes of Fine Arts instruction which includes Visual Arts, Music, and Library Instruction on a rotating basis throughout the week. Indy STEAM Academy will integrate the arts to support science, technology, and engineering design. The arts will stimulate and develop the imagination, foster creativity and innovation skills, and refine critical thinking, collaboration, and communication learning skills. Teachers focus on developing the “whole mind” to nurture the creative talents of students. The fine arts curriculum is aligned with the academic standards and will focus on Music and Visual Arts during the school day and Drama and Dance after school during extra-curricular activities.

Social Studies Curriculum. Teachers will provide 60 minutes of Social Studies and Citizenship/Character Education instruction three days per week. Indy STEAM Academy will integrate skills that include reading, writing, listening, and speaking during Social Studies instruction. This curriculum develops an understanding of history, the culture and traditions of real people in real places and how people work together to build communities, solve problems of the world, to develop an awareness and appreciation for diversity, develop social skills, and build character to become a productive citizen in society.

Health and Wellness Curriculum. Indy STEAM Academy will provide 60 minutes of Health and Wellness instruction two days per week. The overarching goal of school health education is to ensure that students become health literate and possess the skills and knowledge to lead healthy active lives. The Health and Wellness curriculum focuses on health promotion and disease prevention, identifying factors that influence health behaviors, identifying services and resource that promote healthy behavior, and practicing strategies that promote good health and reduce health risks. The academy will use the Harcourt Health and Fitness series to support instruction.

Physical Education Curriculum. Indy STEAM Academy will provide 60 minutes of physical education. The goal of physical education is to develop physically literate students who have the knowledge, skills and confidence to enjoy a lifetime of healthful physical activity. The academy will use resources such as the Shape America, Youth Physical Activity Toolkit, Let’s Move initiative to support instruction. Our curriculum develops physical and nutritional wellness habits that students can incorporate into their everyday lives. This curriculum emphasizes individual and life activities as well as cooperative skills through team sports, games and group activities.

d) Integration of Technology

Indy STEAM Academy will provide the cutting-edge technologies and software to tailor instruction: **Chromebooks and I-Pads:** Students will be assigned a technology tool for use during the school day. Teachers will use these resources across all content areas and students can complete and submit their assignments to the teacher. Students will use computers/I-pads to conduct research on the Internet to find information. **Smartboards:** Teachers will use Smartboards to integrate multiple information streams into a coherent lesson that is individualized for students. Interactive whiteboards provide an extraordinary opportunity to create classroom environments so the needs of students with different learning styles can be met. Teachers can provide formative assessments using Smartboards to assess student knowledge before the lesson and check for understanding during and after a lesson using interactive student response systems. Students can select their responses and receive immediate feedback from their teachers. **Computer Assisted Instruction:** Teachers will provide independent practice with reading and mathematics using programs such as Scholastic Reader where students read at their independent reading levels to build vocabulary, comprehension, and fluency skills. Teachers will use “Dreambox” for independent practice with math computations, problem solving and reasoning skills. Students will use computers to create engineering design plans and models. **3D Printers:** Teachers will be able to bring “science to life” by generating 3D models of images that normally would not be visible to the human eye. **Digital Microscopes:** Teachers will use digital microscopes to project organisms that normally would not be visible to the human eye.

e) Plan to Ensure that the School is Staffed with Highly Qualified Teachers

Recruitment and Selection. Indy STEAM Academy is committed to ensuring that highly qualified and effective teachers are placed and retained in the classroom. The academy realizes there has been a STEM Teacher shortage over the past eight years, however, great work is being done to resolve this shortage. The initiative: “1000K by 10,” is a project of the National Center for Civic Innovation which has identified over 280 academic institutions, non-profit organizations, foundations, companies, and government agencies to retain 100,000 excellent teachers over the next 10 years. This initiative has already trained 30,000 new STEM teachers in the past 4 years and funds have been established to train “tens of thousands more teachers to improve their skills and encourage them to stay in the classroom longer. The Indiana Department of Education, I-STEM Resource Network, Project Lead the Way, Teach for America, and the University of Indianapolis are local organizations that are partnering with the “Initiative 1000K by 10” to recruit, prepare and retain highly qualified teachers for STEM. The academy has partnerships established with these organizations to recruit highly qualified teachers. We will recruit teachers with a Bachelor’s Degree in Elementary Education with an Indiana Teacher’s License then provide ongoing professional development to ensure their success with the implementation of the STEAM instructional model. The Bachelor of Science with a major in Elementary Education program at colleges and universities prepares students to provide classroom learning through multiple instructional strategies, including the science inquiry process, project-based learning, and STEM initiatives. This degree program is grounded in state and national standards to prepare perspective teachers with core content knowledge and 21st century skills. Several other measures will be taken to recruit the most qualified teachers: (1) Use our IUPUI College of Education partner to create a pipeline for recruiting undergraduate and graduate students who are prepared to teach; (2) Partner with Marian University’s Educators College to create a pipeline of highly qualified teachers to implement our instructional model through the **Teacher Clinical Residency Program**. The academy will receive two Clinical Resident Teachers in Years 1 and 2, three Clinical Resident Teachers in Years 3 and 4, and four Clinical Resident Teachers in Year 5 for a total of 14 teachers over the first five years of operation. Clinical Teacher Residents have Bachelor’s degrees and are licensed to teach. Clinical Resident Teachers serve one year at our Academy then graduate with a Master’s Degree. These residents will make a three-year commitment to our Academy to ensure the retention of highly qualified teachers; (3) Partner with Teach for America that will provide a pool of highly qualified teachers; (4) Post vacancy announcements and recruit through university and college job fairs and employment placement banks. The interview team will review applications and resumes of potential candidates; conduct telephone screenings; invite qualified candidates to participate in an interview and conduct writing samples, demonstration lessons; identify finalists among candidates then conduct reference and background checks. The interview team will compile recommendations for the Board of Directors starting in February 2019 and will complete the approval process for any remaining staff no later than June 30, 2019.

Evaluation Process. Indy STEAM Academy will implement informal and formal evaluations of teachers to provide ongoing feedback to support their instruction. Daily classroom walkthroughs will be used to provide informal feedback to support teachers with instructional delivery and classroom management. Coaches will provide specific informal classroom observations to support teachers with implementing instructional strategies and core content. Teachers will have an opportunity to reflect on their teaching practices and discuss effective instruction and classroom management. The Head of School will provide formal classroom observations with evaluation feedback using the Indiana Rise Evaluation model.

Professional Development for Staff. Indy STEAM Academy will provide on-going, job-embedded professional development for all staff. Teachers will have a total of 20 professional development days during the calendar year that include 10 days of professional development before the start of the school year and 10 professional development days during the school year. Teachers will receive training with the use of our basal reading and math programs and local assessment tools from our vendors, service providers, and external partners which include: I-STEM Resource Network, Project Lead the Way, Engineering is Elementary, Balanced Literacy, Balanced Math, Positive Behavior Intervention and Supports (PBIS), Response to Intervention (RTI), Character Counts, NWEA MAP K-2 and DIBELS assessments, and technology Integration using interactive whiteboards and laptops. Indy STEAM Academy will participate in the application process to become a STEM Certified school through the Indiana Department of Education. The STEAM and Literacy Coached will provide on-going support for teachers to implementation the curriculum. Teachers with 0-3 years of experience will have a mentor and receive additional support to ensure their effectiveness. Our coaches and grade level team leaders will also assist with professional development during the school year and support grade level teams with curriculum mapping, lesson planning, administering assessments, analysis of data, and flexible grouping for Success Time.

f) Evidence-Based Supports

Indy STEAM academy will implement several supports to ensure the success of all students:

Success Time. All students will participate in “Success Time” which provides 60 minutes of flexible group Tier II intervention each day during the instructional day to address below level (remediation), on grade level (reinforcement), and above grade level (enrichment) proficiency skills of students based on academic standards for reading and mathematics to ensure that students demonstrate proficiency as measured by ILEARN, IREAD, WIDA standardized assessments and the school administered NWEA Map Growth benchmark assessments.

Resource Teachers. The Special Education Resource teacher will provide additional instruction and support for special needs students and students with exceptionalities as identified in their Individualized Educational Plans (IEPs). The Resource teacher will use a “pull-out” and/or “push-in” model of support based on the IEP. Classroom teachers will provide accommodations for learning based on the individual learning needs of students with exceptionalities. The ELL Resource Teacher will provide additional instruction and support for students who have been identified as English Language Learners to support their language acquisition using the “pull-out” and/or “push-in” model based the Las Links assessment.

Response to Intervention (RTI). RTI is a general education model to provide support for all students to ensure their academic success by differentiating instruction at three levels of intervention as described below:

a) Tier I: Classroom Instruction, Diagnostic/Formative Assessments, and Flexible Groups

The classroom teacher provides instruction based on data from diagnostic, formative, and summative assessments. In addition to whole group instruction, the teacher provides flexible small groups of instruction based on the skill levels of students. The teacher also provides independent work and learning center activities to enhance the proficiency levels of students. Students who do not demonstrate sufficient progress are moved to Tier II.

b) Tier II: Targeted Interventions provide additional instruction for small groups of students based on specific skills where students are below proficiency. The teacher monitors students' progress and provides reinforcement until they demonstrate proficiency. Students demonstrating progress return to Tier I supports, those who do not are moved to Tier III supports.

c) Tier III: Intensive Systematic Interventions provide individualized instruction that focus on a few key skills at a time to correct the skills gap using research-based instructional strategies provided by a specialist. Students who demonstrate progress return to Tier II supports, those who do not receive a comprehensive evaluation.

Positive Behavior Intervention and Supports (PBIS). The academy will implement the Positive Behavior Intervention and Supports (PBIS) framework (see Attachment 15) to maintain a positive school climate and culture. Schoolwide expectations will be established and posted in each area of the building. Expectations will be taught and reinforced daily. Positive reward systems and consequences will be reinforced every day. Behavior goals will be established for students in their ABC Plans and teachers will work closely with parents to ensure student success.

Academic, Behavior, and Career (ABC) Plan. The academy will develop an Academic, Behavior, and Career Plan (ABC Plan) to provide “wrap around” services and supports for all students. Adaptations will be made for students who have formal Individualized Education Plans. Individual academic, behavior, and career goals are established with parents and students at the beginning of the school year. Academic Performance goals will be established to ensure that students are proficient in reading, math, and science at each grade level. Goals will also be established for student behaviors to develop positive academic mindsets for learning, study skills, and social skills to be successful in our learning environment. Goals will be established for the transition to high school. College and career aspirations will be identified and resources to help students maintain their goals in their desired career pathways. The ABC Learning Plan will be updated at the end of each semester and reviewed with parents and students at conferences. The academy will use the Learn More Magazine provided by the Commission for Higher Education, Indiana Department of Education and Indiana Department of Workforce Development retrieved from <https://learnmoreindiana.org/students/k-5-students/>. Students will complete a planning checklist, explore career pathways, identify career interests and STEM jobs, learn about college, and parents will be encouraged to start a savings account for college using the Indiana College Choice 529 Savings Plan.

Parent and Community Engagement. The academy is committed to establishing a strong partnership with parents and community members. Parents and their children will meet with teachers at the beginning of the school year to develop Academic, Behavior, and Career plans. These plans will establish goals to ensure student success. Parents and community members will participate in the “Full STEAM Ahead” opening day activities. Parents will participate in four parent teacher conference days which are embedded in the school calendar. Families and community members will be engaged through monthly Literacy and STEAM family nights, science and career fairs, and other school extra-curricular activities in support of their children at home with learning. Parents will be encouraged to participate in the academy Parent Organization, volunteer time within their work limitations, and utilize resources provided by the Parent Center. Community partners will provide career awareness activities, industry visits, job shadowing, and mentoring for students and opportunities for students to participate in local, state and national STEM competitions. University partners will provide summer camp for students as an enrichment learning opportunity.

2. Instructional Strategies

The student learning experience is **reimagined** using the following instructional strategies:

Project Based Learning. This hands-on instructional approach is integrated with the science inquiry approach. Classrooms are student-centered. Activities are hands-on and students work in learning teams or collaborative groups that rotate each quarter. Each grade level has specific science and engineering concepts to investigate. The project is framed by meaningful problems to solve or questions to answer. Students engage in a rigorous, extended process of asking questions, finding resources, and applying information. Students give, receive, and use feedback to improve their design process and models. Students present their work to their classes and parents at STEAM family night activities. This learning by doing approach is embedded in the PLTW and EIE curriculums. Research suggests that project based learning and hands-on activities engage students with learning, helps students make connections with new knowledge, increases retention of information, improves students' attitudes towards learning, and fosters a sense of accomplishment when projects are completed which makes these instructional strategies a good “fit” for the targeted population.

21st Century Learning. This instructional approach fosters a broad set of knowledge, skills, work habits and character traits that are critical to the success of students in the STEM workplace. Students learn the 4C's: critical thinking and problem solving, creativity and innovation, collaboration, and communication while developing content area knowledge. This **intentional approach** can be done while reading a story and discussing the characters or

during a science experiment through the problem-solving experience. Students gain a deeper understanding of concepts, develop positive mindsets about learning, take responsibility for their learning both in and out of the classroom, and enhance their interpersonal and intrapersonal skills as they work in collaborative learning teams. This learning approach is part of the Indiana Academic Standards and STEM curriculum.

Science Inquiry Approach. This instructional approach is integrated with the project-based learning approach. Students work in learning teams to solve research problems. Indy STEAM Academy will partner with the I-STEM Network and the Indiana Science Initiative which provide science kits for experimentation with Physical, Life, and Earth/Space science. Students gain scientific knowledge by observing the natural and constructed world, making predictions, performing investigations and experiments, testing predictions with multiple trials, collecting data, evaluating investigations, and communicating their findings. This learning approach is embedded in the Indiana Science Standards and I-STEM Science curriculum.

Engineering Design Process. Teachers guide students through the five-step approach for the design process to support planning and constructing their design models:

- ASK:** What is the problem? How have others approached it? What are your constraints?
IMAGINE: What are some solutions? Brainstorm ideas. Choose the best one.
PLAN: Draw a diagram. Make lists of materials you will need.
CREATE: Follow your plan and create something. Test it out!
IMPROVE: What works? What doesn't? What could work better? Modify your designs to make it better. Test it out!

The engineering design process instructional approach fosters critical thinking, creativity, communication, collaboration, and team building skills. Students take responsibility for developing a model from start to finish. Student use technology to planning and design their models and with making presentations. This learning approach is embedded in Indiana Science and Engineering Process Standards, Project Lead the Way and Engineering is Elementary instructional modules. The curriculum outlines how to implement this process in the lesson plans for teachers to support their instructional delivery.

Differentiating Instruction

Teachers recognize that all students do not learn the same way at the same time. Teachers will differentiate instruction by using a variety of instructional strategies and providing instruction at varying levels of difficulty during reading, math and science. Teachers will provide instruction at varying levels of difficulty using flexible small groups based on skill levels as determined by informal, quarterly benchmark, and standardized assessments. Teachers will differentiate content by providing activities for groups of students using the engineering modules and while asking higher order thinking questions as student process information during science experiments using the science inquiry process and while students are planning their engineering prototypes using the engineering design process. Our instructional model provides opportunities for teachers to address varying learning styles of students as they able make decisions about how they will create their engineering designs and present their work to others. Our model provides a variety of ways for students to demonstrate mastery of content using tests, projects, reports, and presentations. Our model provides for a differentiated learning environment where students will have opportunities to work in a whole group, small groups, pairs, and independently throughout the school day.

3. Core Curriculum Scope and Sequences

The Indy STEAM Academy curriculum and instructional strategies are directly aligned with the Indiana Academic Standards. Scope and sequences are provided for core subjects grade K-8 in **Attachment 4**. Our STEAM and Literacy Coaches will work with the Head of School post authorization during the pre-opening planning phase to create Curriculum Maps and Pacing Guides that deconstruct the standards and explain what teachers will teach, and what students will know and be able to do at each grade level each quarter. An assessment calendar will be included to help teachers keep track of timelines to monitor student progress. Instructional strategies will be included as additional resources along with other supplemental resources and websites to support instructional delivery.

4. Blended Learning Operators – Not Applicable

PUPIL PERFORMANCE STANDARDS

1. Pupil Performance Standards

Indy STEAM Academy in keeping with its mission and vision, will ensure that students are prepared to take advance coursework in high school, and ultimately are prepared be admitted to college to take coursework that will prepare them for careers in STEM fields. The academy will align its curriculum with the Indiana Academic Standards and adopt the eighth-grade standards identified in **Attachment 5** as our exit promotion criteria. The Head of School and eight grade teacher team will review the ABC Plan with 8th grade parents and students. This plan will ensure the successful transition of students to middle school to high school including course selections, career pathways and colleges/universities of interest. Students will be signed up for the 21st Century Scholarship program and an academic commitment statement will be included with the ABC Plan which will follow the student to high school.

2. Promotion Policy

Indy STEAM will use the following promotion policies to ensure that every student is successful and on track be promoted from one grade level to the next. These policies will be communicated to parents and students through the Parent/Student Handbook, at student and parent orientations at the beginning of the school year, and during parent/teacher conferences. Whereas, Indy STEAM Academy is committed to the academic success of all students, we will use multifaceted approaches to support student learning through the Response to Intervention (RTI) process, Success Time, Afterschool Tutoring, and Summer School to ensure student success at every grade level. Students will demonstrate proficiency as measured by our assessments to be promoted at the end of the school year to the next grade level. The following levels of proficiency are expected:

Proficiency Levels		Grade Levels	Content Areas	Proficiency Levels	Assessments
Exceeds Standard	76-100%	K-2	Reading, Math, Science	≥70%	NWEA MAP Growth K-2 IREAD K-2
Meets Standard	75-66%	3-8	Reading, Math, Science	≥75%	IREAD 3, NWEA MAP Growth 3-8, and ILEARN 3-8
Approaching Standard	65-56%				
Below Standards	55-0%				

Benchmark assessments using NWEA MAP Growth will be administered three times per year (Fall, Winter and Spring) to monitor students' progress determine levels of proficiency. The IREAD K-2 will be administered in late Spring to determine students' levels of reading proficiency. Students in grades 3-8 will take IREAD 3 and ILEARN 3-8 state standardized assessments to determine levels of proficiency in reading, math, and science. Students grades K-2 are expected to perform at 70% or above in reading, math, and science. Students grade 3-8 are expected to perform at 75% or above in reading, math, and science. Students performing 65% or below in reading, math, or science as measured by the NWEA MAP Benchmark Assessments, IREAD K-2, 3, and ILEARN 3-8 assessments are required to participate in the following intervention services to demonstrate proficiency:

- **Success Time** - Five days per week during the school day for one hour (3:00-4:00 PM)- (All students)
- **Homework Help** - Four days per week (M-TH) for one hour (3:00-4:00 PM) (66% and above + make-ups)
- **After School Tutoring** - Three days per week for one hour (4:15-5:15 PM)- (65% and below students)
- **Summer School** - Three weeks at the end of the school year from 8:00-Noon- (65% and below students)

Students who are performing at the "Approaching Standard" range (65-56%) will not be in jeopardy of retention; however, will be required to participate in after school and summer school programs to demonstrate proficiency. Students performing at 65% or below standard will be able to retake the NEWA Spring benchmark assessments to demonstrate proficiency at the end of the Summer School program to demonstrate proficiency. Students who are performing **below standard 55% proficiency** in reading and math for **two out of four quarters of the school year** will be considered for **retention**. Students will be provided every attempt to demonstrate proficiency by participating in additional interventions services as describe above. The Head of School and with the RTI team will meet with the parent and student. The ABC Plan will be reviewed to realign goals to help the student improve. The Head of School

will make the final decision on the recommendations for the retention of students. Students with Individualized Education Plans (IEP's) will not be retained, but are expected to achieve their IEP goals each school year. Students with IEP's may participate in afterschool tutoring, homework help, and summer school programs.

Attendance requirements for promotion. Attendance is an essential component for learning and student success. Students cannot learn, if they are not in attendance to receive direct instruction. Therefore, students are expected to be in attendance every day. Students who miss 3 consecutive days without an excused absence will be referred to the Head of School. Students will be required to make up all missing assignments and participate in the Homework Help program after school to get all assignments completed. Students missing 5 days of school (excused and/or unexcused) will be referred to the Head of School who will meet with the parent and student and will be required to participate in two weeks of After School Tutoring to receive additional instruction to make up assignments. Students missing a total of 10 or more days of school (excused or unexcused) will be referred to the Head of School and will be processed through the RTI Team. A meeting will be held with the parent, student and teacher, the ABC Plan will be reviewed and goals will be realigned to help the student get back on track. Students missing 15 days or more in a given school year may be recommended for retention and will be required to participate in After School Tutoring and Summer School programs to ensure their success. Retention will also be based on level of proficiency by the end of the school year. The final decision will be made by the Head of School considering all academic factors involved.

HIGH SCHOOL GRADUATION REQUIREMENTS (High School Only) - Not Applicable

SCHOOL CALENDAR AND SCHEDULE

The School Calendar and Schedule are provided in **Attachment 6**.

SCHOOL CULTURE

1. Positive Academic Environment and Social Development

The culture of Indy STEAM Academy is rooted in our core values which are based on the **Six Pillars of Character: Trust, Respect, Responsibility, Fairness, Caring, and Citizenship** to foster a positive school climate and culture. These core values are taught to students, reflected in behavior expectations, and modeled in all interactions among the members of our school community. Building strong character is fundamental to creating a positive learning environment and school culture which is the hallmark of our Academy. We believe the classrooms are social settings where staff, students, and parents create learning communities that influence students' academic and social success. Indy STEAM Academy will implement the Character Counts program along with Positive Behavior Intervention and Supports (PBIS) to promote a positive school climate and culture that reinforces student intellectual and social development. Positive Behavior Intervention and Support provides a framework for expectations and procedures to create a safe, nurturing and respectful learning environment. This framework will be explained further in the Discipline section of this application (**See Attachment 8**). The Character Counts program provides activities that instill the core values of the academy. These evidence-based strategies support the academic, social emotional, mindsets and character traits to help students reach their academic potential and be successful in school. The Character Counts program is implemented schoolwide by focusing on one trait bimonthly. Teachers will provide instruction and students will participate in classroom and/or schoolwide activities that reinforce each theme to learn how to apply these core values to their daily lives. Providing social skills instruction and reinforcing expectations and procedures each day will strengthen relationships among students and staff and will reduce or prevent problems from occurring. The Character Counts Theme of the Month will be introduced on the first day of school during our morning announcements and reinforced in our first day of school student assembly. The Parent/Student Handbook will include the PBIS Framework, Character Counts Traits Matrix and a Parent Compact which will be signed by the student, parent, and teacher at the beginning of the school year. Banners and signs will be displayed throughout the school to reinforce a positive school culture and climate. We believe in celebrating the successes of our students and staff and honoring them for displaying these character traits with our "Student of the Month" and "Teacher of the

Month” activities where one student from each classroom is recognized and one teacher is selected by students to be recognized each month. The academy will implement school spirit days on Fridays to foster a sense of pride, belonging, self-confidence, self-discipline, and ownership for learning.

Positive Behavior Interventions and Supports (PBIS)

The academy will implement the Positive Behavior Intervention and Supports (PBIS) framework (see Attachment 8) to maintain a positive school climate and culture. The academy has established clear expectations for behaviors within the school environment in order to support the learning community. These behaviors fall into three categories: **Respect, Responsibility, and Safety**. These expectations contribute to a positive learning environment where students are able to grow socially and succeed academically. Schoolwide expectations will be established and posted in each area of the building. Expectations will be taught and reinforced daily. Positive reward systems and consequences will be reinforced every day. Behavior goals will be established for students in their ABC Plans and teachers will work closely with parents to ensure student success.

A Day in the Life of a Student at Indianapolis (Indy) STEAM Academy

Joy is a third grade student at Indy STEAM Academy and Mrs. Brown is her teacher. Her mother is a single working parent who expressed an interest in Joy attending a STEAM school at the recruitment fair. Joy enjoys hands-on activities like science experiments. Joy’s mother shared that Joy watches the science channel and tries experiments at home, so she felt that Indy STEAM Academy would be a good fit to meet the interests of her child.

Arrival/Morning (7:30-8:00) Joy arrives at school and she is greeted at the front entrance by a classroom assistant and the academy Head of School. Joy walks to the cafeteria to have breakfast. Breakfast ends at 8:00 a.m., so she walks to the gym to meet Mrs. Brown. If Joy finishes breakfast early, she can go to the gym and sit with her grade level classmates. Joy lines up with her classmates at 8:00 a.m., then follows Mrs. Brown to the classroom.

(8:00-9:30) Joy goes to the closet to hang up her coat and book bag then she goes the charging station to retrieve her computer and puts it on the table where she and her teammates sit. Joy immediately begins the “Bell Ringer” math and language challenges for the day while Mrs. Brown takes attendance. Morning announcements are delivered over the intercom. Mrs. Brown reviews the learning goals for the day listed on the whiteboard.

Joy gets out her math folder. Joy is learning about geometrical shapes (quadrilaterals) and their attributes. Mrs. Brown shares examples and explains the attributes using the whiteboard. Joy uses the practice sheet to match the examples of shapes with their attributes. Mrs. Brown shares several other examples on the whiteboard. Joy identifies one quadrilateral that does not belong using her interactive response clickers to check for understanding. Mrs. Brown shows examples of simple machines then asks Joy to explain what quadrilaterals are used to create the machine displayed. Joys shares her explanation with the class. Joy reflects on how shapes are used to create simple machines and makes notes in her math folder. Joy turns in her practice sheet, writes the homework assignment in her planner then puts her work away to get ready for reading.

(9:30-11:00) It is time for the English/Language Arts block of instruction. Mrs. Brown presents a mini lesson on the reading and vocabulary skills for the day. Joy goes to the carpet for whole group reading instruction. She participates in word work and a shared reading activity on the carpet with Mrs. Brown. Mrs. Brown calls Joy’s group to come to the back table to work on a guided reading lesson. After small group, Joy returns to her seat and works on her reading response and reflection journal on her computer where she develops sentences that explain the characters, setting, plot, and problem/solution of the story. Joy completes her mini lesson activity sheet then shares her responses with seat partner. Joy gets out her independent reader and reads several pages from her book, completes her vocabulary and comprehension check then logs her reading on her reading log. Joy uses her Chromebook to work on a computer assisted reading activity. Joy returns her computer to the charging station then gets ready for specials. Mrs. Brown reminds students to put their work in their reading bins.

(11:00-12:00) Joy follows Mrs. Brown to the art room. Joy is learning how to use the “Smart Draw” software program as she teaches shapes, use of lines, and symmetry that are used to create a drawing of a simple machine. Joy use

her computer to make sketches of shapes that she can use to craft her simple machine. Watch: Simple Machines: Science & Art Integration from the Teaching Channel Retrieved from: <https://www.teachingchannel.org/videos/teaching-simple-machines>. Joy shares her drawing with students at her table, puts her computer in the charging station and gets ready for lunch.

Lunch (12:00-12:30) Joy lines up for lunch and follows Mrs. Brown to the cafeteria. Joy gets her lunch (chicken, fingers, potato wedges, carrots with ranch dressing for dipping, apple slices, and milk). She sits with her friends and talks about her favorite book over lunch. Joy has read six books and is excited about reaching her goal to participate in the incentive reading program at the end of the quarter. Joy empties her food tray, lines up with her classmates then follows the classroom assistant to the playground for recess. Joy likes jump rope and takes turn jumping with her friends.

(12:30-12:45) Joy hears the bell to line up, so she puts her jump rope in the container and lines up with her class. Joy meets Mrs. Brown on the playground and follows her to the restroom. After the restroom, Joy follows Mrs. Brown back to the classroom.

Afternoon (12:45-1:30) Today is Wednesday, and the class is working on their Social Studies unit about the Foundations of Government and how it provides goods and services to the community like fire and police protection, trash and snow removal, and public transportation. Joy is watching the presentation on the Smart Board. Joy's learning team is assigned to discuss Public Transportation and responds to the questions: What does this service do? How does the service help the community? What equipment/machine(s) does this service need? Does this service require a uniform? What interesting facts can you find about this service? Joy shares the responses from her group with the class. Joy finds it interesting how the bus driver uses the wheelchair lift (incline plane) to help handicapped people on and off the bus. Joy thinks about a simple machine she can create to help someone get their job done easier for her engineering design challenge.

(1:30-3:00) It is STEM Block Time! Joy gets out her Chromebook. Joy is learning about six types of simple machines (wedge, wheel and axle, lever, inclined plane, screw, and pulley) and how they help people make their work easier. Joy participates in the class discussion about the mechanical advantages of each simple machine. Joy helps her learning team identify objects in the classroom that are simple machine and shares the group's examples with the class. Joy puts her scavenger hunt paper in her homework folder. Joy completes the independent practice activity the turns-in her work to Mrs. Brown. The engineering portion of the class is where students bring their designs to life! Joy sits on the carpet in the front of the classroom and listens to the story from their Engineering is Elementary Lesson 1 Unit about simple machines. Joy participates in the class discussion about the types of simple machines their teams may create. Joy participates in the discussion about the pulley Mrs. Brown created. Joy is excited that this will be a "Pulley" Design Challenge. She works with her STEAM learning team to begin the brainstorming and planning process for the design challenge. Joy discusses the plans they have made and exchanges ideas about the design concept and the shapes learned in their art class that they could use to create their simple machine as a group. Joy keeps notes on her Chromebook. Joy returns her computer to the charging station and gets ready for Success Time.

(3:00-4:00) Joy goes to Mrs. Smith's class for intervention. There are five other students in her group. Joy is working on understanding story structure. Joy has a graphic organizer called a story map where she is working on identifying characters, plot, setting, theme and problem/solution. Joy participates in the class discussion where the teacher explains how to use a story map. The teacher provides an example then Joy participates in shared reading activity with the teacher. Joy takes turns reading with the teacher and other students in the group. Joy participates in the discussion as they identify story elements. Joy returns to her seat to complete the story map. Mrs. Smith walks around to check for understanding. Joy turns in her work, gathers her belongings to return to Mrs. Brown's classroom. Joy checks her planner as Mrs. Brown reviews the homework assignment. Joy makes sure that she has her homework assignment written in her planner. Joy puts her favorite independent reading book, reading journal, math book, and planner in her book bag then lines up for dismissal.

Dismissal (4:00) Joy follows Mrs. Brown to the car pick-up area. Joy participates in the drama club after school on Tuesdays and Thursdays and robotics on Wednesdays since her mom works late on these days. This was an exciting and engaging day in the life of Joy as a student at Indy STEAM Academy.

A Day in the Life of a Teacher at Indianapolis STEAM Academy

Mrs. Brown is a third grade self-contained teacher at Indy STEAM Academy. She has a Master's degree from IUPUI, and a strong background in science, which is why she was selected to serve as a grade level Lead Teacher and mentors help colleague, Mrs. Jones. Mrs. Brown also serves as a member of the academy's leadership team. Mrs. Brown has 25 students in her class and has a teacher assistant whom she shares with Mrs. Jones.

Arrival/Morning (7:15) Mrs. Brown arrives at school, checks her mailbox then goes to her classroom.

(7:15-7:55) Mrs. Brown has 40 minutes to prepare before her students arrive.

(7:55) Mrs. Brown picks up her class in the gym then returns with them to the classroom.

(8:00-9:30) Mrs. Brown completes daily classroom routines and procedures like attendance and the collection of homework and other items while students are working on their "bell ringer" Daily Oral Math and Language activities. Mrs. Brown starts the day by reviewing the schedule and learning objectives and standards for the day using "I Can" Statement: "I can identify the attributes of geometrical shapes..." Mrs. Brown implements the math instruction block which is the time in which students develop a strong foundation in core math concepts identified in the Indiana Academic Standards. Mrs. Brown teaches a lesson about geometrical shapes. Mrs. Brown uses the Smartboard to show examples of a square, rectangle, rhombus, parallelogram, trapezoid and kite. Mrs. Brown discusses the attributes of each shape with the class. Mrs. Brown has students use their interactive response system (clickers) to identify shapes that are not quadrilaterals to check for understanding. Mrs. Brown provides a practice worksheet where students match geometric shapes with their attributes. Mrs. Brown shows examples of simple machines that have quadrilaterals. Mrs. Brown ask students to describe the shapes they see in each machine. Mrs. Brown reviews the answers to the practice sheet and summarizes the lesson. Mrs. Brown has students turn-in their practice sheets and reminds them to write their homework in their planners.

(9:30-11:00) Mrs. Brown implements the Balanced Literacy block which is the time in which students develop a strong foundation in reading and writing. The reading lesson begins with a whole group modeled lesson to help students build their comprehension skills using a story elements anchor chart. Mrs. Brown provides a shared reading activity using the basal reading book. Mrs. Brown differentiates instruction by conducting several rotations of small group guided reading instruction. While Mrs. Brown is working with one small group rotation (6-8 students) the remaining students are working on independent seatwork, learning centers activities, paired instruction, computer assisted instruction or working with the teacher assistant. After guided reading, students return to their seats to type two sentences about the characters, setting, plot, and theme of the story then complete their reading logs and independent practice assignment. Mrs. Brown has students share what they learned during the reading lesson using an "Exit Ticket." Mrs. Brown has students put their reading materials away to get ready for specials. Mrs. Brown takes her class to Art then goes to the planning room for the grade level team meeting.

(11:00-12:00) Mrs. Brown has one hour for planning during specials each day. Mrs. Brown is the Lead Teacher for the third grade team. The academy Head of School meets with the team twice per month. Mrs. Brown meets with her grade level team on Tuesdays, Wednesdays, and Thursdays to collaborate on standards and objectives that have been mapped-out for the quarter. They share ideas for lesson activities for next week's learning objectives. The Literacy and STEAM Coaches also meet with Mrs. Brown and the grade level team on Tuesdays and Wednesdays. Mrs. Brown leads the team in a discussion about the upcoming NWEA MAP benchmark assessment. Mrs. Brown and coaches review the proficiency levels of students on the data wall and set goals for the upcoming assessment. The team identifies how students will be grouped during Success Time. Mrs. Brown returns to the art room to pick up her students then returns to the classroom to get ready for lunch.

Lunch (12:00-12:45) Mrs. Brown takes her class to the cafeteria for lunch then goes to the staff cafeteria where she is able to relax with her colleagues. Mrs. Brown takes a restroom break then meets her class on the playground (Outside Good Weather Days/or at the Gym on inclement weather "In Days").

Afternoon (12:45-1:30) Today is Wednesday, and Mrs. Brown is working on a Social Studies Unit: Foundations of the Government. Mrs. Brown discusses how the government provides goods and services. Mrs. Brown builds background knowledge by asking students about goods and services that are provided in their communities. Mrs. Brown uses the Smartboard to show examples of different goods and services such as fire and police protection, trash and snow removal, and public transportation. Mrs. Brown discusses these services and asks students to respond to questions: What does this service do? How does the service help the community? What equipment/machine(s) does this service need? Does this service require a uniform? What interesting facts can you find about this service? Mrs. Brown has students to think about a real-world problem in our city today and how a simple machine could enhance the service to make our lives easier.

(1:30-3:00) Mrs. Brown is working on a physical science standards-based lesson about simple machines, which is connected to the engineering design unit “Marvelous Machines: Making Work Easier” from the Engineering is Elementary curriculum. Mrs. Brown has students recite the learning objective: “I can describe six types of simple machines and explain how they make work easier.” Mrs. Brown uses a KWL chart to see what students know and want to know about simple machines. Mrs. Brown uses the interactive whiteboard to show a video from Engineering is Elementary (EiE) Lesson 1 Unit - Simple Machines and Their Uses – Vocabulary (wedge, wheel and axle, lever, inclined plane, screw, pulley). After explaining the definitions of each machine, Mrs. Brown puts these words on the word wall for future reference. Mrs. Brown discusses the kinds of engineers (mechanical, industrial, civil) who use simple machines to make their work easier. Mrs. Brown distributes a handout that has pictures of these simple machines. Mrs. Brown has students discuss the “Mechanical Advantages” (uses less force to move an object a longer distance) for each. Mrs. Brown gives students a “Scavenger Hunt” sheet then has them work in their learning teams to identify simple machines in the classroom. Mrs. Brown has each team share their responses. Mrs. Brown checks for understanding by having students complete a sheet where students match the names of the simple machine with their definitions and identify the types of simple machines for the given pictures. Mrs. Brown collects this independent practice sheet then brings the lesson to a close. Mrs. Brown refers back to the KWL chart to have students identify what they learned during the lesson by asking questions and recording their responses on the chart: Who can name a simple machine that we learned about today? How do simple machines make work easier? What are the mechanical advantages of these machines? What kinds of engineers did we learn about today? Why do engineers use simple machines? What simple machines did you find in our classroom? Mrs. Brown provides an extension to the lesson: “Tonight at home, think about everyday examples of the six simple machines we learned about today, see how many you can find at your home! Record your examples on the Scavenger Hunt Worksheet and bring it back to school tomorrow.” Mrs. Brown reminds students to put their worksheet in their homework folder.

Practical Application of the Lesson: Students love when it’s engineering design challenge time. Mrs. Brown announces that the **Simple Machine Design is the “Pulley Challenge!”** Mrs. Brown takes students to the engineering lab where she has set up an example of a pulley and demonstrates how it helps to move heavy objects for longer distances. Mrs. Brown has students discuss how the pulley functions and its mechanical advantages. Mrs. Brown has a variety of objects from which students will choose to lift from the floor using their pulley systems. Mrs. Brown presents the project requirements and discusses limitations. Students must be able to lift objects at least 4 inches off of the floor using their pulley systems. A variety of materials and supplies are available for students to choose to create their pulleys. Mrs. Brown reviews the five-step engineering design process then has students to get into their learning teams to brainstorm ideas and plan their designs. Mrs. Brown has each learning team share their design ideas with the class. It is time to stop. Mrs. Brown reminds students to save their ideas on their computers and return their computers to the charging station and get ready for Success Time.

(3:00-4:00) “Success Time” is Tier II skills intervention and/or enrichment for reading and math standards. Mrs. Brown is helping students who are having difficulty with addition with regrouping. Mrs. Brown uses the interactive whiteboard to demonstrate and students practice at the whiteboard as well. Mrs. Brown shows students how to check their answers. Mrs. Brown has students work in pairs to create one addition with regrouping word problem then has them demonstrate how to solve the word problem to check their understanding. Students return to their homeroom classes. Mrs. Brown has students clean up and get ready for dismissal. She reminds them to check to

make sure their homework assignments are written in their planners. Mrs. Brown has students line up to be dismissed.

Dismissal (4:00) Mrs. Brown walks her class to the gym (car pickup area). Mrs. Brown provides the office with a list of names of students who have not been picked up by 4:15 PM. Mrs. Brown may leave at 4:15 PM, but returns to her classroom, reviews her lesson plans and gets ready for the next day. Mrs. Brown also helps with the Lego club every Wednesday afterschool. Overall, it was an exciting day in the life of Mrs. Brown at Indy STEAM Academy.

SUPPLEMENTAL PROGRAMMING

1. Summer School Program. Indy STEAM Academy will offer a summer school program. The summer school program will be three weeks (15 days) after the end of the school year (June 10 -July 5, 2020) for 4 hours per day (8:00 AM – Noon). Some of our students may start below level. It is anticipated that approximately 30% (60) of our students will require additional support to demonstrate proficiency in reading and math. Students demonstrating 65% or below proficiency will be required to participate based on the NEWA MAP Growth K-2, IREAD K-3, and ILEARN assessment results. Students may be recommended by their classroom teachers or the RTI team to participate in the summer school program. Parents may also request that their children participate in the summer school program. Parent requests will be reviewed by the RTI team and approved contingent upon funding. Summer school will be funded using the Title I allocation and resources from the Indiana Public School Summer Program fund.

2. Extra-Curricular and Co-Curricular Programs. After school extra-curricular clubs such as Robotics, Lego, Coding, Graphic Design, Math Minds, Science Minds, Visual Arts, and Book clubs will be available to students four days per week (Monday through Thursday). Other extra-curricular activities such as violin, piano, ballet, drama, gymnastics, soccer, tennis, golf, basketball, and baseball may be offered on a rotating semester or seasonal basis, except for instrumentals and drama which may be offered for the entire school year, so every student can find an activity of interest. Activities will be funded by the academy basic grant funds and through the support of our community partners and foundations.

3. Student Mental, Emotional, and Social Development and Health. Cummins Behavioral Health Systems. We will partner with **Cummins Behavioral Health Systems** to provide wraparound mental health services for identified students and their families. Cummins will be on site all day at least one to two days per week depending upon need.

Big Brothers Big Sisters of Central Indiana. We will partner with **Big Brothers Big Sisters of Central Indiana** to provide mentoring for students and support for families to foster positive home/school communication and of students. This mentoring relationship will help students with academics, social skills development and will foster positive home/school communication. The academy will identify other organizations to support schoolwide activities that address issues such as depression, suicide prevention, child abuse, substance abuse, gangs, violence, and bullying. We will hold monthly assemblies to address these topics and will provide schoolwide activities every Friday during our citizenship time.

ABC Plans. The academy will develop an Academic, Behavior, and Career Plan (ABC Plan) to provide “wrap around” services and supports for all students. Adaptations will be made for students who have formal Individualized Education Plans. Individual academic, behavior, and career goals are established with parents and students at the beginning on the school year. Goals will also be established for student behaviors to develop positive academic mindsets for learning, study skills, and social skills to be successful in our learning environment. The academy will use our RTI process to provide additional community resources to help families with the social and emotional needs of students.

Schoolwide Activities and Initiatives. The academy will also implement programs such as D.A.R.E., Just Say Yes, “No Bully”, and Random Acts of Kindness, and the Let’s Move programs to support the social, emotional, and physical well-being of students. The academy plans to write a grant to help fund a Social Worker for the school. The academy will implement the Positive Behavior Intervention and Supports (PBIS) framework (see **Attachment 8**) to

maintain a positive school climate and culture. Schoolwide expectations will be established and posted in each area of the building. Expectations will be taught and reinforced daily. Positive reward systems and consequences will be reinforced every day. Behavior goals will be established for students in their ABC Plans and teachers will work closely with parents to ensure student success.

4. Other Student Focused Activities and Programs

After School Tutoring. The academy will provide after school tutoring three days per week (Tuesday, Wednesday, and Thursday) for one hour (4:15-5:15 PM) starting August 19, 2019 through May 29, 2019. This program will be funded using the Title I allocation. Our community partner, IUPUI will provide undergraduate and graduate students to serve as tutors along with teachers who have agreed to work (stipends) with this program. Students demonstrating 65% or below proficiency will be selected to participate in this program. This program will be funded by remedial and Title I funds.

Homework Help Club. The Homework Help Club will be available four days per week (Monday through Thursday) for one hour (4:15-5:15 PM) for students who would like help with their homework assignments. Students demonstrating proficiency 65% or higher may also seek support with their homework assignments. Students who miss 3 or more consecutive days of school will be required to make up work with the support of the homework help club. This program will be funded using remedial dollars.

SPECIAL POPULATIONS AND AT-RISK STUDENTS

1. Plans to Serve Students with Special Needs

Indy STEAM Academy is committed to meeting the needs of all learners, including students who enter below grade level, students with special needs and disabilities, students with limited English proficiency, and students who are at risk of failure, and academically advanced or gifted. The Response to Intervention team will work with teachers and parents to provide effective research-based instructional practices and strategies to meet the academic, and social emotional needs of all students. Indy STEAM Academy will follow all provisions of federal and state law relating to students with disabilities, including the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act of 1973. In addition, Indy STEAM Academy will comply with all Special Education rules outlined in Article 7 of the Indiana Administrative Code (IAC). All students with qualifying disabilities under IDEA shall have access to a free and appropriate public education (FAPE), receive an evaluation, IEP, and an appropriate education in the least restrictive environment; be involved in decisions regarding the IEP, along with their parent/guardian(s); and have access to appropriate procedures to resolve any disputes related to the academy's provision of FAPE. We shall maintain student education records in line with the federal Family Educational Rights Privacy Act of 1974 (FERPA) as they relate to students with disabilities. This includes but is not limited to having procedures for protecting the privacy of student education records. Indy STEAM Academy has a targeted enrollment of 200 students Year One. **We anticipate that there will be approximately 15% English Language Learners, 10% Specials Needs and students with exceptionalities Section 504 plans, 30% at risk of academic failure, and 5% intellectually gifted students.**

2. Students with Mild, Moderate, and Severe Disabilities

Identification and Plan Development. In accordance with the Individuals with Disabilities Education Act (IDEA) Child Find Provision and Article 7, Indy STEAM Academy will train staff to actively locate, identify and evaluate all students who may need special education and related services. A Multidisciplinary Team, consisting of Parent(s)/Guardian(s), General Education Teachers, Special Education Teachers, Relevant Clinicians, Student, etc., will work together to determine eligibility for special education services and avoid educational misplacement. The academy will provide formal training for all staff involved in the IEP process to review guidelines for the determination of student eligibility for special education services. They will also receive training on the implementation of IEPs and 504 plans, including modifications and accommodations within the classroom. Students who do not require specialized educational services in the form of an IEP, but who need accommodations and modifications for equal access to the classroom will receive 504 plans.

The Multi-Tiered System of Supports (MTSS) system will serve as an initial screening process, and typically students will receive interventions through this system before recommendation for Special Education services. Throughout the period of intervention, our educational and behavioral intervention strategies and the student's response will be closely monitored on a weekly basis by the RTI/PBIS committee. If progress is observed, we will determine whether to continue with our chosen interventions. If, after three-weeks, measurable progress is not evident, intervention strategies will be modified, while continuing to track the student's progress. If, after the ten-week process, the student is not progressing, we may recommend to the student's parent/guardian(s) that the data collected indicates there may be reason to have a more extensive diagnostic evaluation by relevant clinicians. If RTI is unsuccessful, or if there is a request for a Full Individual Evaluation (FIE), Indy STEAM Academy will schedule a Domain Meeting under IDEA. The Head of School will arrange a meeting with the academic team to determine which domains are areas of suspected disability or needs and identify the assessments the team will complete. After written parental/guardian consent is secured, the student will be evaluated by properly trained and licensed professionals. If a student is deemed eligible for special education services at a subsequent Eligibility Meeting, the team (including parent/guardian(s)) will develop an Individualized Education Plan (IEP). If the student is not eligible for special education services, the team will consider a 504 plan and develop one if appropriate. If neither a 504 plan nor an IEP is appropriate, but the student is still struggling, we will meet with parent/guardian(s) to determine a behavioral and/or academic support plan.

Continuum of Services. In accordance with Article 7, Indy STEAM Academy will provide a continuum of support and services from those in the least restrictive environment to increasingly restrictive options in order to meet students' specific needs. Students with disabilities will be provided the services specified in their IEP.

- **Related Services:** Related services are developmental, corrective, and other support services required to help a student with a disability benefit from instruction within the general education curriculum. Related services may include, but are not limited to: counseling, occupational therapy, physical therapy, school health services, speech/language therapy, hearing/vision services, and other support services (paraprofessional support, sign language/oral interpreters).
- **Support Services:** Other support services provided to children include, but are not limited to: assistive technology devices, behavior intervention plans, and curriculum modifications.
- **Special Education Services:** Students receive specially designed supplemental instruction based on their needs as identified in the IEP. The special education teacher works to adjust the learning environment and adopt instructional techniques and methods to meet students' individual needs.
- **Transportation Services:** In the event the IEP team determines a student needs transportation services, Indy STEAM Academy will work with IPS or private contractors to provide transportation for the student.
- **Collaborative Consultant Teacher (CCT)/Co-Teacher:** In CCT classrooms students with disabilities and general education students are educated together, by a general education teacher and a special education teacher. The CCT collaborates with the general education teacher and provides instructional support to the student while the special education teacher serving the class adapts and modifies instruction for students with disabilities.
- **Adjustments to Curricula and Instructional Programs:** Indy STEAM Academy teachers will be trained to make adjustments to curricular and instructional programs and practices to meet the need of our special student populations. Because the adjustments are common practices across our schools, students with special needs do not feel "different" from peers in general education, contributing to an overall culture of inclusivity and optimism.

Least Restrictive Environment. Indy STEAM Academy will comply with all state and federal laws to ensure students with disabilities are served in the Least Restrictive Environment (LRE) where they are afforded access to general curriculum and integration with their nondisabled peers, with appropriate modifications and accommodations as delineated in their IEPs. To that end, individual classroom enrollment may not be comprised of more than 30 percent of students with disabilities. Indy STEAM Academy will utilize the general education classroom, co-teaching, push-in/pull-out support, alternate assessments, and in rare cases, self-contained Special Education classrooms as a part of a students' LRE. All decisions regarding a student's placement are based on the student's abilities and needs. Before making a decision to change a child's LRE, Indy STEAM Academy will confirm that the child has received all

the services outlined in the IEP. If a student continues to struggle in their current LRE even with the services outlined in their IEP, the IEP team may convene to determine if the current placement is still appropriate under IDEA. A student's IEP cannot be revised without holding another IEP meeting. Any meetings regarding LRE will include the parent, special education teacher, general education teacher, school administrator, and related service providers and IPS personnel as appropriate.

Accommodations

- All daily curricula and weekly and unit assessments receive the accommodations and modifications detailed in the students' IEP. General education and special education teachers work together to ensure this is accomplished.
- Based on a student's current level of performance (as determined by diagnostics and current student performance data) students are provided online and written curricula at their instructional level. This includes access to independent, guided and shared reading texts that are appropriate both in content and level to a student's age, developmental level and current instructional level.
- All students receiving special education services also receive small-group, differentiated instruction as part of their daily schedule. During this time, students receive targeted, skill-based instruction customized to their individual needs as determined by the NWEA Learning Continuum.
- Students are given immediate feedback on daily formative assessments and provided with opportunities for remediation on the spot and one-on-one by the general education and/or special education teacher.

Monitoring and Evaluation. Indy STEAM Academy's Head of School and Special Education team will oversee the implementation of the IEP services. A copy of the IEP, along with procedural safeguards, will be given to all teachers and the parents of students identified as special needs. We will carefully monitor the progress of students in the RTI process or possessing IEPs through bi-weekly debriefing meetings with the academic team and the student's Special Education and General Education teachers. The student's most current assessment data from core academic subjects will be collected and analyzed. Students with significant cognitive disabilities will take the state Alternate Assessment. All of special needs students will take the NEWA Growth K-8 benchmark assessments, IREADK-2, IREAD-3 and ILEARN 3-8 assessments with accommodations as identified in the IEP and as determined by the state assessment implementation guidelines.

The academy will monitor and evaluate the progress of students in special education with the same frequency and intensity of their peers in general education. In the event a student is progressing more quickly than expected or not progressing at a rate that will allow him/her to meet his/her annual IEP goal, the IEP team may convene periodically to adjust annual goals and/or accommodations and modifications. The following methods are ways to monitor progress for students with an IEP. These methods have been adapted from research-based best practices:

Daily: Students in special education who have daily behavior plans receive daily "progress towards goals" updates to be shared with parents/guardians in the student's daily planner.

Weekly: Parents/guardians receive weekly progress updates based on student performance on adaptive online curricula. As established in their IEP, students in special education receive accommodations and modifications on weekly assessments as appropriate. Special Education may conduct additional mini assessments of sub-goals to gather data on student performance relative to the annual goal. These data points are rolled up and shared with families through the quarterly IEP report card.

Quarterly: Parents/guardians receive quarterly IEP updates in which special education teachers share a student's performance relative to his/her annual goals; this is called the IEP Quarterly Report Card. All students receiving special education services receive a standard school report card. Parents/guardians are asked to meet with the classroom and Special Education teacher to discuss progress toward both final grades and IEP annual goals.

Annually: All parents/guardians of students receiving Special Education services will meet with the rest of the IEP team annually. At this time, parents/guardians receive an additional update with a final determination as to whether or not a student has met annual IEP goals; All parents/guardians and students receive a report card indicating final grades in all subject areas for that school year.

All students with IEPs shall be re-evaluated a minimum of once every three years. In addition, if a parent/ guardian requests that their child is reevaluated, we will respond to that request promptly. Communication with families/guardians of our special needs students will be a priority, and they will participate in an additional special services meeting during our Parent-Teacher conferences. At the close of each student's annual review or three-year re-evaluation the parent will receive a copy of the new IEP.

Qualified Staff. Indy STEAM Academy will employ a full-time licensed Special Education teacher who will serve as a resource teacher for students identified as special needs or with exceptionalities who have an Individualized Education Plan (IEP) or who are in the process of being identified for services. The academy will contract with a part-time licensed Speech Therapist and School Psychologist through the Indiana Charter School Resource Network, Marian University College of Education and/or IU Bloomington P16 Center for Research. The academy will also hire a part-time (contract service) certified individual as the Director of Special Services (DSS) in Year 3 to assist our Academy with the management of Special Education Services after our services agreement with Marian University expires Year 2 (CSP Grant resource). These individuals will ensure that parents/guardians of children with special needs are informed of their children's progress on annual IEP goals and in the general curriculum. The Director of Special Services and Parent Coordinator shall provide annual training to families whose children are identified as receiving special education services, reviewing with families the IEP process and documentation, identifying the difference between modifications and accommodations, and review the due process rights of families within the process. We will make available contact information for outside support resources and have on campus mini conferences from available outside support resources.

3. English Language Learners

Identification. Indy STEAM Academy believes “all children can learn and achieve at high levels.” Limited English Proficient (LEP) or English Language Learners (ELL) will be identified when they enroll. Parents will complete a Home Language Survey where they identify their native language. Students whose native language is anything other than English will take English Language Proficiency Assessments to determine a student's level of English proficiency. WIDA ACCESS is the English Language Proficiency Assessment administered in Indiana. The W-APT placement test (kindergarten) and the WIDA Screener (grades 1-12) function as a screener that is used for both initial and English Language (EL) program placement of students who are identified as Limited English Proficient (LEP). The annual assessment, ACCESS and Alternate Access, is administered to determine a student's current level of English proficiency. English Learners will receive speaking and written language support tailored to their individual needs while providing access to the general curriculum and school environment as much as possible. The English Language Learner (ELL) teacher will work with the Head of School, classroom teachers, and parents to ensure that ELL students receive appropriate support and make strong progress toward their goals. If the number of ELL students attending the academy unexpectedly increases, we may also hire a full-time ELL teacher assistant who will provide instructional support in the classroom in addition to pulling out students in need of additional support. The Head of School and ELL Resource Teacher will oversee compliance and proper implementation of the ELL Program.

Instructional Programs. LEP students will receive English Language Development (ELD) instruction as part of their core reading program in the general education setting. At the elementary level our ELL instructional model will be a “pullout” model. Students leave their classrooms and work in small groups to practice and learn language in a meaningful and supportive environment. Students receive anywhere from 60 minutes of instruction 3 days a week depending on their language proficiency level. Students will receive additional supports with classroom instruction using the “push-in” model of support provided by the English Language Learner Resource Teacher. Our teachers use a variety of research-based teaching strategies which support students' acquisition of English. Examples of these strategies include the following: use of the native language, language experience activities, total physical response, dialogues, songs, chants, guided-reading activities, story-telling, hands-on projects, and cooperative learning activities. We also use the following web-based programs to supplement our English Language development instruction: “Brain-Pop ESL” K-5, and “Grammar Gallery” K-12.

Monitoring and Evaluation. Regularly progress monitoring with the selected curriculum for the English Language Development (ELD) program will be part of curriculum and instruction provided. WIDA, NWEA MAP Growth K-8 benchmark assessments and ILEARN assessments will be administered to all ELL students. Prior grade assessments will also be reviewed, and the beginning of the year assessment data will be used to identify areas of deficiency and performance levels of LEP students in reading, math, and science.

Qualified Staff. Indy STEAM Academy will employ a part-time certified English Language Learner (ELL) Resource teacher Years 1-2 depending upon the number of ELL students and full-time ELL resource teacher Year 3, if enrollment warrants, who will serve as the director for the ELL program. The ELL Resource Teacher and Parent Coordinator shall provide annual training to families whose children are identified as receiving ELL services, and will review with families the curriculum, resources and supports that are available to ELL students. The Parent Coordinator will serve as a liaison for parents and will make available contact information for community outreach services and support resources.

4. At-Risk and Below Level Learners

Identification. Indy STEAM Academy believes that “**failure is not an option**” for students. There are five social factors associated with At-Risk students: (1) poverty; (2) ethnicity and race; (3) family composition; (4) mother’s educational background; and (5) language background. These factors are considered when working to improve the academic performance of students at risk of failure. Our staff will not allow apathy and sympathy to cloud the vision to realize the potential of all students. We realize that the parent is the child’s first teacher, and as students begin their school careers, it is necessary to establish partnerships with parents to provide nurturing and supportive learning environments at home and school to ensure the success of students. The academy will provide training for parents who struggle with helping their children at home. Parents may also utilize the services in our Parent Center and participate in our literacy and math family night workshops.

Instructional Programs. Students performing below level or who are at-risk of failure will receive small group guided reading and math instruction in the classroom. In addition to classroom instruction, students will be assigned to small flexible learning groups during “Success Time” (Tier II) instruction. Success Time will be 60 minutes three days per week. Students may be identified for Tier III instruction, which provides 30 minutes of individualized instruction with the Intervention Specialist. In addition to Success Time and Tier III instruction, students performing below level will participate in After School Tutoring which will be three days per week for one hour in reading and math. In addition to after school tutoring, students performing below level will participate in five (5) days of remediation during Fall and Spring Break Intersessions. Students will receive 4 hours of skills-based instruction directly related to the areas of deficiency identified on the NWEA MAP Growth and DIBELS benchmark assessments. In addition to Intersession support, students performing below level will participate in the Summer School program which is 19 days after the end of the school year. Students will receive five (5) hours of instruction based on areas of deficiency. These additional learning supports are used for specific skill building to help students master skills needed to demonstrate proficiency. The academy is committed to ensuring the success of all students and to close the achievement gap among students.

Monitoring and Evaluation. NWEA MAP Growth (K-8) benchmark assessments will be administered to all students at the beginning of the school year. Prior grade assessments will also be reviewed, and the beginning of the year assessment data will be used to identify areas of deficiency and performance levels of students in reading, math, and science. An **Academic, Behavioral, and Career Pathways (ABC)** plan will be developed for all students. The **academic** component of the plan will identify target goals for specific learning objectives and skills from the standards that are deficient. Target goals will be prioritized, and intervention strategies will be identified for each academic target goal. Teachers will monitor students’ progress each week in the data team meetings. Formative assessments will be used to determine if students have demonstrated mastery of targeted skills. The Response to Intervention and Instruction Team will support teachers with research-based strategies and best practices to support instruction in the classroom. Continuous progress monitoring will be provided to determine students’ levels of proficiency. The IREAD K-2 summative assessment will be administered to determine students’ levels of proficiency. Students will be recognized for their improvement at quarterly awards assemblies. Parents will be kept abreast of students’ progress through mid-term progress reports, report cards, and parent-teacher conferences.

5. Intellectually Gifted Learners

Identification. Indy STEAM Academy believes that “all students should receive rigorous and challenging instruction.” Indiana schools shall identify students with high ability in the general intellectual and specific academic domains and provide them with appropriately differentiated curriculum and instruction in core content areas, K-12 (refer to IC- 20-36-2-2). The Indiana Code defines a student with high abilities as one who:

- a) Performs at, or shows the potential for performing at, an outstanding level of accomplishment in at least one domain when compared to other students of the same age, experience, or environment; and:
- b) Is characterized by exceptional gifts, talents, motivation, or interests (IC 20-36-1-3). Identification is a critical component of effective gifted education programming. One size does not fit all. In addition to using assessments appropriate to the services provided, different strategies may be needed to ensure students with high potential are identified. Indy STEAM Academy will use the NWEA MAP assessment to determine eligibility to participate in the high ability program supports. Testing may be requested in any grade. Kindergarten students will be tested spring semester and grades 1-2 fall semester. High ability needs will participate in **Gifted** and **Talented** programs and activities that will challenge them in regular classroom settings to enable them to make continuous progress in school. Indy STEAM Academy will collaborate with the Indiana Association for the Gifted and the National Association for Gifted Children to identify additional resources and supports for high ability students.

Instructional Programs. Indy STEAM Academy will not provide a separate “pull-out” program for gifted students; however, students identified as high ability will have their needs met in the regular education classroom. We believe that the STEAM instructional model will enable high ability students to enhance their critical thinking, creativity, collaboration, and communication skills. Students will receive Tier I instructional supports at their ability level through small group guided practice and instruction in reading and math. In addition to Tier I classroom instruction, high ability students will be assigned to small flexible learning groups during “Success Time” for enrichment three days per week for 60 minutes. In addition to Success Time, high ability students will participate in After School Enrichment two days per week for one hour, participate in a variety of extra-curricular programs, participate in Fall, Winter, Spring STEAM competitions and STEM Summer Enrichment Camps.

Qualified Staff. Indy STEAM Academy will not have a separate Gifted program. However, the academy will provide basic training for all teachers on recognizing and serving high ability students and providing instruction that will meet their needs in the in the regular classroom setting.

Monitoring and Evaluation. High ability needs will take the NWEA MAP (K-2) benchmark assessments during the fall, winter and spring. The IREAD K-2 summative assessments will be administered in late spring to determine students’ levels of proficiency. Prior grade assessments will also be reviewed and used to identify performance levels of students in reading and math. An **Academic, Behavioral, and Career Pathways (ABC)** plan will be developed for students. The **academic** component of the plan will identify target goals for specific learning objectives and skills for enrichment. Target goals will be prioritized, and enrichment strategies will be identified for each academic target goal. Teachers will monitor students’ progress each week in the data team meetings. Formative assessments will be used to determine if students have demonstrated mastery of targeted skills. The RTI Team will support teachers with research-based strategies to support instruction in the classroom.

STUDENT RECRUITMENT AND ENROLLMENT

1. Student Recruitment and Enrollment

Indy STEAM Academy will begin recruitment activities immediately after authorization. The academy has conducted **surveys** of families in this high priority needs community to gauge their level of interest in a STEAM instructional model and charter school in their community and receive very positive feedback (**See Attachment 10**). The academy will conduct **focus group meetings** (**See Attachment 10**) in each the four surrounding school district communities to provide opportunities for parents and community members learn more about the instructional model and services and to receive feedback regarding services they would like our academy to provide. The academy will begin its formal marketing campaign and conduct **recruitment fairs** starting late November 2018, to explain the

STEAM focus and provide more information about the curriculum and school calendar. Once authorized, the academy will secure a facility and begin registering students for the upcoming school year. Indy STEAM Academy does not plan to participate in Enroll Indy; however, parents will be able to enroll their children on our website and at recruitment fairs. The academy will also target parents and families in the community by attending community events, making presentations at churches and neighborhood association meetings, greeting parents at restaurants, grocery stores, malls, and other public gathering places. The academy has 15 “Friends of Indy” STEAM Academy volunteers, who will serve as door-to-door canvassers and callers to help us spread the word about our Academy. The academy will conduct a **direct mailer** to residents of 10 surrounding neighborhoods within the Far Eastside community using addresses provide by the “**SAVI**” **database**. The academy will distribute brochures, use newspaper, television, radio, digital advertisements and social media to get the word out to the community about the opening of the academy. The academy has a website – visit us at www.indysteamacademy.org. Indy STEAM Academy has developed a **Letter of Intent to Enroll (see Attachment 10)**. We conducted recruitment fairs in January 2018 at 4 Head Start locations and received overwhelming response from our preschool parents with **60 parents** completing **Letters of Intent to Enroll** their children in our academy. **(See Attachment 10)**.

We will continue our recruitment efforts once authorized to target five strategic stakeholders:

Churches and Community Centers. We have identified over 20 area churches and pastors in the proposed school attendance area. Eastern Star Church is my home church and will serve as hub for our initial efforts and outreach to all other churches in the neighboring communities. We will send letters via email to request an opportunity to meet all local pastors or a representative to share the programs and services that the academy will provide. We have identified 4 community centers in the area and have established a partnership with the Community Alliance of the FAR Eastside (CAFÉ).

Daycare, Early Childhood, Head Start, and Day Early Learning Facilities. We have identified 15 early childhood facilities including the (CAFÉ) Head Start Program, faith-based day care ministries, community day care facilities, and private owner day care facilities in our attendance area.

Families in Neighborhood Housing Projects and Condominium Complexes. We have identified 12 housing complexes in the community and will contact property managers to reach out to tenants, hold meeting with parents in their community rooms, distribute brochures.

Local Businesses. We have identified 23 business including restaurants, banks, grocery stores, and pharmacies where we greet families and community members to distribute materials about the academy.

The academy will work diligently to solidify its enrollment through follow up calls, emails, mailings, and recruitment fairs.

2. Enrollment Policy

The Enrollment Policy for Indy STEAM Academy is provided as **Attachment 7**.

STUDENT DISCIPLINE

1. Discipline Philosophy

The discipline philosophy of Indy STEAM Academy is aligned with our mission to provide a safe and nurturing learning environment where students take responsibility for their behaviors to be productive citizens at school and in their communities. Clear, fair, and consistent student discipline is essential to fostering a positive school culture and climate. We will be able to garner the cooperation of our parents and students when they know that they will be treated fairly. The culture of Indy STEAM Academy is built on the ideals that classrooms are the place where students work hard and strive to do their best work while demonstrating their best behavior. This culture is reinforced by the core values that are instilled through the Character Counts –Six Pillars of Character Framework (Respect, Responsibility, Fairness, Trustworthiness, Caring and Citizenship) and the Positive Behavior System of Supports Behavior and Expectations Matrix (**see Attachment 8**) for which our behavior expectations and procedures are established. Indy STEAM Academy believes that our discipline philosophy is aligned with the core values that our parents instill in their children at home which are reinforced at school: “Be Respectful, Responsible, and Safe.” Indy STEAM Academy has established clear expectations for behaviors within the school environment in order to support the learning community. Our discipline plan is a proactive approach that attempts to head off behavior problems before they occur with the goal of teaching students the desired behaviors for school, classrooms and other school

settings. Indy STEAM Academy is committed to creating a school environment where students feel valued, cared for and respected. Such an atmosphere has been proven to decrease discipline problems and increase academic achievement.

2. Discipline Policy

The Discipline Policy for Indy STEAM Academy is provided in **Attachment 8**.

GRIEVANCE POLICY

The Grievance Policy for Indy STEAM Academy is provided in **Attachment 9**.

PARENTS AND COMMUNITY ENGAGEMENT

1. School Options in the Target Location and Performance of Surrounding Schools

The targeted population of the Indy STEAM Academy is the Far Eastside, which includes students from the Indianapolis Public Schools district and surrounding Township School districts including: Lawrence, Warren, and Washington Township schools. There are eight Indianapolis Public Schools, five Lawrence Township Schools, one Washington Township school, Warren Township school, and 5 charter schools in this attendance catchment area. Data from the Indiana Department of Education suggest a significant percentage (approximately 71%-85%) of families in poverty as determined by the free and reduced lunch status. This data suggests a high percentage of minority students and students with disabilities in each district compared to the state. The suspension rate of devastating percentage of students suspended from two IPS schools and three charter schools supports the need for a charter school that will address the social and emotion well-being of students. Based on the 2017-18 Report Card, there are four (F) failing schools, six (D) schools in academic warning status, four (C) schools making academic progress, two (B) schools performing above average, and four (A) exemplary schools; two of which are charter schools. Indy STEAM Academy will seek students from both underperforming and high performing schools. Levels of proficiency of students from the surrounding schools indicate a need to build a strong foundation in reading, math, and science to become more proficient in math and science before entering high school and college. We anticipate serving students from these surrounding communities and are committed to providing students and their families with a high-quality educational option to ensure the achievement of students.

2. Evidence of Sufficient Demand

Indy STEAM Academy has begun the charge of assessing the demand for a new science, technology, engineering, arts and mathematics charter school on the Far Eastside of Indianapolis. The academy conducted surveys of families in this high priority needs community to gauge their level of interest in our charter school in January 2018 and received great interest in the STEAM instructional model. Of the 32 respondents surveyed, 15 parents indicated that they were “Very Interested;” 15 parents indicated that they were “Interested;” and 2 parents indicated “maybe.” The academy did not have any parents who indicated “Not Sure” or “Not Interested” (see Attachment 10). The academy conducted recruitment fairs at 4 Head Start centers and received a tremendous response to our STEAM instructional model where 63 parents completed Letters of Intent to Enroll (see Attachment 10). There are parents with siblings of students who attend other schools who expressed an interest in having both children attend our Academy. We have over 25 “Friends of STEAM Academy” volunteers who will assist us with phone “cold calling,” door-to-door canvassing making presentations at churches and neighborhood association meetings, greeting parents at restaurants, grocery stores, malls, and other public gathering places to recruit students to achieve our enrollment targets. Indy STEAM academy believes based on our surveys and letters of intent that we will be able to meet our enrollment targets.

3. Engage Parents in the School, Family School Partnerships, and Volunteer Activities

Indy STEAM Academy plans to continue to engage parents in the life and development of the academy from the time the academy is authorized by conducting **focus groups panel discussions** (see Attachment 10) with parents and community stakeholders to gather feedback about the programs and services they would like to see included at our Academy that we have not already considered. We will contact all parents who have completed **Letters of Intent to Enroll** (see Attachment 10) and will begin the **STEAM Founding Parent Advisory Council** to give parents an opportunity to participate in the planning pre-opening phase of our academy. This council will meet monthly until the opening of school. The Parent Advisory Council will serve as “Parent Ambassadors” for the academy by getting the word out to other parents, participating in recruitment fairs to help attract other parents, creating interest through social media, and providing a column “Parents Speak” in our monthly newsletter. Once school starts, the STEAM Parent Advisory Council (SPAC), recruit two parent representatives from each classroom to serve as the parent executive body. All parents will be able to participate in the Parent/Teacher organization. We will continue to solicit community partnerships to support the implementation of our instructional model and extra-curricular programs and services. We will establish the **STEAM Community Advisory Council (SCAC)**, which will include our existing partner representatives, community leaders, pastors, preschool and daycare program directors, and other community stakeholders. We will implement our “**Boots on the Ground**” door-to-door-canvassing, “cold-calling,” telephone

canvassing, media and social media marketing campaign. We have 25 “**Friends**” of **Indy STEAM Academy**, who will assist us with our recruitment campaign. We will contact **community service agencies** to help parents with immunizations and physical examinations for their children. We will host fundraisers and collect donations to help support our extra-curricular activities and excursions. We will implement a school **supply-bookbag drive** where we collect donated school supplies for students. We will contact School Zone, the local school uniform shops to assist parents with obtaining school uniforms. Parents will discuss with their children then sign the school Parent Compact, which is our agreement to work together in a cooperative and collaborative manner. Families will participate in activities provided by the academy including: **Welcome Back to School Picnic, Open House**, quarterly **parent/teacher conferences**, quarterly **awards and recognition programs**, monthly **STEAM Family Literacy** (Reading and Math) **Nights, STEAM Design Challenge Nights** (Science), **Career Fairs, holiday programs, college tours, and fieldtrips.**

4. Community Resources and Partnerships

Community Resources Available to Students and Parents

Parents will be able to use the **Boys and Girls Club Finish Line** location if they need after school care beyond the time (5:15 PM) which is when our extra-curricular activities end each school day. There is a \$15 fee to use this service and the academy will partner with the Boys and Girls Club to coordinate services for students participating in this program. Students will participate in afterschool extra-curricular programs for a small fee \$2.00 per day; however, parents will be responsible for the rental of music instruments and clothing for activities like ballet, and sports uniforms. **IUPUI Center Urban Center for the Advancement of STEM Education (UCASE)** will provide fieldtrips at no cost to students. Students will visit the Geology Center for Discovering Earth Science. Mobile Resource Trailers will come to the school. Students will be able to participate in the STEM Summer Camp program, which will be developed in partnership with IUPUI; however, we are not aware of any cost to parents at this time. Undergraduate and graduate students will assist students with their design projects, service learning projects, and will serve as tutors for our **Afterschool Tutoring program**. There will be no cost for students to participate in this program. **Cummins Behavioral Health Systems** will provide wraparound mental health services for identified students and their families. Cummins will be on site all day at least one to two days per week to support the emotional well-being of students. **Big Brothers Big Sisters of Central Indiana** will provide volunteer mentors for students and provide support for their families. This program will work one-to-one with students on social skills development and study skills. University STEAM Ambassadors (undergraduate students from IUPUI will serve as mentors for students to foster their interest in college life, and STEM programs of study. Community partners will assist with Summer Camp activities and local, state, and national STEM competitions.

Community Partnerships

The CEO/Founder/Head of School has worked diligently to secure the following partnerships:

Indiana University Purdue University Indianapolis Urban Center for the Advancement of STEM (UCASE) will provide professional development for classroom teachers with the implementation of the math and science curriculum and provide volunteer undergraduate and graduate math/science students who will tutor students and assist classes with their service learning projects. The University will provide support with science projects, fieldtrips, and with developing activities to effectively use technology including coding. The University will share the Mobile Resources Trailer as an extension of field-based science instruction and the use of the Geology Center for Discovering the Earth Sciences. Indy STEAM Academy will collaborate with UCASE to develop a Summer Camp program for our students. These services and resources will enhance the implementation of the STEAM model and support the integration of science, technology, engineering, and mathematics.

Marian University

Marian University's Center for School and Community Success (CS2) will partner with Indy Steam Academy (see Attachment #16) to provide a broad range of consulting services to support our Academy, especially in the first two years of implementation to ensure our success. The **Center for School and Community Success** will provide support with (1) Special Education Policies and Administration-provide training with understanding special education policies, processes and systems to comply with state and federal requirements; (2) State Compliance and Reporting-provide support with establishing and maintaining timely and accurate reporting to state authorities.

Marian University's Klipsch Educators College will partner with Indy STEAM Academy to create a pipeline of highly qualified teachers to support our instructional model through the **Teacher Clinical Residency Program**. The academy will receive two Clinical Resident Teachers in Years 1 and 2, three Clinical Resident Teachers in Years 3 and 4, and four Clinical Resident Teachers in Year 5 for a total of 14 teachers over the first five years of operation. Clinical Teacher Residents have Bachelor's degrees and are licensed to teach. They will work with the support of a Clinical Supervisor and Master Teacher provided by Marian University and will receive additional supports by our staff coaches. Clinical Resident Teachers will complete their residency, graduate from Marian University with Master's degrees, and commit to at least three years of service at our Academy with "effective" or higher performance evaluations at the end of their residency program. This partnership will help our Academy recruit and retain highly qualified licensed teachers and establish a pipeline of teachers as our staff grows organically.

Teach for America

Indy STEAM Academy will partner with Teach for America to create a pipeline of highly qualified teachers to support the implementation of our instructional model. Teach for America will provide recruitment fairs where the academy can meet and interview perspective teachers. This program will allow the academy to recruit up to two Novice Teachers who have a Bachelor's Degree, are licensed to teach, and prepared to take on the responsibilities of a new and beginning classroom teacher. This will be a two-year commitment on the part of the teacher and the academy. Teach for America will continue to provide training for teachers through the Marian University College of Education and provide coaching and resources such as ISTEM Resource Network Science Kits for teachers in their program. Indy STEAM Academy will also provide professional development and supports for our Novice Teachers.

I-STEM Resource Network will provide leadership with planning STEAM education and improving student performance through professional development for teachers. The I-STEM Resource Network will provide support with the integration of mathematics and engineering with science as a comprehensive curriculum. The ISTEM Resource network will provide science experiment kits for further exploration and investigation of science. These resources and services will help Indy STEAM Academy provide a strong foundation in science through the integration of science, engineering, mathematics and technology in students' early years to ensure a deep understanding of content that prepares students for more rigorous course work in high school and college.

Project Lead the Way will provide professional development for teachers with the implementation of the Indiana science standards and the Project Lead the Way Launch program for students grades K-5. Project Lead the Way captures the curiosity of students and engages them in hands-on activities that build knowledge and skills in the areas of computer science, engineering and biomedical science. These programs help students develop skills such as problem solving, critical and creative thinking, communication, collaboration, and perseverance to be successful in high school, college, and careers.

Community Alliance of the Far Eastside (CAFÉ) is the neighborhood association for our school community. CAFÉ will help our academy with community outreach to parents and leaders in the community. CAFÉ has provided the academy with a list of 20 pastors in the surrounding neighborhood. Indy STEAM Academy will visit churches on Sundays to speak with their congregations about the STEAM instructional model and goals to ensure the achievement of all students. There are four failing (F) schools and four (D) below proficient schools in the proposed school attendance area, which supports the need to provide a high-quality educational option for parents and their children in this community. CAFÉ will assist the academy with distributing brochures and will provide access to one of the largest Head Start programs in the city, which will serve as a pipeline for students entering kindergarten. Indy STEAM Academy will target children from low-income families, underserved minorities, and underrepresented students in the STEAM workplace.

5. Evidence of Demand, Community Engagement and Community Partnerships

Evidence of demand, evidence of community engagement, and evidence of support from community partners are provided in **Attachment 10**.

PERFORMANCE MANAGEMENT

1. Performance Goals

Indy STEAM Academy is committed to maintaining high academic standards that are rigorous, yet attainable. The Board of Directors will embrace all academic, non-academic, financial, and organizational goals as required by the Indiana Charter School Board's Accountability Plan. The following academic and non-academic goals are established to ensure student and staff success, and effective implementation of the STEAM model to be sustained and/or replicated in the future.

Academic Performance Goals for Reading

Performance Goal 1: Students will demonstrate proficiency in reading by the end of each grade level as measured by IREAD K-2, IREAD-3, ILEARN, and NWEA Benchmark Assessments.					
Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
1	2019-20	≥76%	75-66%	65-56%	55%≥
2	2020-21	≥76%	75-66%	65-56%	55%≥
3	2021-22	≥80%	79-71%	70-61%	60%≥
4	2022-23	≥80%	79-71%	70-61%	60%≥
5	2023-24	≥85%	84-75%	74-66%	65%≥

Growth Measures Goal 1: Students will demonstrate growth of 3-5%tile gains in reading by the end of each school year as measured by IREAD K-2, IREAD-3, ILEARN, and NWEA Benchmark Assessments.					
Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
1	2019-20	≥5%	4-3%	2%	1%≥
2	2020-21	≥5%	4-3%	2%	1%≥
3	2021-22	≥6%	5-4%	3%	2%≥
4	2022-23	≥6%	5-4%	3%	2%≥
5	2023-24	≥7%	6-5%	4%	3%≥

Academic Performance Goals for Math

Performance Goal 1: Students will demonstrate proficiency in math by the end of each grade level as measured by IREAD K-2, IREAD-3, ILEARN, and NWEA Benchmark Assessments.					
Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
1	2019-20	≥76%	75-66%	65-56%	55%≥
2	2020-21	≥76%	75-66%	65-56%	55%≥
3	2021-22	≥80%	79-71%	70-61%	60%≥
4	2022-23	≥80%	79-71%	70-61%	60%≥
5	2023-24	≥85%	84-75%	74-66%	65%≥

Growth Measures Goal 1: Students will demonstrate growth of 3-5%tile gains in math by the end of each school year as measured by IREAD K-2, IREAD-3, ILEARN, and NWEA Benchmark Assessments.

Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
1	2019-20	≥5%	4-3%	2%	1%≥
2	2020-21	≥5%	4-3%	2%	1%≥
3	2021-22	≥6%	5-4%	3%	2%≥
4	2022-23	≥6%	5-4%	3%	2%≥
5	2023-24	≥7%	6-5%	4%	3%≥

Academic Performance Goals for Science

Performance Goal 1: Student will demonstrate proficiency in science by the end of each grade level as measured by ILEARN (Grades 4 & 6), and NWEA Benchmark Assessments.

Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
3	2021-22	≥76%	75-66%	65-56%	55%≥
4	2022-23	≥76%	75-66%	65-56%	55%≥
5	2023-24	≥80%	79-71%	70-61%	60%≥

Growth Measures Goal 1: Students will demonstrate growth of 3-5%tile gains in science by the end of grades 4 & 6 school as measured by IREAD K-2, IREAD-3, ILEARN, and NWEA Benchmark Assessments.

Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
3	2019-20	≥5%	4-3%	2%	1%≥
4	2020-21	≥5%	4-3%	2%	1%≥
5	2021-22	≥6%	5-4%	3%	2%≥

Non-Academic Performance Goal 1: Attendance Rate

Performance Goal 1: The CEO/Head of School will foster an environment where students are engaged each with learning as measure by daily, quarterly, and annual attendance rates.

Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
1	2019-20	≥95%	94-93%	92-90%	89%≥
2	2020-21	≥95%	94-93%	92-90%	89%≥
3	2021-22	≥96%	95-94%	93-92%	91%≥
4	2022-23	≥96%	95-94%	93-92%	91%≥
5	2023-24	≥97%	96-95%	93-94%	92%≥

Non-Academic Performance Goal 2: Community Partnerships

Performance Goal 1: The CEO/Head of school will recruit community additional partnerships to support the implementation of the STEAM instructional model as measured by community partnership agreements or letters of support.					
Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
1	2019-20	4 partnerships	3 partnerships	2 partnerships	1 partnership
2	2020-21	5 partnerships	4 partnerships	3 partnerships	2 partnerships
3	2021-22	6 partnerships	5 partnerships	4 partnerships	3 partnerships
4	2022-23	7 partnerships	6 partnerships	5 partnerships	4 partnerships
5	2023-24	8 partnerships	7 partnerships	6 partnerships	5 partnerships

Non-Academic Performance Goal 3: Culture and Climate

Performance Goal 1: The CEO/Head of school will establish a positive, safe, and nurturing learning environment as measured by school culture and climate survey average ratings.					
Charter Year		Exceeds Standard	Meets Standard	Approaching Standard	Below Standard
1	2019-20	8	7-6	5-3	2-1
2	2020-21	8	7-6	5-3	2-1
3	2021-22	9	7-8	6-5	4-3
4	2022-23	9	7-8	6-5	4-3
5	2023-24	10	8-9	6-7	5

2. State Mandatory Assessments and School Formative Assessments

Indy STEAM Academy will implement the following required state standardized assessments along with adopted local assessments. Year 1 will serve as a baseline year since students grades K-2 do not take state mandated assessments. However, formative and adopted quarterly benchmark assessments will be administered to monitor student progress towards demonstrating proficiency in reading and math.

NWEA MAP (K-2) Growth and (3-8) Growth Benchmark Assessments will be administered to all students three times per year (Fall, Winter, Spring) to monitor students' academic progress. Assessment data will be used to identify areas of deficiency and performance levels of students in reading, math, and science. Data from these assessments will be used to group students during small groups, Success Time, after school tutoring, and summer school

IREAD K-2

The Indiana Reading Evaluation and Determination (IREAD-K-2) is optional and will be administered once per year in the spring to measure foundational reading standards to determine if students are reading on grade level. This assessment will be used to determine if students need additional supports to develop a strong foundation in reading.

IREAD-3

The Indiana Reading Evaluation and Determination (IREAD-3) state mandated assessments is administered to students in the spring of grade 3 to measure foundational reading standards. This assessment determines if students are reading on grade level. Students who do not demonstrate proficiency on the first administration of this assessment will participate in summer school for intervention and will retake this assessment during summer school to demonstrate proficiency to be prepared for grade 4.

ILEARN

The ILEARN state mandated summative assessment is administered to students each year at grades 3-8 in reading and math, grades 4 and 6 in science, and grade 5 in social studies. The purpose of these assessments is to

measure student growth and proficiency based on the Indiana Academic Standards. Indy STEAM Academy will administer ILEARN in Year 2 which will serve as our baseline data year.

WIDA

WIDA is a state mandated English Language Proficiency assessment that is administered annually to determine students' oral language, reading and writing skills in English. WIDA ACCESS is the English Language Proficiency assessment is administered to determine the correct level of English proficiency.

I AM

I AM is a state mandated alternative assessment to measure student achievement and growth based on the Indiana Academic Standards. I AM is administered to students with significant cognitive disabilities in grades 3-8.

3. Collection and Analysis of Data

All data will be saved in PowerSchool Student Management System. NWEA MAP Growth K-2 and 3-8 assessments will be administered three times per year (Fall, Winter, Spring) using student computers. IREAD K-2 will be administered in late Spring. Results will be available immediately. Coaches will assist teachers with exporting and storing their data. Teachers will also maintain data notebooks as an immediate resource to support their planning for instruction. Teachers will receive assistance from the Head of School, coaches, and their grade level team lead teachers with the analysis of data. The Grade Level Team Teacher Leaders, Coaches, and Head of School will meet bi-weekly to analyze data to support teachers with making informed decisions about instruction and student progress towards proficiency. Coaches and Grade Level Team Teacher Leaders will meet with classroom teachers during their planning periods to analyze data, make decisions about flexible groups for small group reading and math instruction in the classroom, flexible groups for Success Intervention Time, after school instruction, and identify students who will benefit from after school tutoring and summer school. Teachers will review the results reports NWEA MAP Growth K-2/3-8 assessments that are disaggregated by subject, class, and student. Teachers will also review data by subgroups: ethnicity, gender, special needs, English Language Learners, and free/reduced lunch.

4. Data Warehouse and Student Information Systems

PowerSchool will host our student information management system, data warehouse, and enrollment registration system. The Technology Specialist will be responsible for the warehousing of data. The Head of School, and Literacy and STEAM Coaches and Lead Teachers will be responsible for assisting teachers with the interpretation and analysis of data. The Head of School and Literacy and STEAM coaches will be responsible for leading and coordinating professional development to improve student achievement.

5. Training and Support for Analysis of Data

Teachers will receive training with analyzing and interpreting performance data to improve student learning from NWEA Assessment company representatives. Teachers will also receive 3 days of training with the use of the PowerSchool student information management system and data warehousing and reporting systems. The Head of School will use resources that include professional learning books such as *Leading With Data* by Goldring and Berends, and the *Data Coach's Guide to Improving Learning for All Students* by Love, by Stiles, Mundry, DiRanna, and *Getting More Excited about Using Data* by Holcomb.

6. Corrective Actions

If the academy falls short with achieving its academic expectations or goals as established by the Indiana Charter School Board and the Indiana Department of Education, the Head of School along with the school leadership team will develop and implement a School Improvement Plan as described by Section 11 Indiana Administrative Code Article 6.2, Rule3. The Board of Directors will realign the Strategic Plan Goals to ensure academic success. The Head of School will revisit current performance targets to ensure that the achievement goals are attainable considering the baseline data and the achievement levels of students upon entrance to the academy. **Failure is not an option at Indy STEAM Academy.** Receiving an overall rating of "F" or failing to meet annual proficiency and growth targets would trigger such corrective actions. The Head of School will meet with the School Leadership Team and formulate a School Improvement Team comprised of teachers, parents, community stakeholders and the Academic Achievement and Accountability sub-committee of the Board of Directors to identify the root causes of failure then create an action plan to support improvement. We have

established several “**STOP GAPS**” to intervene and support below level learners when the school opens. Assessments will be provided at the beginning of the school year to determine students’ levels of proficiency in reading and math. Students will be strategically grouped to provide Tier I and Tier II interventions and supports for reading and math instruction. Students will receive an additional hour of support (Success Time) during the school day (3:00-4:00 PM) to address skill areas where students are deficient. Students will receive additional support in the afterschool tutoring and summer school programs. Student progress will be closely monitored bi-weekly with support from the School Leadership Team. The Head of School will meet with the School Leadership Team once per week. The Head of School will meet with Grade level teams bi-weekly. The Head of School will meet with the entire staff bi-weekly (opposite the weeks of the grade level team meetings). Teachers will participate in ongoing monthly professional development to enhance classroom practices and instructional delivery. Teachers will have the support of our coaches who will demonstration lessons, help teachers with their instruction, provide reflection to modify and adjust instruction, assist with curriculum mapping and pacing instruction. Each classroom teacher will keep track of the performance of the class as well as individual students to ensure the success of all students. If after several interventions have been implemented and a student is not making expected progress, that student will be referred to the RTI Team for additional support.

SECTION III: IMPLEMENTATION PLAN

LEGAL STATUS AND GOVERNING DOCUMENTS

1. The legal entity is **Education Children Matters, Inc.**, doing business as **Indianapolis (Indy) STEAM Academy**.
 - a) **501 (c)(3) Determination Letter** is provided in **Attachment 11**.
 - b) **Articles of Incorporation** are provided in **Attachment 11**.
 - c) **ByLaws** for the Board of Director are provided in **Attachment 11**.
 - d) **Code of Ethics Policy** is provided in **Attachment 11**.
 - e) **Conflict of Interest Policy** is provided in **Attachment 11**.
2. Pursuant to IC 20-24-3-3, the **Dissolution Clause** is provided in Article IX of the Bylaws in **Attachment 11**.
3. The **Statement of Assurances** form is provided in **Attachment 12 (Exhibit E)**.

HUMAN CAPITAL

School Staffing Structure

1. Organizational Charts

Organization charts for the School Level Leadership Year One and at Full Capacity and Governing Board with roles and responsibilities are provided in **Attachment 13**.

School Leadership & Staff Hiring, Management and Evaluation

1. Timeline for Recruiting and Hiring Teachers

Indy Steam Academy will implement the following strategies and timeline for recruiting and hiring teachers in accordance with IC 20-24-6. Upon authorization, the academy will immediately begin recruiting highly qualified teachers and staff. The academy has established a partnership with IUPUI Center for the Advancement of STEM Education and will work with the College of Education to recruit teachers in the elementary education, science and math programs. The Head of School met with the director of Teach for America and has a partnership agreement to access a pool of new and beginning teachers as well as experienced teachers with science, engineering, and mathematics backgrounds. The Head of School met with the Dean of Marian University Klipsch Educator College to establish a partnership to access the Teacher Clinical Resident Program which provide a pool of teachers working on Master’s Degrees in Education. The Head of School has several networks established over the years of working in a variety of school districts in the Midwest to recruit teachers to our academy. Perspective teachers will be highly qualified meaning have a Bachelor’s Degree in Elementary Education or related field and be licensed to teach or eligible to receive a license to teach in Indiana.

The Head of School will implement the following recruitment timeline:

Timeline for Recruiting and Hiring Teachers	
December 2018	Recruit, Interview pre-opening staff (Business Manager, Office Manager, Coaches, Parent & Community Engagement Specialist, Technology Specialist)
January 2019	Make recommendations to hire Pre-opening Staff Conduct Indy STEAM Teacher Recruitment Fair (Round #1). Advertise in local newspapers, use social media and the academy's website, placement centers of identified colleges and universities; Utilize the College Career Center Consortium of Indiana (CCCC) resources; Send job postings to local churches; Post jobs on new Indiana Teachers Job Bank, at Placement Centers, on job search websites; Post job announcement in local public venues and participate in local job fairs; Collect applications submitted on the academy's website; Begin screening and interview process for Round #1 candidates
February 2019	Participate in the local and surrounding college fairs in Indiana, Kentucky, Ohio, and Illinois; Email potential candidates; and Visit local colleges and universities to recruit Spring graduates
March 2019	Continue recruitment efforts as described. Make recommendations for hire of Round #1 candidates. Begin screening and interview process for Round #2 candidates.
April 2019	Continue recruitment efforts as described. Make recommendations for hire of Round #2 candidates. Begin screening and interview process for Round #3 candidates.
May 2019	Make recommendations for hire of Round #3 candidates. May 30 is the deadline for Rounds 1, 2, 3, candidates to accept offers. May 30 is the deadline to receive all credentials and paperwork from candidates.
June 2019	Check all personnel files to ensure that all credentials and contracts are on file. Send Welcome Packets to all staff with information regarding timelines for onboarding and professional development.

The Interview Process:

The process for hiring includes the online application process. Applications for these positions should be submitted within 30 days of the posting date. Applications will be reviewed by the Interview Committee. Potential candidates will participate in an informal telephone screening process. Candidates recommended to move forward in the selection process will be invited to interview. The formal interview process will be comprised of three steps: (1) Writing Assessment where candidates respond to school related scenarios; (2) Question and Answer session where candidates provide oral responses to questions essential to their role and responsibilities, and interpersonal skill sets which are rated using a rubric; (3) Demonstration of Skills and Presentation relative to their role and responsibilities and the use of technology to support their roles which are rated using an interview rubrics. A complete background and references check will be conducted for candidates designated to move forward in the selection process. Candidates will be notified of their status in the application process within 5-10 business days following the formal interview. Candidates recommended for hire to the Board of Directors for review and potential approval. New hires will participate in an onboarding process in July 2019.

1. Staffing Plan

The following staff will be hired to ensure that every student has access to excellent teaching:

CEO/Head of School. Manage the day-to-day operations of the school, evaluate instructional staff, supervise students, facilitate professional development for all staff, head the school leadership team, frequently monitors the progress of students using data from benchmark and standardized assessments. Maintain a positive climate and culture using schoolwide PBIS and Character Education activities. Provide rewards and incentives to encourage

excellent behavior and acts of kindness, provides monthly professional development that focuses on the STEAM instructional model to build the capacity of teachers, and head the Community and Parent Advisory Councils to build engagement. The Head of School reports to the Board of Directors.

***Assistant Principal.** Assist the day-to-day operations of staff, assist with the evaluation of teacher assistants, assist with the supervision of students and support professional development efforts and participates on the school leadership team, assist with the Community and Parent Advisory Councils, lead efforts including afterschool tutoring, extra-curricular activities, intersession remedial program, summer school programs, and report to the CEO/Head of School. Note *position is available, if funding and enrollment targets are met Year 3.

STEAM/Literacy Coaches. Lead staff with the implementation of the STEAM model and Balanced Literacy model, coach classroom teachers, provide demonstration lessons and opportunities for reflection with the implementation of Project-Based Learning, 21st Century Learning Skills, Science Inquiry and Engineering Design Processes; align the curriculum with the Indiana Academic Standards and create curriculum maps; assist teachers lesson planning and the analysis of data to make instructional decisions about teaching and learning; collaborate with teachers during their grade level team planning periods; coordinate Success Time Tier II Interventions, coordinate the after school tutoring and summer school programs, serve on the school leadership team, and report to the CEO/Head of School.

Special Education and English Language Learner Resource Teachers. Provide “push-in” and “pull-out” instruction and support for students identified as special needs according to their Individualized Education Plans or identified as English Language Learners based on the Home Language Survey. These Resource Teachers will lead and coordinate their respective programs and services, work closely with the Director of Special Education, specialist staff, and regular education classroom teachers, ensure all records are up-to-date, complete state reports, facilitate MTSS meetings, lead the RTI team, serve on the school leadership team, and report to the CEO/Head of School.

Lead Teachers. will lead grade level teams with implementing curriculum maps, lesson planning, analysis of data, develop flexible groups for instruction, assist with planning Success Time instruction, mentor new and beginning teachers, serve on the school leadership team. Grade Level Lead Teachers in addition to their leadership roles will provide the same instructional and non-instructional responsibilities and a classroom core teacher. Lead Teachers report to the CEO/Head of School.

Novice and Clinical Resident Teachers. Provide daily instruction for students at their assigned grade levels and create safe, nurturing, and respectful learning environment using effective classroom management strategies. Develop lesson plans to provide Tier I and II interventions and supports to ensure the academic success of their students. Participate in parent/teacher conferences, family nights and other evening school activities. Work collaboratively in their grade level team meetings, receive support from the grade level team teacher leader and mentor, receive support from the Literacy and STEAM coaches with the implementation of the STEAM instructional model and Balanced Literacy framework, participate in monthly staff meetings, and all ongoing professional development training. Use feedback from informal and formal classroom observations to create professional development plans and improve classroom practices. Core teachers report to the CEO/Head of School.

Teacher Assistants. Assist classroom teachers with daily instruction and create a safe, nurturing and respectful learning environment. Teacher assistants will follow the assigned schedules and will participate in all grade level team planning meeting, staff meetings, and schoolwide professional development. The teacher assistant will focus on supporting instruction and behavior in the classroom and assist with the supervision of students during lunch and recess. Teacher Assistants will report directly to the Assistant Principal or Head of School.

2. Evaluation of Head of School

One of the Board's primary responsibilities is the annual evaluation of the CEO/Head of School. The evaluation should include key performance indicators that contribute to the academy's success and the overall effectiveness of the leadership. The evaluation of the CEO/Head of School may include key elements such as climate and culture, student achievement, policies and procedures, and fiscal responsibility. The Board of Directors will work with Board on Track to identify an evaluation tool for the Head of School. The evaluation will be based on both qualitative and quantitative data obtained from a variety of supportive documentation (e.g., observations, reports, surveys). The Board of Director's Governance and Development Committee will meet with the Head of School prior to the beginning of the school year to establish academic and non-academic goals. The Head of School will create an action plan to address how these goals will be accomplished. The Board of Directors will review the progress of the Head of School

mid-year and at the end of the calendar school year to provide performance feedback. The evaluation results will be communicated in a timely manner and will provide areas of strength to motivate and validate and opportunities for growth to develop leadership capacity. If the Head of School is performing at a less than proficient in any category, the board will recommend identifying a mentor as a means of support to improve performance.

Evaluation of Teachers

To comply with Public Law 90, the Indy STEAM Academy will use the Indiana Rise Teacher Effectiveness Rubric 2.0 to evaluate our teachers. The CEO/Head of School will have the primary responsibility for evaluating teachers, aligning observations, data analysis, and feedback to support teacher growth and development. The Indiana Teacher Effectiveness Rubric consists of three primary domains and nineteen competencies that focus on Planning, Instruction and Leadership. The fourth domain focuses on Core Professionalism which reflects the non-negotiable aspects of a teacher's job such as Attendance, On-Time Arrival, Policies & Procedures, and Respect. Each teacher will receive a rating at the end of each semester (December and June) in one of four performance levels: Highly Effective, Effective, Improvement Necessary and Ineffective. If a teacher is deemed Ineffective after the first semester, the teacher will develop a remediation plan with the support of coaches, mentors and Head of School that provides opportunities for additional professional development and support. If at the end of the year, the teacher is deemed ineffective again, the teacher will be released. Every teacher will develop a professional development plan that identifies at least two academic goals and one non-academic goal and identify professional development learning opportunities to achieve their goals. The Head of School will implement a multitiered system of evaluation that includes:

Informal Building/Classroom Walkthroughs – daily at least 5-10 minutes per classroom.

Informal Classroom Observations once per month for the entire lesson, unannounced, written feedback provided

Formal Classroom Observations – four times per year – once per quarter 90 minutes or entire class period.

Teachers will participate in pre- and post- observation conferences to discuss the observation and rubric feedback.

3. Unsatisfactory Leadership or Teacher Performance – Succession Plans and Turnover

Unsatisfactory Performance

Indy STEAM Academy is an “at-will” employer. Every decision is guided by our ambitious mission and goals for student achievement. If a teacher, staff member, or school leader is not working effectively toward meeting our mission, they will be coached, receive additional professional development, and will be assigned to a mentor if they do not already have one to become more effective. If remediation, coaching, and professional development are not effective, that employee will be recommended for dismissal. However, it is the goal of the Indy STEAM Academy to recruit and retain the most highly qualified teachers and support staff to reduce and prevent the possibilities of ineffective performance.

Succession Plan: If replacement of the Head of School is deemed necessary by the Board of Directors, the Board will use the job description and seek assistance from a local or national search firm to hire a new Head of School. The Board may use other resources including the National Charter School Board and the Indiana Charter School Board.

4. Compensation System

Indy STEAM Academy will provide a compensation structure that is comparable to other charter schools in our target area. We also reviewed the Indiana average teacher salary and used the Employee Compensation Report Gateway System to gauge the salaries for our staff. Teacher Clinical Resident salaries are based on a service agreement. The base salary for Novice or new and beginning teachers with a Bachelor's Degree is \$35,000 and \$40,000 with a Master's Degree. The base salary for a grade level lead teacher/mentor, Special Education and ELL Resource teacher is \$45,000. The base salary for coaches is \$50,000. Teacher assistant salaries are above the average starting at \$25,000. The Office Manager Parent Coordinator, Technology Specialist average salary range is \$35,000 to 40,000. The Business Manager, Speech Therapist, Psychologist and Special Education salary is \$50,000. The Head of School salary is \$95,000. Stipends for professional development are in the range of \$2,500 along with extra-

curricular activity contracts. Tutoring and summer school pay is \$30.00 per hour. The academy has not established a performance incentive structure, but we are looking for ways to provide incentives for outstanding performance.

Benefits

To meet our desired goal to retain at least 85% of our teaching force every year, Indy STEAM Academy has created a competitive benefits package equivalent to 28% of the actual annual base salary. All full-time Indy STEAM staff will be able to enroll in a 401K plan where the academy will contribute a portion of the annual salary for retirement. The academy will match 50% of the employee's contribution or pay up to 2% their gross salary for a 401K contribution. Additionally, Indy STEAM Academy will be able to offer Health, Dental and Vision Insurance, Workers Compensation, and Unemployment Insurance. To ensure personal health and wellness of our staff, Indy STEAM Academy staff will be allotted 2 personal leave days and 3 sick leave days Paid Time Off (PTO) days in addition to holidays and routine school breaks. The academy will contract with a provider to manage payroll and benefits.

Professional Development

1. Professional Development Plan for School Leaders and Teachers

All school leaders and teachers will develop goals and objectives in a professional development plan to carry-out their roles and responsibilities. The plan will identify key supports and training needed to be effective in their respective roles. The school leadership team will visit other STEAM Charter Schools and participate in STEAM/STEM professional organizations to establish networks and partnerships. School leaders and teachers will participate in local, state and national conferences to enhance the knowledge and instructional practices.

2. Ongoing Professional Development for School Leaders and Teachers

School leaders and teachers will participate in 10 additional days of professional development during the school year. These are days in which students are not in attendance:

August 30, 2019: Culture and Climate, PBIS/Character Ed

September 3, 2019: Analysis of Data for results from the Fall benchmark assessments

October 4, 2019: Evidence-based Reading Strategies

November 1, 2019: Evidence-based Math Strategies

January 31, 2019: Analysis of Data from the results of Winter benchmark assessments

February 28, 2019: Technology Tools and Resources

March 27, 2019: Science and Engineering Modules

April 13, 2019: Analysis of Data for results from the Spring benchmark assessments

May 26, 2019: School Visits to other STEAM Schools

June 12, 2019: Review School Survey results and plan for next school year

The Head of School will facilitate a “**Lunch and Learn**” one day per week where the members of the school leadership team discuss topics that focus on enhancing our workplace of learning. Coaches will participate in Instructional Coaching training to support their roles in working with adult learners. Coaches will also participate in the Train the Trainer model for STEM and Balanced Literacy to build the capacity of Lead Teachers.

3. Professional Development to Support Instruction, Build Capacity, and Improve Student Achievement

STEAM/Literacy Coaches will provide demonstration lessons, share instructional best practices, engage in ongoing conversations about instructional practices, and provide feedback with opportunities for teachers to reflect on their instruction during debriefing sessions. Our coaches will help teachers with lesson planning and the analysis of data to make instructional decisions during their weekly grade level team meetings. Lead Teachers work closely with coaches to help **Novice** (new) **teachers** with implementing the instructional model. Lead Teachers **will serve as mentors** for Novice teachers to help them acclimate as new and beginning teachers and support them as they learn to juggle instructional and non-instructional responsibilities.

4. Professional Development Schedule

Indy STEAM Academy will provide 10 days of training for 8 hours per day with one hour for lunch prior to the first day of school to help teachers acclimate to the learning environment, build a culture of collaboration and communication among staff, and provide them with resources to support the implementation of our instruction model. This hands-on training will provide opportunities for teachers to learn how to implement the curriculum, use technology tools,

implement assessments, and analyze data to monitor student progress. Teachers will develop the first two weeks of lesson plans with their grade level teacher leader/mentors and coaches using their curriculum maps and prepare their classrooms for the first day of school with students. The table below identifies the content and focus areas for each day of professional development.

Dates	Training
July 11-12, 2019	Staff Onboarding, Orientation, TEAM Building, and Classroom Preparation Teachers and Teacher Assistants will receive orientation with the School Leadership Team and Business Manager. This orientation will be an opportunity for teachers and assistants to become acclimated with the building, review Staff and Student/Parent Handbooks and School Safety Plan, IEP's training. (PM)-Teachers will participate in teambuilding activities off site. Day 2 Teachers will receive textbooks, supplies and materials needed to begin the school year. Teachers will have an opportunity to prepare their classrooms.
July 15-16, 2019	I-STEM Resource Network /Indiana Science Initiative/STEM Certification Teachers will review K-2 science standards and learn how to implement the Inquiry process and science curriculum. This two-day workshop will enhance the teacher's knowledge base to provide instruction focused on Earth, Space, Physical and Life Sciences. Teachers will learn how to use the science experiment kits to support their instruction. The leadership team will discuss the process for STEM Certification.
July 17, 2019	Project Lead the Way Launch This core training supports teachers with hands-on training where teachers take on the role of the student to engage in in-depth exploration of the PLTW curriculum. This training will help teachers build confidence with the implementation of project-based learning strategies to support instruction.
July 18, 2019	Engineering is Elementary This core training builds the teacher's understanding of engineering concepts, skills, and pedagogy. This hands-on training will help teachers build confidence with the implementation of project-based, inquiry-based learning strategies and the Engineering Design Process to support instruction.
July 19, 2019	RTI, PBIS, Character Counts Culturally Responsive Classrooms This training will review the RTI three-tiered approach to instruction. Teachers will learn how to build supports for instruction at each tier through small group instruction and guided practice during reading and math instruction. Teachers will learn how to group students for Success Time. End the first week with a team building activity.
July 22, 2019	Balanced Literacy – Reading/Language Arts (AM) This training will review the K-2 reading standards. Teachers will learn the Balanced Literacy approach for instruction. Teachers will be trained to use the basal program. Balanced Math Framework (PM) This training will review the K-2 math standards. Teachers will learn the Balanced Math approach for instruction and the Pearson Math program.
July 23, 2019	PowerSchool Student Information System Teachers will be trained with the use of the PowerSchool student information system to maintain attendance, grades, view schedules, manage assessment data and report progress of students to parents.
July 24, 2019	NWEA Assessment Training Teachers will be trained with the administration and implementation of the NWEA MAP Growth K-2 benchmark assessment. Teachers will learn how to review assessment reports and analyze data.
July 25, 2019	Smartboard, DreamBox, and Scholastic Reader Software Programs Teachers will learn how to use the Smartboards and interactive response systems to support classroom instruction. Teacher will learn how to use computer assisted instructional software programs to support math and reading instruction.
July 26, 2019	First Day of School Protocols and Classroom Preparation Teachers will review protocols and procedures for the first day of school. Teachers will finalize classroom preparation. Teachers turn-in beginning of the year checklist. End with a team building activity and pre-opening day celebration.

5. Professional Development Hours and Alignment with Assessments

The academy will provide 10 professional development days during the school year when students are not in attendance (See School Calendar Attachment 6). Training will be 7 hours per day. Training will support the analysis of data from benchmark assessments that are administered in August, January and May. State Assessments will be administered in March. Teachers will review reading and math instructional strategies to enhance instructional delivery and student achievement. (See Ongoing PD chart above in question #2).

6. Evaluation of Professional Development

The academy will evaluate the effectiveness of professional development offerings by completing an evaluation form that gauges the instructional staff's perceptions and reactions to the professional development experience.

Evaluation questions focus on (1) **Participant Reactions** to the professional development learning experience; (2) **Participant Learning** – knowledge and skills that participants gained from the professional development experience; (3) **Organization Support and Change** – planning and organization of professional development experience; (4) **Participant Use of New Knowledge and Skills** – how teachers will use new knowledge and apply to classroom practices; and (5) **Student Learning Outcomes** – how the professional development activity will benefit/affect student learning. The overall effectiveness of professional development for the academy will be determined through the implementation of the STEAM instructional model and student achievement results.

Start-Up Operations

1. Start-Up Plan

A detailed start-up plan of tasks by month and persons responsible from the period of authorization to the first day of school for students is provided in **Attachment 14**.

2. Transportation

Based on our targeted enrollment projections and the location of students living in the surrounding area within a three-mile radius, students will be able to walk to school or be driven by their parents. Indy STEAM Academy will not provide transportation for the general population; however, the academy will provide transportation for fieldtrips, special events, and activities away from school. The academy will provide transportation for homeless students to comply with the federal McKinney-Vento Homeless Act, 42 USC 11431, and for students with disabilities whose IEPs require transportation in compliance with the Individuals with Disabilities Education Act and 511 IAC 7-43-1(u) through a private contracted bus service.

Safety and Security Plan

Indy STEAM Academy will apply for a Homeland Security grant to support some of the cost for a school threat analysis and School Resource Officer. The academy will have hand-held metal detectors, and security system and surveillance cameras to monitor activity inside and the outer perimeter of the building. The School Safety and Security plan will be developed with the local community first responders once we have solidified a permanent location.

Facility Policies: All staff will sign-in at the beginning of the school day and sign-out upon leaving at the end of the school day. All staff are required to wear identification badges which will electronically open locked entrance doors. All parents and visitors will enter through the office and sign-in/out with the office manager. Visitors will use the visitor sign-in/out badge system. Students arriving late will need to sign-in before they go to their classrooms and will receive a pass for admittance to their classrooms. Students may not leave the building without being signed-out by a parent or authorized person. Parents desiring to sign-out their children before the end of the school day must call the office manager to make this request and sign-out their children using the badge system. Parents and family members authorized to pick up their children must show a photo-ID.

3. Technology Specifications and Requirements *(for Blended Learning and Virtual Operators only)* Not Applicable

4. Insurance Coverage (See Attachment 15)

Indy STEAM Academy has partnered with Miller Insurance Group to provide appropriate coverage to safeguard the school from potential risks. The insurance coverage will indemnify Indiana Charter School Board, any related entities, Board of Directors, employees, officials and agents. The insurance coverage will provide liability insurance coverage and names Indiana Charter School Board as an Additional Insured agency.

Facility Plan

Indy STEAM Academy is working with several companies to assist us with acquiring a facility that will meet the needs of students and staff, and support the implementation of our instructional model. The Facility and Finance committees will consider facility options with the help of professionals to determine the most viable option.

Attorney: Stevenson Legal Group (Howard Stevenson) will assist the academy with all legal needs and issues.

Real Estate Broker of Record: NAI Meridian (Andrew Follman) will assist in locating a facility.

Architect: Schmidt Associates (Anna Marie Burrell) will assist with any plans to reoutfit the facility and work with the Board Facilities Chair on all permits, building codes, ADA requirements, occupancy certificate, and inspections.

Facility Financing: Charter Schools Capital (Equipment, Furniture and Facility Financing) (Michelle Goodin) Charter Schools Capital has provided a Prequalification Letter in the amount of \$325,000 to cover initial start-up cost and are committed to providing funding to reoutfit the facility to meet our instructional needs (**See Attachment 10**). According to the Indiana Department of Education School Facilities Guidelines, "**adequate classroom space**" means an instructional area containing thirty (30) square feet of space per student to be accommodated. The targeted enrollment for Year One is 200 students. The minimum required classroom space is 200 x 30 square feet which totals 7,000 square feet. Additional spaces needed for administrative and support staff as well as spaces to support the instructional model are listed in the table below:

Classroom Spaces			Other Classroom Spaces	Office Spaces	Other Spaces	Outdoor Spaces
Year 1	K-2	8	Art	Principal	Cafeteria*	Playground
Year 2	K-3	11	Music	Asst. Principal (Y3)	Staff Workroom	Parking
Year 3	K-4	14	Gymnasium*	Business Manager	Staff Lounge	
Year 4	K-5	17	Science/Engineering Lab	Main Office - Office Manager	Copy Room	
Year 5	K-6	20	Computer Lab	Parent Specialist	Server Room	
Year 6	K-7	23	Library	Social Services	Janitor	
Year 7	K-8	26	Coaches	Speech Therapist	Parent Center	
			In-School Suspension	Psychologist & Special Ed. Director (Y3)	Student Restrooms	
			Special Ed. & ELL Resource	Nurse	Staff Restrooms	

Indy STEAM Academy is considering four properties to house our program. These properties would allow Indy STEAM Academy to serve students in our targeted community.

6550 E. 30th Street

Large Office & Flex Space Available
6550 E 30th Street Indianapolis, IN 46219

Office/ Flex Lease

Large Office & Flex Space Available
6550 E 30th Street Indianapolis, IN 46219

Office/ Flex Lease

Suite 100 - 61,300 SqFt

- Call Center Build out: Space is currently set up for a diverse office configuration. Included are over 100 workstations.
- Optimal Configuration: Ideal mix of open and private office areas, storage loading docks, and back office support space.
- Each Workstation: Floor and ceiling power. CAN for wiring and ample power. The space is perfect for both support or any office operation.

Option #1: 6550 E. 30th Street (Currently a Call Center and Industrial Building)

Budget and Finance

1. Accounting, Purchasing, Payroll, and Audit Systems, Processes and Internal Controls

The Board of Directors, Finance Subcommittee, led by the Treasurer of the Board, Business Manager, and Head of School will be responsible for the oversight of the management of the finances for the academy. The Head of School along with the Board Treasurer will create the preliminary budget until a Business Manager is hired. The Board of Directors will be responsible for adopting the preliminary and final. The Business Manager will handle day-to-day financial operations such as bookkeeping, accounts payable, purchasing, payroll preparation, and management of receipts. The Board of Directors has the ultimate fiduciary duties of oversight for proper financial reporting.

Financial Controls

Purchasing. The Board of Director Treasurer, Head of School and Business Manager will be involved in carrying out financial transactions. All checks, drafts or orders for the payment of money, notes or other evidences of indebtedness in the name of the Indy STEAM Academy will be signed by the officers and agents of the academy, and from time to time be determined by resolution of the Board of Directors. In the absence of the resolutions, checks and orders will be signed by the Treasurer and countersigned by the Board President or Vice President of the academy. Any transactions in excess of \$10,000 will require an affirmative vote of the majority of Board of Directors (See Bylaws). However, it is the intent of the Head of School to ensure the approval of purchases in excess of \$5,000 to maintain fiscal stability and long-term viability. **Accounting.** The Business Manager will use *Quickbooks* accounting software program to maintain the academy's financial records. The Board Treasurer, CEO/Head of School, and Business Manager will have access to the accounting software program to ensure transparent tracking or revenues and expenditures, and the overall management of the academy's finances. The Business Manager will generate checks, monitor cash, create journal entries, manage payroll, reconcile bank statements, and generate financial reports. All financial statements will be maintained using generally accepted accounting principles established by the Governmental Accounting Standards Board (GASB). **Payroll.** The Business Manager will submit payroll to TriNet to manage distribution of checks, benefits, and other risk management issues. **Financial Reports.** The Business Manager is also responsible for generating regular monthly financial reports for review by the CEO/Head of School and Board Treasurer. After review, this report will be provided to the Finance Committee and then to the entire Board during their monthly meetings. The Board Treasurer is responsible for implementing the academy's approved financial policies and established compliance procedures that have been accepted by the Board of Directors. Exceptions, changes or amendments to these policies shall be conducted by the Finance Subcommittee and the Policies subcommittee and approved by the Board of Directors. **Annual Budget Preparation.** The Business Manager, Board Treasurer, and CEO/Head of School will prepare an annual operating budget of revenues and expenses, cash flow projections, and a capital budget. In preparation for the annual operating and capital budgets and cash flow projections, the Business Manager and CEO/Head of School will prepare preliminary budgets and cash flow projections based on overall enrollment projections, individual class size projections, salary structures, facility costs, and long-term financial goals. The Business Manager will prepare current year-to-date financial data with prior year budget-to-actual comparisons, as well as the basis for current year projections. Once prepared, the CEO/Head of School and the Board Treasurer will review the budgets and projections submitted for completeness and reasonableness. The Finance Subcommittee will make necessary changes prior to presenting them to the Board for final approval and adoption. The adopted budget totals will be entered in the general ledger by the Business Manager for the new fiscal year, in order to prepare subsequent budget-to-actual reports. **Audit.** Indy STEAM Academy will use contracted services to hire an approved auditor who will provide annual reviews and audit reports of the academy's finances and the management thereof according to the policies and requirements of the Indiana State Board of Accounts.

2. Five Year Budget Worksheet (See Attachment 16)

3. Budget Narrative (See Attachment 17)

4. Pre-Existing Non-Profit Organization Financials (See Attachment 18 - Not Applicable)

SUBMISSION OF FULL APPLICATION

The full application for charter authorization is provided in **Attachment 19**. References page is provided below.

SUMMARY OF QUALIFICATIONS

Management career with hands-on industry experience directing and overseeing technical and logistics execution. 18+ years of experience in applied technology, critical problem analysis/resolution, documentation and reporting, and employee training and development. Effectively able to communicate technical information to non-technical audiences, improvising content and style to meet diverse audience needs. Experience in public speaking including classroom instruction to adult learners.

EDUCATIONAL BACKGROUND

M.A., Management, Antioch University McGregor, Yellow Springs, Ohio (July 2005)
B.S., Chemical Engineering, Tuskegee University, Tuskegee, Alabama (Degree Conferred 1999)

ACADEMIC EXPERIENCE

Brown Mackie College	Oct 2007-Apr 2015
-----------------------------	--------------------------

Adjunct Instructor, Business & Technology, Cincinnati, Ohio & Ft. Mitchell, Kentucky

Developed instructional plans and delivered classroom instruction. Maintained and submitted accurate and timely reports.

- Taught 11+ courses in Business Management (Introduction to Business, Business Law, Small Business Management, Human Resource Management, Accounting, Economics, Marketing, Operations Management)
- Instructed class size of up to 30+ students (experience with in-class & online instruction)
- Recognized as Instructor of the Quarter in 2010

PROFESSIONAL EXPERIENCE

Procter & Gamble	2004 - present
-----------------------------	-----------------------

Inbound Transportation Operations Leader, NAPD, Cincinnati, Ohio (2006 –present)

Lead work processes that support the flow of raw materials between strategic suppliers and manufacturing sites. Manage material planning and forecasting for raw materials. Own inbound transportation logistics and freight payments process.

- Lead inbound transportation operations for >1400 raw materials and spend \$165MM (5 direct reports).
- Owned inventory capability for >2,500 perfume materials at \$84MM.
- Owned central planning forecast process for 30+ critical raw materials with total spend >\$1billion.
- Managed Target Order Management Team (2nd largest P&G Customer Team)

Board Director Resume: Tanya Mack

Page 2 of 2

Engineer, Beauty Care Product Development, Cincinnati, Ohio (2004-2006)

Designed and executed consumer market research studies. Identified consumer needs and translated into technical solutions.

- Designed and executed consumer research for category Stream I initiative, meeting time-critical deadlines to provide decision-making data and results to lock project commitment.
- Community Team Adopt-A-Family Committee Chair (2006), which served as an annual holiday project helping 2 Cincinnati families in need.

Cognis Corporation

2003 - 2004

Quality Compliance Auditor, Cincinnati, Ohio

Lead auditor for ISO 9001:2000 internal audits of Cognis N.A. and GMP audits of external tollers and contract labs.

- Established GMP audit process for the NA manufacturing plants and third-party vendors.
- Activities Chairperson for RIM Clean-Out Day 2004.

Owens-Illinois, Inc.

1999 - 2003

Quality Assurance Manager, Cincinnati, Ohio (2001-2003)

Managed daily workflow of Quality Control lab and supported operations through finished goods inspection and approval.

- Managed quality department of 10 quality technicians.
- Established capability tool to track customer complaints by shift, which reduced complaints by 40%.
- Improved root cause analysis process, which generated savings of \$20,000/year in customer returns from key customer.

Package Development Engineer, Perrysburg, Ohio (1999-2001)

Led consumer product packaging projects from concept to manufacturing start-up.

- Led \$4MM+ project and manufacturing launch of new bottle design integrating start-up of new/advanced technology.
- Promoted from Engineer I to Engineer II.

Summary of Qualifications

- Higher education leader with experience in academic affairs, student affairs and classroom instruction.
- Management and leadership of faculty and administrative staff.
- Skilled in academic advising, mentoring and retention, and developing strategies to address and meet needs of adult and at-risk student populations.

Professional Experience

Capital Group, Carmel, IN 2017-present

Client Services Representative

- Educate investors and financial advisors on American Funds services and mutual fund products.
- Interpret and apply policy and procedures established by company and governing state and federal agencies.
- Research and resolve customer inquiries regarding their accounts.

University of Phoenix, Indianapolis, IN 2010-2017

Director of Academic Affairs, 2016-2017

- Managed team of faculty positions including Associate Faculty, Lead Faculty Area Chairs, and Campus Faculty Assessment Liaisons.
- Conducted faculty performance reviews, quality checked course syllabi and online classrooms, and provided coaching to ensure academic rigor and instructional quality in campus courses as well as adherence to academic policies and procedures.
- Evaluated course needs and assigned faculty to approved courses, led general faculty and campus chair meetings, and planned professional development workshops and trainings.
- Supervised campus staff of Resource Specialists and Student Service Coordinators and collaborated with offsite advisors with purpose of providing support services and academic assistance to local and online students.
- Handled all student grievances, classroom issues and grade disputes. Reviewed responses from student end of course surveys and followed up with students and faculty regarding concerns or commendations.
- Prepared campus self-evaluation in preparation for annual campus reviews and upcoming Higher Learning Commission visit.

Faculty Liaison, 2010-2015

- Served as liaison between Academic Affairs and more than 400 faculty members at seven campuses to provide timely and accurate information on academic policy and procedures. Provided excellent customer service and advocate for faculty during all phases of employment.
- Collaborated with Directors of Academic Affairs and Campus College Chairs to schedule faculty for classes, plan and monitor faculty evaluations, and manage Lead Faculty Area Chair contracts.
- Responded to faculty needs by researching and problem-solving to effectively communicate resolution to satisfaction of faculty member.
- Identified opportunities for improvement to existing departmental procedures and created new procedures.
- Identified and helped implement methods and opportunities for professional development workshops, trainings, and social activities to foster faculty engagement.
- Worked collaboratively with student Resource Specialists and Student Services; served on Academic Skills Assistance Program committee with goal to ensure quality support services for campus students.

Associate Faculty, 2014-2017

- Taught *Critical Thinking and Creative Problem-Solving* focusing on helping students develop the skills necessary to analyze and solve problems, make decisions, implement strategies, and formulate well-supported

Board Director Resume: Kamia Jackson

points of view on key academic, social, and professional issues.

Martin University, Indianapolis, IN

1994-2009

Student Services, 2005-2009

- Served as Associate Director, then Director of Student Services. Managed workflow and oversaw all responsibilities of division of Student Affairs and synchronized activities with recruitment to ensure seamless processes and one-stop enrollment. Supervised team of advisors and testing coordinator.
- Enrolled first semester undergraduate applicants and served as academic advisor and mentor to continuing students. Met with accepted applicants, new and transfers, to advise in selecting courses and establishing degree plans. Pre-evaluated transcripts and collaborated with department deans to align transferred courses into degree plan.
- Served on retention committee in consultation with Noel-Levitz with result of developing retention strategies that included administering and evaluating data from College Student Inventory (CSI), establishing early alert metrics through attendance monitoring and instructor feedback, withdrawal counseling, development of communication matrices, and use of National Survey of Student Engagement (NSSE).
- Oversaw administration of Compass placement test to applicants to determine ability to benefit and English, math and reading course placements. Provided counseling and plan of action to applicants that were not able to meet minimum score requirements.
- Provided ongoing evaluation of processes, policies and procedures to refine or implement as needed. Created and managed enrollment and retention reports to provide accurate data for daily dashboard updates.

Adjunct Faculty, 2005-2009

- Taught Student Success in Higher Education, the first year experience course. Instructed students in academic and life skills such as study habits, setting SMART goals, time-management, career search strategies, and learning styles. Special emphasis placed on critical thinking in reading, researching, and problem-solving as it applied cross-curriculum and in everyday decision making.

Director of Prior Learning Assessment, 2007-2009

- Led the academic program which served to award university credit to students based on college-level learning from their work and life experiences utilizing Council for Adult and Experiential Learning (CAEL) guidelines and principles. Evaluated course and program effectiveness based on formative and summative assessments.
- Identified potential candidates for the program through interview and/or faculty recommendation. Met with students individually from start of program through portfolio completion to establish goals and stay on task.
- Instructed course and served as course coordinator for other instructors. Developed course syllabus and weekly assignments in alignment with the CAEL recommended student learning outcomes and expected University program outcomes. Trained faculty and staff evaluators on portfolio assessment.

Bookstore Manager, 1994-2004

- Planned, implemented, organized and controlled all operations related to university bookstore. Performed direct sales to students, employees, and campus visitors. Coordinated marketing, merchandising and promotional activities. Interviewed, hired, trained and evaluated employees.

EDUCATIONAL PROFILE

Experienced educator with expertise in curriculum, instruction, assessments, grant writing, and program evaluation. Experience with operating budgets, and able to address all aspects of school leadership.

ADMINISTRATIVE COMPETENCIES

- Visionary/Strategic Planner
- Collaborative/Transformative Leader
- Common Core Standards
- Intervention and Turn-Around Models
- Systemic School Improvement Planning
- Assessment, Analysis of Data, and Evaluation
- Curriculum Development/Alignment
- Budget Development and Management Skills
- Oral/Written Communication Skills
- Presenter/Facilitator/Trainer Skills
- Response to Intervention/PBIS Development
- Grant Writing and Development Expertise
- Federal/State Program Implementation
- NCLB/AYP/Race to the Top Guidelines
- Scientific Research Based Best Practices
- Liaison for Community and Business Partnerships
- Human Resources Skills Including Interviewing, Hiring, Supervision, and Evaluation of Staff
- Computer Literate, Use of Data Warehouse, and Integration of Technology to Enhance Instruction

ADMINISTRATIVE ACCOMPLISHMENTS

Improved reading and math achievement scores.

Results: District overall performance improved on (ISAT) standardized assessments in reading from 41% to 60% and math from 63% to 75%. PSAT scores improved in reading from 8% to 27% and in math from 10% to 20%. ACT composite scores improved from 15.3% to 20.6%. The elementary/middle school improved reading performance and had the highest math scores compared to the past six years. Primary students performed on grade level as measured by DIBELS and SRI results.

Facilitated turnaround and transformation of two high schools and one middle school that were slated for State takeover because they failed to make Adequate Yearly Progress for 6 consecutive years.

Results: The high schools improved in twelve months from "F" to "C" status. Student achievement improved from 50.4% to 60.5% passing English and from 30% to 47.6% passing math. The middle school improved in nine months from "F" to "A" status. Student achievement improved from 47% to 62% in reading, from 44% to 75% in math, and from 33% to 56% passing both, which prevented State takeover of schools as planned.

Written and awarded numerous grants such as SIG 1003g, 21st Century, Enhancing Education through Technology, Fine Arts, Magnet Schools and Homeless grant to support instruction, professional development and the integration of technology in the classroom.

Results: Provided reading and math coaches and intervention specialists to support classroom teachers. Provided professional development using research-based best practice strategies and interventions to enhance instructional delivery, student engagement, and classroom management. Provided I-Pads, desktop computers, laptops, interactive whiteboards, and student response systems to support instruction in the classroom. Enhanced the instructional leadership of principals through the use of classroom walkthroughs to build the capacity of teachers and transform instructional practices.

7. Are you, your spouse, or any other immediate family members, a director, officer, employee, partner or member of, or are otherwise associated with, any other organization that is partnering, or plans to partner, with the charter school?

☒ No.

☐ Yes. Please describe the relationship and the nature of the partnership:

8. Are there any other potential ethical or legal conflicts of interests that would, or are likely to, exist should you serve on the school's board?

☒ No.

Page 2 of 3

Attachment #2: Statement of Economic Interest and Conflict of Interest Form (Exhibit C)
Yvonne Bullock, CEO/Founder/Ex-Officio of the Board/Head of School
Page 3 of 3

10. Do you understand the obligations of a charter school's board of directors to comply with Indiana's Public Access laws, including the Open Door Law and the Access to Public Record Act?
- ☒ Yes.
☐ Don't Know/ Unsure.

I, certify to the best of my knowledge and ability that the information I am providing to the Indiana Charter School Board as a prospective board member for the above charter school is true and correct in every respect.

<u>Name and Title</u> Yvonne Bullock CEO/Founder/Head of School Ex-Officio of the Board	<u>Date</u> 8-21-18

Attachment #4

Course Scope and Sequence

Attachment #4 Core Curriculum Scope and Sequence

Indy STEAM Academy will use the following resources as we develop our curriculum:

Core Content Area	Curriculum Resources
Reading Language Arts	Houghton Mifflin Journeys Basal Reading Six+ Traits for Writing
Mathematics	Pearson EnVision Math Program
Science	I-STEM Resource Network Kits
Engineering	Engineering is Elementary Project Lead the Way
Technology	Technology Standards and Technology Plan
Social Studies	Houghton Mifflin/Harcourt Kids Discover

The STEAM and Literacy Coaches will develop curriculum maps and pacing guides that are aligned with the Indiana Academic Standards before the start of school which will help classroom teachers develop lesson plans and coordinate instruction with assessments to monitor student learning and enhance achievement. Coaches will use the Indiana Academic Standards, Vertical Articulations, and Textbook Scope and Sequences to ensure that there are no skill gaps with instruction from one grade level to the next. Examples of textbook or program scope and sequences are provided along with the vertical articulations for each core content area:

English/Language Arts Grades K-5 Vertical Articulation

READING

Guiding Principle: Students transition from "learning to read" to "reading to learn." Students develop and apply a wide range of strategies to comprehend, interpret, evaluate, and appreciate texts. They read a wide range of literature in several genres from a variety of time periods and cultures from around the world to build an understanding of the many dimensions (e.g., philosophical, ethical, aesthetic) of human experience. They draw on their prior experience, their interactions with other readers and writers, their knowledge of word meaning and of other texts, their word identification strategies, and their understanding of textual features (e.g., sound-letter correspondence, sentence structure, context, graphics).¹

READING: Foundations

There are four key areas found in the Reading: Foundations section for grades K-5: Print Concepts, Phonological Awareness, Phonics, and Fluency. By demonstrating the skills listed in each section, students should be able to meet the Learning Outcome for Reading: Foundations.

In Reading: Foundations, students are expected to do the following:

RF.1: LEARNING OUTCOME FOR READING FOUNDATIONS Develop, build, and apply knowledge of foundational reading skills					
LEARNING OUTCOME	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RF.1: Understand and apply knowledge of print concepts, phonics, phonemic awareness, vocabulary, and fluency and comprehension as a foundation for developing reading skills.	1.RF.1: Develop an understanding of the five components of reading (print concepts, phonemic awareness, phonics, vocabulary, and fluency) and comprehension to build foundational reading skills.	2.RF.1: Demonstrate an understanding of the five components of reading (print concepts, phonemic awareness, phonics, vocabulary, and fluency) and comprehension to build foundational reading skills.	3.RF.1: Apply foundational reading skills to demonstrate reading fluency and comprehension.	4.RF.1: Apply foundational reading skills to demonstrate reading fluency and comprehension.	5.RF.1: Apply foundational reading skills to demonstrate reading fluency and comprehension.
RF.2: PRINT CONCEPTS Demonstrate understanding of the organization and basic features of print, including that printed materials provide information and tell stories					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RF.2.1: Demonstrate understanding that print moves from left to right across the page and from top to bottom.	1.RF.2.1: Students are expected to build upon and continue applying concepts learned previously.	2.RF.2.1: Students are expected to build upon and continue applying concepts learned previously.	3.RF.2.1: Students are expected to build upon and continue applying concepts learned previously.	4.RF.2.1: Students are expected to build upon and continue applying concepts learned previously.	5.RF.2.1: Students are expected to build upon and continue applying concepts learned previously.

RF.3: PHONOLOGICAL AWARENESS Demonstrate understanding and apply knowledge of spoken words, syllables, and sounds					
PHONOLOGICAL AWARENESS	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RF.3.1: Identify and produce rhyming words.	1.RF.3.1: Students are expected to build upon and continue applying concepts learned previously.	2.RF.3.1: Students are expected to build upon and continue applying concepts learned previously.	3.RF.3.1: Students are expected to build upon and continue applying concepts learned previously.	4.RF.3.1: Students are expected to build upon and continue applying concepts learned previously.	5.RF.3.1: Students are expected to build upon and continue applying concepts learned previously.
K.RF.3.2: Orally pronounce, blend, and segment words into syllables.	1.RF.3.2: Blend sounds, including consonant blends, to produce single- and multi-syllable words.	2.RF.3.2: Students are expected to build upon and continue applying concepts learned previously.	3.RF.3.2: Students are expected to build upon and continue applying concepts learned previously.	4.RF.3.2: Students are expected to build upon and continue applying concepts learned previously.	5.RF.3.2: Students are expected to build upon and continue applying concepts learned previously.
K.RF.3.3: Orally blend the onset (the initial sound) and the rime (the vowel and ending sound) in words.	1.RF.3.3: Add, delete, or substitute sounds to change single-syllable words.	2.RF.3.3: Students are expected to build upon and continue applying concepts learned previously.	3.RF.3.3: Students are expected to build upon and continue applying concepts learned previously.	4.RF.3.3: Students are expected to build upon and continue applying concepts learned previously.	5.RF.3.3: Students are expected to build upon and continue applying concepts learned previously.

RF.4: PHONICS Decode and read words by applying phonics and word analysis skills					
PHONICS	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RF.4.1: Tell the order of sounds heard in words with two or three phonemes, and identify the beginning, middle (medial) and final sound.	1.RF.4.1: Distinguish beginning, middle (medial), and final sounds in single-syllable words.	2.RF.4.1: Students are expected to build upon and continue applying concepts learned previously.	3.RF.4.1: Students are expected to build upon and continue applying concepts learned previously.	4.RF.4.1: Students are expected to build upon and continue applying concepts learned previously.	5.RF.4.1: Students are expected to build upon and continue applying concepts learned previously.
K.RF.4.2: Add, delete, or substitute sounds to change words.	1.RF.4.2: Segment the individual sounds in one-syllable words.	2.RF.4.2: Students are expected to build upon and continue applying concepts learned previously.	3.RF.4.2: Students are expected to build upon and continue applying concepts learned previously.	4.RF.4.2: Students are expected to build upon and continue applying concepts learned previously.	5.RF.4.2: Students are expected to build upon and continue applying concepts learned previously.
K.RF.4.3: Blend consonant-vowel-consonant (CVC) sounds to make words.	1.RF.4.3: Use letter-sound knowledge to decode the sound of each consonant (e.g., <i>c</i> , <i>g</i>) and each vowel (e.g., <i>a</i> , <i>i</i> , <i>o</i> , <i>u</i>) in simple words.	2.RF.4.3: Students are expected to build upon and continue applying concepts learned previously.	3.RF.4.3: Students are expected to build upon and continue applying concepts learned previously.	4.RF.4.3: Students are expected to build upon and continue applying concepts learned previously.	5.RF.4.3: Students are expected to build upon and continue applying concepts learned previously.
K.RF.4.4: Blend consonant-vowel-consonant (CVC) sounds to make words.	1.RF.4.4: Use letter-sound knowledge to decode the sound of each consonant (e.g., <i>c</i> , <i>g</i>) and each vowel (e.g., <i>a</i> , <i>i</i> , <i>o</i> , <i>u</i>) in simple words.	2.RF.4.4: Students are expected to build upon and continue applying concepts learned previously.	3.RF.4.4: Students are expected to build upon and continue applying concepts learned previously.	4.RF.4.4: Students are expected to build upon and continue applying concepts learned previously.	5.RF.4.4: Students are expected to build upon and continue applying concepts learned previously.

K.RF.4.5: Recognize the long and short sounds for the five major vowels.	1.RF.4.5: Apply knowledge of final -e and common vowel digraphs (e.g., <i>ea</i> , <i>oa</i>) to represent long vowel sounds.	2.RF.4.5: Apply knowledge of short and long vowels (including vowel teams) when reading regularly spelled one-syllable words.	3.RF.4.5: Students are expected to build upon and continue applying concepts learned previously.	4.RF.4.5: Students are expected to build upon and continue applying concepts learned previously.	5.RF.4.5: Students are expected to build upon and continue applying concepts learned previously.
K.RF.4.6: Read common high-frequency words by sight (e.g., <i>the</i> , <i>and</i>).	1.RF.4.6: Recognize and read common and irregularly spelled high-frequency words by sight (e.g., <i>the</i> , <i>and</i>).	2.RF.4.6: Recognize and read common and irregularly spelled high-frequency words by sight (e.g., <i>the</i> , <i>and</i>).	3.RF.4.6: Recognize and read common and irregularly spelled high-frequency words by sight (e.g., <i>the</i> , <i>and</i>).	4.RF.4.6: Recognize and read common and irregularly spelled high-frequency words by sight (e.g., <i>the</i> , <i>and</i>).	5.RF.4.6: Recognize and read common and irregularly spelled high-frequency words by sight (e.g., <i>the</i> , <i>and</i>).
K.RF.4.7: Identify similarities and differences in words (e.g., word endings, onset and rime) when spoken or written.	1.RF.4.7: Read words in common word families (e.g., <i>-at</i> , <i>-an</i>).	2.RF.4.7: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).	3.RF.4.7: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).	4.RF.4.7: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).	5.RF.4.7: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).
K.RF.4.8: Standard begins at first grade.	1.RF.4.8: Read words in common word families (e.g., <i>-at</i> , <i>-an</i>).	2.RF.4.8: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).	3.RF.4.8: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).	4.RF.4.8: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).	5.RF.4.8: Know and use more difficult word families when reading unfamiliar words (e.g., <i>-ait</i> , <i>-ain</i> , <i>-ait</i> , <i>-ain</i>).

RF.5: FLUENCY					
Demonstrate accuracy and fluency when reading					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RF.5: Read emergent reader texts, maintaining an appropriate pace and using self-correcting strategies while reading.	1.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	2.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	3.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	4.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	5.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.

READING: Literature
There are three key areas found in the Reading: Literature section for grades K-5: Key Ideas and Textual Support, Structural Elements and Organization, and Connection of Ideas. By demonstrating the skills listed in each section, students should be able to meet the Learning Outcome for Reading: Literature.

In Reading: Literature, students are expected to do the following:

Read and comprehend a variety of literature independently and proficiently					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.L.1: Actively engage in-group reading activities with purpose and understanding.	1.L.1: With support, read and comprehend literature that is grade- and age-appropriate.	2.L.1: Read and comprehend a variety of literature within a range of complexity appropriate for grades 2-3. By the end of grade 2, students interact with text proficiently and independently at the low end of the range and with scaffolding as needed at the high end.	3.L.1: Read and comprehend a variety of literature within a range of complexity appropriate for grades 3-4. By the end of grade 3, students interact with text proficiently and independently at the low end of the range and with scaffolding as needed at the high end.	4.L.1: Read and comprehend a variety of literature within a range of complexity appropriate for grades 4-5. By the end of grade 4, students interact with text proficiently and independently at the low end of the range and with scaffolding as needed at the high end.	5.L.1: Read and comprehend a variety of literature within a range of complexity appropriate for grades 5-6. By the end of grade 5, students interact with text proficiently and independently at the low end of the range and with scaffolding as needed at the high end.

RL.3: STRUCTURAL ELEMENTS AND ORGANIZATION					
Build comprehension and appreciation of literature, using knowledge of literary structure and point of view					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.L.3.1: Recognize familiar narrative text genres (e.g., fairy tales, nursery rhymes, storybooks).	1.L.3.1: Identify the basic characteristics of familiar narrative text genres (e.g., fairy tales, nursery rhymes, storybooks).	2.L.3.1: Describe the overall structure of a story, including how the beginning introduces the story and the ending concludes the action.	3.L.3.1: Use terms to describe the structure of a story, including how the beginning introduces the story and the ending concludes the action.	4.L.3.1: Explain major differences between prose, plays, and poetry, and refer to the structural elements of poems and drama.	5.L.3.1: Explain how a range of complexity appropriate for grades 4-5. By the end of grade 4, students interact with text proficiently and independently at the low end of the range and with scaffolding as needed at the high end.
K.L.3.2: With support, define the role of the author and illustrator in a story in telling the story.	1.L.3.2: Identify who is telling the story at various points in a text.	2.L.3.2: Acknowledge differences in the points of view from which the story is told and identify dialogue as it is used to advance the plot.	3.L.3.2: Compare and contrast the point of view from which the story is told and identify dialogue as it is used to advance the plot.	4.L.3.2: Compare and contrast the point of view from which the story is told and identify dialogue as it is used to advance the plot.	5.L.3.2: Describe how a narrator's or speaker's point of view influences how events are portrayed.
RL.4: CONNECTION OF IDEAS					
Build comprehension and appreciation of literature by connecting literary elements and themes and analyzing how sensory tools impact meaning					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.L.4.1: With support, define the role of the author and illustrator in a story in telling the story.	1.L.4.1: Use illustrations and details in a story to describe its characters, setting, or events.	2.L.4.1: Use illustrations and details in a story to describe its characters, setting, or events.	3.L.4.1: Explain how multiple aspects of a text's illustrations contribute to what is conveyed in the words in a story (e.g., create mood, emphasize aspects of a character or setting).	4.L.4.1: Explain how multiple aspects of a text's illustrations contribute to what is conveyed in the words in a story (e.g., create mood, emphasize aspects of a character or setting).	5.L.4.1: Explain how multiple aspects of a text's illustrations contribute to what is conveyed in the words in a story (e.g., create mood, emphasize aspects of a character or setting).
K.L.4.2: With support, compare and contrast the adventures and experiences of characters in familiar stories.	1.L.4.2: Compare and contrast the adventures and experiences of characters in stories.	2.L.4.2: Compare and contrast the adventures and experiences of characters in stories.	3.L.4.2: Compare and contrast the adventures and experiences of characters in stories.	4.L.4.2: Compare and contrast the adventures and experiences of characters in stories.	5.L.4.2: Compare and contrast the adventures and experiences of characters in stories.

RF.5: FLUENCY					
Demonstrate accuracy and fluency when reading					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RF.5: Read emergent reader texts, maintaining an appropriate pace and using self-correcting strategies while reading.	1.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	2.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	3.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	4.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.	5.RF.5: Orally read grade-level appropriate or higher texts accurately and fluently, with expression that connotes comprehension at the independent level.

READING: Vocabulary
There are two key areas found in the Reading: Vocabulary section for grades K-5: Vocabulary Building and Vocabulary in Literature and Nonfiction Texts. By demonstrating the skills listed in each section, students should be able to meet the Learning Outcome for Reading: Vocabulary.

In Reading: Vocabulary, students are expected to do the following:

RV.1: LEARNING OUTCOME FOR READING VOCABULARY					
Build and apply vocabulary using various strategies and sources					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RV.1.1: Use words, phrases, and strategies acquired through conversations, reading and being read to, and responding to literature and nonfiction texts to build and apply vocabulary.	1.RV.1.1: Use words, phrases, and strategies acquired through conversations, reading and being read to, and responding to literature and nonfiction texts to build and apply vocabulary.	2.RV.1.1: Use words, phrases, and strategies acquired through conversations, reading and being read to, and responding to literature and nonfiction texts to build and apply vocabulary.	3.RV.1.1: Build and use accurately conversational, general academic, and content-specific words and phrases.	4.RV.1.1: Build and use accurately general academic and content-specific words and phrases.	5.RV.1.1: Build and use accurately general academic and content-specific words and phrases.
RV.2: VOCABULARY BUILDING					
Use strategies to determine and clarify words and understand their relationships					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RV.2.1: Standard begins at first grade.	1.RV.2.1: Demonstrate understanding that context clues (e.g., words and sentence clues) and text features (e.g., glossaries, illustrations) may be used to help understand unknown words.	2.RV.2.1: Use context clues (e.g., word, phrase, sentence, and paragraph clues) and text features (e.g., glossaries, illustrations, charts) to determine the meanings of unknown words.	3.RV.2.1: Apply context clues (e.g., word, phrase, sentence, and paragraph clues) and text features (e.g., glossaries, illustrations, charts) to determine the meanings of unknown words.	4.RV.2.1: Apply context clues (e.g., word, phrase, sentence, and paragraph clues) and text features (e.g., glossaries, illustrations, charts) to determine the meanings of unknown words.	5.RV.2.1: Select and apply context clues (e.g., word, phrase, sentence, and paragraph clues) and text features (e.g., glossaries, illustrations, charts) to determine the meanings of unknown words.

Reading Language Arts Grades K-5 Vertical Articulation

RV.3: VOCABULARY IN LITERATURE AND NONFICTION TEXTS					
Build appreciation and understanding of literature and nonfiction texts by determining or clarifying the meanings of words and their uses					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.RV.3.1: With support, ask and answer questions about unknown words in stories, poems, or songs.	1.RV.3.1: Identify words and phrases in stories, poems, or songs that suggest feelings or appeal to the senses (touch, hearing, sight, taste, smell).	2.RV.3.1: Recognize that authors use words (e.g., <i>regular beats</i> , <i>repeating lines</i> , <i>simile</i> , <i>alliteration</i> , <i>onomatopoeia</i> , <i>idioms</i>) to provide rhythm and meaning in a story, poem, or song.	3.RV.3.1: Determine how the author uses words and phrases to provide meaning to words of literature, including figurative language (e.g., <i>similes</i> , <i>metaphors</i> , or <i>hyperbole</i>).	4.RV.3.1: Determine how words and phrases provide meaning to words of literature, including figurative language (e.g., <i>similes</i> , <i>metaphors</i> , or <i>hyperbole</i>).	5.RV.3.1: Determine how words and phrases provide meaning to words of literature, including figurative language (e.g., <i>similes</i> , <i>metaphors</i> , or <i>hyperbole</i>).
K.RV.3.2: With support, ask and answer questions about unknown words in a nonfiction text.	1.RV.3.2: Ask and answer questions to help determine or clarify the meaning of words and phrases in a nonfiction text.	2.RV.3.2: Determine the meanings of words and phrases in a nonfiction text relevant to a second grade topic or subject area.	3.RV.3.2: Determine the meanings of words and phrases in a nonfiction text relevant to a third grade topic or subject area.	4.RV.3.2: Determine the meanings of words and phrases in a nonfiction text relevant to a fourth grade topic or subject area.	5.RV.3.2: Determine the meanings of words and phrases in a nonfiction text relevant to a fifth grade topic or subject area.
K.RV.3.3: Standard begins at third grade.	1.RV.3.3: Standard begins at third grade.	2.RV.3.3: Standard begins at third grade.	3.RV.3.3: Standard begins at third grade.	4.RV.3.3: Standard begins at third grade.	5.RV.3.3: Standard begins at third grade.

SL.3: COMPREHENSION					
Develop and apply active listening and interpretation skills using various strategies					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.SL.3.1: Ask and answer questions about key details in a text read aloud or information presented orally or through other media.	1.SL.3.1: Ask and answer questions about key details in a text read aloud or information presented orally or through other media.	2.SL.3.1: Determine the purpose for listening (e.g., to obtain information, to enjoy humor) and paraphrase or describe key details from a text read aloud or information presented orally or through other media.	3.SL.3.1: Retell, paraphrase, and explain the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.	4.SL.3.1: Summarize major ideas and supporting evidence from text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.	5.SL.3.1: Orally summarize or respond to a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
K.SL.3.2: Ask and answer questions about what a speaker says.	1.SL.3.2: Ask and answer questions about what a speaker says.	2.SL.3.2: Ask and answer questions about what a speaker says to clarify comprehension, interpret information, or deepen understanding of a topic or issue.	3.SL.3.2: Ask and answer questions about what a speaker says to clarify comprehension, interpret information, or deepen understanding of a topic or issue.	4.SL.3.2: Identify and use evidence a speaker provides to support particular points.	5.SL.3.2: Summarize a speaker's points and refer to main ideas or relevant details to support claims and evidence.

W.4: THE WRITING PROCESS					
Produce coherent and legible documents by planning, drafting, revising, editing, and collaborating with others					
KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
K.W.4: Apply the writing process to:	1.W.4: Apply the writing process to:	2.W.4: Apply the writing process to:	3.W.4: Apply the writing process to:	4.W.4: Apply the writing process to:	5.W.4: Apply the writing process to:
• With support, make a plan for writing (e.g., use a writing template, use a writing checklist, use a writing organizer, use a writing prompt, use a writing strategy, use a writing tool, use a writing resource, use a writing example, use a writing model, use a writing guide, use a writing rubric, use a writing checklist, use a writing organizer, use a writing prompt, use a writing strategy, use a writing tool, use a writing resource, use a writing example, use a writing model, use a writing guide, use a writing rubric).	• With support, make a plan for writing (e.g., use a writing template, use a writing checklist, use a writing organizer, use a writing prompt, use a writing strategy, use a writing tool, use a writing resource, use a writing example, use a writing model, use a writing guide, use a writing rubric).	• With support, make a plan for writing (e.g., use a writing template, use a writing checklist, use a writing organizer, use a writing prompt, use a writing strategy, use a writing tool, use a writing resource, use a writing example, use a writing model, use a writing guide, use a writing rubric).	• With support, make a plan for writing (e.g., use a writing template, use a writing checklist, use a writing organizer, use a writing prompt, use a writing strategy, use a writing tool, use a writing resource, use a writing example, use a writing model, use a writing guide, use a writing rubric).	• With support, make a plan for writing (e.g., use a writing template, use a writing checklist, use a writing organizer, use a writing prompt, use a writing strategy, use a writing tool, use a writing resource, use a writing example, use a writing model, use a writing guide, use a writing rubric).	• With support, make a plan for writing (e.g., use a writing template, use a writing checklist, use a writing organizer, use a writing prompt, use a writing strategy, use a writing tool, use a writing resource, use a writing example, use a writing model, use a writing guide, use a writing rubric).

MEDIA LITERACY

Guiding Principle: Students develop critical thinking about the messages received and created by media. Students recognize that media are a part of culture and function as agents of socialization and information, and they develop understanding that people use individual skills, beliefs, and experiences to construct their own meanings from media messages. Students develop media literacy skills in order to become more informed, reflective, and engaged participants in society.^{iv}

MEDIA LITERACY:

By demonstrating the skills listed in Media Literacy, students should be able to meet the Learning Outcome for Media Literacy.

In Media Literacy, students are expected to do the following:

LEARNING OUTCOME	ML.1: LEARNING OUTCOME FOR MEDIA LITERACY					
	Develop an understanding of media and the roles and purposes of media					
	KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
	K.ML.1: Recognize various types of media.	1.ML.1: Recognize the role of the media in informing, persuading, entertaining, or transmitting culture.	2.ML.1: Recognize the role of the media in informing, persuading, entertaining, and transmitting culture.	3.ML.1: Recognize the role of the media in informing, persuading, entertaining, or transmitting culture.	4.ML.1: Identify how information found in electronic, print, and mass media is used to inform, persuade, entertain, and transmit culture.	5.ML.1: Identify how information found in electronic, print, and mass media is used to inform, persuade, entertain, and transmit culture.
MEDIA LITERACY	ML.2: MEDIA LITERACY					
	Recognize the purposes of media and the ways in which media can have influences					
	KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3	GRADE 4	GRADE 5
	K.ML.2.1: Recognize common signs and logos and identify commercials or advertisements.	1.ML.2.1: Demonstrate understanding of media by asking and answering appropriate questions about what is read, heard, or viewed.	2.ML.2.1: Recognize that media can be sources for information, entertainment, persuasion, interpretation of events, and transmission of culture.	3.ML.2.1: Distinguish among the purposes of various media messages, including for information, entertainment, persuasion, interpretation of events, or transmission of culture.	4.ML.2.1: Recognize claims in print, image, and multimedia and identify evidence used to support these claims.	5.ML.2.1: Review claims made in various types of media and evaluate evidence used to support these claims.

Number Sense		Grade 2	
Strand 1		Strand 2	
A.NS.1. Count to at least 100 (or more) and count by one from any number.	A.NS.1. Count to at least 100 by tens, five, and/or from any given number. In this range, read and write numerals and represent a number greater than fifty as a written numeral.	A.NS.1. Count by ones, tens, fives, and hundreds up to at least 1,000 (or more) and count by one.	A.NS.1. Read the actual numbers first, second, five, six, and ten up to at least 1,000.
A.NS.2. Write whole numbers from 0 to 20 and recognize number names from 0 to 20. Represent a number of objects with a number (number 0-20) (path) (representing a set of objects).	A.NS.2. Match the ordinal numbers first, second, third, and so on, with an ordered set up to 20 items.	A.NS.2. Match the actual numbers first, second, five, six, and ten up to at least 1,000.	A.NS.2. Match the actual numbers first, second, five, six, and ten up to at least 1,000.
A.NS.3. Find the number that is one more or one less than any whole number up to 20.	A.NS.3. Find mentally 20 more or 20 less than a given hundred; the number without having to count, and without the need to draw a base ten block for the answer.	A.NS.3. Read and write the numbers up to 1,000. In words, numerals, and expanded form. Use skip-counting by tens and skip-count by hundreds up to 1,000.	A.NS.3. Read and write the numbers up to 1,000. In words, numerals, and expanded form. Use skip-counting by tens and skip-count by hundreds up to 1,000.
A.NS.4. Use the number names to identify order when counting objects, using base-ten blocks with one and ten blocks, and number names with one and ten words. Understand that the first number name and describe the number of objects counted and that the number of objects is the same regardless of their arrangement or the order in which they were counted.			
A.NS.5. Count up to 20 objects arranged in a line, a rectangular array, or a circle. Count up to 20 objects in a scattered configuration. Count out the number of objects, given a number from 1 to 20.			
A.NS.6. Recognize one of 10 objects in patterns arranged in rows that have rows without counting.			
A.NS.7. Identify whether the number of objects in a group is greater than, less than, or equal to the number of objects in another group (e.g., by counting and counting forwards).			
A.NS.8. Compare the sizes of two groups of 10 to 30 presented in various configurations.	A.NS.8. Give place value understanding to compare two hundred numbers based on meaning of the place value, using skip-counting, the result of comparisons with the symbols $>$, $=$, and $<$.	A.NS.8. Find and compare whole numbers up to 1,000 in a variety of configurations.	A.NS.8. Find and compare whole numbers up to 1,000 in a variety of configurations.
A.NS.9. Use the number line to compare, including one and two groups of objects, and base ten, first and second, and place to, more than or less than.			
A.NS.10. Separate sets of four or fewer objects into equal groups.			
	A.NS.10. Understand that the length of a group of objects is called "ten." Understand that the number 10 is the number of objects in a group of ten. Understand that the number 10 is the number of groups of ten in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100.		
A.NS.11. Develop an initial understanding of place value and the base ten number system. Understand that the number 10 is the number of objects in a group of ten and one group of ten and one group of ten and one group of ten.	A.NS.11. Use skip-counting to compare two hundred numbers based on meaning of the place value, using skip-counting, the result of comparisons with the symbols $>$, $=$, and $<$.	A.NS.11. Use place value understanding to compare two three-digit numbers based on meaning of the place value, using skip-counting, the result of comparisons with the symbols $>$, $=$, and $<$.	A.NS.11. Use place value understanding to compare two three-digit numbers based on meaning of the place value, using skip-counting, the result of comparisons with the symbols $>$, $=$, and $<$.
	A.NS.12. Understand that the length of a group of objects is called "ten." Understand that the number 10 is the number of objects in a group of ten. Understand that the number 10 is the number of groups of ten in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100.	A.NS.12. Determine whether a group of objects is 100 by an addition or subtraction problem (e.g., using the number of objects in a group of 100 and the number of groups of 10 to find the number of objects in a group of 100).	A.NS.12. Determine whether a group of objects is 100 by an addition or subtraction problem (e.g., using the number of objects in a group of 100 and the number of groups of 10 to find the number of objects in a group of 100).
	A.NS.13. Understand that the number 10 is the number of objects in a group of ten. Understand that the number 10 is the number of groups of ten in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100.	A.NS.13. Understand that the number 10 is the number of objects in a group of ten. Understand that the number 10 is the number of groups of ten in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100.	A.NS.13. Understand that the number 10 is the number of objects in a group of ten. Understand that the number 10 is the number of groups of ten in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100. Write the tens, fives, tens, fives, and ones in a group of 100.
	A.NS.14. Use skip-counting to compare two hundred numbers based on meaning of the place value, using skip-counting, the result of comparisons with the symbols $>$, $=$, and $<$.	A.NS.14. Use skip-counting to compare two hundred numbers based on meaning of the place value, using skip-counting, the result of comparisons with the symbols $>$, $=$, and $<$.	A.NS.14. Use skip-counting to compare two hundred numbers based on meaning of the place value, using skip-counting, the result of comparisons with the symbols $>$, $=$, and $<$.

Computation and Algebraic Thinking		
Kindergarten	Grade 1	Grade 2
	<p>1.6.1. Demonstrate fluency with addition facts and the corresponding subtraction facts within 10.</p> <p>1.6.2. Memorize facts as reciting multiplication tables.</p> <p>1.6.3. Memorize a number based on 10: $10 - 1 = 9$, $10 - 2 = 8$, $10 - 3 = 7$, $10 - 4 = 6$, and using memorization to learn subtraction facts within 10, adding 6 by knowing the known fact $10 - 4 = 6$, $1 + 1 = 2$, $1 + 2 = 3$, $1 + 3 = 4$, $1 + 4 = 5$.</p>	<p>2.1.1. Add and subtract fluently within 100.</p>
<p>1.6.3. Use objects, drawings, mental images, number lines, etc. to represent addition and subtraction within 10.</p>	<p>1.6.4. Add and subtract 10, including adding a one-digit number and a one-digit number, and adding a one-digit number and 10, resulting in 10 one-unknowns in drawing and equations based on place value, interpretation of operations, and understanding of addition and subtraction. Interpret the strategy of adding the missing number. Understand that adding two-digit numbers, one adds tens and ones, and tens and ones (position) to represent a number.</p>	<p>2.1.2. Add and subtract within 100, using models or drawing and explaining the strategy. Understand the relationship between addition and subtraction, including the strategy of adding the missing number. Understand that adding two-digit numbers, one adds tens and ones, and tens and ones (position) to represent a number.</p>
	<p>1.6.5. Solve word problems involving adding and subtracting within 10 situations of adding, by using tens, adding together, and counting, with unknowns in all positions of the addition or subtraction problem, by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.</p>	<p>2.1.3. Solve word problems involving addition and subtraction within 100 situations of adding, by using tens, adding together, using smart, and counting, with unknowns in all positions of the addition or subtraction problem, by using drawings and equations with a symbol for the unknown number to represent the problem.</p>
<p>1.6.5. Solve word problems that involve addition and subtraction within 100, by using objects or drawings to represent the problem.</p>	<p>1.6.6. Solve word problems that can be solved in three ways within a sum is 10, using 10 objects, drawing pictures, and equations with a symbol for the unknown number to represent the problem.</p>	<p>2.1.4. Solve word problems involving addition and subtraction within 100 situations of adding, by using tens, adding together, using smart, and counting, with unknowns in all positions of the addition or subtraction problem, by using drawings and equations with a symbol for the unknown number to represent the problem.</p>
<p>1.6.5. Use objects, drawings, etc., to demonstrate known facts and explain 10 objects in three tens and one unit, and represent addition with a drawing of an arrangement of 10: $3 + 1 = 2 + 2 = 1 + 3$.</p>	<p>1.6.7. Use objects, drawings, mental images, and equations with a symbol for the unknown number to represent a given subtraction involving addition and subtraction: 10.</p>	<p>2.1.5. Solve word problems involving addition and subtraction within 100 situations of adding, by using tens, adding together, using smart, and counting, with unknowns in all positions of the addition or subtraction problem, by using drawings and equations with a symbol for the unknown number to represent the problem.</p>
<p>1.6.6. Use the number that makes 10 to add the unknown in subtraction problems within 10, by using 10 objects, drawing pictures, and equations with a symbol for the unknown number to represent the problem.</p>	<p>1.6.8. Understand the meaning of the plus sign, and determine if equations involving addition and subtraction are true or false. (10 of the following equations are true and are written in the box: $7 + 1 = 8$, $1 + 1 = 2$, $1 + 2 = 3$, $1 + 3 = 4$, $1 + 4 = 5$.)</p>	<p>2.1.6. Use the number that makes the number of objects arranged in rectangular arrays up to 5 rows and 4 columns, write an equation to represent the total of a set of objects.</p>
<p>1.6.6. Use the number that makes 10 to add the unknown in the given subtraction problems within 10, by using 10 objects, drawing pictures, and equations with a symbol for the unknown number to represent the problem.</p>	<p>1.6.9. Create, extend, and use an appropriate rule for number patterns by using objects, drawings, mental images, and equations with a symbol for the unknown number to represent the problem.</p>	<p>2.1.7. Create, extend, and use an appropriate rule for number patterns by using objects, drawings, mental images, and equations with a symbol for the unknown number to represent the problem.</p>

[illegible]

Measurement		
Kindergarten	Grade 1	Grade 2
<p>K.M.1 Make direct comparisons of the length, width, height, and perimeter of objects, and recognize which object is longer, larger, taller, wider, shorter, closer or farther than.</p>	<p>1.M.1 Use direct comparison or a nonstandard unit to compare and order objects according to length, area, capacity, weight, and temperature.</p>	<p>2.M.1 Describe the relationship among inch, foot, and yard. Describe the relationship between centimeter and meter.</p> <p>2.M.2 Estimate and measure the length of an object by selecting and using appropriate tools, such as rulers, centimeter rulers, and measuring tapes to the nearest inch, foot, yard, centimeter and meter.</p> <p>2.M.3 Understand that the length of an object does not change regardless of its position. Measure the length of an object using with length units of different lengths for the two measurements. Describe how the two measurements relate to the size of the unit chosen.</p> <p>2.M.4 Estimate and measure volume (capacity) using cups and pints.</p> <p>2.M.5 Tell and write to the nearest half-hour the time on a 12-hour digital clock.</p> <p>2.M.6 Tell and write to the nearest minute the time on a 12-hour digital clock. Solve word problems involving finding the addition and subtraction of time intervals on the hour or half hour.</p> <p>2.M.7 Describe the relationship of time, including seconds in a minute, minutes in an hour, hours in a day, days in a week, and days, weeks, and months in a year.</p> <p>2.M.8 Find the value of a collection of pennies, nickels, dimes, quarters and dimes.</p>
<p>K.M.2 Understand concepts of time, including measuring afternoon, evening, today, yesterday, tomorrow, day, week, month, and year.</p> <p>K.M.3 Understand that clocks and calendars are ways that measure time.</p>	<p>1.M.2 Tell and write to the nearest half-hour and the time on the hour (before/after, during/after) using analog clocks. Understand how the hour hand and minute hand work together.</p>	<p>2.M.2 Estimate and measure volume (capacity) using cups and pints.</p> <p>2.M.5 Tell and write to the nearest half-hour the time on a 12-hour digital clock.</p> <p>2.M.6 Tell and write to the nearest minute the time on a 12-hour digital clock. Solve word problems involving finding the addition and subtraction of time intervals on the hour or half hour.</p> <p>2.M.7 Describe the relationship of time, including seconds in a minute, minutes in an hour, hours in a day, days in a week, and days, weeks, and months in a year.</p> <p>2.M.8 Find the value of a collection of pennies, nickels, dimes, quarters and dimes.</p>

[illegible][illegible]

Math
Grades
3-5

[illegible]

Geometry		
Third Grade	Fourth Grade	Fifth Grade
<p>3.G.1. Identify and describe the following shapes, spheres, prism, pyramids, cone, and cylinder.</p> <p>3.G.2. Understand that shapes (e.g., rectangles, rhombuses, and others) may have attributes (e.g., having four sides), and that the attributes (e.g., having four sides) may apply to several shapes. Recognize and draw rhombuses, rectangles, and squares as examples of quadrilaterals. Recognize and draw examples of quadrilaterals that do not belong to any of these categories.</p>	<p>4.G.1. Classify figures and quadrilaterals based on the presence and absence of parallel or perpendicular lines, or the presence or absence of angles (right, acute, obtuse).</p> <p>4.G.2. Identify, describe, and draw parallelograms, rhombuses, and trapezoids using appropriate tools (e.g., ruler, straightedge and technology).</p> <p>4.G.3. Recognize angles at geometric shapes that are formed whenever two lines intersect.</p> <p>4.G.4. Identify, describe, and draw rays, angles (right, acute, obtuse), and perpendicular and parallel lines (using appropriate tools, e.g., ruler, straightedge and technology). Identify these in two-dimensional figures.</p>	<p>5.G.1. Identify and classify polygons including quadrilaterals, pentagons, hexagons, and heptagons (rhombus, rectangle, square, circle, and others) based on angle measures and sides. Classify polygons in a hierarchy based on properties.</p> <p>5.G.2. Identify, describe, and draw triangles (right, acute, obtuse) and circles using appropriate tools (e.g., ruler, straightedge, compass and technology). Understand the relationship between radius and diameter.</p> <p>5.G.3. Partition shapes into parts with equal areas. Express the area of each part as a fraction of the whole (U.S., U.S., U.S.).</p> <p>5.G.4. Recognize and draw lines of symmetry in two-dimensional figures. Identify figures that have lines of symmetry.</p>

Measurement				
Third Grade		Fourth Grade	Fifth Grade	
<p>3.M.1 Estimate and measure the area of figures in grids (e.g. rectangles) and the volume of solids in unit cubes (e.g. prisms) and use (e.g. add, subtract, multiply, divide) to solve one area and volume problems involving rectangles in unit cubes (e.g. find the area of a 3 by 5 rectangle, which is 3 times as many as a rectangle that is 1 by 5).</p>		<p>4.M.1 Measure area of measurement units within one square unit, including $\frac{1}{2}$ and $\frac{1}{4}$ (e.g. find the area of a rectangle that is 3 units by $\frac{1}{2}$ unit). Record measurements in square units and use the area of a square to find the area of a rectangle.</p> <p>4.M.2 Use the four operations (addition, subtraction, multiplication and division) to solve word problems involving lengths, intervals of time, masses of objects, and money. Use addition and subtraction problems involving three fractions and problems that require measuring measurements given in larger units in terms of a smaller unit.</p>	<p>5.M.1 Convert among different units of measure (e.g. convert 5 centimeters to inches) and use these conversions in solving multi-step word problems.</p>	
<p>3.M.2 Draw and use appropriate units and tools to estimate and measure lengths, weight, and temperature. Sketch and measure length in quarters, eighths or tenths, and temperature in degrees Celsius and Fahrenheit.</p>		<p>4.M.3 Measure length to the nearest quarter inch, eighth inch, and millimeter.</p>		
<p>3.M.3 Estimate weight to the nearest gram and temperature to the nearest degree Celsius and Fahrenheit.</p>				
<p>3.M.4 Find the area of the rectangle using unit squares and, using the area of a square, find the area of a rectangle with side lengths that are whole numbers of units (e.g. find the area of a rectangle that is 3 units by 5 units in the form of perimeter and area). Use the two new word problems to determine whether there is enough time to solve a problem.</p>				
<p>3.M.5 Find the area of a rectangle with whole-number side lengths by measuring with unit squares, and show that the area is the same as would be found by multiplying the side lengths. Identify and draw rectangles with the same perimeter and different areas and show that the area of a rectangle with a given perimeter and area is unique.</p>				
<p>3.M.6 Multiply side lengths to find areas of rectangles with whole-number side lengths. Use area-ward problems and other mathematical problems, and represent whole numbers and fractions on a number line to solve problems.</p>		<p>4.M.4 Apply area and perimeter formulas for rectangles to solve word problems and other mathematical problems. Recognize area as additive and find the area of composite figures by measuring them. Use the techniques to solve word problems and other mathematical problems by measuring them.</p>		
<p>3.M.7 Use perimeter of rectangles to find the lengths of missing sides in unknown side lengths.</p>				
		<p>4.M.5 Understand the area is measured with reference to a unit, with the unit of the common edge of the unit, by considering the length of the common edge or the distance the points where the line has been placed on the line.</p> <p>4.M.6 Find the area of a rectangle with side lengths that are whole numbers of units (e.g. find the area of a rectangle that is 3 units by 5 units) and use the area to measure other figures. Understand an angle that turns through n whole angles is n times as large as the angle that turns through 1 whole angle.</p>		
		<p>4.M.7 Measure length in whole-number segments using appropriate tools. Identify angles of different measure.</p>		
			<p>5.M.2 Find the area of a rectangle with fractional side lengths by measuring with unit squares of the appropriate unit fraction side lengths and show that the area is the same as would be found by multiplying the side lengths. Identify rectangles with the same perimeter and different areas and show that the area of a rectangle with a given perimeter and area is unique.</p>	
			<p>5.M.3 Identify and use formulas for the area of rectangles, parallelograms, and trapezoids. Use these formulas to solve word problems that involve perimeter and area of rectangles, parallelograms and trapezoids, and use appropriate units for the measure.</p>	
			<p>5.M.4 Find the volume of a right rectangular prism with whole-number side lengths by packing it with unit cubes, and show that the volume is the same as would be found by multiplying the side lengths.</p>	
			<p>5.M.5 Apply formulas for $V = l \times w \times h$ and $V = s \times s \times s$ to find the volume of right rectangular prisms with whole-number side lengths and of cubes with whole-number side lengths.</p>	
			<p>5.M.6 Apply the volume of right rectangular prisms with whole-number side lengths to solve problems involving the volume of the rectangular prism and use the volume to solve problems involving the volume of the rectangular prism.</p>	

Data Analysis (and Statistics in Gr.5)		
Third Grade	Fourth Grade	Fifth Grade
<p>3.B.1. Create solid (cube, prism), closed (box), and frequently break to represent data set—recognize data collection through observation, listen, and experiment—use data to answer questions. Use data and graphs to show many ways and how they help “predict” something using the data and graphs.</p>	<p>4.B.1. Formulate questions that can be addressed with data and use observations, surveys, and experiments to collect data. Organize and represent data in a variety of ways (line plots, bar graphs, and dot plots). Recognize the differences among qualitative and quantitative data.</p>	<p>5.B.1. Formulate questions that can be addressed with data and use predictions (line plots, bar graphs, surveys, and experiments) to collect data. Organize and represent data in a variety of ways (line plots, bar graphs, and dot plots). Recognize the differences among qualitative and quantitative data.</p>
<p>3.B.2. Measure (monitored) measure data in measuring length with tools to the nearest quarter inch. Classify the data by grouping into whole halves, halves, or quarters.</p>	<p>4.B.2. Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$). Class (prepare) in writing (reading) and (summarizing) the data (line plot).</p>	<p>5.B.2. Understand and use measures of center (mean and median) and measures (mode) to describe a data set.</p>
	<p>4.B.3. Interpret data displayed in a column graph.</p>	

[illegible]

Computation		
Grade 5	Grade 7	Grade 8
<p>A.C.1 Divide multi-digit whole numbers fluently using a standard algorithmic approach.</p>	<p>7.C.1 Understand $p \times q$ as the number of objects in a dimension p by q rows in a rectangular array, representing an operation, depending on whether p is positive or negative. Show that a number a is equal to the sum of two positive integers, interpret real-world contexts by describing real-world contexts.</p> <p>7.C.2 Understand the relationship between multiplication and division: $q = p \div p$. Show that the distance between two numbers a and b on the number line is the absolute value of their difference, and apply this principle to real-world contexts.</p>	
<p>A.C.2 Compute with positive fractions and positive decimals fluently using a standard algorithmic approach.</p>	<p>7.C.3 Understand that multiplication is extended from finding real numbers to requiring that operations continue from the properties of operations, particularly the distributive property, leading to products such as $(-2)(-3) = 6$. Use this rule for multiplying signed numbers.</p> <p>7.C.4 Understand that integers can be divided, provided that the divisor is not zero, and that every quotient of integers is a rational number. Understand that $p \div q$ and $a \div b$ are equal, then $a \div b = p \times q$.</p> <p>7.C.5 Compute with rational numbers fluently using a standard algorithmic approach.</p>	
<p>A.C.3 Solve real-world problems with positive fractions and decimals by using one or more operations.</p>	<p>7.C.6 Use proportional relationships to solve real and percent problems with positive quantities, such as the following: items in a sale, mark-up, mark-down, gratuities, commissions, fees, percent increase and decrease, and percent error.</p> <p>7.C.7 Solve real-world problems with rational numbers using all four basic operations.</p>	<p>8.C.1 Solve real-world problems with rational numbers by using multiple operations.</p>
<p>A.C.4 Compute quotients of positive fractions and exact real-world problems involving division of fractions and decimals, use a column method and follow equations to represent these situations.</p>		
<p>A.C.5 Evaluate positive products and sums with whole number operations.</p>		
<p>A.C.6 Apply the order of operations and properties of operations (identity, inverse, commutative properties of addition and multiplication, distributive property of addition and multiplication, and distributive property of multiplication over addition) to evaluate expressions with rational numbers, including those using grouping symbols, such as parentheses, and involving multiple operations, including multiplication and division.</p>	<p>8.C.2 Compute with rational quantities with ratios of fractions, including ratios of lengths, areas, and other quantities measured in two or different units.</p>	<p>A.C.2 Solve real-world and other mathematical problems involving numbers expressed in scientific notation, including problems with unit conversion and scientific notation as well. Interpret scientific notation and use scientific notation to represent numbers, such as a scientific notation, graphing, ordering, or non-comparable.</p>

Algebra and Functions		
Grade 6	Grade 7	Grade 8
<p>A.6.1. Evaluate expressions for specific values, including fractions, and write numerical answers that show that one form is equivalent to another.</p> <p>A.6.2. Apply the properties of exponents to identify, simplify, and compare expressions; demonstrate properties to create equivalent forms of expressions; and use the distributive property to create equivalent forms that have the same numerical value.</p> <p>A.6.3. Define and use initial variables when writing equations to represent numbers and other mathematical properties, and evaluate them for given values.</p> <p>A.6.4. Understand that each coefficient in an equation is the price of the product of the following quantities, and use this understanding to solve equations for unknown quantities.</p> <p>A.6.5. Understand that the equation of the form $a(x + b) = c$, $a(x + b) + c = d$, $a(x + b) + c = d(x + e)$, and $a(x + b) + c = d(x + e) + f$ are all linear equations in one variable, and use this understanding to solve equations for unknown quantities.</p>	<p>A.7.1. Apply the properties of exponents to identify, simplify, compare, and describe properties to create equivalent forms of expressions; demonstrate properties to create equivalent forms that have the same numerical value.</p> <p>A.7.2. Define and use initial variables when writing equations to represent numbers and other mathematical properties, and evaluate them for given values.</p> <p>A.7.3. Understand that each coefficient in an equation is the price of the product of the following quantities, and use this understanding to solve equations for unknown quantities.</p> <p>A.7.4. Understand that the equation of the form $a(x + b) = c$, $a(x + b) + c = d$, $a(x + b) + c = d(x + e)$, and $a(x + b) + c = d(x + e) + f$ are all linear equations in one variable, and use this understanding to solve equations for unknown quantities.</p>	<p>A.8.1. Use the properties of exponents to identify one variable in an equation, simplify the equation, or in an inequality. Demonstrate properties to create equivalent forms of expressions; demonstrate properties to create equivalent forms that have the same numerical value.</p> <p>A.8.2. Define and use initial variables when writing equations to represent numbers and other mathematical properties, and evaluate them for given values.</p> <p>A.8.3. Understand that each coefficient in an equation is the price of the product of the following quantities, and use this understanding to solve equations for unknown quantities.</p> <p>A.8.4. Understand that the equation of the form $a(x + b) = c$, $a(x + b) + c = d$, $a(x + b) + c = d(x + e)$, and $a(x + b) + c = d(x + e) + f$ are all linear equations in one variable, and use this understanding to solve equations for unknown quantities.</p>

[illegible][illegible][illegible]

Math: EnVision Math Scope and Sequence

**FOCUS
COHERENCE
RIGOR**

Content is developed with focus, coherence, and rigor. The attention to rigor reflects a balance of conceptual understanding, procedural skill and fluency, and applications. See each Topic Overview and Lesson Overview.

TOPICS	FOCUS ON
1 Solve Addition and Subtraction Problems to 10	In Topic 1, students represent and solve problems involving addition and subtraction within 10.
2 Fluently Add and Subtract Within 10 3 Addition Facts to 20: Use Strategies	In Topics 2–3, students develop fluency for addition and subtraction within 10. They explore strategies to add within 20.
4 Subtraction Facts to 20: Use Strategies	In Topic 4, students use strategies based on the properties of operations and the relationship between addition and subtraction to solve subtraction facts to 20.
5 Work with Addition and Subtraction Equations	In Topic 5, students work with addition and subtraction equations. They learn how to find a missing number in an equation and determine if an equation is true or false.
6 Represent and Interpret Data	In Topic 6, students organize and interpret data to answer questions. They learn to represent data visually using tally charts and picture graphs.
7 Extend the Counting Sequence	In Topic 7, students extend their understanding of the counting sequence to numbers through 120.
8 Understand Place Value 9 Compare Two-Digit Numbers	In Topics 8–9, students learn that two-digit numbers represent amounts of tens and ones. They use their understanding of place value to compare numbers.
10 Use Models and Strategies to Add Tens and Ones 11 Use Models and Strategies to Subtract Tens	In Topics 10–11, students use strategies based on place value and properties of operations to add within 100 and subtract multiples of 10 within 100.
12 Measure Lengths	In Topic 12, students use indirect measurement to compare two lengths. They measure length using nonstandard units.
13 Time	In Topic 13, students are introduced to the hour and minute hands on a clock. They tell time to the hour and half hour.
14 Reason with Shapes and Their Attributes 15 Equal Shares of Circles and Rectangles	In Topics 14–15, students explore attributes of two- and three-dimensional shapes. They divide shapes into two and four equal shares to build a conceptual foundation for fractions.

Science Grades K-5 Vertical Articulation (Physical Science)

	Kindergarten	First Grade	Second Grade
Physical Properties	K.PS.1 Plan and conduct an investigation using all senses to describe and classify different kinds of objects by their composition and physical properties. Explain these choices to others and generate questions about the objects.	1.PS.1 Characterize materials as solid, liquid, or gas and investigate their properties, record observations and explain the choices to others based on evidence (i.e., physical properties).	2.PS.1 Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties.
	K.PS.2 Identify and explain possible uses for an object based on its properties and compare these uses with other students' ideas.	1.PS.2 Predict the result of combining solids and liquids as pure. Mix, observe, gather, record, and discuss evidence of whether the result may have different properties than the original materials.	2.PS.2 Predict the result of combining solids and liquids as pure. Mix, observe, gather, record, and discuss evidence of whether the result may have different properties than the original materials.
Force and Motion	K.PS.3 Plan and conduct an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object.	1.PS.3 Plan and conduct an investigation to provide evidence that vibrating materials can make sound and that sound can make materials vibrate.	2.PS.3 Construct an argument with evidence that some changes caused by heating and cooling can be reversed and some cannot.
	K.PS.4 Analyze data to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.	1.PS.4 Make observations to collect evidence and explain that objects can be seen only when illuminated.	2.PS.4 Analyze data obtained from testing different materials to determine which materials have the properties that can best suit for an intended purpose.
Energy			

	Third Grade	Fourth Grade	Fifth Grade
Physical Properties			5.PS.1 Describe and measure the volume and mass of a sample of a given material.
			5.PS.2 Demonstrate that regardless of how parts of an object are assembled the mass of the whole object is identical to the sum of the mass of the parts; however, the volume can differ from the sum of the volumes. (Law of Conservation of Mass)
Force and Motion			5.PS.3 Determine if matter has been added or lost by comparing mass when melting, freezing, or dissolving a sample of a substance. (Law of Conservation of Mass)
			5.PS.4 Describe the difference between weight being dependent on gravity and mass comprised of the amount of matter in a given substance or material.
Energy			

	Third Grade	Fourth Grade	Fifth Grade
Force and Motion			4.PS.1 Investigate transportation systems and devices that operate on or in land, water, air and space and recognize the forces (lift, drag, friction, thrust and gravity) that affect their motion.
			4.PS.2 Investigate the relationship of the speed of an object to the energy of that object.
Energy			4.PS.3 Investigate how multiple simple machines work together to perform complex tasks.
			4.PS.4 Describe and investigate the difference between energy that is generated and/or converted from one form of energy to another form of energy.
Energy			4.PS.5 Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.

Science Grades 6-8 Vertical Articulation (Physical Science)

	Sixth Grade	Seventh Grade	Eighth Grade
Physical Properties	6.PS.1 Draw, construct models, or use simulations to differentiate between atoms, elements, molecules, and compounds.	7.PS.1 Create models to represent the arrangement and changes of subatomic particles in an atom (protons, neutrons and electrons). Understand the significance that there are currently 118 known chemical elements combine to form all the matter in the universe.	8.PS.1 Create models to represent the arrangement and changes of subatomic particles in an atom (protons, neutrons and electrons). Understand the significance that there are currently 118 known chemical elements combine to form all the matter in the universe.
	7.PS.2 Describe the properties of solids, liquids, and gases. Develop models that predict and describe changes in particle motion, density, temperature, and state of a pure substance when thermal energy is added or removed.	7.PS.3 Illustrate with diagrams (drawings) how atoms are arranged in simple molecules. Distinguish between atoms, elements, molecules, and compounds.	8.PS.2 Use basic information provided for an element (atomic mass, atomic number, symbol, and name) to determine its place on the Periodic Table. Use this information to find the number of protons, neutrons, and electrons in an atom.
Force and Motion	7.PS.3 Investigate the Law of Conservation of Mass by measuring and comparing the mass of a substance before and after a change of state.	8.PS.3 Identify organizational patterns (radio, atomic number, atomic mass, position and radioactivity) on the Periodic Table.	8.PS.4 Investigate the property of density and provide evidence that properties, such as density, do not change for a pure substance.

	Sixth Grade	Seventh Grade	Eighth Grade
Physical Properties			8.PS.5 Compare and contrast physical change vs. chemical change. Analyze the properties of substances before and after substances interact to determine if a chemical reaction has occurred.
			8.PS.6 Balance chemical equations to show how the total number of atoms for each element does not change as chemical reactions and as a result, mass is always conserved in a closed system. (Law of Conservation of Mass)
Force and Motion	6.PS.1 Distinguish between the mass position, distance, and displacement, as well as, the mass speed and velocity.	7.PS.4 Investigate Newton's first law of motion (the law of inertia) and how different forces (gravity, friction, push and pull) affect the velocity of an object.	8.PS.7 Investigate Newton's second law of motion to show the relationship among force, mass and acceleration.
	6.PS.2 Describe the motion of an object graphically showing the relationship between time and position.	7.PS.5 Investigate Newton's third law of motion to show the relationship between action and reaction forces.	8.PS.8 Investigate Newton's third law of motion to show the relationship between action and reaction forces.
Energy	6.PS.3 Describe how potential and kinetic energy can be transferred from one form to another.	7.PS.6 Compare a device that uses one or more of Newton's laws of motion. Explain how motion, acceleration, force, and mass are affecting the device.	8.PS.9 Investigate a process in which energy is transferred from one form to another and provide evidence that the total amount of energy does not change during the transfer when the system is closed.

	Sixth Grade	Seventh Grade	Eighth Grade
Force and Motion			(Law of Conservation of Energy)
Energy	6.PS.4 Investigate the properties of light, sound, and other energy waves and how they are reflected, absorbed, and transmitted through materials and space.	7.PS.9 Compare and contrast the three types of heat transfer: radiation, convection, and conduction.	

Science Grades K-5 Vertical Articulation – Earth and Space Science

	Kindergarten	First Grade	Second Grade
Solar System	K.ESS.1 Use observations to determine the effect of sunlight on Earth's surface and use tools and materials to design and build a structure to reduce the warming effect on Earth's surface.	1.ESS.1 Use observations of the sun, moon, and stars to describe patterns that can be predicted.	2.ESS.1 Record detailed weather observations, including cloud cover, cloud type, and type of precipitation on a daily basis over a period of weeks and compile observations to that time of year. Chart and graph collected data.
	K.ESS.2 Describe and compare objects seen in the night and day sky, observing that the sun and moon move across the sky.		2.ESS.2 Investigate the severe weather of the region and its impact on the community, looking at forecasting to prepare for, and respond to, severe weather.
Weather	K.ESS.3 Investigate the local weather conditions to describe patterns over time.		

	Kindergarten	First Grade	Second Grade
Soil, Rocks, and Minerals		1.ESS.5 Observe and compare properties of sand, clay, silt, and organic matter. Look for evidence of sand, clay, silt, and organic matter in components of soil samples.	2.ESS.3 Investigate how wind or water change the shape of the land and design solutions for prevention.
		1.ESS.6 Observe a variety of soil samples and describe in words and pictures the soil properties in terms of color, particle size and shape, texture, and recognizable living and nonliving parts.	2.ESS.4 Obtain information to identify where water is found on Earth and that it can be solid or liquid.
Earth's Systems and Structures	K.ESS.4 Communicate solutions that will reduce the impact of human on the land, water, air, and/or other living things in the local environment.	1.ESS.7 Develop solutions that could be implemented to reduce the impact of humans on the land, water, air, and/or other living things in the local environment.	2.ESS.5 Obtain information to identify where water is found on Earth and that it can be solid or liquid.

	Third Grade	Fourth Grade	Fifth Grade
SOLAR SYSTEM		4.ESS.1 Investigate how the moon appears to move through the sky and it changes day to day, emphasizing the importance of how the moon impacts the Earth, the rising and setting tides, and solar and lunar eclipses.	5.ESS.1 Analyze the scale of our solar system and its components; our solar system includes the sun, moon, seven other planets and their moons, and many other objects like asteroids and comets.
			5.ESS.2 Represent data in graphical displays to reveal patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky.
WEATHER	3.ESS.1 Obtain and combine information to determine seasonal weather patterns across the different regions of the United States.		
	3.ESS.2 Develop solutions that could be implemented to reduce the impact of weather-related hazards.		

Science Grades 3-5 and 6-8 Vertical Articulation – Earth and Space Science

SOIL, ROCKS, & MINERALS	3.ESS.2 Observe the detailed characteristics of rocks and minerals. Identify and classify rocks as being composed of different combinations of minerals.	4.ESS.2 Obtain and combine information to describe how energy and fuels are derived from natural resources and how these resources affect the environment.	SIXTH GRADE	SEVENTH GRADE	EIGHTH GRADE	EARTH SYSTEM & STRUCTURE	7.ESS.2 Construct a model or scale drawing (diagram or map) based on evidence from rock strata and fossil records. Use how the geologic time scale is used to organize Earth's 4.6 billion-year-old history.	8.ESS.2 Create a diagram or map that illustrates how energy is cycled through the geologic system, atmosphere and oceans. Explain how the geologic time scale is derived from the rates and the force of geology.
	3.ESS.3 Determine how fossils are formed, discovered, layered over time, and used to provide evidence of the organisms and the environment in which they lived long ago.	4.ESS.3 Describe how geological forces change the shape of the land suddenly and over time.					7.ESS.3 Use simulations or representations, including scientific data, to describe how the geologic time scale is derived from the rates and the force of geology.	8.ESS.3 Research how human representations of their natural resources (i.e., coal, oil, natural gas, and other resources) have had an impact on the environment (i.e., causes of air, water, soil, light, and noise pollution).
EARTH SYSTEM & STRUCTURE	3.ESS.4 Determine how fossils are formed, discovered, layered over time, and used to provide evidence of the organisms and the environment in which they lived long ago.	4.ESS.4 Develop solutions that could be implemented to reduce the impact of humans on the natural environment and the natural environment on humans.	SOIL, ROCKS, & MINERALS	WEATHER:	7.ESS.1 Identify and investigate the properties of minerals. Identify and classify a variety of rocks based on physical characteristics from their origin and explain how they are related to the rock cycle (i.e., sedimentation, erosion, and metamorphic rocks).	EARTH SYSTEM & STRUCTURE	7.ESS.4 Construct an argument, based on evidence from rock strata and fossil records, to describe how the geologic time scale is derived from the rates and the force of geology.	8.ESS.4 Research how human representations of their natural resources (i.e., coal, oil, natural gas, and other resources) have had an impact on the environment (i.e., causes of air, water, soil, light, and noise pollution).
	3.ESS.5 Investigate how individual communities within the United States receive the Earth's resources and environment.	4.ESS.5 Develop a model using an example to describe how the geosphere, biosphere, hydrosphere, and/or atmosphere interact.					7.ESS.5 Construct a model, diagram, or scale drawing of the interior layers of the Earth. Identify and compare the compositional (chemical) layers of the Earth's interior (i.e., crust, mantle, and core) and explain the differences in physical characteristics among individuals in a population may be advantageous for survival and reproduction.	8.ESS.5 Research how human representations of their natural resources (i.e., coal, oil, natural gas, and other resources) have had an impact on the environment (i.e., causes of air, water, soil, light, and noise pollution).

Science Grades K-2 Vertical Articulation – Life Science

Kindergarten	First Grade	Second Grade	Third Grade	Fourth Grade	Fifth Grade
GROWTH & DEVELOPMENT			GROWTH & DEVELOPMENT		
K.LS.1 Describe and compare the growth and development of common living plants and animals.	L.1.S.1 Develop representations to describe that organisms have unique and diverse life cycle but all have in common birth, growth, reproduction, and death.	L.2.S.1 Determine patterns and behavior (adaptations) of parents and offspring which help offspring to survive.	3.LS.1 Analyze evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms.	4.LS.1 Observe, analyze, and interpret how offspring are very much, but not exactly, like their parents in our world. Describe how these differences in physical characteristics among individuals in a population may be advantageous for survival and reproduction.	
STRUCTURE & FUNCTION			STRUCTURE & FUNCTION		
K.LS.2 Describe and compare the physical features of common living plants and animals.	L.1.S.2 Develop a model illustrating how plants and/or animals use their external parts to help them survive, grow, and meet their needs. Explain how these external parts could solve a human problem.	L.2.S.2 Compare and contrast details of body plans and structures within the life cycles of plants and animals.	3.LS.2 Use evidence to support the explanation that a change in the environment may result in a plant or animal that survive and reproduce, or die.	4.LS.2 Use evidence to support the explanation that a change in the environment may result in a plant or animal that survive and reproduce, or die.	
SYSTEMS:			SYSTEMS:		
K.LS.3 Use observations to describe patterns of what plants and animals (including humans) need to survive.	L.1.S.3 Make observations of plants and animals to compare the diversity of life in different habitats.	L.2.S.3 Compare and contrast details of body plans and structures within the life cycles of plants and animals.	3.LS.3 Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.	4.LS.3 Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction in a different ecosystem.	
	L.1.S.4 Use a model to represent the relationship between the needs of different plants and animals (including humans) and the places they live.	L.2.S.4 Classify living organisms according to variations in specific physical features (i.e., body coverings, appendages) and describe how these features may provide an advantage for survival in different environments.	3.LS.4 Construct an argument that some animals form groups that help members survive.	4.LS.4 Construct an argument that some animals form groups that help members survive.	

Science Grades 6-8 Vertical Articulation – Life Science

Sixth Grade	Seventh Grade	Eighth Grade	STRUCTURE & FUNCTION		
GROWTH & DEVELOPMENT			GROWTH & DEVELOPMENT		
6.LS.1 Investigate and describe how homeostasis is maintained in living things such as their basic needs of food, water, shelter, space, and air.	7.LS.1 Investigate and observe cells in living organisms and collect evidence showing that living things are made of cells. Compare and provide examples of prokaryotic and eukaryotic organisms. Identify the characteristics of living things.	8.LS.1 Compare and contrast the transmission of genetic information in sexual and asexual reproduction. Research organisms that undergo these two types of reproduction.	6.LS.2 Create a model to show how the cells in multicellular organisms repeatedly divide to make more cells for growth and repair as a result of mitosis. Explain how mitosis is related to cancer.	7.LS.2 Create a model to show how the cells in multicellular organisms repeatedly divide to make more cells for growth and repair as a result of mitosis. Explain how mitosis is related to cancer.	8.LS.2 Demonstrate how genetic information is transmitted from parent to offspring through chromosomes via the process of meiosis. Explain how living things grow and develop.
6.LS.2 Create a model to show how the cells in multicellular organisms repeatedly divide to make more cells for growth and repair as a result of mitosis. Explain how mitosis is related to cancer.	7.LS.2 Create a model to show how the cells in multicellular organisms repeatedly divide to make more cells for growth and repair as a result of mitosis. Explain how mitosis is related to cancer.	8.LS.3 Create and analyze Punnett squares to calculate the probability of specific traits being passed from parent to offspring using different patterns of inheritance.	6.LS.3 Create and analyze Punnett squares to calculate the probability of specific traits being passed from parent to offspring using different patterns of inheritance.	7.LS.3 Create and analyze Punnett squares to calculate the probability of specific traits being passed from parent to offspring using different patterns of inheritance.	8.LS.3 Create and analyze Punnett squares to calculate the probability of specific traits being passed from parent to offspring using different patterns of inheritance.
6.LS.3 Create and analyze Punnett squares to calculate the probability of specific traits being passed from parent to offspring using different patterns of inheritance.	7.LS.3 Create and analyze Punnett squares to calculate the probability of specific traits being passed from parent to offspring using different patterns of inheritance.	8.LS.4 Differentiate between and provide examples of acquired and genetically inherited traits.	6.LS.4 Differentiate between and provide examples of acquired and genetically inherited traits.	7.LS.4 Differentiate between and provide examples of acquired and genetically inherited traits.	8.LS.4 Differentiate between and provide examples of acquired and genetically inherited traits.
6.LS.4 Explain how factors affecting natural selection (competition, genetic variation, environmental changes, and overproduction) increase or decrease a species' ability to survive and reproduce.	7.LS.4 Explain how factors affecting natural selection (competition, genetic variation, environmental changes, and overproduction) increase or decrease a species' ability to survive and reproduce.	8.LS.5 Explain how factors affecting natural selection (competition, genetic variation, environmental changes, and overproduction) increase or decrease a species' ability to survive and reproduce.	6.LS.5 Explain how factors affecting natural selection (competition, genetic variation, environmental changes, and overproduction) increase or decrease a species' ability to survive and reproduce.	7.LS.5 Explain how factors affecting natural selection (competition, genetic variation, environmental changes, and overproduction) increase or decrease a species' ability to survive and reproduce.	8.LS.5 Explain how factors affecting natural selection (competition, genetic variation, environmental changes, and overproduction) increase or decrease a species' ability to survive and reproduce.
SYSTEMS			SYSTEMS		
6.LS.5 Describe specific relationships (symbiotic/parasitic) between organisms. Construct an explanation that predicts why patterns of interactions develop between organisms in an ecosystem.	7.LS.5 Investigate how various and how various affect the human body.	8.LS.6 Investigate how various and how various affect the human body.	6.LS.6 Investigate how various and how various affect the human body.	7.LS.6 Investigate how various and how various affect the human body.	8.LS.6 Investigate how various and how various affect the human body.
6.LS.6 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.7 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.7 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	6.LS.7 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.7 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.7 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.
6.LS.7 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.8 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.8 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	6.LS.8 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.8 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.8 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.
6.LS.8 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.9 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.9 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	6.LS.9 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.9 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.9 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.
6.LS.9 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.10 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.10 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	6.LS.10 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.10 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.10 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.
6.LS.10 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.11 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.11 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	6.LS.11 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	7.LS.11 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.	8.LS.11 Investigate and use data to explain how changes in biotic and abiotic components in a given habitat can be beneficial or detrimental to native plants and animals.

FOSS National K-8 Scope and Sequence (Next Generation Edition)

Grade	Integrated Middle Grades				
6-8	Heredity and Adaptation*	Electromagnetic Force*	Gravity and Kinetic Energy*	Waves*	Planetary Science
	Chemical Interactions	Earth History	Populations and Ecosystems		
	Weather and Water	Diversity of Life	Human Systems Interactions*		

*Half length courses Physical Science content Earth Science content Life Science content Engineering content

Grade	Physical Science	Earth Science	Life Science
5	Mixtures and Solutions	Earth and Sun	Living Systems
4	Energy	Soils, Rocks, and Landforms	Environments
3	Motion and Matter	Water and Climate	Structures of Life
2	Solids and Liquids	Pebbles, Sand, and Silt	Insects and Plants
1	Sound and Light	Air and Weather	Plants and Animals
K	Materials and Motion	Trees and Weather	Animals Two by Two

Integration of STEM Concepts

Science Concepts		I-STEM Resource Network Kits	Engineering Modules	Field of Engineering
Physical	Objects: Solids, Liquids, Gases	Solids and Liquids	Explore Playdough process How to Keep a Popsicle Cold w/o a Cooler	Chemical Engineer
	Forces & Motion	Pushes & Pulls Exploring Force & Motion	Design a Maglev System Design Bridges Design Simple Machines	Mechanical Engineer Civil Engineer Industrial Engineer
	Energy	Light and Sound SoundBite & Shadow Box	Design a Lighting System Design an Alarm Circuit Design a Solar Oven* Use Objects to Create Sound	Electrical Engineer Acoustical Engineer
Life	Human Body	Healthy Habits	Design a Knee Brace Design a Prosthetic Design a Cast	Biomedical Engineer
	Animals, Insects, Organisms, & Plants	Living & Non-Living Things Animal Adaptations Insects & Plants Exploring Plants and Animals	Design a Hand Pollinator Create Animal Habitats Create Model Membrane Design Plant Packages	Agricultural Engineer
Earth & Space	Solar System (sun, moon, stars, sky)	Observing the Sun	Study Eclipse Create Solar System Replica	Aerospace Engineer Astronomer
	Earth's System (land, water, air)	Floating & Sinking The Changing Earth Air & Water	Design Windmills Design a Parachute Design Water Filter Design a Submersible Design Walls Evaluate Landscapes/Landslides	Mechanical Engineer Environmental Engineer Geotechnical Engineer
	Weather		Design a Volcano Create a Tornado Create a Weather Vane Create a Rainbow	Meteorologists
	Soil, Rocks, & Minerals	Peebles, Sand, & Silt	Replicate an artifact	Materials Engineer Geologist
	Ecosystem		Cleaning an Oil Spill	Environmental Engineer
Computer Science	Coding, Animation Video Games	Spatial Sense & Coding Grids & Games Animated Storytelling		Software Engineer

Engineering Grades K-6 Vertical Articulation

Kindergarten - Second	Third - Fifth	Sixth - Eighth
K-2.E.1 Pose questions, make observations, and obtain information about a situation people want to change. Use this data to define a simple problem that can be solved through the construction of a new or improved object or tool.	3-5.E.1 Identify a simple problem with the design of an object that reflects a need or a want. Include criteria for success and constraints on materials, time, or cost.	6-8.E.1 Identify the criteria and constraints of a design to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
K-2.E.2 Develop a simple sketch, drawing, or physical model to illustrate and investigate how the shape of an object helps it function as needed to solve an identified problem.	3-5.E.2 Construct and compare multiple plausible solutions to a problem based on how well each is likely to meet the criteria and constraints of the problem.	6-8.E.2 Evaluate competing design solutions using a systematic process to identify how well they meet the criteria and constraints of the problem.
K-2.E.3 Analyze data from the investigation of two objects constructed to solve the same problem to compare the strengths and weaknesses of how each performs.	3-5.E.3 Construct and perform fair investigations in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved.	6-8.E.3 Analyze data from investigations to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.
		6-8.E.4 Develop a prototype to generate data for repeated investigations and modify a proposed object, tool, or process such that an optimal design can be achieved.

Engineering: Project Lead the Way Scope and Sequence Grades K-5 Launch Program

Modules

Project Lead The Way (PLTW) Launch modules engage students in cross-disciplinary activities that spark a lifelong love of learning and build knowledge and skills in areas including computer science, engineering, and biomedical science. Each module empowers student to develop essential skills such as problem solving, critical and creative thinking, communication, collaboration, and perseverance.

- **Modules Aligned to Kindergarten Standards**
 - Structure and Function: Exploring Design
 - Pushes and Pulls
 - Structure and Function: Human Body
 - Animals and Algorithms
- **Modules Aligned to First-Grade Standards**
 - Light and Sound
 - Light: Observing the Sun, Moon, and Stars
 - Animal Adaptations
 - Animated Storytelling
- **Modules Aligned to Second-Grade Standards**
 - Materials Science: Properties of Matter
 - Materials Science: Form and Function
 - The Changing Earth
 - Grids and Games
- **Modules Aligned to Third-Grade Standards**
 - Stability and Motion: Science of Flight
 - Stability and Motion: Forces and Interactions
 - Variation of Traits
 - Programming Patterns
- **Modules Aligned to Fourth-Grade Standards**
 - Energy: Collisions
 - Energy: Conversion
 - Input/Output: Computer Systems
 - Input/Output: Human Brain
- **Modules Aligned to Fifth-Grade Standards**
 - Robotics and Automation
 - Robotics and Automation: Challenge
 - Infection: Detection
 - Infection: Modeling and Simulation

Grades Gades 6-8 Program

Project Lead the Way Gateway Program Units Grades 6-8

PLTW Gateway Sparks Engagement and Illuminates Possibilities

Middle school is a time of exploration, a time when students are figuring out what they're passionate about today and how that relates to who they'll become tomorrow. PLTW Gateway's 10 units **empower students to lead their own discovery**. The hands-on program boosts classroom **engagement** and excitement, drives **collaboration**, and inspires "aha!" moments and deep **comprehension**. And as students engage in PLTW's activities in computer science, engineering, and biomedical science, they see a range of paths and possibilities they can look forward to in high school and beyond. These units are:

Design and Modeling

Students discover the design process and develop an understanding of the influence of creativity and innovation in their lives. They are then challenged and empowered to use and apply what they've learned throughout the unit to design a therapeutic toy for a child who has cerebral palsy.

Automation and Robotics

Students learn about the history and impact of automation and robotics as they explore mechanical systems, energy transfer, machine automation, and computer control systems. Using the VEX Robotics® platform, students apply what they know to design and program traffic lights, robotic arms, and more.

App Creators

This unit will expose students to computer science as a means of computationally analyzing and developing solutions to authentic problems through mobile app development, and will convey the positive impact of the application of computer science to other disciplines and to society.

Computer Science for Innovators and Makers

Throughout the unit, students will learn about programming for the physical world by blending hardware design and software development, allowing students to discover computer science concepts and skills by creating personally relevant, tangible, and shareable projects.

Energy and the Environment

Students are challenged to think big and toward the future as they explore sustainable solutions to our energy needs and investigate the impact of energy on our lives and the world. They use what they've learned to design and model alternative energy sources, as well as evaluate options for reducing energy consumption.

Flight and Space

The exciting world of aerospace comes alive through Flight and Space. Students explore the science behind aeronautics and use their knowledge to design, build, and test an airfoil.

Science of Technology

Science impacts the technology of yesterday, today, and the future. In this unit, students apply the concepts of physics, chemistry, and nanotechnology to activities and projects, including making ice cream, cleaning up an oil spill, and discovering the properties of nano-materials.

Magic of Electrons

In this unit, students examine the behavior and parts of atoms as well as the impact of electricity on the world around them. They learn skills in basic circuitry design and use what they know to propose designs such as a burglar alarm for an art museum.

Green Architecture

In this unit, students learn how to apply green concepts to the fields of architecture and construction. They explore dimensioning, measuring, and architectural sustainability and apply what they have learned to design affordable housing units using Autodesk® 3D architectural design software.

Medical Detectives

Students play the role of real-life medical detectives as they collect and analyze medical data to diagnose disease. They solve medical mysteries through hands-on projects and labs, measure and interpret vital signs, dissect a sheep brain, investigate disease outbreaks, and explore how a breakdown within the human body can lead to dysfunction. (This enhanced unit will be available Fall 2018.)

Engineering: Engineering Is Elementary Scope and Sequence

Engineering is Elementary

Curriculum Units Mapped to the ITEEA Standards for Technological Literacy

Key:																						
① denotes standard as primary unit goal, explicitly stated in learning objectives and/or lesson and activities.																						
② denotes standard as secondary unit goal, with the ideas briefly covered or implied in the lesson and activities.																						
		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing Maglev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces	
Category 1: The Nature of Technology																						
Standard 1: Students will develop an understanding of the characteristics and scope of technology.																						
Grades K-2	A. The natural world and human-made world are different.			①			②		①			①										
	B. All people use tools and techniques (technology) to help them do things.	②	②		①	②	①	①	①	①	①	①	①		①	①	①	①	①	②	①	
Grades 3-5	C. Things that are found in nature differ from things that are human-made in how they are produced and used.	②			①		②								①							
	D. Tools, materials, and skills are used to make things and carry out tasks.	②	②	①	①	①	②	①		②	①	①			①	①	①	①	①	②	①	
	E. Creative thinking and economic and cultural influences shape technological development.		②	①	①	①		①		①	①	①		②	①							
									cranes												ms	

Key:		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing Maglev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces
① denotes standard as primary unit goal, explicitly stated in learning objectives and/or lesson and activities.																					
② denotes standard as secondary unit goal, with the ideas briefly covered or implied in the lesson and activities.																					
Standard 2: Students will develop an understanding of the core concepts of technology.																					
Grades K-2	A. Some systems are found in nature, and some are made by humans.		②				①						②					①			
	B. Systems have parts or components that work together to accomplish a goal.		②				①						①							①	
	C. Tools are simple objects that help humans complete tasks.	②				①	②									②		①			
	D. Different materials are used in making things.	①		①	①	②	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
	E. People plan in order to get things done.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
Grades 3-5	F. A subsystem is a system that operates as a part of another system.						①	②													
	G. When parts of a system are missing, it may not work as planned.						①														
	H. Resources are the things needed to get a job done, such as tools and machines, materials, information, energy, people, capital, and time.								②							①	②				
	I. Tools are used to design, make, use, and assess technology.		②		②											①					
	J. Materials have many different properties.	①	②	①			①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
	K. Tools and machines extend human capabilities, such as holding, lifting, carrying, fastening, separating, and computing.	②			①	①													①		
	L. Requirements are the limits to designing or making a product or system.	①	①	①	②	②	②	②	②	②	②	①	②	①	②	①	①	①	①	②	①
	S. Trade-off is a decision process recognizing the need for careful compromises among competing factors.										①				①	①	①		①	①	①
Grades 6-8																					

Engineering Is Elementary Unit Modules

Key:		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing MagLev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces
Standard 6: Students will develop an understanding of the role of society in the development and use of technology.																					
Grades K-2	A. Products are made to meet individual needs and wants.	1	2	1	2	1	1	1	2	1	1	1	1	2	1	1			1	1	1
Grades 3-5	B. Because people's needs and wants change, new technologies are developed, and old ones are improved to meet those changes.			2	1											2					
	C. Individual, family, community, and economic concerns may expand or limit the development of technologies.			1				2	2		1	1	1			1					
Standard 7: Students will develop an understanding of the influence of technology on history.																					
Grades K-2	A. The way people live and work has changed throughout history because of technology.	1			1	1										2			1		
Grades 3-5	B. People have made tools to provide food, to make clothing, and to protect themselves.															2	2		1		
Category 3: Design																					
Standard 8: Students will develop an understanding of the attributes of design.																					
Grades K-2	A. Everyone can design solutions to a problem.	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1
	B. Design is a creative process.	1	1	1	1	1	1	1	1	1			1	1	1	2					
Grades 3-5	C. The design process is a purposeful method of planning practical solutions to problems.	1	1	1	1	1	1	1		1	1	1	1	2	1	1	1	1	1	1	1
	D. Requirements for a design include such factors as the desired elements and features of a product or system or the limits that are placed on the design.	1	1	1	1	1		1		1		1	1		1	1	1	1		1	1

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 4

Key:		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing MagLev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces
Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.																					
Grades K-2	A. The study of technology uses many of the same ideas and skills as other subjects.	2	2	1	1	1	1	2	1	1	1	1	2	1	2		1	2			
Grades 3-5	B. Technologies are often combined.				1																
	C. Various relationships exist between technology and other fields of study.	2	2	2	2	2	1	1	1	1	1	1	1			1		1	1		1
Category 2: Technology and Society																					
Standard 4: Students will develop an understanding of the cultural, social, economic and political effects of technology.																					
Grades K-2	A. The use of tools and machines can be helpful or harmful.		1															1			
Grades 3-5	B. When using technology, results can be good or bad.		1		1							1						1			
	C. The use of technology can have unintended consequences.		1		1										1			1			
Standard 5: Students will develop an understanding of the effects of technology on the environment.																					
Grades K-2	A. Some materials can be reused and/or recycled.											1			1						
Grades 3-5	B. Waste must be appropriately recycled or disposed of to prevent unnecessary harm to the environment.		1									1			1		1				
	C. The use of technology affects the environment in good and bad ways.		1					2						1		1					

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 3

Engineering is Elementary Unit Modules

Key:																	
① denotes standard as primary unit goal, explicitly stated in learning objectives and/or lesson and activities.																	
② denotes standard as secondary unit goal, with the ideas briefly covered or implied in the lesson and activities.																	
		Designing Walls Designing Bridges Designing Water Filters Designing Windmills Making Work Easier Designing Pollinators Representing Sound Designing Model Membranes Designing Alarm Circuits Improving a Play Dough Evaluating Landscapes Designing Plant Packages Designing MagLev Systems Designing Parachutes Designing Solar Ovens Replicating an Artifact Cleaning an Oil Spill Designing Submersibles Designing Lighting Systems Knee Braces															
		Standard 9: Students will develop an understanding of engineering design.															
Grades K-2	A. The engineering design process includes identifying a problem, looking for ideas, developing solutions, and sharing solutions with others.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
	B. Expressing ideas to others verbally and through sketches and models is an important part of the design process.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
Grades 3-5	C. The engineering design process involves defining a problem, generating ideas, selecting a solution, testing the solution(s), [making, evaluating, and presenting].	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
	D. When designing an object it is important to be creative and consider all ideas.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
	E. Models are used to communicate & test design ideas & processes.	①	②	②	②	②	①	①	①	①	①	①	①	①	①	①	①
		Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation.															
Grades K-2	A. Asking questions and making observations helps a person to figure out how things work.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
	B. All products and systems are subject to failure. Many products and systems, however, can be fixed.																
Grades 3-5	C. Troubleshooting is a way of finding out why something does not work so that it can be fixed.								①								
	D. Invention and innovation are creative ways to turn ideas into real things.																
	E. The process of experimentation, which is common in science, can also be used to solve technological problems.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 5

Key:																	
① denotes standard as primary unit goal, explicitly stated in learning objectives and/or lesson and activities.																	
② denotes standard as secondary unit goal, with the ideas briefly covered or implied in the lesson and activities.																	
		Designing Walls Designing Bridges Designing Water Filters Designing Windmills Making Work Easier Designing Pollinators Representing Sound Designing Model Membranes Designing Alarm Circuits Improving a Play Dough Process Evaluating Landscapes Designing Plant Packages Designing MagLev Systems Designing Parachutes Designing Solar Ovens Replicating an Artifact Cleaning an Oil Spill Designing Submersibles Designing Lighting Systems Knee Braces															
		Category 4: Abilities for a Technological World															
		Standard 11: Students will develop abilities to apply the design process.															
Grades K-2	A. Brainstorm people's needs and wants and pick some problems that can be solved through the design process.											①					
	B. Build or construct an object using the design process.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
Grades 3-5	C. Investigate how things are made and... can be improved.	①								①							
	D. Identify and collect information about everyday problems that can be solved by technology, and generate ideas and requirements for solving a problem.																
	E. The process of designing involves presenting some possible solutions in visual form and then selecting the best solution(s)...												①	①	①	①	①
	F. Test and evaluate the solutions for the design problem.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
	G. Improve the design solutions.	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①	①
		Standard 12: Students will develop the abilities to use and maintain technological products and systems.															
Grades K-2	A. Discover how things work.																
	B. Use hand tools correctly & safely & name them correctly.							②									
Grades 3-5	C. Recognize and use everyday symbols.								①								
	D. Follow step-by-step directions to assemble a product.					①			①	①			①				
	E. Select and safely use tools, products, and systems for specific tasks.					①					①						
	F. Use computers to access and organize information.																
	G. Use common symbols, such as numbers and words, to communicate key ideas.							①	①		①						

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 6

Engineering is Elementary Unit Modules

Key: ① denotes standard as primary unit goal, explicitly stated in learning objectives and/or lesson and activities. ② denotes standard as secondary unit goal, with the ideas briefly covered or implied in the lesson and activities.		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing MagLev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces
Standard 13: Students will develop abilities to assess the impact of products and systems.																					
Grades	K-2	A. Collect information about everyday products and systems by asking questions.									①			①		①					
		B. Determine if the human use of a product or system creates positive or negative results.					①														
Grades	3-5	C. Compare, contrast and classify collected information in order to identify patterns.									①	①		①	①					①	
		D. Investigate and assess the influence of a specific technology on the individual, family, community, and environment.														①					
		E. Examine the trade-offs of using a product or system and decide when it could be used.																			
Category 5: The Designed World																					
Standard 14: Students will develop an understanding of and be able to select and use medical technologies.																					
Grades	K-2	A. Vaccinations protect people from getting certain diseases.																			
		B. Medicine helps people who are sick to get better.																			
		C. There are many products designed specifically to help people take care of themselves.																		①	
Grades	3-5	D. Vaccines are designed to prevent diseases from developing and spreading; medicines are designed to relieve symptoms and stop diseases from developing.																			
		E. Technological advances have made it possible to create new devices, to repair or replace certain parts of the body, and to provide a means for mobility.																		①	
		F. Many tools & devices have been designed to help provide clues about health and to provide a safe environment.																			

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 7

Key: ① denotes standard as primary unit goal, explicitly stated in learning objectives and/or lesson and activities. ② denotes standard as secondary unit goal, with the ideas briefly covered or implied in the lesson and activities		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing MagLev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces
Standard 15: Students will develop an understanding of and be able to select and use agricultural and related biotechnologies.																					
Grades	K-2	A. The use of technologies in agriculture makes it possible for food to be available year round and to conserve resources.																			
		B. There are many different tools necessary to control and make up the parts of an ecosystem.					①														
Grades	3-5	C. Artificial ecosystems are human-made environments that are designed to function as a unit and are comprised of humans, plants, and animals.																			
		D. Most agricultural waste can be recycled.																			
		E. Many processes used in agriculture require different procedures, products or systems.																			
Standard 16: Students will develop an understanding of and be able to select and use energy and power technologies.																					
Grades	K-2	A. Energy comes in many forms.				①										①					
		B. Energy should not be wasted.				②										①					
		C. Energy comes in different forms.				②										①					
	3-5	D. Tools, machines, products, and systems use energy in order to do work.				①										①					

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 8

Engineering is Elementary Unit Modules

Key:																						
① denotes standard as primary unit goal, explicitly stated in learning objectives and/or lesson and activities.																						
② denotes standard as secondary unit goal, with the ideas briefly covered or implied in the lesson and activities.																						
		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing MagLev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces	
Standard 17: Students will develop an understanding of and be able to select and use information and communication technologies.																						
Grades K-2	A. Information is data that has been organized.							②														
	B. Technology enables people to communicate by sending and receiving information over a distance.			②				①												①		
	C. People use symbols when they communicate by technology.							①														
Grades 3-5	D. The processing of information through the use of technology can be used to help humans make decisions and solve problems.							②														
	E. Information can be acquired & sent through a variety of technological sources, including print & electronic media.			②																		
	F. Communication technology is the transfer of messages among people and/or machines over distances through the use of technology.							①														
	G. Letters, characters, icons, and signs are symbols that represent ideas, quantities, elements and operations.							①		①										②		
	Standard 18: Students will develop an understanding of and be able to select and use transportation technologies.																					
Grades K-2	A. A transportation systems has many parts that work together to help people travel.													①								
	B. Vehicles move people or goods from one place to another in water, air or space, and on land.													①	①							
	C. Transportation vehicles must be cared for to prolong use.																					
Grades 3-5	D. The use of transportation allows people and goods to be moved from place to place.													①								
	E. A transportation system may lose efficiency/fail if a part is missing/malfunctioning or a subsystem isn't working.																					

EIE Mapped to ITEEA Standards for Technological Literacy – Page 10

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 9

Key:		Designing Walls	Designing Bridges	Designing Water Filters	Designing Windmills	Making Work Easier	Designing Pollinators	Representing Sound	Designing Model Membranes	Designing Alarm Circuits	Improving a Play Dough Process	Evaluating Landscapes	Designing Plant Packages	Designing MagLev Systems	Designing Parachutes	Designing Solar Ovens	Replicating an Artifact	Cleaning an Oil Spill	Designing Submersibles	Designing Lighting Systems	Knee Braces
Standard 19: Students will develop an understanding of and be able to select and use manufacturing technologies.																					
Grades K-2	A. Manufacturing systems produce products in quantity.						①														
	B. Manufactured products are designed.					②							①								①
	C. Processing systems convert natural materials into products.																①				
Grades 3-5	D. Manufacturing processes include designing products, gathering resources, and using tools to separate, form, and combine materials in order to produce products.																				
	E. Manufacturing enterprises exist because of a consumption of goods.																				
Standard 20: Students will develop an understanding of and be able to select and use construction technologies.																					
Grades K-2	A. People live, work, & go to school in buildings, which are of different types: houses... office buildings, & schools.																				
	B. The type of structure determines how the parts are put together.	①	①																		
	C. Modern communities are usually planned according to guidelines.																				
Grades 3-5	D. Structures need to be maintained.		②																		
	E. Many systems are used in buildings.																				
Grades 6-8	G. Structures rest on a foundation.												①								

EIE Mapped to ITEEA Standards for Technological Literacy -- Page 10

Standards for Technology Literacy

2006 Standards Alignment Chart

Please note: The comparison chart is intended to assist teachers in updating lesson plans to align with national Standards For Technological Literacy (STL). STL crosswalks may vary per local implementation and course structure.

2006 (Indiana)

Standard #1 (STL 1) Understand how technology can improve, manage, and help control the natural and human-made environments.

Standard #2 (STL 2) Describe technology as a system with inputs, processes, outputs, impacts, and feedback.

Standard #3 (STL 3, STL 4, STL 7) Understand the relationship of technology to other academic fields, particularly science, math, social studies, and language arts.

Standard #4 (STL 14-20) Describe technology as it is applied in the context of communication, construction, manufacturing, transportation, and related technologies.

Standard #5 (STL 8, STL 11) Work cooperatively and productively in groups to design and use technology to solve technological problems.

Standard #6 (STL 4, STL 6) Identify societal and personal needs and opportunities that can be addressed through technology.

Standard #7 (STL 11) Develop and refine alternate solutions that address technological needs and opportunities.

Standard #8 (STL 6, STL 13) Evaluate and select appropriate solutions that address technological needs and opportunities.

Standard #9 (STL 9, STL 11) Apply engineering principles when planning, developing, implementing, and analyzing technological solutions.

Standard #10 (STL 9, STL 17) Specify solutions to stated needs and opportunities using appropriate technical means.

Standards For Technological Literacy (national)

STL #1 Students will develop an understanding of the characteristics and scope of technology.

STL #2 Students will develop an understanding of the core concepts of technology.

STL #3 Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.

STL #4 Students will develop an understanding of the cultural, social, economic, and political effects of technology.

STL #5 Students will develop an understanding of the effects of technology on the environment.

STL #6 Students will develop an understanding of the role of society in the development and use of technology.

STL #7 Students will develop an understanding of the influence of technology on history.

STL #8 Students will develop an understanding of the attributes of design.

STL #9 Students will develop an understanding of engineering design.

STL #10 Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.

2006 continued...

Standard #11 (STL 14-20) Select the appropriate resources needed to produce and operate communication, construction, manufacturing, transportation, and other technological systems and artifacts.

Standard #12 (STL 2, STL 14-20) Select the appropriate processes needed to produce or operate products, structures, and systems.

Standard #13 (STL 12, STL 14-20) Efficiently use appropriate processes to related to communication, engineering, production, transportation, and similar devices and systems.

Standard #14 (STL 12, STL 13) Appropriately operate technological devices and systems.

Standard #15 (STL 5) Describe the relationships among entrepreneurship, business enterprises, and technology.

Standard #16 (STL 12) Select the appropriate devices and systems to meet personal and societal needs.

Standard #17 (STL 10) Recognize the need for servicing and repairing technological devices and systems.

Standard #18 (STL 5, STL 13) Properly dispose or recondition worn out and obsolete technological devices.

Standard #19 (STL 4, STL 5, STL 13) Determine the impact of technological actions on people, society, and the environment.

STL continued...

STL #11 Students will develop abilities to apply the design process.

STL #12 Students will develop abilities to use and maintain technological products and systems.

STL #13 Students will develop abilities to assess the impact of products and systems.

STL #14 Students will develop an understanding of and be able to select and use medical technologies.

STL #15 Students will develop an understanding of and be able to select and use agricultural and related biotechnologies.

STL #16 Students will develop an understanding of and be able to select and use energy and power technologies.

STL #17 Students will develop an understanding of and be able to select and use information and communication technologies.

STL #18 Students will develop an understanding of and be able to select and use transportation technologies.

STL #19 Students will develop an understanding of and be able to select and use manufacturing technologies.

STL #20 Students will develop an understanding of and be able to select and use construction technologies.

Social Studies Grades K-4 Vertical Articulation

K – 3 VERTICAL ARTICULATION

KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3
<p>The goal of social studies education is to help children develop thinking and decision-making skills that prepare them for responsible citizenship in a democratic society. Children begin to explore these skills at the kindergarten level through learning experiences that challenge them to explore their world and the interrelated communities that exist in the lives of children living in their immediate and distant past.</p> <p>Kindergarten students are introduced to examples of differences and changes in their surroundings and learn to describe a sequence of events in a day. They also become familiar with geographic relationships, such as location, time, and order (direction). They learn to use maps, globes, and globes to explore why rules are needed in groups and how they are used to solve problems. Kindergarten students should begin to understand responsibility for their behavior in school and to explore why rules are needed in families and at school. Children understand how the opportunities to use a variety of resources, including technology and electronic and print media, is a means of gathering, organizing, analyzing information, and answering questions. Students should use the opportunity to learn through open-ended questions and to explore how people interact and work together in families and in school. Kindergarten students should begin to understand responsibility for their behavior in school and to explore why rules are needed in families and at school. Children understand how the opportunities to use a variety of resources, including technology and electronic and print media, is a means of gathering, organizing, analyzing information, and answering questions. Students should use the opportunity to learn through open-ended questions and to explore how people interact and work together in families and in school.</p> <p>The Indiana K-1 academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Kindergarten are described below. On the pages that follow, appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.</p>	<p>All first grade students are able to explore thinking and decision-making skills through activities and experiences that challenge them to explore their world and the interrelated communities that exist in the lives of children living in their immediate and distant past.</p> <p>First grade students are introduced to examples of differences and changes in their surroundings and learn to describe a sequence of events in a day. They also become familiar with geographic relationships, such as location, time, and order (direction). They learn to use maps, globes, and globes to explore why rules are needed in groups and how they are used to solve problems. First grade students should begin to understand responsibility for their behavior in school and to explore why rules are needed in families and at school. Children understand how the opportunities to use a variety of resources, including technology and electronic and print media, is a means of gathering, organizing, analyzing information, and answering questions. Students should use the opportunity to learn through open-ended questions and to explore how people interact and work together in families and in school.</p> <p>The Indiana K-1 academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Grade 1 are described below. On the pages that follow, appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.</p>	<p>Through active learning experiences, students in second grade are able to explore thinking and decision-making skills through activities and experiences that challenge them to explore their world and the interrelated communities that exist in the lives of children living in their immediate and distant past.</p> <p>Second grade students are introduced to examples of differences and changes in their surroundings and learn to describe a sequence of events in a day. They also become familiar with geographic relationships, such as location, time, and order (direction). They learn to use maps, globes, and globes to explore why rules are needed in groups and how they are used to solve problems. Second grade students should begin to understand responsibility for their behavior in school and to explore why rules are needed in families and at school. Children understand how the opportunities to use a variety of resources, including technology and electronic and print media, is a means of gathering, organizing, analyzing information, and answering questions. Students should use the opportunity to learn through open-ended questions and to explore how people interact and work together in families and in school.</p> <p>The Indiana K-1 academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Grade 2 are described below. On the pages that follow, appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.</p>	<p>Through active learning experiences, students in third grade are able to explore thinking and decision-making skills through activities and experiences that challenge them to explore their world and the interrelated communities that exist in the lives of children living in their immediate and distant past.</p> <p>Third grade students are introduced to examples of differences and changes in their surroundings and learn to describe a sequence of events in a day. They also become familiar with geographic relationships, such as location, time, and order (direction). They learn to use maps, globes, and globes to explore why rules are needed in groups and how they are used to solve problems. Third grade students should begin to understand responsibility for their behavior in school and to explore why rules are needed in families and at school. Children understand how the opportunities to use a variety of resources, including technology and electronic and print media, is a means of gathering, organizing, analyzing information, and answering questions. Students should use the opportunity to learn through open-ended questions and to explore how people interact and work together in families and in school.</p> <p>The Indiana K-1 academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Grade 3 are described below. On the pages that follow, appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.</p>

Adopted March 2014

K – 3 VERTICAL ARTICULATION

Standard 1 – History	Standard 1 – History	Standard 1 – History	Standard 1 – History
<p>Students examine the connections of their own environment with the past. They begin to distinguish between events and people of the past and the present, and use a sense of time in classroom planning and participation.</p> <p>Historical Knowledge</p> <p>K.1.1 Compare children and families of today with those from the past. Example: Clothing, houses, and other objects.</p>	<p>Students differentiate between events that happened in the past and nearby, recognize examples of continuity and change in local and regional communities, and consider ways that people and events of the past and present influence their lives.</p> <p>Historical Knowledge</p> <p>1.1.1 Compare the way individuals in the community lived in the past with the way they live in the present. Example: Clothing, the use of technology, methods of transportation, entertainment, and customs.</p> <p>1.1.2 Compare past and present communities and differences in community life through different forms of media, biographies, and historical events. Example: Compare the roles of men, women and children; ethnic and cultural groups; types of work, schools and education in the community, and recreation.</p>	<p>Students differentiate between events that happened in the past and nearby, recognize examples of continuity and change in local and regional communities, and consider ways that people and events of the past and present influence their lives.</p> <p>Historical Knowledge</p> <p>2.1.1 Identify when the local community was established and identify its founders and early settlers.</p> <p>2.1.2 Explain changes in daily life in the community over time using maps, photographs, news stories, Web sites or video images. Example: Changes in architecture, business methods, transportation, community buildings, work and use of leisure time.</p>	<p>Students describe how significant people, events and developments have shaped their own community and region; compare their community to other communities in the region in other times and places; and use a variety of resources to gather information about the past.</p> <p>Historical Knowledge</p> <p>3.1.1 Identify and describe Native American (Woodland Indians who lived in the region when European settlers arrived. Example: Miami, Shawnee, Kickapoo, Algonquian, Delaware, Powhatan and Wyandott.</p> <p>3.1.2 Explain why and how the local community was established and identify its founders and early settlers.</p> <p>3.1.3 Describe the role of the local community and other communities in the development of the state's history. Example: Full figure was the early trade center because of the convergence of three rivers in the area. Mining the state history to Indianapolis encouraged growth in the central region of Indiana.</p>

Adopted March 2014

K – 3 VERTICAL ARTICULATION

KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3
<p>Chronological Thinking, Historical Analysis and Interpretation, Research</p> <p>K.1.1 Identify and order events that take place in a sequence. Example: Identify events in the school day as first, next, last, yesterday, today and tomorrow, place school events in order.</p> <p>K.1.4 Explain that calendars are used to represent the days of the week and months of the year. Example: Use a calendar to identify days of the week and school activities and birthdays.</p>	<p>Chronological Thinking, Historical Analysis and Interpretation, Research</p> <p>1.1.6 Create a simple timeline of important events in the student's life. Example: Use the terms past and present; yesterday, today and tomorrow, and next week and last week to sequentially order events that have occurred in the school.</p> <p>1.1.8 Explain how clocks and calendars are used to measure time.</p> <p>1.1.9 Distinguish between historical fact and fiction in American histories and legends that are part of American culture. Example: John Jay, Benjamin Franklin, Paul Bunyan, and John Henry.</p>	<p>Chronological Thinking, Historical Analysis and Interpretation, Research</p> <p>2.1.6 Create and maintain a calendar of important events in the history of the school and/or community.</p> <p>2.1.7 Read about and summarize historical community events using a variety of resources (the library, digital media, print media, electronic media, and community resources). Example: Write or draw historical events in the history of the school using photographs, artifacts, interviews and oral histories of people in the community.</p> <p>2.1.8 Describe how your community has changed over time and how it has stayed the same. Example: Drawers village in Southern Indiana and Corner Pointe settlement.</p>	<p>Chronological Thinking, Historical Analysis and Interpretation, Research</p> <p>3.1.6 Use a variety of resources to gather information about your region's communities, identify factors that make the region unique, including cultural, historical, geographic, and architectural. Example: Cherokee, Shawnee, Kickapoo, Algonquian, Delaware, Powhatan and Wyandott.</p> <p>3.1.7 Distinguish between fact and fiction in historical accounts by comparing documentary sources on historical figures and events with fictional characters and events in stories. Example: Compare historical accounts of the exploits of George Washington and John Chapman (Johnny Appleseed) with historical accounts. Compare a scene of historical fiction about Abraham Lincoln or Harriet Tubman with a primary source.</p>

Adopted March 2014

K – 3 VERTICAL ARTICULATION

<p>K.1.2 Identify people, celebrations, commemorations, and holidays as a way of honoring people, heritage, and events. Example: George Washington, Charlie Turtle, Abraham Lincoln, Harriet Tubman, and Martin Luther King, Jr., Thanksgiving, Columbus Day, Groundhog Day, and birthdays.</p>	<p>1.1.3 Identify local people from the past who have shaped history, courage and responsibility. Example: War veterans and community leaders.</p> <p>1.1.4 Identify American songs and symbols and discuss their origins. Example: Songs: "The Star-Spangled Banner" and "Pledge the Oath," Symbols: The United States Flag, the bald eagle and the Statue of Liberty.</p> <p>1.1.5 Identify people and events observed in national celebrations and holidays. Example: Celebrations and holidays, such as Thanksgiving, Reverend Martin Luther King, Jr. Day, Presidents' Day, Independence Day, Arbor Day, and Veterans' Day.</p>	<p>2.1.3 Identify individuals who have had a positive impact on the local community.</p> <p>2.1.4 Give examples of people, events and developments that brought important changes to your community and the region where your community is located. Example: Developments in transportation, such as the building of canals, roads and railroads, commercial communities and caused changes in population or industry.</p> <p>2.1.5 Identify and describe community celebrations, symbols and traditions and explain why they are important. Example: Local and regional festivals, city flags and seals, and community mottos.</p>	<p>3.1.4 Give examples of people, events and developments that brought important changes to your community and the region where your community is located. Example: Developments in transportation, such as the building of canals, roads and railroads, commercial communities and caused changes in population or industry.</p>
---	--	---	---

K – 3 VERTICAL ARTICULATION

<p>K.2.2 Identify and explain that the President of the United States is the leader of our country and that the American flag is a symbol of the United States.</p>	<p>1.2.2 Define immigration and explain how immigration enriched our country. Example: We are a nation of immigrants; we have been heavily influenced by immigration since before the Revolutionary War. Example: Ellis Island was opened (January 1, 1952) during the administration of President Benjamin Harrison (Indiana's only President). http://www.ellis.org/ehp/ehp.html</p>	<p>2.2.2 Define and give examples of ways and how in the school and the community and explain the benefits of these ways and how.</p>	<p>3.2.2 Explain the importance of having these ways to ensure order and safety.</p>
---	--	---	--

K – 3 VERTICAL ARTICULATION

KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3
<p>Standard 2 – Civics and Government</p> <p>Students learn that they are citizens of their community and the United States. They identify symbols of the nation and understand the importance of being a responsible citizen who knows why rules are needed and follows them.</p> <p>Foundations of Government</p> <p>K.2.1 Give examples of people who are community leaders and leaders and describe how they help. Example: Teachers, leaders, school principal, bus drivers and politicians.</p> <p>K.2.2 Identify and explain that the President of the United States is the leader of our country and that the American flag is a symbol of the United States.</p> <p>Foundations of Government</p> <p>K.2.3 Give examples of people who are community leaders and leaders and describe how they help. Example: Teachers, leaders, school principal, bus drivers and politicians.</p>	<p>Standard 2 – Civics and Government</p> <p>Students explore why communities have government and how it works. They identify symbols of the nation and understand the importance of being a responsible citizen who knows why rules are needed and follows them.</p> <p>Foundations of Government</p> <p>1.2.1 Identify rights and responsibilities and identify the responsibilities that accompany these rights. Example: Students have the right to be safe and the right to be heard. They have the responsibility to follow community safety rules.</p> <p>Foundations of Government</p> <p>1.2.2 Define and give examples of ways and how in the school and the community and explain the benefits of these ways and how.</p>	<p>Standard 2 – Civics and Government</p> <p>Students explore why communities have government and how it works. They identify symbols of the nation and understand the importance of being a responsible citizen who knows why rules are needed and follows them.</p> <p>Foundations of Government</p> <p>2.1.1 Explain that the United States government is founded on the belief of equal rights for all people. Example: People have the right to be safe and the right to be heard. They have the responsibility to follow community safety rules.</p> <p>Foundations of Government</p> <p>2.1.2 Define and give examples of ways and how in the school and the community and explain the benefits of these ways and how.</p>	<p>Standard 2 – Civics and Government</p> <p>Students explore why communities have government and how it works. They identify symbols of the nation and understand the importance of being a responsible citizen who knows why rules are needed and follows them.</p> <p>Foundations of Government</p> <p>3.1.1 Explain the reasons government is needed and identify specific goals and values that government provides. Example: Government provides community services such as the fire and police departments, water and sewer systems, and safe drinking water.</p> <p>Foundations of Government</p> <p>3.1.2 Identify and explain the significance of the American government and state. Example: The rights to life, liberty and the pursuit of happiness.</p> <p>Foundations of Government</p> <p>3.1.3 Identify and explain the role of the selection process for local and state government officials who make, implement and enforce laws.</p> <p>Foundations of Government</p> <p>3.1.4 Explain that the United States has three levels of government: local, state and national, and that each level has special duties and responsibilities.</p>

Social Studies Grades K-3 Vertical Articulation

K – 3 VERTICAL ARTICULATION

KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3
Places and Features	Places and Features	Places and Features	Places and Features
K.3.1 Locate and describe places in the school and community. Example: Classroom, library, office, restaurant, gym and the fire station			K.3.1 Explain that people are aware that there is order in physical and cultural characteristics. Identify Indiana and the local community as part of a specific region. Example: Cities housing the Great Lakes are part of the Great Lakes Region. The same cities are also considered part of the Midwest because of their location relative to other cities. Cultural characteristics: human features, such as population, immigration and migration, religion, language, customs, and how people make a living or build homes and other structures.
	K.3.2 Identify and describe physical features of the local community including human, natural and geographical features. Geographical features include location in relation to land and water bodies, natural vegetation and wildlife. Human features: features created by humans, such as buildings, cities, roads and farms.	K.3.2 Compare neighborhoods in your community and explain how physical features of the community affect people living there. Example: Lakes and rivers may affect the types of work and transportation done in a community. People in small communities may have to travel to larger communities to grocery shop, for school or for recreational activities.	K.3.2 Compare and contrast the physical characteristics of Indiana to neighboring states using maps, illustrations, maps, photographs, and other resources.
K.3.2 Identify and describe the address and location of school, understand the importance of an address		K.3.2 Compare the cultural characteristics of the local community with communities in other parts of the world.	K.3.2 Compare the cultural characteristics of the local community with communities in other parts of the world.
Physical Systems	Physical Systems	Physical Systems	Physical Systems
K.3.2 Describe and give examples of seasonal weather changes and illustrate how weather affects people and the environment. Example: In different seasons, people wear different kinds of clothing.	K.3.2 Understand weather patterns in the community, including temperature, precipitation, cloud cover and the amount of sunlight during the different seasons of the year. K.3.2 Explain the effect of seasonal change on plants, animals, and people.	K.3.2 On a map, identify physical features of the local community. Example: Use maps and address to identify how bodies of water, crops and green spaces.	K.3.2 Identify the major climate regions of the United States and explain how they affect the vegetation and animal life in those regions. K.3.2 Describe how climate and the physical characteristics of a region affect the vegetation and animal life in those regions. Example: Growing seasons, types of crops grown, and animal behavior and migration.

Adopted March 2014

K – 3 VERTICAL ARTICULATION

KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3
Standard 4 - Economics	Standard 4 - Economics	Standard 4 - Economics	Standard 4 - Economics
Students explain that people do different jobs and work to meet their economic wants and needs.	Students explain how people in the school and community use goods and services and make choices as both producers and consumers.	Students explain how people in a community use productive resources, create a variety of businesses and industries, specialize in different types of jobs, and depend on each other to supply goods and services.	Students explain how people in the local community make choices about using goods, services and productive resources. How they engage in trade to satisfy their resources wants and needs. How they use a variety of resources to produce goods and services. How they use economic change in the community, and how they compare costs and benefits in economic decisions.
K.4.1 Explain that people work to earn money to buy the things they want and need.	K.4.1 Identify goods (tangible objects, such as food, clothing, and money) that people use and need to buy things they want and need.	K.4.1 Define the three types of productive resources: human resources, natural resources and capital resources. Explain how these resources are used to produce goods and services. Identify the human work effort, both physical and mental, that is used to produce goods and services. Identify the natural resources (often called land resources) that are used to produce goods and services. Identify the capital resources (such as tools, machinery, and equipment) used in production.	K.4.1 Give examples of how the local community uses the three types of productive resources. Explain how these resources are used to produce goods and services. Identify the human work effort, both physical and mental, that is used to produce goods and services. Identify the natural resources (often called land resources) that are used to produce goods and services. Identify the capital resources (such as tools, machinery, and equipment) used in production.
K.4.2 Identify and describe different kinds of jobs that people do in the school and community.	K.4.2 Identify services (actions that someone does for someone else that people do not produce often).	K.4.2 Identify productive resources used to produce goods and services in the community. • Productive resources: human resources, natural resources, and capital resources used to produce goods and services.	K.4.2 Give examples of goods and services provided by local business and industry.

Adopted March 2014

K – 3 VERTICAL ARTICULATION

			K.4.2 Gather data from a variety of resources about changes that have had an economic impact on your community. Example: Interview a community leader to discuss the decision to build a bigger baseball park in the community. Use the local chamber of commerce and government Web sites to research the impact a new recreation center will have on young people and their families.
			K.4.3 Identify different ways people earn their money and explain advantages and disadvantages of each. Example: Home "giggy" work, savings accounts, etc.

Social Studies Grades 4-5 Vertical Articulation

GRADE 4-5 VERTICAL ARTICULATION

GRADE 4	GRADE 5
Fourth grade students apply their growing academic skills and knowledge to an exploration of Indiana and its relationships with regional, national, and world communities. Students are beginning to develop a more refined concept of time and can begin to deal with cause-and-effect relationships and decision-making processes, such as identifying problems and considering alternative solutions and their subsequent consequences. These skills and concepts must be related to students' lives and should be represented in a wide variety of resources and hands-on activities, which include: (1) collecting and examining primary documents and artifacts, (2) making models and maps, (3) talking with community resource persons, and (4) visiting historic sites and buildings.	Students in grade 5 study the United States, focusing on the influence of physical and cultural characteristics on national identity, growth, and development up to 1800 through a formal exploration of United States history (geography, economics), government, current events, and cultural history. Emphasis should be placed upon study of Native American, Indian cultures, European exploration, colonization, settlement, revolution against British rule, the founding of the Republic and the beginning of the United States. Students also learn to describe the major components of our national government and to demonstrate responsible citizenship in the classroom and school setting.
In the fourth grade, students identify key people, places and events that have shaped their state and region. They learn to explain how changes have affected people and communities. Students identify major land forms, water features and resources, and explain how they have influenced state and regional development. They learn to describe the basic structure of state government and explain its purpose. Students have opportunities to actively explore and appreciate the diverse cultures which have contributed to Indiana's heritage. Students also learn to develop proficiency in working cooperatively in groups to: (1) collect data from a variety of resources, including electronic and print media; (2) draw simple conclusions; and (3) organize data using a variety of notes (written, graphic, charts, maps, time lines, etc.).	Through active learning experiences in the fifth grade level, students' increasing interest in the ability to gather and organize data enables them to explore the physical and cultural characteristics of the United States and its neighbors. Most fifth grade students benefit from working and sharing in flexible groups so that they can become actively involved in "discovery" of their natural interest in science, geography, and travel set the stage for experiences involving maps, memorabilia, collections, illustrations, educational games, group planning projects, first person-perspectives, and school and community experiences. Fifth graders' interest in collecting and demonstrating use of old objects provides avenues for extending time concepts.
The Indiana's K - 5 academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Grade 4 are described below. On the pages that follow, age-appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.	In activities, emphasis is placed on the problem-solving skills of questioning, analyzing, fact and opinion, analyzing and evaluating sources of information, contrasting and comparing using primary and secondary sources, and conducting research using a variety of resources, including technology and electronic and print media. Additional skills to be taught include: (1) analyzing maps, globes, and graphic organizers; (2) drawing and interpreting charts and graphs; (3) identifying relationships; (4) identifying issues; (5) posing alternative actions; and (6) developing thinking and independent study skills.
	The Indiana's K - 5 academic standards for social studies are organized around four content areas. KINDERGARTEN	GRADE 1	GRADE 2	GRADE 3
Human Systems	Human Systems	Human Systems	Human Systems
K.3.1 Identify and compare similarities and differences in families, communities, neighborhoods, and ethnic and cultural groups. Example: Cities housing the Great Lakes are part of the Great Lakes Region. The same cities are also considered part of the Midwest because of their location relative to other cities. Cultural characteristics: human features, such as population, immigration and migration, religion, language, customs, and how people make a living or build homes and other structures.	K.3.1 Draw simple maps using symbols that show how space is used in familiar areas such as the classroom, the school, the neighborhood, and the community. Example: Draw simple maps of the school setting that show the playground and different parts of the school building. Make maps that show the location of the school office, library, gymnasium and cafeteria.	K.3.1 Identify and describe cultural or human features on a map using major symbols. Example: Local roads, highways, buildings, towns and parks.	K.3.1 Compare and contrast the physical characteristics of Indiana to neighboring states using maps, illustrations, maps, photographs, and other resources.
Environment and Society	Environment and Society	Environment and Society	Environment and Society
K.3.2 Recognize ways that people can improve their environment at home, in school, and in the neighborhood.	K.3.2 Give examples of cultural resources found locally and describe how people in the school and community use these resources. Example: Interact in a variety of ways for cooking and clothing. Trees are used to make paper and provide shelter, and soil is used to grow plants which are provide food.	K.3.2 Identify ways that recreational opportunities influence human activity in the community. Example: Identify parks, lakes, swimming pools, rivers and mountains that are used for recreational purposes.	K.3.2 Identify the major climate regions of the United States and explain how they affect the vegetation and animal life in those regions. K.3.2 Describe how climate and the physical characteristics of a region affect the vegetation and animal life in those regions. Example: Growing seasons, types of crops grown, and animal behavior and migration.

Adopted March 2014

GRADE 4-5 VERTICAL ARTICULATION

Standard 4 - History	Standard 4 - History
Students trace the historical periods, events and movements that have led to the development of Indiana as a state.	Students describe the historical movements that led to the development of the United States from pre-Columbian times up to 1800, with an emphasis on the American Revolution and the founding of the United States.
Historical Knowledge	Historical Knowledge
4.1.1 Identify and compare the major early cultures that existed in the region that became Indiana prior to contact with Europeans. Example: Paleo-Indian, Archaic, Woodland, and Mississippian cultures.	4.1.1 Identify and describe early cultures and settlements that existed in North America prior to contact with Europeans. Example: The Hopewell (800 B.C.E. - 100 A.D.C.E.) and Mississippian culture of Cahokia (800 A.D.C.E. - 1600 A.D.C.E.).
4.1.2 Identify and describe historic Native American Indian groups that lived in Indiana at the time of early European exploration, including how their groups adapted to and interacted with the physical environment. Example: Miami, Shawnee, Potawatomi and Lenape (Delaware). http://www.indianapedia.com/indian/indian.html	4.1.2 Examine accounts of early European exploration of North America including major land and water routes, reasons for exploration and the impact the exploration had. Example: The Vikings explorations and settlements in Newfoundland and North America; Spanish explorations by Christopher Columbus, Vasco Núñez de Balboa, Hernando de Soto and Francisco Pizarro de Coronado; descriptions by French explorers Jacques Cartier and Samuel de Champlain, and explorations by English and Indian by explorers Henry Cabot, Henry Hudson and John White.
4.1.3 Explain the importance of the Revolutionary War and other key events and people that influenced the development of Indiana as a state. Example: George Rogers Clark and the Fall of Vincennes (1779), development of the Northwest Territory, Indiana becoming a U.S. Territory, Chief Little Turtle (Tecumseh, Tenskwatewa (the Prophet), William Henry Harrison, and the Battle of Tippecanoe (1811).	4.1.3 Compare and contrast historic Indian groups of the West, Southeast, Midwest, Arctic and Sub-Arctic, Great Plains, and Eastern Woodlands regions at the beginning of European exploration in the late 15th and 16th centuries. Example: Compare sites of exploration, settlement patterns, sources of food and clothing, customs and social traditions, political and economic organization, and types and uses of technology.
4.1.4 Demonstrate and explain the significance of key documents in Indiana's development from a United States territory to a state. Example: The Land Ordinance of 1785, the Northwest Ordinance (1787), which made Indiana part of the United States territory, and the 1816 Indiana Constitution, which established the first state government.	4.1.4 Locate and compare the origins, physical structure and social structure of early Spanish, French and British settlements. Example: St. Augustine, Roanoke Island, Santa Fe and Jamestown.
	4.1.5 Compare and contrast the religious, political and economic reasons for the colonization of the Americas by Europe. Example: Puritan fleeing religious persecution, search for wealth by the French and Spanish, debtor-refugees in Georgia, and the African slave trade.
	4.1.6 Identify and explain missions of both cooperation and conflict that existed between Native American Indians and colonists. Example: Invasions, trade, cultural exchanges, military alliances, and missions.

Social Studies Grades 4-5 Vertical Articulation

Social Studies Grades 4-5 Vertical Articulation

GRADE 4-5 VERTICAL ARTICULATION	
STANDARD 4 – ECONOMICS	STANDARD 5 – ECONOMICS
Students study and compare the characteristics of different interacting economies in the past and present.	Students describe the production resources and market relationships that influence the way people produce goods and services and how living in the United States in different historical periods. Students consider the importance of economic decision making and how people make economic choices that affect their lives.
4.4.1 Give examples of the ways in which goods and services produced in Indiana in different historical periods. <ul style="list-style-type: none"> goods, tangible objects, such as food or toys, that can satisfy people's wants and needs services, actions that someone does for someone else, such as dental care or health insurance 	5.4.1 Describe the economic activities within and among Native American Indian cultures prior to contact with Europeans. Examine the economic similarities that helped influence European exploration and settlement. 5.4.2 Delineate a market economy and give examples of how the colonial and early American economies were different from the economies of Europe. <ul style="list-style-type: none"> market economy: An economic system where decisions about what to produce, how to produce, and whom to allocate assets and resources are made primarily by individuals and businesses. In a market economy, prices are determined by the interaction of businesses and producers in a market.
4.4.2 Define productivity and give examples of how productivity has changed in Indiana during the past 100 years. <ul style="list-style-type: none"> Example: Increased productivity in manufacturing and service sectors. Technology has helped businesses run more efficiently, improved education has provided individuals with the knowledge and skills to run businesses and work more productively. 	5.4.3 Define types of trade barriers. <ul style="list-style-type: none"> trade barriers: policies that hinder trade such as tariffs, quotas or embargos
4.4.3 Explain how both parties can benefit from trade and give examples of how growth in Indiana is related to trade in different historical periods. <ul style="list-style-type: none"> trade: the voluntary exchange of goods or services 	5.4.4 Describe the impact of technological developments and major movements on business production during the early development of the United States.
4.4.4 Explain that prices change as a result of changes in supply and demand for specific products. <ul style="list-style-type: none"> supply and demand are willing and able to sell at various prices demand and consumers are willing and able to buy at various prices 	5.4.5 Explain how education and training, specialization and investment in capital resources increase productivity. <ul style="list-style-type: none"> capital resources: goods, such as tools, buildings and equipment, used in production
4.4.5 Describe Indiana's economic development in Indiana, such as Toledo, Chicago, St. Louis, North Chicago, and other communities that were an international presence such as Detroit, St. Louis and Chicago Express.	

GRADE 4-5 VERTICAL ARTICULATION

4.4.6 List the functions of money and compare and contrast things that have been used as money in the past in Indiana, the United States and the world. <ul style="list-style-type: none"> functions of money: helps people trade, measures the value of items, facilitates saving 	5.4.6 Use economic reasoning to explain why certain careers are more common in one region than in another and how specialization results in more interdependence.
4.4.7 Identify entrepreneurs who have influenced Indiana and the United States. <ul style="list-style-type: none"> entrepreneur: a person who takes a risk to start a business 	5.4.7 Predict the effect of changes in supply and demand on price. <ul style="list-style-type: none"> supply: what producers are willing and able to sell at various prices demand: what consumers are willing and able to buy at various prices
4.4.8 Define profit and describe how profit is an incentive for entrepreneurs. <ul style="list-style-type: none"> profit: revenues from selling a good or service minus the costs of producing the good or service 	5.4.8 Analyze how the causes and effects of changes in price of certain goods and services had significant influence on events in United States history. <ul style="list-style-type: none"> Example: The price of cotton, the price of sugar and the price of gold all are related to specific events and movements in the development of the United States.
4.4.9 Identify important goods and services provided by state and local governments by giving examples of how state and local tax revenues are used.	5.4.9 Explain the purpose and components of a personal budget and compare factors that influence household saving and spending decisions in early United States history and today.
4.4.10 Explain how people save, develop a savings plan, and create a budget in order to make a future purchase.	

Social Studies Grades 6-8 Vertical Articulation

GRADE 6 – 7 VERTICAL ARTICULATION

GRADE 6: People, Places and Cultures in Europe and the Americas	GRADE 7: Peoples, Places and Cultures in Africa, Asia and the Southwest Pacific
Students in sixth grade compare the history, geography, government, economic systems, current issues, and cultures of the Western World with an emphasis on: (1) Europe, (2) North America, (3) South America, (4) Central America, (5) and the Caribbean region. Instructional programs for sixth grade students include experiences which better the passage from concrete information to abstract reasoning, concepts, ideas, and generalizations. Opportunities to develop skills include the use of a variety of resources and activities. Students should acquire positive attitudes regarding active participation, cooperation, responsibility, open-mindedness, and respect for others. The Indiana's K – 8 Academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Grade 6 are described below. On the pages that follow, age-appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.	Students in seventh grade explore the history, geography, government, economic systems, current issues, and cultures of the Eastern World with an emphasis on: (1) Asia, (2) Africa, (3) the Middle East, (4) the Pacific Islands, (5) Australia, and (6) New Zealand. Learning experiences for seventh grade students should help them to make the transition from concrete information to abstract ideas, concepts, and generalizations. In-depth studies provide greater understanding of environmental influences on economic, cultural, and political institutions. Opportunities to develop thinking and research skills include reading and interpreting maps, graphs, and charts. Decision-making and problem-solving activities should include the following: (1) identifying problems, issues and questions; (2) information gathering; (3) hypothesizing; and (4) evaluating alternative solutions and actions. The Indiana's K – 8 Academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Grade 7 are described below. On the pages that follow, age-appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.
STANDARD 1: HISTORY Students explore the key historic movements, events and figures that contributed to the development of modern Europe and America from early civilizations through modern times by examining religious institutions, trade and cultural interactions, political institutions, and technological developments. Historical Knowledge Early and Classical Civilizations: 3500 B.C. / B.C.E. to 700 A.D. / C.E. 6.1.1 Summarize the rise, decline, and cultural achievements of ancient civilizations in Europe and Mesoamerica. Examples: Greek, Roman, Mayan, Inca, and Aztec civilizations	STANDARD 1: HISTORY Students examine the major movements, events and figures that contributed to the development of nations in modern Africa, Asia and the Southwest Pacific from ancient civilizations to modern times by examining religious institutions, trade and cultural interactions, political institutions, and technological developments. Historical Knowledge Early Civilizations, States and Empires: 3500 B.C. / B.C.E. to 650 A.D. / C.E. 7.1.1 Identify and explain the conditions that led to the rise of early river valley civilizations and evaluate how the achievements in art, architecture, written language, and religion of those civilizations influenced their respective forms of government and social hierarchies. Examples: River Valley Civilizations: Nile (Ancient Egypt), Tigris and Euphrates (Mesopotamia), Indus (Ancient India), and Huang He (Ancient China)

GRADE 6 – 7 VERTICAL ARTICULATION

6.1.2 Describe and compare the beliefs, the spread and the influence of religions throughout Europe and Mesoamerica. Examples: Judaism, Christianity, Islam and native practices in Mesoamerica and Europe Medieval Period: 400 A.D./C.E. – 1500 A.D./C.E. 6.1.3 Explain the continuation and contributions of the Eastern Roman Empire after the fall of the Western Roman Empire. Examples: Influence of the spread of Christianity in Russia and Eastern Europe 6.1.4 Identify and explain the development and organization of political, cultural, social and economic systems in Europe and the Americas. Examples: Feudal system, manorial system, rise of kingdoms and empires, and religious institutions 6.1.5 Analyze the diverse points of view and interests of those involved in the Crusades and give examples of the changes brought about by the Crusades. Examples: Increased contact between European and non-European peoples, impact on Jews and Muslims in Europe and the Middle East, changes in technology, and centralization of political and military power 6.1.6 Identify trade routes and discuss their impact on the rise of cultural centers and trade cities in Europe and Mesoamerica. Examples: Florence, Genoa, Venice, Naples, Tenochtitlan, Machu Picchu and Teotihuacan 6.1.7 Describe how the Black Death, along with economic, environmental and social factors led to the decline of medieval society	The Spread of Cultural, Economic, Social and Political Ideas: 500 B.C. (B.C.E.) – 1600 A.D. (C.E.) 7.1.2 Describe, compare, and contrast the historical origins, central beliefs and spread of major religions. Example: Hinduism, Buddhism, Judaism, Christianity and Islam 7.1.3 Assess the development of sub-Saharan civilizations in Africa and the importance of political and trading centers. 7.1.4 Describe the importance of the Silk Road on the histories of Europe, Africa, and Asia 7.1.5 Explain the influence of Muslim civilization on the growth of cities; the development of trade routes; political organizations; scientific and cultural contributions; and the basis for the early banking system to other cultures of the time. 7.1.6 Describe the institution of slavery in its various forms in Africa, Asia and the Southwest Pacific and analyze the impact slavery had on different civilizations. 7.1.7 Trace the rise, spread and influence of the Mongols. Major Civilizations, States and Empires: 300 – 1650 7.1.8 Describe the rise, contributions, and decline of the Chinese dynasties. Example: The dynastic cycle and the influence of Confucianism 7.1.9 Demonstrate how Japan became increasingly independent of earlier Chinese influences and developed its own political, religious, social and artistic traditions. Example: Feudalism, shogunate court life, samurai culture
--	---

GRADE 6 – 7 VERTICAL ARTICULATION

GRADE 6 – 7 VERTICAL ARTICULATION	GRADE 6 – 7 VERTICAL ARTICULATION
6.1.8 Compare the diverse perspectives, ideas, interests and people that brought about the Renaissance in Europe. Examples: Ideas of the importance of the individual, scientific inquiry based on observation and experimentation, interest in Greek and Roman thought, and new approaches in the fine arts and literature. People: Leonardo da Vinci, Michelangelo, Nicholas Copernicus, William Shakespeare and Galileo Galilei 6.1.9 Analyze the interconnections of people, places and events in the economic, scientific and cultural exchanges of the European Renaissance that led to the Scientific Revolution, voyage of discovery and imperial conquest. Early Modern Era: 1500 to 1800 6.1.10 Examine and explain the outcomes of European colonization on the Americas and the rest of the world. Examples: The defeat of the Aztec and Incan empires by the Spanish, the rise of trading empires, Columbian exchange and slavery, Columbus' search for India 6.1.11 Compare and contrast Spanish, Portuguese, French, and British colonies in the Americas. 6.1.12 Describe the Reformation and their effects on European and American society. Examples: Missionary activities, the rise of Calvinism and Lutheranism, Henry VIII's break with Parliament and the Catholic Church, the principle of separation of church and state, Papal reform, and the Council of Trent 6.1.13 Explain the origin and spread of scientific, political, and social ideals associated with the Age of Enlightenment/Age of Reason. Examples: The American and French Revolutions and the spread of democratic ideals, the Scientific Revolution, and the influence on world religions resulting in the assimilation of religious groups	Exploration, Conquest and Post-Colonial States: 1500 to the Present 7.1.10 Analyze worldwide voyages of exploration and discovery by considering multiple perspectives of various people in the past by demonstrating their differing motives, beliefs, interests, hopes, and fears. Example: The voyages of the Ming dynasty, and Jan Batista 7.1.11 Explain the reasons for European colonization of Africa, Asia, and the Southwest Pacific and analyze the long and short term impact that colonization and imperialism had on the social, political, and economic development of these societies from both European and indigenous perspectives. 7.1.12 Analyze the Japanese imperial period (1868-1945), including Japan's involvement in World War II. 7.1.13 Identify and explain the significance of historical events in the Middle East since the end of World War II. Example: The partition of the British Palestine Mandate (1947), the Suez Canal crisis (1956), the Arab-Israeli Six Day War (1967), the formation of Organization of Petroleum Exporting Countries (OPEC, 1960), the Iranian Hostage Crisis (1979), the Gulf Wars (1991, 2003), the War on Terrorism (2001-present)

6.1.14 Describe the origins, developments and innovations of the Industrial Revolution and explain the impact these changes brought about. Examples: Steam engine, factory system, urbanization, changing role of women and child labor Modern Era: 1700 to the present 6.1.15 Describe the impact of industrialization and urbanization on the lives of individuals and on trade and cultural exchange between Europe and the Americas and the rest of the world. 6.1.16 Identify individuals, beliefs and events that represent various political ideologies during the nineteenth and twentieth century's and explain their significance. Examples: Liberalism, conservatism, nationalism, socialism, communism, fascism and popular sovereignty 6.1.17 Discuss the benefits and challenges related to the development of a highly technological society. Examples: Atomic energy, computers and environmental change Chronological Thinking, Historical Comprehension, Analysis and Interpretation, Research 6.1.18 Create and compare timelines that identify major people, events and developments in the history of individual civilizations and/or countries that comprise Europe and the Americas. 6.1.19 Define and use the terms decade, century, and millennium, and compare alternative ways that historical periods and eras are designated by identifying the organizing principles upon which each is based. 6.1.20 Analyze cause-and-effect relationships, keeping in mind multiple causations, including the importance of individuals, ideas, human interests, beliefs and chance in history. Examples: The decline of Greek city-states, the destruction of the Aztecs, and state-sponsored genocide, including the Holocaust.	7.1.14 Identify and explain recent conflicts and political issues between nations or cultural groups and evaluate the solutions that different organizations have utilized to address these conflicts. Chronological Thinking, Historical Comprehension, Analysis and Interpretation, Research 7.1.15 Create and compare timelines that identify major people and events and developments in the history of civilization and/or countries of Africa, Asia and the Southwest Pacific. 7.1.16 Analyze cause-and-effect relationships, bearing in mind multiple causation in the role of individuals, beliefs and chance in history. 7.1.17 Distinguish between unsupported expressions of opinion and informed hypotheses grounded in historical evidence. 7.1.18 Compare and contrast perspectives of history in Africa, Asia, and the Southwest Pacific using fictional and nonfictional accounts including visual, literary, art, and musical sources
--	---

Social Studies Grade 6-8 Vertical Articulation

GRADE 6 – 7 VERTICAL ARTICULATION

<p>6.1.21 Differentiate between fact and interpretation in historical accounts and explain the meaning of historical passages by identifying who was involved, what happened, where it happened, and relating them to outcomes that followed and gaps in the historical record.</p> <p>6.1.22 Form research questions and use a variety of information resources to obtain, evaluate and present data on people, cultures and developments in Europe and the Americas.</p> <p>Examples: Collect data and create maps, graphs or spreadsheets showing the impact of immigration patterns in Canada, the Chernobyl nuclear disaster on Russia and access to health care in the European Union (EU).</p> <p>6.1.23 Identify issues related to an historical event in Europe or the Americas and give basic arguments for and against that issue utilizing the perspectives, interests and values of those involved.</p> <p>Examples: The role of women in different time periods, decline of ancient civilizations, and attitudes toward human rights.</p>	<p>STANDARD 2: CIVICS AND GOVERNMENT</p> <p>Students compare and contrast forms of government in different historical periods with contemporary political structures of Europe and the Americas and examine the rights and responsibilities of individuals in different political systems.</p> <p>Foundations of Government</p> <p>6.2.1 Compare and contrast major forms of governments in Europe and the Americas throughout history.</p> <p>Examples: Greek democracies, Roman Republic, Aztec monarchy, parliamentary government, U.S. Republic, and totalitarianism.</p> <p>6.2.2 Explain how elements of Greek direct democracy and Roman representative democracy are present in modern systems of government.</p>
<p>STANDARD 2: CIVICS AND GOVERNMENT</p> <p>Students trace the development of different forms of government in different historical eras and compare various contemporary political structures in Africa, Asia and the Southwest Pacific in terms of power, approach to human rights and the role of citizens.</p> <p>Foundations of Government</p> <p>7.2.1 Compare, contrast, and evaluate the different routes to independence from colonial rule taken by countries in Asia, Africa and the Southwest Pacific.</p> <p>Example: Australia, India and South Africa.</p> <p>7.2.2 Compare and contrast historical and contemporary governments in Africa, Asia, and the Southwest Pacific.</p> <p>Examples: Japan, North Korea, India, South Africa, and China.</p>	<p>STANDARD 2: CIVICS AND GOVERNMENT</p> <p>Students trace the development of different forms of government in different historical eras and compare various contemporary political structures in Africa, Asia and the Southwest Pacific in terms of power, approach to human rights and the role of citizens.</p> <p>Foundations of Government</p> <p>7.2.1 Compare, contrast, and evaluate the different routes to independence from colonial rule taken by countries in Asia, Africa and the Southwest Pacific.</p> <p>Example: Australia, India and South Africa.</p> <p>7.2.2 Compare and contrast historical and contemporary governments in Africa, Asia, and the Southwest Pacific.</p> <p>Examples: Japan, North Korea, India, South Africa, and China.</p>

GRADE 6 – 7 VERTICAL ARTICULATION

<p>6.2.3 Examine key ideas of Magna Carta (1215), the Petition of Right (1628), and the English Bill of Rights (1689) as documents to place limits on the English monarchy and how they have affected the shaping of other governments.</p> <p>6.2.4 Define the term nation-state and describe the rise of nation-states headed by monarchs in Europe from 1500 to 1700.</p>	
<p>Functions of Government</p> <p>6.2.5 Discuss the impact of major forms of government in Europe and the Americas on civil and human rights.</p> <p>6.2.6 Identify and describe the functions of international political organizations in the world today. Examples: Examine the functions of the World Court, North Atlantic Treaty Organization (NATO) and the United Nations (UN).</p>	<p>Functions of Government</p> <p>7.2.3 Describe how major forms of governments of Japan, North Korea, India, South Africa and China currently protect or violate the human rights of their citizens.</p> <p>7.2.4 Compare and contrast the functions of international organizations in Africa, Asia and the Southwest Pacific.</p>
<p>Role of Citizens</p> <p>6.2.7 Define and compare citizenship and the citizen's role throughout history in Europe and the Americas. Examples: Compare methods of voting; participation in voluntary organizations of civil society; and participation in the government in Great Britain, Russia, Brazil, Mexico and Canada.</p>	<p>Role of Citizens</p> <p>7.2.5 Define, compare and contrast citizenship and the citizen's role in the government of selected countries of Africa, Asia and the Southwest Pacific.</p>

GRADE 6 – 7 VERTICAL ARTICULATION

<p>STANDARD 3: GEOGRAPHY</p> <p>Students identify the characteristics of climate regions in Europe and the Americas and describe major physical features, countries and cities of Europe and the Americas.</p> <p>The World in Spatial Terms</p> <p>6.3.1 Demonstrate a broad understanding of the countries and capitals of Europe and the Americas.</p> <p>6.3.2 Use latitude and longitude to locate the capital cities of Europe and the Americas and describe the uses of locational technology, such as Global Positioning Systems (GPS) to distinguish absolute and relative location and to describe Earth's surfaces.</p> <p>Place and Region</p> <p>6.3.3 Describe and compare major physical characteristics of regions in Europe and the Americas.</p> <p>Examples: Mountain ranges, rivers, deserts, etc.</p> <p>6.3.4 Describe and compare major cultural characteristics of regions in Europe and the Americas.</p> <p>Examples: Language, religion, recreation, clothing, diet, music/dance, family structure, and traditions.</p> <p>Physical Systems</p> <p>6.3.5 Give examples and describe the formation of important river deltas, mountains and basins of water in Europe and the Americas.</p> <p>Examples: Volga River, Canadian Rockies, Sierra Madre Mountains and Lochs in Scotland.</p> <p>6.3.6 Explain how ocean currents and winds influence climate differences on Europe and the Americas.</p> <p>6.3.7 Locate and describe the climate regions of Europe and the Americas and explain how and why they differ.</p> <p>Examples: Gulf Stream and North Atlantic Current.</p>	<p>STANDARD 3: GEOGRAPHY</p> <p>Students use technology and grid systems to identify and categorize places (physical, cultural, countries, large cities), major geographic characteristics (human and physical), and regions in Africa, Asia, and the Southwest Pacific. They use geographic skills, perspectives, and technologies to analyze relationships within and between these regions and the rest of the world.</p> <p>The World in Spatial Terms</p> <p>7.3.1 Formulate a broad understanding of the location of countries of Africa, Asia and the Southwest Pacific.</p> <p>7.3.2 Formulate a broad understanding of the location of capital cities in Africa, Asia and the Southwest Pacific using latitude and longitude on maps and with locational technology such as Global Positioning Systems and Geographic Information Systems.</p> <p>Place and Region</p> <p>7.3.3 Use historical maps to identify changes in Africa, Asia and the Southwest Pacific over time.</p> <p>7.3.4 Identify major physical characteristics of regions of Africa, Asia, and the Southwest Pacific, such as deserts, basins, plains, mountains, and rivers, and describe their formation.</p> <p>Physical Systems</p> <p>7.3.5 Describe ecosystems of Africa's deserts, Asia's mountain regions, and the arid reefs of Australia and use multiple information resources to discover environmental concerns that these ecosystems are facing today.</p> <p>7.3.6 Compare and contrast the distribution of natural resources in Africa, Asia and the Southwest Pacific, describe how natural resource distribution can impact the wealth of a country.</p> <p>7.3.7 Describe the limitations that climate and land forms place on land or people in regions of Africa, Asia and the Southwest Pacific.</p>
---	--

GRADE 6 – 7 VERTICAL ARTICULATION

<p>6.3.8 Identify major biomes of Europe and the Americas and explain how these are influenced by climate.</p> <p>Examples: Rainforests, tundra, woodlands, and deserts.</p> <p>Human Systems</p> <p>6.3.9 Identify current patterns of population distribution and growth in Europe and the Americas using a variety of geographic representations such as maps, charts, graphs, and satellite images and aerial photography. Evaluate different push and pull factors that trigger migrations.</p> <p>Examples: Rural and urban areas, immigration.</p> <p>6.3.10 Explain the ways cultural diffusion, invention, and innovation change culture.</p> <p>6.3.11 Define the terms anthropology and archeology and explain how these fields contribute to our understanding of societies in the present and the past.</p> <p>Environment and Society</p> <p>6.3.12 Compare the distribution and evaluate the importance of natural resources such as natural gas, oil, forests, uranium, minerals, coal, seafood and water in Europe and the Americas.</p> <p>6.3.13 Explain the impact of humans on the physical environment in Europe and the Americas.</p> <p>6.3.14 Explain and give examples of how nature has impacted the physical environment and human populations in specific areas of Europe and the Americas.</p> <p>Examples: Hurricanes, earthquakes, floods and drought.</p>	<p>Human Systems</p> <p>7.3.8 Identify current trends and patterns of rural and urban population distribution in selected countries of Africa, Asia and the Southwest Pacific and analyse the causes for these patterns.</p> <p>Example: Life expectancy, income, literacy rate, industry, education, natural resources, and climate.</p> <p>7.3.9 Provide examples of ethnocentrism and how this attitude affected the relationships between different peoples in Africa, Asia, and the Southwest Pacific.</p> <p>Environment and Society</p> <p>7.3.10 Analyse current issues and developments related to the environment in selected countries in Africa, Asia and the Southwest Pacific.</p>
--	--

GRADE 6 – 7 VERTICAL ARTICULATION

<p>STANDARD 4: ECONOMICS</p> <p>Students examine the influence of physical and cultural factors upon the economic systems of countries in Europe and the Americas.</p> <p>6.4.1 Give examples of how trade related to key developments in the history of Europe and the Americas.</p> <p>Examples: The growth of trading towns and cities in medieval Europe led to money economies, competition to expand world trade led to European voyages of trade and exploration, and Mayan trade in Mesoamerica led to colonization and the diffusion of art.</p> <p>6.4.2 Analyze how countries of Europe and the Americas have been influenced by trade in different historical periods.</p> <p>Examples: Increased production and consumption and lower prices.</p> <p>6.4.3 Explain why international trade requires a system for exchanging currency between various countries.</p> <p>6.4.4 Describe how different economic systems (traditional, command, market and mixed) in Europe and the Americas answer the basic economic questions on what to produce, how to produce and for whom to produce.</p> <p>6.4.5 Compare the standard of living of various countries of Europe and the Americas today using Gross Domestic Product (GDP) per capita as an indicator.</p> <p>6.4.6 Analyze current economic issues in the countries of Europe or the Americas using a variety of information resources.</p> <p>Examples: Use information sources such as digital newspapers, the Internet and podcasts to examine changes in energy prices and consumption, exchange rates and currency values.</p> <p>6.4.7 Identify economic connections between the local community and the countries of Europe or the Americas and identify job skills needed to be successful in the workplace.</p>	<p>STANDARD 4: ECONOMICS</p> <p>Students examine the influence of physical and cultural factors upon the economic systems found in countries of Africa, Asia and the Southwest Pacific.</p> <p>7.4.1 Explain how voluntary trade benefits countries and results in higher standards of living in Africa, Asia, and the Southwest Pacific.</p> <p>Example: Voluntary trade results in increased production, increased consumption of goods and services, and lower prices for consumers.</p> <p>7.4.2 Illustrate how international trade requires a system for exchanging currency between and among nations.</p> <p>7.4.3 Trace the development and change over time of the economic systems (traditional, command, market and mixed) of various cultures, societies or nations in Africa, Asia and the Southwest Pacific, and analyze why these changes occurred over time.</p> <p>*traditional economy: an economy in which resources are allocated based on custom and tradition. *command economy: an economy in which resources are allocated by the government or other central authority. *market economy: an economy in which resources are allocated by individuals and businesses responding to changes in prices. *mixed economy: an economy in which resources are allocated by some combination of traditional, command or market systems.</p> <p>7.4.4 Compare and contrast the standard of living of various countries in Africa, Asia, and the Southwest Pacific using Gross Domestic Product (GDP) per capita as an indicator; hypothesize how factors, including urbanization, industrialization, and globalization could affect the differences in the standard of living statistics.</p> <p>*Gross Domestic Product (GDP): the value of all final goods and services produced in a country in a year.</p>
--	--

GRADE 6 – 7 VERTICAL ARTICULATION

<p>6.4.8 Identify ways that societies deal with helpful and harmful externalities (pollution) in Europe or the Americas.</p> <p>Examples: Government support of public education and governments taxing or regulating pollution.</p> <p>*externality (pollution): the impact of an activity (positive or negative) on the well-being of a third party.</p> <p>6.4.9 Explain how saving and investing help increase productivity and economic growth and compare and contrast individual saving and investing options.</p> <p>Examples: Savings accounts, certificates of deposit and stocks.</p>	<p>7.4.5 Analyze different methods that countries in Africa, Asia and the Southwest Pacific have used to increase their citizens' individual human capital.</p> <p>*human capital: the skills and expertise people acquire from education, training and experience.</p> <p>7.4.6 Identify ways that societies deal with helpful and harmful externalities (pollution) in Africa, Asia or the Southwest Pacific.</p> <p>Example: Government support of public education and governments taxing or regulating pollution.</p> <p>*externality (pollution): the impact of an activity (positive or negative) on the well-being of a third party.</p>

Indy STEAM Academy

Attachment #5

Academic and Exit Standards

Attachment # 5: Grade 8 Reading Academic and Exit Standards

Indy STEM Academy will be a full capacity grades K-8 in Year 7. Exit Standards for Grade 8 indicate what students should know and be able to do to be prepared to enter high school. The academy's curriculum will be aligned with the Indiana Academic Standards to ensure student success.

Grade 8 Reading Academic and Exit Standards

 Indiana Department of Education 

GRADE 8

READING

Guiding Principle: Students read a wide range of fiction, nonfiction, classic, and contemporary works, to build an understanding of texts, of themselves, and of the cultures of the United States and the world; to acquire new information; to respond to the needs and demands of society and the workplace; to apply a wide range of strategies to comprehend, interpret, evaluate, and appreciate texts. They read a wide range of literature in many genres from a variety of time periods and cultures from around the world to build an understanding of the many dimensions (e.g., philosophical, ethical, aesthetic) of human experience. They draw on their prior experience, their interactions with other readers and writers, and reading skills that they have developed and refined.¹

READING: Literature

There are three key areas found in the Reading: Literature section for grades 6-12: Key Ideas and Textual Support, Structural Elements and Organization, and Synthesis and Connection of Ideas. By demonstrating the skills listed in each section, students should be able to meet the Learning Outcome for Reading: Literature.

Learning Outcome

8.RL.1 Read a variety of literature within a range of complexity appropriate for grades 6-8. By the end of grade 8, students interact with texts proficiently and independently.

Key Ideas and Textual Support

8.RL.2.1 Cite the textual evidence that most strongly supports an analysis of what a text says explicitly as well as inferences drawn from the text.

8.RL.2.2 Analyze the development of a theme or central idea over the course of a work of literature, including its relationship to the characters, setting, and plot; provide a detailed summary that supports the analysis.

8.RL.2.3 Analyze how particular lines of dialogue or incidents in a work of literature propel the action, reveal aspects of a character, or provide a decision.

8.RL.2.4 Students are expected to build upon and continue applying concepts learned previously.

Structural Elements and Organization

8.RL.3.1 Compare and contrast the structure of two or more related works of literature (e.g., similar topic or theme), and analyze and evaluate how the differing structure of each text contributes to its meaning and style.

8.RL.3.2 Analyze a particular point of view or cultural experience in a work of world literature considering how it reflects heritage, traditions, attitudes, and beliefs.

Synthesis and Connection of Ideas

8.RL.4.1 Analyze the extent to which a filmed or live production of a story or play stays faithful to or departs from the text or script, evaluating the choices made by the director or actors.

8.RL.4.2 Analyze how works of literature draw on and transform earlier texts.

Grade 8 1 Indiana Academic Standards 2014

 Indiana Department of Education 

READING: Nonfiction

There are three key areas found in the Reading: Nonfiction section for grades 6-12: Key Ideas and Textual Support, Structural Elements and Organization, and Synthesis and Connection of Ideas. By demonstrating the skills listed in each section, students should be able to meet the Learning Outcome for Reading: Nonfiction.

Learning Outcome

8.RN.1 Read a variety of nonfiction within a range of complexity appropriate for grades 6-8. By the end of grade 8, students interact with texts proficiently and independently.

Key Ideas and Textual Support

8.RN.2.1 Cite the textual evidence that most strongly supports an analysis of what a text says explicitly as well as inferences drawn from the text.

8.RN.2.2 Analyze the development of a central idea over the course of a text, including its relationship to supporting ideas; provide a detailed, objective summary of the text.

8.RN.2.3 Analyze how a text makes connections and distinctions among individuals, events, and ideas.

Structural Elements and Organization

8.RN.3.1 Students are expected to build upon and continue applying concepts learned previously.

8.RN.3.2 Analyze in detail the structure of a specific paragraph in a text, including the role of particular sentences in developing and refining a key concept.

8.RN.3.3 Determine an author's perspective or purpose in a text, and analyze how the author acknowledges and responds to conflicting evidence or viewpoints.

Synthesis and Connection of Ideas

8.RN.4.1 Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient; recognize when irrelevant evidence is introduced.

8.RN.4.2 Evaluate the advantages and disadvantages of using different mediums (e.g., print or digital text, video, multimedia) to present a particular topic or idea.

8.RN.4.3 Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.

Grade 8 2 Indiana Academic Standards 2014

 Indiana Department of Education 

READING: Vocabulary

There are two key areas found in the Reading: Vocabulary section for grades 6-12: Vocabulary Building and Vocabulary in Literature and Nonfiction Texts. By demonstrating the skills listed in each section, students should be able to meet the Learning Outcome for Reading: Vocabulary.

Learning Outcome

8.RV.1 Acquire and use accurately grade-appropriate general academic and content-specific words and phrases, gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.

Vocabulary Building

8.RV.2.1 Use context to determine or clarify the meaning of words and phrases.

8.RV.2.2 Students are expected to build upon and continue applying concepts learned previously.

8.RV.2.3 Distinguish among the connotations of words with similar denotations.

8.RV.2.4 Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word (e.g., preclude, record, secede).

8.RV.2.5 Select appropriate general and specialized reference materials, both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, part of speech, or origin. 

Vocabulary in Literature and Nonfiction Texts

8.RV.3.1 Analyze the meaning of words and phrases as they are used in works of literature, including figurative and connotative meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.

8.RV.3.2 Determine the meaning of words and phrases as they are used in a nonfiction text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.

8.RV.3.3 Interpret figures of speech (e.g., verbal irony, puns) in context.

Grade 8 3 Indiana Academic Standards 2014

 Indiana Department of Education 

WRITING

Guiding Principle: Students employ a wide range of strategies as they write and use different writing processes elements appropriately to communicate with different audiences for a variety of purposes. Students apply knowledge of language structure, language conventions, media techniques, figurative language, and genre to create, critique, and discuss writing. Students conduct research on issues and interests by generating ideas and questions, and by posing problems. They gather, evaluate, and synthesize data from a variety of sources to communicate their discoveries in ways that suit their purpose and audience.²

WRITING

There are four key areas found in the Writing section for grades 6-12: Writing Genres, the Writing Process, the Research Process, and Conventions of Standard English. By demonstrating the skills listed in each section, students should be able to meet the Learning Outcome for Writing.

Learning Outcome

8.W.1 Write routinely over a variety of time frames for a range of tasks, purposes, and audiences; apply reading standards to support analysis, reflection, and research by drawing evidence from literature and nonfiction texts.

Handwriting

8.W.2 Students are expected to build upon and continue applying concepts learned previously.

Writing Genres: Argumentative, Informative, and Narrative

8.W.3.1 Write arguments in a variety of forms that –

- Introduce claims, acknowledge and distinguish the claim(s) from alternative or opposing claims, and organize the reasons and evidence logically.
- Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text.
- Use effective transitions to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence.
- Establish and maintain a consistent style and tone appropriate to purpose and audience.
- Provide a concluding statement or section that follows from and supports the argument presented.

Grade 8 4 Indiana Academic Standards 2014

Attachment #5: Grade 8 Mathematics Academic and Exit Standards

MATHEMATICS: GRADE 8

The Mathematics standards for grade 8 are supplemented by the Process Standards for Mathematics.

The Mathematics standards for grade 8 are made up of 5 strands: Number Sense; Computation; Algebra and Functions; Geometry and Measurement; and Data Analysis, Statistics, and Probability. The skills listed in each strand indicate what students in grade 8 should know and be able to do in Mathematics.

NUMBER SENSE

GRADE 8
8.NS.1: Give examples of rational and irrational numbers and explain the difference between them. Understand that every number has a decimal expansion; for rational numbers, show that the decimal expansion terminates or repeats, and convert a decimal expansion that repeats into a rational number.
8.NS.2: Use rational approximations of irrational numbers to compare the size of irrational numbers, plot them approximately on a number line, and estimate the value of expressions involving irrational numbers.
8.NS.3: Given a numeric expression with common rational number bases and integer exponents, apply the properties of exponents to generate equivalent expressions.
8.NS.4: Use square root symbols to represent solutions to equations of the form $x^2 = p$, where p is a positive rational number.

COMPUTATION

GRADE 8
8.C.1: Solve real-world problems with rational numbers by using multiple operations.
8.C.2: Solve real-world and other mathematical problems involving numbers expressed in scientific notation, including problems where both decimal and scientific notation are used. Interpret scientific notation that has been generated by technology, such as a scientific calculator, graphing calculator, or excel spreadsheet.

IAS Mathematics Grade 8 – Page 9 – 5/1/14

ALGEBRA AND FUNCTIONS

GRADE 8
8.AF.1: Solve linear equations with rational number coefficients fluently, including equations whose solutions require expanding expressions using the distributive property and collecting like terms. Represent real-world problems using linear equations and inequalities in one variable and solve such problems.
8.AF.2: Give examples of linear equations in one variable with one solution, infinitely many solutions, or no solutions. Show which of these possibilities is the case by transforming a given equation into simpler forms, until an equivalent equation of the form $x = a$, $a = a$, or $a = b$ results (where a and b are different numbers).
8.AF.3: Understand that a function assigns to each x -value (independent variable) exactly one y -value (dependent variable), and that the graph of a function is the set of ordered pairs (x, y) .
8.AF.4: Describe qualitatively the functional relationship between two quantities by analyzing a graph (e.g., where the function is increasing or decreasing, linear or nonlinear, has a maximum or minimum value). Sketch a graph that exhibits the qualitative features of a function that has been verbally described.
8.AF.5: Interpret the equation $y = mx + b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. Describe similarities and differences between linear and nonlinear functions from tables, graphs, verbal descriptions, and equations.
8.AF.6: Construct a function to model a linear relationship between two quantities given a verbal description, table of values, or graph. Recognize in $y = mx + b$ that m is the slope (rate of change) and b is the y -intercept of the graph, and describe the meaning of each in the context of a problem.
8.AF.7: Compare properties of two linear functions given in different forms, such as a table of values, equation, verbal description, and graph (e.g., compare a distance-time graph to a distance-time equation to determine which of two moving objects has greater speed).
8.AF.8: Understand that solutions to a system of two linear equations correspond to points of intersection of their graphs because points of intersection satisfy both equations simultaneously. Approximate the solution of a system of equations by graphing and interpreting the reasonableness of the approximation.

Attachment #5: Grade 8 Mathematics Academic and Exit Standards

GEOMETRY AND MEASUREMENT

GRADE 8
8.GM.1: Identify, define and describe attributes of three-dimensional geometric objects (right rectangular prisms, cylinders, cones, spheres, and pyramids). Explore the effects of slicing these objects using appropriate technology and describe the two-dimensional figure that results.
8.GM.2: Solve real-world and other mathematical problems involving volume of cones, spheres, and pyramids and surface area of spheres.
8.GM.3: Verify experimentally the properties of rotations, reflections, and translations, including: lines are mapped to lines, and line segments to line segments of the same length; angles are mapped to angles of the same measure; and parallel lines are mapped to parallel lines.
8.GM.4: Understand that a two-dimensional figure is congruent to another if the second can be obtained from the first by a sequence of rotations, reflections, and translations. Describe a sequence that exhibits the congruence between two given congruent figures.
8.GM.5: Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations. Describe a sequence that exhibits the similarity between two given similar figures.
8.GM.6: Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates.
8.GM.7: Use inductive reasoning to explain the Pythagorean relationship.
8.GM.8: Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in real-world and other mathematical problems in two dimensions.
8.GM.9: Apply the Pythagorean Theorem to find the distance between two points in a coordinate plane.

IAS Mathematics Grade 8 – Page 11 – 5/1/14

DATA ANALYSIS, STATISTICS, AND PROBABILITY

GRADE 8
8.DSP.1: Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantitative variables. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association.
8.DSP.2: Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and describe the model fit by judging the closeness of the data points to the line.
8.DSP.3: Write and use equations that model linear relationships to make predictions, including interpolation and extrapolation, in real-world situations involving bivariate measurement data; interpret the slope and y-intercept.
8.DSP.4: Understand that, just as with simple events, the probability of a compound event is the fraction of outcomes in the sample space for which the compound event occurs. Understand and use appropriate terminology to describe independent, dependent, complementary, and mutually exclusive events.
8.DSP.5: Represent sample spaces and find probabilities of compound events (independent and dependent) using methods, such as organized lists, tables, and tree diagrams.
8.DSP.6: For events with a large number of outcomes, understand the use of the multiplication counting principle. Develop the multiplication counting principle and apply it to situations with a large number of outcomes.

Attachment #5: Grade 8 Science and Engineering Process Standards

Eighth Grade Science Standards

Science and Engineering Process Standards (SEPS)	
SEPS.1 Posing questions (for science) and defining problems (for engineering)	<p>A practice of science is posing and refining questions that lead to descriptions and explanations of how the natural and designed world(s) work and these questions can be scientifically tested. Engineering questions clarify problems to determine criteria for possible solutions and identify constraints to solve problems about the designed world.</p> <p>A practice of both science and engineering is to use and construct conceptual models that illustrate ideas and explanations. Models are used to develop questions, predictions and explanations, analyze and identify flaws in systems, build and revise scientific explanations and proposed engineered systems, and communicate ideas. Measurements and observations are used to revise and improve models and designs. Models include, but are not limited to: diagrams, drawings, physical replicas, mathematical representations, analogies, and other technological models.</p>
SEPS.2 Developing and using models and tools	<p>Another practice of both science and engineering is to identify and correctly use tools to construct, obtain, and evaluate questions and problems. Utilize appropriate tools while identifying their limitations. Tools include, but are not limited to: pencil and paper, models, ruler, a protractor, a calculator, laboratory equipment, safety gear, a spreadsheet, spreadsheet data collection software, and other technological tools.</p>
SEPS.3 Constructing and performing investigations	<p>Scientists and engineers are constructing and performing investigations in the field or laboratory, working collaboratively as well as individually. Researching analogous problems in order to gain insight into possible solutions allows them to make conjectures about the form and meaning of the solution. A plan to a solution pathway is developed prior to constructing and performing investigations. Constructing investigations systematically encompasses identified variables and parameters generating quality data. While performing, scientists and engineers monitor and record progress. After performing, they evaluate to make changes to modify and repeat the investigation if necessary.</p>
SEPS.4 Analyzing and interpreting data	<p>Investigations produce data that must be analyzed in order to derive meaning. Because data patterns and trends are not always obvious, scientists and engineers use a range of tools to identify the significant features in the data. They identify sources of error in the investigations and calculate the degree of certainty in the results. Advances in science and engineering makes analysis of proposed solutions more efficient and effective. They analyze their results by continually asking themselves questions; possible questions may be, but are not limited to: "Does this make sense?" "Could any results be duplicated?" and/or "Does the design solve the problem with the given constraints?"</p>

Eighth Grade

1 Indiana Academic Standards for Science 2016

Eighth Grade Science Standards

SEPS.5 Using mathematics and computational thinking	<p>In both science and engineering, mathematics and computation are fundamental tools for representing physical variables and their relationships. They are used for a range of tasks such as constructing, representing, solving equations exactly or approximately, and integrating, engineering, and applying quantitative relationships. Mathematical and computational approaches enable scientists and engineers to predict the behavior of systems and test the validity of such predictions. Scientists and engineers understand how mathematical ideas interconnect and build on one another to produce a coherent whole.</p>
SEPS.6 Constructing explanations (for science) and designing solutions (for engineering)	<p>Scientists and engineers use their results from the investigation in constructing descriptions and explanations, citing the interpretation of data, connecting the investigation to how the natural and designed world(s) work. They construct or design logical coherent explanations or solutions of phenomena that incorporate their understanding of nature and/or engineering as a model that represents it, and are consistent with the available evidence.</p>
SEPS.7 Engaging in argument from evidence	<p>Scientists and engineers use reasoning and argument based on evidence to identify the best explanation for a natural phenomenon or the best solution to a design problem. Scientists and engineers use argumentation, the process by which evidence-based conclusions and solutions are reached, to listen to, compare, and evaluate competing ideas and methods based on merits. Scientists and engineers engage in argumentation when investigating a phenomenon, testing a design solution, resolving questions about measurements, building data models, and using evidence to evaluate claims.</p>
SEPS.8 Obtaining, evaluating, and communicating information	<p>Scientists and engineers need to be communicating clearly and articulating the ideas and methods they generate. Critiquing and communicating ideas individually and in groups is a critical professional activity. Communicating information and ideas can be done in multiple ways: using tables, diagrams, graphs, models, and equations, as well as, orally, in writing, and through extended discussions. Scientists and engineers employ multiple sources to obtain information that is used to evaluate the merit and validity of claims, methods, and designs.</p>

Eighth Grade

2 Indiana Academic Standards for Science 2016

Attachment #5: Grade 8 Science Academic and Exit Standards

Eighth Grade Science Standards

LEARNING OUTCOMES	LST.1: LEARNING OUTCOME FOR LITERACY IN SCIENCE/TECHNICAL SUBJECTS Read and comprehend science and technical texts independently and proficiently and write effectively for a variety of discipline-specific tasks, purposes, and audiences
	GRADES 6-8
	6-8.LST.1.1: Read and comprehend science and technical texts within a range of complexity appropriate for grades 6-8 independently and proficiently by the end of grade 8.
	6-8.LST.1.2: Write routinely over a variety of time frames for a range of discipline-specific tasks, purposes, and audiences.

KEY IDEAS AND TEXTUAL SUPPORT	LST.2: KEY IDEAS AND TEXTUAL SUPPORT (READING) Extract and construct meaning from science and technical texts using a variety of comprehension skills
	GRADES 6-8
	6-8.LST.2.1: Cite specific textual evidence to support analysis of science and technical texts.
	6-8.LST.2.2: Determine the central ideas or conclusions of a text; provide an accurate, objective summary of the text.
	6-8.LST.2.3: Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks.

STRUCTURAL ELEMENTS AND ORGANIZATION	LST.3: STRUCTURAL ELEMENTS AND ORGANIZATION (READING) Build understanding of science and technical texts, using knowledge of structural organization and author's purpose and message
	GRADES 6-8
	6-8.LST.3.1: Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6-8 texts and topics.
	6-8.LST.3.2: Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to an understanding of the topic.
	6-8.LST.3.3: Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text.

Attachment #5: Grade 8 Science Academic and Exit Standards

Eighth Grade Science Standards

SYNTHESIS AND CONNECTION OF IDEAS	LST.4: SYNTHESIS AND CONNECTION OF IDEAS (READING) Build understanding of science and technical texts by synthesizing and connecting ideas and evaluating specific claims
	GRADES 6-8
	6-8.LST.4.1: Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., <i>in a flowchart, diagram, model, graph, or table</i>).
	6-8.LST.4.2: Distinguish among facts, reasoned judgment based on research findings, and speculation in a text.
	6-8.LST.4.3: Compare and contrast the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic.

WRITING GENRES	LST.5: WRITING GENRES (WRITING) Write for different purposes and to specific audiences or people
	GRADES 6-8
	6-8.LST.5.1: Write arguments focused on discipline-specific content.
	6-8.LST.5.2: Write informative texts, including scientific procedures/experiments or technical processes that include precise descriptions and conclusions drawn from data and research.

THE WRITING PROCESS	LST.6: THE WRITING PROCESS (WRITING) Produce coherent and legible documents by planning, drafting, revising, editing, and collaborating with others
	GRADES 6-8
	6-8.LST.6.1: Plan and develop; draft, revise using appropriate reference materials; rewrite; try a new approach; and edit to produce and strengthen writing that is clear and coherent, with some guidance and support from peers and adults.
	6-8.LST.6.2: Use technology to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

Attachment #5: Grade 8 Science Academic and Exit Standards

Eighth Grade Science Standards

THE RESEARCH PROCESS	LST.7: THE RESEARCH PROCESS (WRITING) Build knowledge about the research process and the topic under study by conducting short or more sustained research
	GRADES 6-8
	6-8.LST.7.1: Conduct short research assignments and tasks to answer a question (including a self-generated question), or test a hypothesis, drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
	6-8.LST.7.2: Gather relevant information from multiple sources, using search terms effectively; annotate sources; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation (e.g., <i>APA or CSE</i>).
	6-8.LST.7.3: Draw evidence from informational texts to support analysis, reflection, and research.

Attachment #5: Grade 8 Science Academic and Exit Standards

Eighth Grade Science Standards

Physical Science (PS)
8.PS.1 Create models to represent the arrangement and charges of subatomic particles in an atom (protons, neutrons and electrons). Understand the significance that the currently 118 known chemical elements combine to form all the matter in the universe.
8.PS.2 Illustrate with diagrams (drawings) how atoms are arranged in simple molecules. Distinguish between atoms, elements, molecules, and compounds.
8.PS.3 Use basic information provided for an element (atomic mass, atomic number, symbol, and name) to determine its place on the Periodic Table. Use this information to find the number of protons, neutrons, and electrons in an atom.
8.PS.4 Identify organizational patterns (radius, atomic number, atomic mass, properties and radioactivity) on the Periodic Table.
8.PS.5 Investigate the property of density and provide evidence that properties, such as density, do not change for a pure substance.
8.PS.6 Compare and contrast physical change vs. chemical change. Analyze the properties of substances before and after substances interact to determine if a chemical reaction has occurred.
8.PS.7 Balance chemical equations to show how the total number of atoms for each element does not change in chemical reactions and as a result, mass is always conserved in a closed system. (Law of Conservation of Mass.)

Earth and Space Science (ESS)
8.ESS.1 Research global temperatures over the past century. Compare and contrast data in relation to the theory of climate change.
8.ESS.2 Create a diagram or carry out a simulation to describe how water is cycled through the earth's crust, atmosphere and oceans. Explain how the water cycle is driven by energy from the sun and the force of gravity.
8.ESS.3 Research how human consumption of finite natural resources (i.e. coal, oil, natural gas, and clean water) and human activities have had an impact on the environment (i.e. causes of air, water, soil, light, and noise pollution).

Attachment #5: Grade 8 Science Academic and Exit Standards

Eighth Grade Science Standards

Life Science (LS)
8.LS.1 Compare and contrast the transmission of genetic information in sexual and asexual reproduction. Research organisms that undergo these two types of reproduction.
8.LS.2 Demonstrate how genetic information is transmitted from parent to offspring through chromosomes via the process of meiosis. Explain how living things grow and develop.
8.LS.3 Create and analyze Punnett squares to calculate the probability of specific traits being passed from parents to offspring using different patterns of inheritance.
8.LS.4 Differentiate between and provide examples of acquired and genetically inherited traits.
8.LS.5 Explain how factors affecting natural selection (competition, genetic variations, environmental changes, and overproduction) increase or decrease a species' ability to survive and reproduce.
8.LS.6 Create models to show how the structures of chromatin, chromosomes, chromatids, genes, alleles and deoxyribonucleic acid (DNA) molecules are related and differ.
8.LS.7 Recognize organisms are classified into taxonomic levels according to shared characteristics. Explain how an organism's scientific name correlates to these shared characteristics.
8.LS.8 Explore and predict the evolutionary relationships between species looking at the anatomical differences among modern organisms and fossil organisms.
8.LS.9 Examine traits of individuals within a species that may give them an advantage or disadvantage to survive and reproduce in stable or changing environment.
8.LS.10 Gather and synthesize information about how humans alter organisms genetically through a variety of methods.
8.LS.11 Investigate how viruses and bacteria affect the human body.

Attachment #5: Grade 8 Science Academic and Exit Standards

Eighth Grade Science Standards

Engineering (E)
6-8.E.1 Identify the criteria and constraints of a design to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
6-8.E.2 Evaluate competing design solutions using a systematic process to identify how well they meet the criteria and constraints of the problem.
6-8.E.3 Analyze data from investigations to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.
6-8.E.4 Develop a prototype to generate data for repeated investigations and modify a proposed object, tool, or process such that an optimal design can be achieved.

Attachment #5: Grade 8 Computer Science Academic and Exit Standards

Sixth – Eighth Grade Computer Science Standards

Programs and Algorithms (PA)
<p>6-8.PA.1 Select appropriate tools and technology resources to support learning and personal productivity, publish individual products, and design, develop, and publish data, accomplish a variety of tasks, and solve problems.</p> <p>6-8.PA.2 Implement problem solutions using a programming language that includes looping behavior, conditional statements, logic, expressions, variables, and functions.</p> <p>6-8.PA.3 Demonstrate dispositions amenable to open-ended problem solving and programming (e.g., comfort with complexity, persistence, brainstorming, adaptability, patience, propensity to tackle, creativity, accepting challenge).</p>
Networking and Communication (NC)
<p>6-8.NC.1 Collaboratively design, develop, publish, and present products (e.g., videos, podcasts, websites) using technology resources that demonstrate and communicate curriculum concepts.</p> <p>6-8.NC.2 Exhibit dispositions necessary for collaboration: providing useful feedback, integrating feedback, understanding and accepting multiple perspectives, socialization.</p>
Impact and Culture (IC)
<p>6-8.IC.1 Exhibit legal and ethical behaviors when using technology and information and discuss the consequences of misuse.</p> <p>6-8.IC.2 Analyze the positive and negative impacts of technology on one's personal life, society, and our culture.</p> <p>6-8.IC.3 Evaluate the accuracy, relevance, appropriateness, comprehensiveness, and biases that occur in electronic information sources.</p> <p>6-8.IC.4 Describe ethical issues that relate to computers and networks (e.g., security, privacy, ownership, and information sharing), and discuss how unequal distribution of technological resources in a global economy raises issues of equity, access, and power.</p>

Sixth – Eighth Grade Computer Science Standards

Introduction to Indiana's Academic Standards for Computer Science

Indiana's Academic Standards for Computer Science allows for students to be prepared in the ever-changing computer science arena providing inquiry-based, hands-on experiences based on two components: Concepts and Practices. These standards are to be implemented in the 2016-2017 school year. The expectation is for students to work through the standards in multi-subject areas. As students move through grade levels, they will work with and experience the standards at those grade levels (K-2, 3-5, and 6-8). The standards are based on the five core concepts: Data and Information (DI), Computing Devices and Systems (CD), Programs and Algorithms (PA), Networking and Communication (NC), and Impact and Culture (IC).

Data and Information (DI)
<p>6-8.DI.1 Use the basic steps in algorithmic problem-solving to design solutions (e.g., problem statement and exploration, examination of sample instances, design, implementing a solution, testing, and evaluation).</p> <p>6-8.DI.2 Describe the process of parallelization as it relates to problem solving.</p> <p>6-8.DI.3 Represent data in a variety of ways (e.g., text, sounds, pictures, and numbers), and use different visual representations of problems, structures, and data (e.g., graphs, charts, network diagrams, flowcharts).</p> <p>6-8.DI.4 Understand the notion of hierarchy and abstraction in computing including high-level languages, translation, instruction set, and logic circuits.</p> <p>6-8.DI.5 Demonstrate interdisciplinary applications of computational thinking and interact with content-specific models and simulations to support learning and research.</p>
Computing Devices and Systems (CD)
<p>6-8.CD.1 Demonstrate an understanding of the relationship between hardware and software.</p> <p>6-8.CD.2 Apply troubleshooting strategies to identify and solve routine hardware and software problems that occur during everyday computer use.</p> <p>6-8.CD.3 Describe the major components and functions of computer systems and network.</p> <p>6-8.CD.4 Describe what distinguishes humans from machines focusing on human intelligence versus machine intelligence and ways we can communicate, as well as ways in which computers use models of intelligent behavior (e.g., robot motion, speech and language understanding, and computer vision).</p>

Attachment #5: Grade 8 Social Studies Academic and Exit Standards

GRADE 8 United States History—Growth and Development (to 1877)

Course 0470-08
In Grade 8, students focus upon United States history, beginning with a brief review of early history, including the Revolution and Founding Era, and the principles of the United States and Indiana constitutions, as well as other founding documents and their applications to subsequent periods of national history and to civic and political life. Students then study national development, westward expansion, social reform movements, and the Civil War and Reconstruction. Students examine major themes, issues, events, movements, and figures in United States history through the Reconstruction Period (1877) and explore relationships to modern issues and current events.

Eighth grade students need to experience a variety of teaching and learning strategies. Students are provided practice in thinking and research skills by learning to use the media center, primary documents, and community resources such as historic sites and buildings to identify, evaluate and use appropriate data and reference information. This course also helps students to develop an appreciation of historical thinking skills. Finally, students should demonstrate, through their studies, a commitment to the rights and responsibilities of citizenship in a democratic society.

The Indiana K–8 academic standards for social studies are organized around four content areas. The content area standards and the types of learning experiences they provide to students in Grade 8 are described below. On the pages that follow, age-appropriate concepts are listed for each standard. Skills for thinking, inquiry and participation are integrated throughout.

CONTENT STANDARDS

Standard 1—History

Students examine the relationship and significance of themes, concepts, and movements in the development of United States history, including review of key ideas related to the colonization of America and the revolution and Founding Era. This will be followed by emphasis on social reform, national development and westward expansion, and the Civil War and Reconstruction period.

Standard 2—Civics and Government

Students explain the major principles, values and institutions of constitutional government and citizenship, which are based on the founding documents of the United States and how the three branches of government share and check power within our federal system of government.

Standard 3—Geography

Students identify the major geographic characteristics of the United States and its regions. They name and locate the major physical features of the United States, as well as demonstrate a broad understanding of the states, capitals and major cities, and use geographic skills and technology to examine the influence of geographic factors on national development.

Standard 4—Economics

Students identify, describe and evaluate the influence of economic factors on national development from the founding of the nation to the end of Reconstruction.

Standard 1 History

Students examine the relationship and significance of themes, concepts and movements in the development of United States history, including review of key ideas related to the colonization of America and the revolution and Founding Era. This will be followed by emphasis on social reform, national development and westward expansion, and the Civil War and Reconstruction period.

Historical Knowledge

The American Revolution and Founding of the United States, 1754 to 1801

- 8.1.1 Identify the major Native American Indian groups of eastern North America and describe early conflict and cooperation between European settlers and these Native American groups.
- 8.1.2 Compare and contrast reasons for British, French, Spanish and Dutch colonization in the New World.
- 8.1.3 Explain the conditions, causes, consequences and significance of Britain's struggle to maintain control of colonies during the French and Indian War (1754–1763).
- 8.1.4 Identify and explain the reasons and actions for the resistance and rebellion against British imperial rule by the thirteen colonies in North America (1761–1775).
- 8.1.5 Analyze the causes and effects of the Revolutionary War (1775–1783), including the ideas from the Declaration of Independence, the enactment of the Articles of Confederation and the Treaty of Paris (1783).
- 8.1.6 Identify and give the significance of major events in the creation of the Constitution such as: the enactment of state constitutions, the Constitutional conventions, the willingness to compromise, and the Federalist- and Federalist debates regarding the vote to ratify the Constitution.
- 8.1.7 Identify and explain the steps taken during the Washington Administration and the First and Second Congresses of the United States to establish a stable and lasting national government.
- 8.1.8 Compare and contrast the views of Thomas Jefferson and Alexander Hamilton and explain how their differences gave rise to the development of political parties.
- 8.1.9 Identify the events leading up to the presidential and congressional election of 1800 and the transfer of political authority and power to the Democratic-Republican Party led by Thomas Jefferson (1801). Evaluate the significance of these events.
- 8.1.10 Analyze the influence of important individuals on social and political developments of the time (1775–1800) such as the Independence movement and the Framing of the Constitution.
- 8.1.11 Compare and contrast the ways of life in the northern and southern states, including the growth of towns and cities and the growth of industry in the North and the growing dependence on slavery and the production of cotton in the South.

National Expansion and Reform: 1801 to 1861

- 8.1.12 Interpret how the events surrounding the Louisiana Purchase (1803) and Lewis and Clark expedition (1803–1806) allowed for America's initial push towards westward expansion.
- 8.1.13 Explain the main issues, consequences, and landmark decisions of the Marshall Court.
- 8.1.14 Analyze the causes and consequences of the War of 1812.
- 8.1.15 Define nationalism and understand the direction nationalism gave to domestic and foreign policy and to the development of an industrial economy during this period.
- 8.1.16 Identify the key ideas of Jacksonian democracy and explain their influence on political participation, political parties and constitutional government; analyze Jackson's actions as President such as the destruction of the National Bank, the nullification crisis, and Jackson's Indian policy.
- 8.1.17 Explain relationships and conflict between settlers and Native Americans on the frontier.
- 8.1.18 Describe the causes, courses, challenges, compromises, and consequences associated with westward expansion, including the concept of Manifest Destiny.
- 8.1.19 Analyze the causes and effects of the Mexican War (1845–1848).
- 8.1.20 Give examples of how immigration affected American culture in the decades before and the Civil War, including growth of industrial sites in the North, religious differences, tensions between middle-class and working-class people, particularly in the Northeast, and intensification of cultural differences between the North and the South.
- 8.1.21 Give examples of the changing role of women, minorities, and immigrants in the northern, southern and western parts of the United States in the mid-nineteenth century, and examine possible causes for these changes.
- 8.1.22 Describe the abolitionist movement and identify figures and organizations involved in the debate over slavery, including leaders of the Underground Railroad.
- 8.1.23 Analyze the influence of early individual social reformers and movements such as the abolitionist, feminist and social reform movements.

The Civil War and Reconstruction Period: 1850 to 1877

- 8.1.24 Analyze the causes and effects of events leading to the Civil War, and evaluate the impact issues such as states' rights and slavery had in developing America's sectional conflict.
- 8.1.25 Identify the factors and individuals which influenced the outcome of the Civil War and explain the significance of each.
- 8.1.26 Compare and contrast the three plans for Reconstruction and evaluate the merits of each.
- 8.1.27 Describe causes and lasting effects of the Civil War and Reconstruction as well as the political controversies surrounding this time such as Andrew Johnson's impeachment, the Black Codes, and the Compromise of 1877. (Government, Economics)

Attachment #5: Grade 8 Social Studies Academic and Exit Standards

Chronological Thinking, Historical Comprehension, Analysis and Interpretation, Research, and Issues-Analysis and Decision-Making

- 8.1.28** Recognize historical perspective and evaluate alternative courses of action by describing the historical context in which events unfolded.
- 8.1.29** Differentiate between facts and historical interpretations of events, recognizing that the historian's narrative reflects his or her judgment about the significance of particular facts.
- 8.1.30** Using primary and secondary sources, analyze an issue confronting the United States from colonial times through the Reconstruction period.
- 8.1.31** Compare and contrast examples of art, music, literature, and other forms of expression; explain how these reflect American culture during this time period.

Standard 2 Civics and Government

Students explain the major principles, values and institutions of constitutional government and citizenship, which are based on the founding documents of the United States and how the three branches of government share and check power within our federal system of government.

Foundations of Government

- 8.2.1** Identify and explain essential ideas of constitutional government, which include limited government; rule of law; due process of law; separated and shared powers; checks and balances; federalism; popular sovereignty; republicanism; representative government; and individual rights to life, liberty and property; and freedom of conscience.
- 8.2.2** Explain the concept of a separation of powers and how and why these powers are distributed, shared and limited in the constitutional government of the United States.
- 8.2.3** Examine ways that the national government affects the everyday lives of people of the United States.

Functions of Government

- 8.2.4** Compare and contrast the delegated, reserved, and concurrent powers (division of power or federal system) contained in the United States Constitution.
- 8.2.5** Compare and contrast the different functions of national and state government within the federal system by analyzing the United States Constitution and the Indiana Constitution.

Roles of Citizens

- 8.2.6** Recognize and explain the relationship between the rights and responsibilities of citizenship in the United States.
- 8.2.7** Explain the importance of responsible participation by citizens in voluntary civil organizations to bring about social reform.
- 8.2.8** Explain ways that citizens can participate in the election process (political parties, campaigns and elections) at the national, state, and local levels.
- 8.2.9** Explain how citizens can monitor and influence the development and implementation of public policies at local, state and national levels of government.
- 8.2.10** Research and defend positions on issues in which fundamental values and principles related to the United States Constitution are in conflict such as: 1st and 2nd Amendment rights, the right to privacy, and the rights of the individual.

Attachment #5: Grade 8 Social Studies Academic and Exit Standards

Standard 3 Geography

Students identify the major geographic characteristics of the United States and its regions. They name and locate the major physical features of the United States, as well as demonstrate a broad understanding of the states, capitals and major cities and use geographic skills and technology to examine the influence of geographic factors on national development.

The World in Spatial Terms

- 8.3.1 Read maps to interpret symbols and determine the land forms and human features that represent physical and cultural characteristics of regions in the United States.

Places and Regions

- 8.3.2 Read and interpret maps that portray the physical growth and development of the United States from colonization through Reconstruction (1877).

Physical Systems

- 8.3.3 Identify and locate the major climate regions in the United States and describe the characteristics of these regions.
- 8.3.4 Identify the major mountain ranges and river systems of the United States and explain the importance of these physical features in the development of America.

Human Systems

- 8.3.5 Identify the agricultural regions of the United States and be able to give explanations for how the land was used and developed during the growth of the United States.
- 8.3.6 Using maps identify changes influenced by growth, economic development and human migration in the United States.
- 8.3.7 Using primary and secondary sources, identify ways people modified the physical environment as the United States developed and describe the impacts that resulted.
- 8.3.8 Analyze human and physical factors that have influenced migration and settlement patterns and relate them to the economic development of the United States.
- 8.3.9 Identify and interpret maps, graphs and charts showing the distribution of natural resources such as forests, water sources and wildlife in the United States at the beginning of the nineteenth century and give examples of how people exploited these resources as the country became more industrialized and people moved westward.

Standard 4 Economics

Students identify, describe and evaluate the influence of economic factors on national development from the founding of the nation to the end of Reconstruction.

- 8.4.1 Identify economic factors contributing to European exploration and colonization in North America, the American Revolution and the drafting of the Constitution of the United States.
- 8.4.2 Identify and explain the four types of economic systems (traditional, command, market, and mixed); evaluate how the characteristics of a market economy have affected the economic and labor development of the United States.
- * **traditional economy:** an economy in which resources are allocated based on custom and tradition
 - * **command economy:** an economy in which resources are allocated by the government or other central authority
 - * **market economy:** an economy in which resources are allocated by decisions of individuals and businesses
 - * **mixed economy:** an economic system combining private and public enterprise
- 8.4.3 Explain how federal, state, and local governments are involved in the economy of the United States.
- 8.4.4 Analyze contributions of entrepreneurs and inventors in the development of the United States economy to 1877.
- 8.4.5 Relate how new technology and inventions brought about changes in labor productivity in the United States in the eighteenth and nineteenth centuries.
- 8.4.6 Trace the development of different kinds of money used in the United States.
- 8.4.7 Trace the development of the banking system in the United States.
- 8.4.8 Explain and evaluate examples of domestic and international interdependence throughout United States history.
- 8.4.9 Examine the importance of borrowing and lending (the use of credit) in the United States economy and list the advantages and disadvantages of using credit.
- 8.4.10 Compare and contrast job skills needed in different time periods in United States history.

Student Attendance Days: July 30, 2019 through June 10, 2020 - Total 180 Attendance Days

- **First Quarter:** July 29 – October 4, 2019 (45 Instructional Days)
- **Second Quarter:** October 7 – December 20, 2019 (40 Instructional Days)
- **Third Quarter:** December 23, 2019 – March 19, 2020 (50 Instructional Days)
- **Fourth Quarter:** March 20 – June 12, 2020 (45 Instructional Days)
- **First Semester:** July 29 – December 20, 2019 (85 Instructional Days)
- **Second Semester:** December 23, 2019 – June 12, 2020 (95 Instructional Days)

Other Learning Opportunities:

- **Summer School:** June 15 through July 3, 2020 (15 Instructional Days)
- **Summer STEAM Enrichment Camp:** June 15-26, 2020 (10 Instructional Days)

Dates TBD	STEAM Summer Competitions

Attachment #6: School Calendar and Schedule

School Master Schedule

The school year provides 180 days of instruction beginning July 30, 2019 through June 10, 2020. The academy is accessible to students from 7:30 AM until 5:15 PM. The teacher day is 7:15 AM to 4:15 PM. Teachers who are not working with after school activities may depart at 4:15 PM. Students arrive for breakfast at 7:30 PM. Students go to their classrooms at 8:00 AM, which is the beginning of the instructional school day. Students are considered late, if they arrive after 8:05 AM. The first period of the day is the balanced math block. The second period of the day is the balanced literacy block. Students participate in specials (art, music, physical education, library, and computer lab) for 60 minutes that rotate each day of the week. Teachers participate in grade level team planning periods while students are in specials. Student and staff lunch is 45 minutes. Students have 30 minutes for lunch and 15 minutes for recess/restroom break. Students receive 60 minutes of Social Studies and Citizenship instruction three days per week. Students receive 60 minutes of Health and Wellness instruction two days per week. Students participate in the STEM Block for 90 minutes which integrates science, technology, engineering and math (practical application) instruction. The last period of the day is Success Time, where students receive Tier II instruction for 60 minutes to meet their academic proficiency goals for reading and math. Students are dismissed at 4:00PM. Snacks are provided for students participating in after school activities for 15 minutes. Students may participate in afterschool tutoring for one hour three days (T-TH) per week for additional help with reading and math. Students in tutoring may participate in extra curricular activities for one hour on days in which they are not receiving tutoring instruction. Students not participating in tutoring may participate in afterschool extracurricular activities and clubs for one hour four days (M-TH) per week. Homework Help club is provided for one hour four days per week (M-TH). Monthly night meetings are held from 5:15-7:00 PM. Dinner is served during monthly family nights to make it more convenient for parents to participate after work.

The master schedule below identifies the time, day, and subjects taught on a typical school day:

Times	Subjects	Monday	Tuesday	Wednesday	Thursday	Friday
7:15	Teachers Arrive	X	X	X	X	X
7:30-8:00	Student Arrival Breakfast	X	X	X	X	X
8:00-9:30	Mathematics	X	X	X	X	X
9:30-11:00	Reading/Language Arts	X	X	X	X	X
11:00-12:00	Specials (Rotations)	Art	Music	Computer	Library	Phys. Ed.
12:00-12:45	Lunch/Recess	X	X	X	X	X
12:45-1:30	Social Studies/Citizenship	X		X		X
12:45-1:30	Health and Wellness		X		X	
1:30-3:00	STEM (Science, Technology, Engineering)	X	X	X	X	X
3:00-4:00	Success Time	X	X	X	X	X
4:00	Student Dismissal	X	X	X	X	X
4:15	Teachers Depart	X	X	X	X	X
4:00-4:15	Snacks	X	X	X	X	X
4:15-5:15	After School Tutoring		X	X	X	
4:15-5:15	Extra-Curricular Activities	X	X	X	X	X

Indy STEAM Academy
Integration of STEAM - Overview

Content Area	Teachers	Coaches
Math Block 8:00-9:30 AM (90 Minutes) Builds a strong foundation for math	Balanced Math Uses Math Program Whole Group Instruction -Model Mini-Lesson Shared Math Activity Interactive Math Activity Small Group Guided Practice Independent Practice Assess: Before, During, After Reading Reviews student work Debriefs with coaches Provides reflections about the lesson and ways to improve upon the lesson Meets with coach in grade level team meetings to create and modify lesson plans	Literacy and STEAM Coaches Creates Curriculum Maps that are aligned with the standards Assists teachers with developing lesson plans that are aligned with the standards Identifies Formative and Summative Assessments Assists teachers with the analysis of data to plan instruction and grouping students for instruction Informally observes teachers Provides feedback during debriefing sessions before school or on Wednesdays during plan periods.

Attachment #6: School Calendar and Schedule Schedule for Coaches

The Day of the STEAM and Literacy Coaches

Morning: 7:15 AM – Arrive – Check Mailbox

7:15-7:55

Coaches Debriefing Sessions

Coaches meet with teachers to discuss the lessons they will model or the lesson they will observe.

8:00-9:30

STEAM Coach: Class demonstrations/modeling/coaching for math

Literacy Coach: Prepare for Reading Block, Success Lessons, After School Tutoring Lessons

Analysis of Data from assessments – review

Lesson Plan Review

9:30-11:00

Literacy Coach: Class demonstrations/modeling/coaching for reading

STEAM Coach: Prepare for STEAM Block experiments, Engineering Challenges, and Success Lessons

Analysis of Data from assessments – review

Lesson Plan Review

11:00-12:00

Grade Level Team Meetings (M, T, TH)

Assist teachers with lesson planning, activities, assessments – review analysis of data for grade level

Debriefing Sessions (W, F) with classroom teachers

Debrief with classroom teachers by providing feedback regarding informal classroom observations.

Teachers have an opportunity to reflect on their lessons (strengths and opportunities for improvement).

Coaches and teachers develop a plan for future support and teacher needs.

Afternoon:

12:00-12:45

Lunch

12:45-1:30

Coaches Plan Period T, W, TH

Leadership Team Meeting with Head of School (M/F)

1:30-2:30

STEAM Coach and Literacy Coaches support STEM block instruction

Assist with experiment and design process

2:30-3:00

STEAM and Literacy Coaches prepare for Success Time

3:00-4:00

STEAM and Literacy Coaches support teachers during success time

4:00-4:15 – Assist with transition to afterschool programs.

Indianapolis STEAM Academy

Enrollment Policy & Procedures

Enrollment at the Indianapolis (Indy) STEAM Academy will be open to all students interested in attending the academy. Enrollment will be on first-come, first-served basis. As a free public charter school, Indy STEAM Academy will follow the guidelines outlined in our charter regarding admissions and enrollment of students. The enrollment procedures explained below are designed to provide a fair opportunity for all students to apply to our school, regardless of race, ethnicity, nationality, religion, gender, gender identity, gender expression, sexual orientation, home language, or disability. Enrollment and admission practices will comply with all applicable state and federal laws. Indy STEAM Academy is committed to serving students that reflect the community.

Key Enrollment Dates:

Dates	Activities
November, 2018 (Post Authorization)	Parents may begin submitting Letters of Intent to Enroll forms or may go to the academy website to complete an enrollment form.
November 2018	Parent Round-Ups (Information Meetings and Recruitment Activities) Participate in Head Start Registration Fair
December 2018	Parent Round-Ups (Information Meetings and Recruitment Activities)
January 7-11, 2019 January 2019	Follow-up contacts with parents who registered in the Fall Check Letter of Intent to Enroll - Make sure that parents have completed registration packets (online or hardcopy) Parent Coordinator will visit homes to assist parents with the registration Parent Round-Ups (Information Meetings and Recruitment Activities)
February 2018	Parent Round-Ups (Information Meetings and Recruitment Activities)
March 1, 2019	Follow-up contacts with parents who registered in the Winter Check Letter of Intent to Enroll – Make sure that parents have completed registration packets (online or hardcopy) Parent Coordinator will visit homes to assist parents with the registration packet or completing the online enrollment process.
April 2019	Parent Round-Ups (Information Meetings and Recruitment Activities)
April 30, 2019	Efforts are made to fill any vacant seats at each grade level
May 30, 2019	Deadline to complete and submit all registration forms.
June 7, & 21, 2019	Parent Orientations for confirmed enrollments
July 10 & 24, 2019	Parent Orientations for confirmed enrollments
July 24, 2019	Deadline to receive student records from sending schools
August 1-9, 2019	“No Shows” are contacted by phone Parent Coordinator conducts home visits for “No Shows”

Open Enrollment Period

The open enrollment period for Indy STEAM Academy will begin November 2018 and will end May 30, 2019. Applications received after the deadline will be placed on the wait list on a first come first served basis, if there are no additional seats available at the requested grade level.

Attachment #7: Enrollment Policy

Page 2 of 5

Letter of Intent to Enroll

Beginning November 2018, parents interested in enrolling their children to attend Indy STEAM Academy may complete the Letter of Intent to Enroll. This Letter of Intent is designed to gauge the interests of parents and the grade levels of perspective students to identify staffing and instructional resource needs. Parents may complete the Letter of Intent online at the academy website www.indysteamacademy.org or may complete a hardcopy at Round-Up, Registration Fairs, or at the school. A running list of names of students by grade level will be maintained with the date that the enrollment was confirmed. Registration forms are to be completed by parents to finalize the enrollment process.

Steps to Enrollment:

Enrollment Application

Parents will be given the opportunity to complete an application for enrollment online at the school website or they may register at the school site. Parents must have (1) the student's birth certificate; (2) immunization records; (3) Proof of residency (Utility bill or Lease agreement); and (4) Parent photo identification. The Enrollment Application should be received by **May 30, 2019**. Applications received after this date will be placed on the wait list, if there are no seats available at the requested grade level. In the event there are seats still available after the registration deadline, late applications will be accepted. If the capacity is reached before the deadline, students will be placed on the waitlist; however, the Board of Directors reserve the right to extend the enrollment capacity as long as there are enough students to support opening another classroom at a given grade level. Registration and enrollment for the next school year will begin directly after the first day of school.

Priority

Children of staff members will be given priority to enroll. Children of the Board of Directors will be given priority to enroll. Families with more than one child at the grade levels offered will be given priority to enroll. After the academy opens, siblings of students currently enrolled will receive priority enrollment. If in the case there is a family with more than one child, and there is a space available for one child, but not the other, both students will be enrolled. The new Bill HEA 1426 will allow charter schools to give enrollment preference to free and reduced lunch students, if the charter school's stated mission is to serve that subgroup.

Lottery Dates and Procedures

Pursuant to I 20-24-5-5, should the number of applicants exceed the number of available seats, the academy will hold a random drawing at a public meeting for student enrollment two weeks after the application deadline. The following procedures will govern the process for enrollment of students:

1. All students who have completed application forms prior to the deadline will be allowed to participate in the lottery. The deadline for the 2019 school year is May 30, 2019.
2. All students drawn in the public lottery will receive a seat in the academy according to grade levels until all seats are filled.
3. Students who are drawn after all seats are filled for a given grade level will be added to the wait list in the order in which their names were drawn. Students will be removed from the wait list as seats become available.
4. If in the case there are limited seats available for siblings of students, a separate lotter will be conducted for the enrollment of students by grade level before non-sibling applicants.

Attachment #7: Enrollment Policy

Page 3 of 5

In accordance with IC 20-24-5-5, should a public lottery be required, admission preferences will be given priority considerations based on the following criteria:

- Students currently attending Indy STEAM Academy
- Siblings of students currently attending Indy STEAM Academy
- Students whose parents are staff members
- Students of the Board of Directors

Sibling preference is designed to ensure that all students within a family are able to attend the academy as a family if they desire to attend the same school.

Waiting List

Student registrations that are received after the registration deadline may be placed on the wait list, if there are no seats available at the requested grade level. Students on the waitlist may fill vacant seats of students who are considered to be “No Shows” or when a seat becomes available due to a transfer-out or withdrawal.

No Shows

Students will be considered a “No Show” if the registration packet is not completed through Enroll Indy, at the school’s website or in person. If a parent has completed a registration packet and the enrollment has been confirmed, but the student fails to report within the first 10 days of school, the student will be deemed a “No Show.” If the student reports the first day of school, but is absent for a period of 7 days, the student will forfeit the seat, if there is no medical or justifiable reason.

Withdrawals

A parent may withdraw a student from school at any time; however, parents are encouraged to wait until a logical break in the school week, month, quarter or semester to withdraw if possible. A student will not be considered withdrawn until the parent completes and submits the withdrawal form and the Release of Information to send the student’s records to the receiving school.

Re-enrollment

Students enrolled at the academy will be able to attend the following school year without having to reapply. Students who leave the school and want to return during the same school year may re-enroll without any consequence; however, the academy cannot guarantee that the student re-enrolling during will be able to return to the same classroom/teacher. Every effort will be made to accommodate the needs of the student.

Transfers

Students transferring out and want to return the following school year will be required to complete a new enrollment application but will be given priority in the enrollment process. Students transferring-in during the school year may do so if seats are available. If there are no seats available, students will be placed on the waitlist.

Attachment #7: Enrollment Policy

Page 4 of 5

Registration Packet Contents:

- ☐ Enrollment and Contact Information
- ☐ Medical Information and Release Form
- ☐ Special Education Services
- ☐ Parent/Guardian Home Language Identification Survey
- ☐ Federal Parent/Guardian Student Ethnic & Race Identification Form
- ☐ Student Residency Questionnaire – Federal McKinney-Vento Act
- ☐ Student Records Release
- ☐ FERPA – Family Educational Rights & Privacy Act
- ☐ Computer, Internet, and Email Policy
- ☐ Media Release Form
- ☐ Transportation Request Form
- ☐ Blanket Field Trip Permission Slip Form
- ☐ Parent, Student, Teacher Compact

Non-Discriminatory Policy

Indy STEAM Academy will provide equal opportunities without regard to race, color, national origin, gender, age, disability, sexual orientation, economic status, religion, political affiliation, or veteran status in its educational programs and activities. This includes, but is not limited to admissions, educational services, financial assistance and employment. Any complaints or allegations of any violations of this policy should be reported to: Yvonne Bullock (or designee), CEO/Founder/Head of School.

Indy STEAM Diversity Statement

Indy STEAM Academy is an equal employment opportunity public charter school which strives to deliver educational excellence, equitable access, and quality service to our students and families. Indy STEAM Academy recognizes the educational and social value of human differences. Indy STEAM Academy is committed to an inclusive approach which affirms and embraces all aspects of diversity. We are strengthened by our unique experiences, interests, hopes, challenges, cultures, traditions and families. We engage families as partners in education through trusting relationships built on culturally responsive two-way communication and mutual respect. Recognizing our diversity, we are committed to equity in all of our work. We seek to allocate resources to eliminate discrimination and disparities. We strive to eliminate stereotypes, prejudice, and intolerance and bridge gaps between and among our diverse students, families, staff and communities. Our approach to diversity and commitment to fairness ensure that the students we serve are empowered to succeed in college, career, military and life.

Federal McKinney-Vento Homeless Assistance Act

Congress established the McKinney-Vento Homeless Assistance Act after receiving reports that up to 50% of homeless children were not attending school. The McKinney-Vento Act was created with the goal of ensuring the enrollment, attendance, and success of homeless children and youth in school. The McKinney-Vento Act provides states with funding to help remove barriers to education. Children and youth experiencing homelessness find shelter in a variety of places. The McKinney-Vento Act defines

Attachment #7: Enrollment Policy

Page 5 of 5

homeless as – an individual who lack fixed, regular, adequate nighttime residence. According to the U.S. Department of Education, children and youth living in the following situations are considered homeless:

- Doubled-Up with family or friends due to economic situation
- Living in motels and hotels for lack of other suitable housing
- Emergency, domestic violence and transitional shelters
- Students whose parent/guardian is hospitalized, incarcerated or military deployed
- The streets, abandoned buildings, cars, trailers, and campgrounds
- Migratory children residing in housing not fit for habitation
- Runaway and “Throwaway” children and youth

Requirements for Schools

The McKinney-Vento Act provides certain rights for homeless students. They include waiving certain requirements such as proof of residency when students are enrolling and allowing categorical eligibility services, such as free textbooks. The Act also states:

- Immediate enrollment in the school of origin or the school in whose attendance area students are currently residing even if they do not present the required documents at the time of enrollment;
- Access to free meals and textbooks, Title I, and other educational programs and other services; including transportation;
- Attendance in the same classes and activities that students in other living situations also participate in without fear of being separated or treated differently due to their housing situations.

Letter of Intent to Enroll

Indy STEAM Academy

Letter of Intent to Enroll

This confidential Letter of Intent is used to demonstrate interest in having your child attend the Indianapolis STEAM Academy, a proposed K-8 public charter school for the 2018-19 school year. This letter does not guarantee your child's enrollment in this school, nor does it legally bind parents to enroll their children at this school. The purpose of this Intent to Enroll form is to gain more information about the interest of parents and the potential enrollment of students at the Academy. Parents may complete a registration packet to officially enroll their children at the Academy.

Indy STEAM Academy

Attachment #8

Student Discipline Policy

Indianapolis (Indy) STEAM Academy

Discipline Policy

Discipline Philosophy

The Indianapolis (Indy) STEAM Academy will provide a safe and nurturing learning environment where students take responsibility for their behaviors to be productive citizens at school and in their communities.

Core Values

The core values of our academy are based on the Six Pillars of Character to foster a positive school climate and culture:

- Trust
- Respect
- Responsibility
- Fairness
- Caring

These core values are taught to students, reflected in behavior expectations, and modeled in all interactions among the members of our school community. Building strong character is fundamental to creating a positive learning environment and school culture which is the hallmark of our academy.

Learning Environment

Establishing a safe and orderly learning requires all members of our school community: administrators, teachers, support staff, students, and parents to model the core values in all interactions at school.

School Expectations

1. Follow directions the first time they are given
2. Treat others with respect
3. Keep hands, feet, and objects to yourself
4. Walk quietly in the halls
5. Do your best

Rewards for Meeting Expectations

The school has a variety of activities and incentives to recognize students for modeling exemplary behavior such as “Caught being Good” tickets; Stickers, STEAM Bucks; Happy Grams; Treasure Chest, Student Store, Friday Fun Days, and Student of the Month and quarterly awards assemblies.

Consequences for Not Meeting Expectations

The teacher and school administration will use a variety of consequences depending on the nature and severity of the behavior. Teachers will resolve minor infractions in their classrooms by giving a verbal warning, time out in the classroom, loss of privileges, contact parent, send a note home to parent (to be signed and returned the next day,) or time-out away from the classroom. Major infractions require more restrictive measures including after school detention, parent phone calls, parent conferences, in-school suspension, out of school suspension, or expulsion.

Behavior Expectations

Indianapolis STEAM Academy has established clear expectations for behaviors within the school environment in order to support the learning community. These behaviors fall into three categories: **Respect, Responsibility, and Safety**. These expectations contribute to a positive learning environment where students are able to grow socially and succeed academically.

Behavior Expectations Matrix

	Be Safe	Be Respectful	Be Responsible
Classroom	Sit in your assigned seat Keep your hands, feet, and objects to yourself Handle all equipment in a safe manner Clean-up after each lesson Stay in the classroom until you are dismissed	Listen when others are talking Raise your hand to speak Share materials Keep up with your belongings Keep your hands, feet, and objects to yourself	Be prepared to learn Listen and follow directions the first time given Stay on task Complete class assignments Turn-in assignments when they are due Give your best effort
Hallways	Walk safely Stay on the right side of the hall and stairs Use the stairs handrails Watch for opening doors Keep your hands, feet, and objects to yourself	Go directly to class Take a hall pass when leaving the classroom	Use quiet voices Hold the door for the person behind you
Cafeteria	Sit at your assigned table Keep your food on the tray Keep your table clean Stay seated until you are dismissed	Wait patiently in line for your food. Empty your tray when you are done eating	Use indoor voices Keep your food on your tray Use table manners
Playground	Stay in your assigned area Keep your hands, feet, and objects to yourself	Return all equipment to the storage containers Line up quietly when it is time to return to the classroom	Follow the rules of the game Play fairly Everyone can play Share and take turns
Restroom	Flush the toilet and wash your hands One person in each stall One person at the water fountain	Use the restroom then return to the classroom Conserve water, paper, and soap.	Give privacy to others Keep the restrooms clean

Teacher/Staff Responsibilities

The teachers and staff at Indy STEAM Academy are committed to providing a sound educational community for all learners. This commitment includes providing effective instruction and establishing of a positive classroom environment with clear expectations for student behavior. At the start of each school year, teachers are responsible for establishing, with the input of their students, a clear set of positively stated classroom behavior expectations. They are responsible for establishing and consistently applying a set of clear consequences for behaviors, both positive and negative in the classroom. Teachers are expected to demonstrate regular focus and attention to developing these behaviors in students. They will provide a model of appropriate behavior, as well as provide explicit instruction in the school expectations on a weekly basis by utilizing multiple teaching strategies that help students understand what is expected. Teachers will accept responsibility for guiding the behavior of ALL students within the school setting, not just the students enrolled in their classes. Teachers will promote mutual respect towards students and their parents. Teachers are expected to communicate with parents on a regular basis to discuss the performance and behaviors of students in their classrooms and document these interactions for school discipline records. Teachers will promote a sense of pride and community by creating a warm and inviting learning environment.

Student Responsibilities

Students at Indy STEAM Academy are expected to be familiar with all behavioral expectations, both school-wide and in their respective classrooms. Students will take responsibility for their own learning and their behavioral choices. Students will comply with all school staff member requests and make behavioral choices that contribute to their safety and the safety of others. They are expected to abide by these guidelines in all that they do on the school campus in order to create a safe and productive learning environment.

Parent Responsibilities

Parents will receive a copy of the Parent Handbook at the beginning of the school year. Parents are encouraged to review the Discipline Plan with their children and discuss how the family values are aligned with the core values instilled at school. Parents at Indy STEAM Academy will be familiar with the academy's expectations for student behavior and related consequences. Parents are responsible for ensuring that their children arrive at school each morning in a timely fashion, ready to learn. The academy expects parents' support in reinforcing behavioral expectations, in communicating regularly with their children's teachers, and in receiving and reading all school related information that is sent home. When consequences for inappropriate student behavior are implemented at school, parents will follow up at home to make sure the behavior does not reoccur. Parents will participate in three parent/teacher conference days and attend school activities.

Parent Contacts

Teachers and parents are expected to communicate often and routinely about the progress of students in their classrooms. Teachers may contact parents during the school day. Parents may be contacted electronically, or via mail. Parents will check student folders and book bags each night for communication from school. Parents may be contacted when they bring their children to school or at pick-up.

Levels of Infractions and Logical Consequences

Level 1 Infractions <i>Acts of misconduct that interferes with orderly school procedures, school functions, extracurricular programs, a student's own learning process or the learning process of others</i>	Consequences
<ul style="list-style-type: none"> • Excessive talking • Failure to follow directions • Refusal to participate or cooperate • Acts that seek unnecessary attention from others • Distracting or disruptive sounds, noise, or movement • Using the cell phone for non-education purposes • Inappropriate use of computers or other electronic devices • Chewing gum/eating candy 	<ul style="list-style-type: none"> • Time out in the classroom • In-school suspension • Loss of recess or other privileges • Reflective consequence/problem solving • Restorative consequence repair harm Other Recommended Actions <ul style="list-style-type: none"> • Parent Phone Call • Conference with teacher or administrator
Level 2 Infractions <i>Acts of misconduct that include, but are not limited to misbehaviors directed against persons or property, but do not seriously endanger the health, safety, or wellbeing of others</i>	Consequences
<ul style="list-style-type: none"> • Persistent Disobedience or defiance of authority • Refusal to follow directions of a staff member • Repeated interference with the school's ability to provide educational opportunities to other students • Talking back to adults • Verbal, non-verbal, or written aggressive behaviors • Using profanity • Throwing objects or other behaviors that may become harmful • Late to class (during the school day) • Repeated Level 1 offenses 	<ul style="list-style-type: none"> • In school suspension • Suspension (1-5 days) • Detention • Loss of privileges, school activities • Lunch work detail • Reflective consequence/problem solving • Restorative consequence/written apology Other Recommended Actions: <ul style="list-style-type: none"> • Parent conference w/teacher • Parent conference w/administrator • Daily Behavior Log
Level 3 Infractions <i>Acts of misconduct that may threaten health, safety, or property and other serious acts of misconduct including repeated misbehaviors.</i>	Consequences
<ul style="list-style-type: none"> • Chronic Disruptive behaviors – repeated Level 2 offenses • Fighting • Throwing Food • Intentionally triggering the fire alarm • Threatening to cause harm to another person 	<ul style="list-style-type: none"> • Suspension (1-10 days) Required conference with parent before the student may return to school • Loss of school privileges/activities • Community service hours • Charges may be filed by authorities

<p>Attachment #8: Student Discipline Policy Page 5 of 7</p> <ul style="list-style-type: none"> • Bullying and/or Cyberbullying • Verbal, non-verbal, written aggressive behavior or abuse including using profanity or making threats to peers or adults • Physical aggression • Skipping class • Leaving the classroom without permission • Leaving an assigned area without permission • Leaving the building without permission' • Theft, attempted theft, or possession of stolen items • Destruction of school or private property (vandalism) 	<ul style="list-style-type: none"> • Restitution (payment of damages) • Restorative consequences that repair harm done or mend relationships (written apology, peer mediation) • Referral to the RTI Team - Develop a Behavior Intervention Plan/Behavior Plan or Behavior Contract <p>Other Recommended Actions:</p> <ul style="list-style-type: none"> • Immediate discipline referral • Immediate removal • Parent Phone Call • Parent Conference with Administrators
<p>Level 4 Infractions <i>Acts of misconduct that threatens the health and safety, or wellbeing of others. These violations are so serious that they require notice to outside agencies and/or law enforcement.</i></p>	<p>Consequences</p>
<ul style="list-style-type: none"> • Chronic Disruptive behaviors – repeated Level 3 offenses • Repeated failure to adhere to the goals in the Behavior Intervention Plan • Possession of/carrying a weapon • Possession and/or use of drugs or alcohol • Arson, false alarms or bomb threats • Terroristic threats • Assault of staff • Sexual harassment of a student or staff member • Promiscuous or immoral acts • Inappropriate Internet or cell phone use 	<ul style="list-style-type: none"> • Long-term Suspension (10+ days) • Expulsion (up to 365 Days) • Civil authorities called • Possible charges filed <p>Other Recommended Actions:</p> <ul style="list-style-type: none"> • Immediate discipline referral • Immediate removal • Conference with administrator • Parent phone call • Parent conference • Referral to RTI Team

BULLYING

What is Bullying? Bullying is the use of force threat or coercion to abuse intimidate or aggressively dominate others. The behavior is often repeated and habitual."

Forms of Bullying

Physical Bullying: Punching, Pushing, Fighting, Attacked by a Gang

Verbal Bullying: Name calling, teasing, gossip, slander, put downs, mimicking others, verbal treats

The following procedures shall be used for reporting, investigating, and resolving complaints of bullying.

Complaint Procedures:

Building Administrators/Designees have the responsibility of conducting investigations concerning the claim of bullying. The investigators shall be a neutral party with no prior involvement in the complaint presented.

Attachment #8: Student Discipline Policy

Page 6 of 7

Any student, employee, or third party who has knowledge of conduct in violation of the Bullying Policy or feels s/he has been a victim of bullying in violation of this Policy is encouraged to immediately report his/her concerns. All complaints will be promptly investigated in accordance with procedures identified in the Grievance section of this application.

Due Process and Appeals

Students have the right to due process in the event they are accused of an infraction identified in Code of Conduct. The student must be informed of the charges, and evidence should be presented to support the claim. Students will be provided an opportunity to present his/her side of the story and any supporting evidents related to the matter. Students have the right to appeal the decision or disciplinary action taken. The student or parent may request that the student remain in school during the period of the appeal of the suspension. If the Head of School believes that the student is a present danger to himself/or others or is likely to be disruptive or destructive, the Head of School shall not allow the student to remain at school during the appeal process. This appeal/complaint process is identified in the Grievance section of this application.

Manifestation Determination

The purpose of this review is to determine whether or not the child's behavior that led to the disciplinary infraction is linked to his or her disability.

Under §300.530(e), a manifestation determination must occur within 10 days of any decision to change the child's placement because of a violation of a code of student conduct.

Under IDEA 2004, the law does not require a manifestation determination for removals for less than 10 consecutive school days that do not constitute a change in placement.

The LEA, the parent, and relevant members of the **IEP team** (as determined by the parent and the LEA) are involved in conducting the review. Their purpose is to determine:

- If the conduct in question was caused by, or had a direct and substantial relationship to, the child's disability; or
- If the conduct in question was the direct result of the LEA's failure to implement the IEP. [§300.530(e)(1)-(2)]

To make these determinations, the group will review all relevant information in the student's file, including the child's IEP, any teacher observations, and any relevant information provided by the parents.

The Act recognizes that a child with a disability may display disruptive behaviors characteristic of the child's disability and the child should not be punished for behaviors that are a result of the child's disability.

(71 Fed. Reg. 46720)

If the Determination is "Yes"

There are two scenarios under which the manifestation determination would be "yes." These are when the conduct:

- was a manifestation of the child's disability, *or*
- the direct result of the LEA's failure to implement the child's IEP.

If either condition is met, the student's conduct must be determined to be a manifestation of his or her disability [§300.530(e)(2)-(3) and (f)]. In other words, the manifestation determination is "yes."

Unless the behavior involved one of the special circumstances—weapons, drugs, or serious bodily injury—the child would be returned to the placement from which he or she was removed as part of the disciplinary action.

However, the parent and LEA can agree to a change of placement as part of the modification of the behavioral intervention plan. [§300.530(f)(2)]

If the Determination is “No”

A manifestation determination of “no” means either that:

- the child’s behavior was not caused by or did not have a direct and substantial relationship to the child’s disability; or
- the child’s behavior was not the direct result of the LEA’s failure to implement the IEP.

In either case of “no,” school personnel have the authority to apply the relevant disciplinary procedures to the child with disabilities in the same manner and for the same duration as the procedures would be applied to a child without disabilities, except—*and this is very important*—for whatever special education and related services the school system is required to provide the child with disabilities under §300.530(d).

Grievance/Complaint Policy

Attachment #9: Grievance Policy

Indy STEAM Academy

Grievance Policy

GRIEVANCE PROCESS

If a staff, student, parent, or community stakeholder has a complaint about the academy, board policies, school practices, or administrative procedures, they may express their concerns using the following grievance process. It is the desire of the Indy STEAM Academy to resolve any complaints in a fair and prompt manner. Prior to the initiation of a grievance, the parent or student will discuss the concern/problem with the person directly involved in an attempt to resolve the problem. If the matter is not resolved, the matter shall be presented in writing to the Head of School using the Complaint Form and follow the resolutions steps are identified as follows:

First Resolution Step: Submit a Complaint Form

The parents or student should initiate a complaint by requesting a complaint form from the officer manager, completing the form and returning it to the office manager or completing and submitting the complaint form on the academy's website. The petitioner is to state the claim, provide a detailed statement of the facts in support of the claim, and identify their desired resolution of the matter. After submitting the form to the CEO/Head of School for review, the CEO/Head of School will provide a written or electronic response acknowledging receipt of the complaint. The CEO/Founder will advise the petitioner of the grievance process and timeline.

Second Resolution Step: In-Person Meeting

The CEO/Head of School will meet individually with all parties to get a clear understanding of the complaint. The CEO/Head of School may determine that it is necessary to meet with both parties involved (if applicable) to resolve the dispute and collaborate on a solution to amicably resolve the matter. The CEO/Head of School will provide a written response on the Complaint form and return it to the parent or student within five (5) business days of the initial meeting decision. If the parent or student is not satisfied with the decision of the CEO/Head of School, the petitioner may appeal to the Policy and Governance Committee (Proceed to the Third Resolution Step).

Third Resolution Step: Decision and Appeal Process

The parent or student may appeal in writing the decision of the CEO/Head of School to the Board of Directors Governance Committee. The CEO/Head of School will forward the Complaint Form with the enclosed resolution to the Governance Committee. The Governance Committee will review all information relative to the complaint and request a meeting with the complainant within (5) five business days. The Governance Committee will meet with the parent or student and any parties involved to review the complaint and shall provide a written decision to the parent or student within five business days of the meeting. If further discussion is needed to resolve the complaint, the Governance Committee may refer the parent or student to the Board of Directors or if the parent or student is not satisfied with the decision of the Governance Committee, the parent or student may appeal to the Board of Directors (proceed to the Fourth Resolution Step).

Fourth Resolution Step: Meeting with the Board of Directors

The parent or student may request to meet with the Board of Directors in Executive Session. The Board Secretary will contact the parent, student and other persons involved with the meeting date and time of the hearing. The Board of Directors has the power and duty to act as deemed appropriate to resolve the matter. The Board of Directors will work diligently to amicably resolve the matter.

If the school or school governing board fails to address the grievance, or if you believe additional notification is warranted, you may contact the Indiana Charter School Board regarding your complaint at indianacharterschoolboard@icsb.in.gov. Please be prepared to complete a complaint form and to provide documentation that describes the issue and any complaint procedure you have followed with the school.

Re: Letter of Support for the proposed Indianapolis STEAM Academy

Dear Amy Osborne:

It is my pleasure as the IUPUI Director of UCASE (Urban Center for the Advancement of STEM Education) to provide this letter of support for *Educating Children Matters, Inc.*'s application to establish a charter school in Indianapolis. The proposed school name is Indianapolis STEAM Academy. I have met with Yvonne Bullock to discuss the goals of the academy, curriculum and instruction, grade levels targeted (K-8+), and potential IUPUI programs that can support the Academy's activities to increase the number of students in the STEM pipeline.

If this charter school application is approved and implemented, there exists a number of IUPUI programs that could partner with this new academy, including but not limited to:

- providing professional development for teachers,
- volunteering undergraduate and graduate math/science education majors to tutor students,
- using the Mobile Resource Trailer as a extension of field-based science instruction,
- assisting with service learning projects for students,
- implementing fieldtrips and science projects,
- developing activities to effectively use technology including coding,
- working with the Geology Center for Discovering the Earth Sciences,
- working with the "Project Lead the Way" program for middle school students,
- collaborating to develop a Summer Camp program for low-income, underserved, and underrepresented minority students.

Sincerely,

A handwritten signature in black ink that reads "Jeffrey Watt".

Amy Osborne
Assistant Director of Applications & External Relations
Indiana Charter School Board
143 West Market Street, Suite 300
Indianapolis, IN 46204

Dear Ms. Osborne,

Marian University has a tradition of focusing its institutional efforts on forming highly effective leaders in the fields of medicine, social welfare and education. Through its Klipsch Educators College, Marian prepares effective school leaders, forms high quality teachers and provides access to quality school and student supports.

We have come to know Dr. Yvonne Bullock of Indianapolis (Indy) STEAM Academy during the course of her development of the school's concept. Dr. Bullock has a proven track record of effective service to students within the IPS District. Marian is pleased to partner with Indy STEAM Academy to support the implementation of its Science, Technology, Engineering, Arts and Mathematics instructional model.

Marian will help support Indy STEAM Academy in a variety of ways: pre-opening assistance; administrative support with state reporting; substantive counsel and administrative support for its Special Education/ELL programs. Through its Center for School and Community Success ("CS2"), Marian will provide professional development workshops and training for staff and the school leadership that include:

- (1) Special Education Program Policy and Practice Development
- (2) Special Education Professional Coaching and Support
- (3) Special Education Administration
- (4) State Reporting and Compliance

In addition to these supports, Marian's Klipsch Educators College intends to partner with Indy STEAM Academy to provide a Teacher Clinical Residency Program. Marian's clinical residencies will take place following a student's acquisition of a Bachelor's degree and licensure. The program will allow a student to complete a Master's degree during a full-year Clinical Residency at a Marian partner school. We will be working with Indy STEAM Academy as a program partner for this clinical residency program and believe that such a relationship will provide Indy STEAM Academy with a reliable system for recruiting and retaining highly effective teachers who will serve the teaching profession for many years.

At Marian, we support highly effective school leaders who implement successful school models, and we will continue to do so across school sectors and throughout the state. We look forward to this opportunity to share resources and support for Indy STEAM Academy. We support the school's efforts to obtain authorization for its Indianapolis location and we will support the school's long-term efforts to develop and sustain a high quality educational program for the benefit of the students and families served by the school.

Respectfully,

Kenith C. Britt, Ph.D.
Senior Vice President and Dean of Fred S. Klipsch Educators College

Amy Osborne
Assistant Director of Applications and External Relations
Indiana Charter School Board
143 West Market Street
Suite 300
Indianapolis, IN 46204

Dear Ms. Osborne:

We are writing today to express our full support of Indy STEAM Academy's charter application.

Teach For America's mission is to find, develop, and support a diverse network of leaders who expand opportunity for children from classrooms, schools, and every sector that shapes the broader systems in which schools operate. To do this, we recruit our nation's most promising leaders and ask them to make a lifelong commitment that starts with two years teaching in a public school, partnering with children and families most acutely impacted by educational inequity. These individuals develop and cultivate their leadership skills and mindsets as they work to become great classroom teachers recognizing teaching is a profound act of leadership. They are also expanding their perspectives, knowledge, and skill as educators, advocates, and systems-change leaders. After the corps, we then support our alumni in their individual and collective leadership as they work toward educational equity from every sector and field.

We are pleased to hear that experienced educator and administrator, Yvonne Bullock, is working to launch and lead Indy STEAM Academy, a K-2 proposed school here in Indianapolis. We support her innovative school model focused on delivering curriculum and instruction that provides a strong foundation in reading, and integrates science, technology, engineering, and mathematics to ensure that students have a deeper understanding of content knowledge and are prepared to take more rigorous coursework in high school and college. In this spirit, we look forward to a potential future school partnership with Indy STEAM Academy that will connect students in Indianapolis with our pipeline of mission-aligned corps members and alumni as teachers and leaders.

Sincerely,

Mark Hazelgrove

RE: STEAM Academy

Ms. Osborne:

It is with great pleasure that Cummins Behavioral Health Systems, Inc. (Cummins) would like to state our intent to partner with Indy STEAM (Science, Technology, Engineering, Arts, Mathematics) Academy in order to provide needed behavioral health services to students and families.

As a community mental health center, Cummins is able to provide evidenced-based therapeutic services to marginalized students who have mental health and behavioral health needs. Through the intended partnership with Indy STEAM Academy, Cummins intends to provide therapy, skills training, case management, and medication services to students enrolled in Cummins Services.

There is a strong need for school-based services for students who have been diagnosed with a behavioral health need. As we know, prevention and early treatment is key for successful and lasting outcomes. Through our intended contract with Indy STEAM Academy, Cummins will be able to provide mental health screening, treatment, and preventive services for students referred by parents, community members, and the school staff.

On behalf of Cummins, we look forward to the opening of the Indy STEAM Academy and look forward to meeting the social, emotional, behavioral, and mental health needs of students enrolled.

Sincerely,

To Whom It May Concern:

Please accept this letter on behalf of Big Brothers Big Sisters of Central Indiana as our commitment to work with the students of the STEM Academy, particularly female students, in providing them with a one-to-one mentoring relationship. It would be our hope to provide mentors to work with students in these early grades to help nurture them as they pursue a variety of career opportunities in the STEM fields.

It has been found that 77% of youth in mentoring relationships report doing better in school, 46% are less likely to use illegal drugs, and 85% state that being in our program helped them have confidence in their abilities.

Our Programmatic commitments include:

Provision of community-based mentoring program establishing one-to-one mentoring relationships between adults (ages 19+) and youth (ages 8-18). Through the Big Brothers Big Sisters of America Service Delivery Model and Standards of Practice BBBSCI recruits, trains, screens, matches, professionally supports, and evaluates each mentor, youth, and parent/guardian. Mentors (Bigs) and mentees (Littles) meet at least four to six hours per month for a minimum of one year (and for as many as 10 years) to ensure the most successful youth outcomes.

We hope through this partnership, more youth in our community will be better prepared for their future

Sincerely,

A handwritten signature in black ink, appearing to read "Amy Pomeranz Essley".

Dr. Yvonne Bullock
Educating Children Matters, Inc.
12341 Cholla Road
Fishers, IN 46037

Dear Dr. Bullock:

On behalf of the Community Alliance of the Far Eastside (CAFE), I am pleased to submit this letter of support for Educating Children Matters and their application to create a new STEAM charter school in Indianapolis.

Community Alliance of the Far Eastside, Inc. (CAFE) was formed and incorporated in 1997 as the result of a merger of Greenleaf Community Center, formed in 1986, and the Far Eastside Community Development Council (FESCDC), formed in 1994. As a neighborhood-based, resident-driven organization, CAFE continues to offer social services and community development efforts in an integrated, holistic manner for the purpose of improving the quality of life for the Far Eastside. CAFE's mission is *"To improve the quality of life in the Far Eastside, we serve as a catalyst for positive community development. We mobilize people to actively preserve our existing resources while pursuing additional investments, through a comprehensive strategy that builds on our community assets."* CAFE's service area encompasses nine square miles on the far eastside of Indianapolis on the Marion County line. This area is bordered by 42nd Street to the North, 30th Street to the South, County Line Road (Carroll Road) to the East and Highway I-465 to the West.

CAFE believes in providing high quality education for our residents. In our area within the Far Eastside, many children lack quality educational opportunities, basic needs such as quality housing and access to healthy foods. Many families and children lack hope and options to better themselves. Some families are in a cycle of 5th generation of poverty. Access to quality educational opportunities provide hope. Therefore, CAFE supports the Indianapolis STEAM Academy.

We have high expectations and believe in this project to provide a better quality of life for our Far Eastside youth.

Respectfully,

Michael Howe
Chief Executive Officer
Community Alliance of the Far Eastside
CAFE

Indianapolis Steam Academy

November 28, 2017

Hello Mrs. Soginni,

I am reaching out to you to request to participate in the Head Start Parent Meeting scheduled for December 12, 2017 at 4:00 PM at the Head Start facility at the Community Alliance for the Far Eastside (CAFÉ). This meeting will provide an opportunity for me to share information about our school with parents, answer any questions they may have and assess their interest in participating in a new charter school. I stopped by your office and left copies of documents that I would like to share. I will also provide copies of these documents in Spanish.

The Indianapolis (Indy) STEAM Academy plans to open July 30, 2018 and serve 200 students grades K-2 on the Far Eastside of Indianapolis at the proposed location 4410 N. Shadeland Avenue. The Indianapolis STEAM Academy will target underrepresented minorities, children from low-income families, and underserved students in the Science, Technology, Engineering, Art, and Math content areas.

The mission of Indianapolis STEAM Academy is to nurture the academic and creative talents of students through Science, Technology, Engineering, Arts, and Mathematics (STEAM) with a strong literacy foundation to ensure the achievement of all students, and prepare them for high school, college, and careers in a 21st century global workforce. The STEAM curriculum will incorporate 21st century literacy skills, engineering design process, science inquiry process and project-based learning strategies that support critical thinking, collaboration, creativity, innovation, and problem-solving skills to help students gain a deeper understanding of content and prepare them for more rigorous coursework in high school and college programs in the STEM fields.

I have also met with Michael Howe, Chief Executive Officer for The Community Alliance for the Far Eastside (CAFE) who has provided a letter of support for our charter school. We are also very interested in creating a partnership with the Head Start program. We understand the importance of providing high quality education options for parents. I look forward to working with families and children on the Far Eastside.

Sincerely,

Yvonne Bullock

Hello Ms. Bullock,

I would be happy to invite you to speak to our families about your program. I might suggest that you attend our Feb. 16 Love Dance to have a table and information for parents as well because this will be very well attended with at least 100 families attending. Our parent meetings typically only have about 20-30 parents attend.

Please let me know if you would like to attend one or both and we can plan accordingly.

Indianapolis (Indy) STEAM Academy

November 20, 2017

Hello Mrs. Harris,

I am reaching out to you to partner with the Boys and Girls Clubs Finish Line, Indianapolis branch. I am in the process of completing the full charter school application to be authorized through Education One, LLC, Trine University. I was wondering, if you would provide a Letter of Support for my charter school. The Indianapolis (Indy) STEAM Academy plans to open July 30, 2018 and serve 200 students grades K-2 on the Far Eastside of Indianapolis at the proposed location 4410 N. Shadeland Avenue.

The Indianapolis STEAM Academy will target underrepresented minorities, children from low-income families, and underserved students in the STEM content areas. The mission of Indianapolis STEAM Academy is to nurture the academic and creative talents of students through Science, Technology, Engineering, Arts, and Mathematics (STEAM) with a strong literacy foundation to ensure the achievement of all students, and prepare them for high school, college, and careers in a 21st century global workforce. The STEAM curriculum will incorporate 21st century literacy skills, engineering design process, science inquiry process and project-based learning strategies that support critical thinking, collaboration, creativity, innovation, and problem-solving skills to help students gain a deeper understanding of content and prepare them for more rigorous coursework in high school and college programs in the STEM fields.

I have met with Mrs. Parsons and Mr. Ongay, who suggested that I contact you regarding this request. I have also met with Michael Howe, Chief Executive Officer for The Community Alliance for the Far Eastside (CAFE) who has provided a letter of support. A partnership with the Boys and Girls Clubs Finish Line, Indianapolis location will provide after school programs for students in our school attendance area. We will provide transportation from the Academy to the Boys and Girls Club each afternoon when school is in session. We understand the importance of providing high quality education options for parents as well as the need to provide additional support for parents who work late and need a safe place for their children to be after school hours. Your support would be greatly appreciated.

Sincerely,

Yvonne Bullock

Good afternoon Ms. Bullock – I am so sorry to have missed your calls. It is exciting to hear that the STEAM Academy will be opening near our Finish Line Club, and we are excited about the opportunity to serve your students. I have copied Juan Ongay, the Director of the Finish Line Club on this email so that you can reach out to him directly.

Unfortunately, it is outside of our practice to provide letters of support to programs that we do not have a previous relationship with, but I am excited to hear about how a partnership might develop. Please let me know if there is some other way that Juan or I might be of assistance to you.

I hope you have a wonderful holiday!

LeeAnn Harris | Director of Club Operations | Boys & Girls Clubs of Indianapolis

Indy STEAM Academy

Community Focus Groups

The Indianapolis STEAM Academy would like to become an approved charter school on the Far Eastside of Indianapolis. If approved, we will open July 30, 2018 with approximately 200 students grades K-2, ultimately growing to serve students in grades K-8 over the next five years.

Please help us create the school by telling us what is important to you. We will consider all responses from families and community members in planning the school.

Instructions:

Participants will select a focus group to share ideas and concerns.

The facilitator will capture ideas and concerns of the group on chart paper (45 minutes)

Participants will reconvene as a group to share ideas and concerns (45 minutes).

Participants may share their contact information on the sign-in sheet, if they would like to receive a copy of the group discussions and suggestions to enhance the development of the Academy.

Focus Groups and Topics for Discussion:

Group 1: Instruction STEAM Model, School Year, and Hours

Group 2: Before and After School Care, Extra-Curricular Activities, and Transportation

Group 3: Discipline Policy, Rewards, and Consequences

Group 4: Teacher and School Leader Qualities

Group 5: Parent and Community Engagement Activities

Thank you for your time and participation in this focus group!

August 16, 2018

Amy Osborne
Assistant Director of Applications and External Relations
Indiana Charter School Board
143 West Market Street, Suite 300
Indianapolis, Indiana 46204

Dear Ms. Osborne,

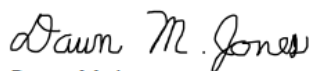

It is with great pleasure to provide this letter of support for Dr. Yvonne Bullock who is tirelessly working to provide a high-quality educational choice for underprivileged families who desire their children to receive an elevated education in the STEAM (Science, Technology, Engineering, Arts, Mathematics) curriculum.

Dr. Bullock served the South Bend Community School Corporation as Executive Director of Curriculum and Instruction. As a fifth term (18 years) member of the Board of Trustees of the SBCSC and grant writer myself, I encountered her expertise in grant writing and budgeting first hand. During her first two weeks in the district, she was able to resolve problems with our Title I/II funds which saved the corporation \$500,000 as well as pull in another \$500,000 in funds to offer a summer school program. I witnessed firsthand Dr. Bullock's knowledge, skills, and tenacity as she hit the ground running by creating Reading and Math quarterly benchmark assessments for grades K-12, and creating opportunities for teachers to obtain professional development while simultaneously offering them personalized support in the classroom to enhance student achievement.

I have known Dr. Bullock for seven years. She is extremely focused, professional as well as knowledgeable about all aspects of school operations. Her leadership style is to lead by example and to offer encouragement along the way. I enjoyed our working relationship as I worked with her on several projects like selecting a new student information management system for the district, stabilizing two high schools and one middle school to prevent state takeover, and supporting a community-wide symposium to address the needs of At-Risk Students.

I am elated that Dr. Bullock is planning this public charter school and encourage you to authorize Indy Steam Academy. Many students will benefit from the opportunity to attend this academy.

Sincerely,

Dawn M. Jones
Secretary, South Bend Community School Corporation, Board of Trustees

Re: Qualification for Funding – Indianapolis STEAM Academy

Dear Ms. Bullock:

Please be advised that Indianapolis STEAM Academy has prequalified for funding with Charter School Capital, Inc. (CSC) based on the information contained in its application and other documents submitted to CSC. Based on the initial information provided by the school, CSC has indicated that it can offer a contract to cover funding in the amount of \$325,000.

Funding for Indianapolis STEAM Academy is generally contingent on the following factors and is subject to satisfaction of CSC's underwriting requirements:

1. Having a valid charter with defined beginning and ending dates of the charter term;
2. Being recognized as a valid charter school in good standing with the State of Indiana, including the Indiana Department of Education;
3. CSC receiving a copy of the approved charter;
4. Having a nonprofit corporation in good standing with the Indiana Secretary of State;
5. A "Good Standing Certification" being executed by the school's Authorizer upon approval of the charter that is either unconditional or with conditions that are acceptable to CSC;
6. Being in compliance with its charter and Indiana laws governing charter schools.

Please feel free to call if any other information is needed.

Sincerely,

Westley Koenen

Public Charity Status:
170(b)(1)(A)(ii)
Form 990/990-EZ/990-N Required:
Yes
Effective Date of Exemption:
December 29, 2017
Contribution Deductibility:
Yes
Addendum Applies:
No

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

You're not subject to the specific publishing requirements of Revenue Procedure 75-50, 1975-2 C.B., page 587, as long as you operate under a contract with the local government. If your method of operation changes to the extent that your charter is not approved, terminated, cancelled or not renewed, you should notify us. You'll also be required to comply with Revenue Procedure 75-50.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

**ARTICLES OF INCORPORATION
FOR EDUCATING CHILDREN MATTERS, INC., A NONPROFIT
CORPORATION**

The undersigned incorporator or incorporators, desiring to form a corporation (hereinafter referred to as the "Corporation.") pursuant to the provisions of the Indiana Nonprofit Corporation Act of 1991 (hereinafter referred to as the "Act"), execute the following Articles of Incorporation:

ARTICLE I

Name and Principal Office

The name of the Corporation is Educating Children Matters, Inc. The principal office of the Corporation shall be 12041 Cholla Road, Fishers, Indiana 46037.

ARTICLE II

Purpose

This Corporation is organized for the basic purpose to do all things reasonable and proper in the operation of a nonprofit charter school within the state of Indiana and to deal generally therein. This corporation is organized exclusively for educational purposes within the meaning of IRC Section 501(c)(3) of the Internal Revenue Code.

Notwithstanding any other provision of these Articles, the corporation shall not carry on any other activities not permitted to be carried on (a) by a corporation exempt from Federal Income tax under Section 501(c)(3) of the Internal Revenue Code of 1986 (or corresponding provision of any future United States Internal Revenue Law), or (b) by a corporation, contributions to which are deductible under Section 170(c)(2) of the Internal Revenue Code of 1986 (or the corresponding provision of any future United States Internal Revenue Law).

ARTICLE III

Registered Agent and Registered Office

The name of the registered agent is Yvonne Bullock, Ph.D. and is located at 12041 Cholla Road, Fishers, Indiana 46037.

ARTICLE IV

Members

This Corporation shall have no members.

ARTICLE V
Limitations on Corporate Earnings and Activities

- 5.1 Earnings. No part of the net earnings of the Corporation shall inure to the benefit of or be distributable to its incorporator, directors, officers or other private persons, except that the Corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in furtherance of the purpose set forth in Article II.
- 5.2 Limitations on Activities. No substantial part of the activities of the Corporation shall be the carrying on of propaganda, or otherwise attempting to influence legislations, except as may be permitted to Section 501 (c) (3) organizations by the Code and the Corporation shall not participate in or intervene in (including the publishing or distribution of statements) any political campaign on behalf of or in opposition to any candidate for public office. Notwithstanding any other provision of these Articles of Incorporation, the Corporation shall not conduct or carry on any other activities not permitted to be conducted or carried on (i) by an organization exempt from federal income tax under Section 501 (c)(3) of the Code, or (ii) by an organization, contributions to which are deductible under Section 170 (c) (2) of the Code.
- 5.3 Notwithstanding any other provision of these articles, this corporation shall not, except to an insubstantial degree, engage in any activities or exercise any powers that are not in furtherance of the purposes of this corporation.

ARTICLE VI
Incorporators

The name of the incorporators is are Yvonne Bullock, Ph.D. and William G. Bullock III.

ARTICLE VII
Dissolution

Upon the dissolution of the corporation, assets shall be distributed for one or more exempt purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code, as amended or supplemented, or shall be distributed to the federal government or to a state or local government for a public purpose. Any such assets not so disposed of shall be disposed of by the District Court of the county in which the principal office of the corporation is then located, exclusively for such purposes or to such organization or organizations, as said Court shall determine, which are organized and operated exclusively for such purposes.

In witness whereof, the undersigned incorporators of said Corporation execute this document, and verify subject to penalties of perjury that the facts contained are true

BYLAWS OF THE BOARD OF DIRECTORS - INDIANAPOLIS STEAM ACADEMY

(PAGE 1 of 8)

ARTICLE I: OFFICES

The principal office of the Academy in the State of Indiana shall be located in Indianapolis, County of Marion. The Academy shall have and continuously maintain in the State of Indiana a registered office, and a registered agent whose office is identical with such registered office, as required by the relevant state Nonprofit School Act.

ARTICLE I: BOARD OF DIRECTORS

Section 1. General Powers.

The affairs of the Academy shall be managed by its Board of Directors. Directors need not be residents of the State of Indiana.

Section 1A. Duties of the Board of Directors.

The Board shall be charged with the management of the affairs of the Academy, and shall pursue such policies and principles as shall be in accordance with the law, the provisions of the Articles of the Academy, these By-Laws, and any written charter entered into by the Board. The Board shall be considered as having the powers of a Board of Directors and shall be deemed to be acting as the Board of Directors for all purposes of the Nonprofit School Law. By way of elucidation, and not in limitation, the Board shall be responsible to carry out the following duties and obligations:

- a. The Board shall uphold the school's mission and vision and ensure effective organizational planning on the part of the school through an annual strategic planning and review process that will review and update the school's short-term, mid-term, and long-range goals, and evaluate the effectiveness of the implementation of the school's mission and plans;
- b. The Board shall either directly or through a personnel committee provide for the annual appraisal of the performance of the school's principal/head of school;
- c. The Board shall do its best to ensure the financial stability of the Academy through regular monthly review of financial statements and reports, an annual independent audit, and direct oversight of major financial commitments and decisions;
- d. The Board shall take an active role, either directly or through a Board committee, in resolving grievances and conflicts which may arise within the school community involving, students, parents, staff, administration, and Board members.
- e. To the extent permitted by law, the Board may, by general resolution, delegate to officers of the Academy or to committees of the Board such powers within the Board's authority, as it deems necessary or appropriate to carry out its duties and obligations.

Section 2. Number, Election, Tenure and Qualifications.

- a. The number of Directors shall be between five (5) and nine (9) members. They shall be selected in accordance with the provisions of paragraph b. There is no limit to the number of terms a Director may serve. Terms of service are voluntary, but must complete one full school year of service to remain as a Director.

Attachment #11: ByLaws

BYLAWS

PAGE 2 of 8

- b. Directors need not be residents of the State of Indiana.
- c. No Director shall as a private person engage in any business transaction with the Academy or be employed in any capacity by the Academy.

Section 3. Annual Meeting.

An annual meeting of the Board of Directors shall be held during the month of July in each year, beginning with the year the Academy opens or before for the purpose of electing officers and handling any business transactions for the opening of school.

Section 4. Regular Meetings.

The Board of Directors may provide by resolution the time and place, within the State of Indiana, for the holding of additional regular meetings of the Board. The preferred location for regular meetings shall be the school's location. There shall be a notice posted in a public place, at least a 24-hour prior to the meeting.

Section 5. Special Meetings.

Special meetings of the Board of Directors may be called by or at the request of the President or any two Directors. The person or persons authorized to call special meetings of the Board may fix any place, within the State of Indiana, as the place for holding any special meeting of the Board called by them. The preferred location for regular meetings shall be the school's location.

Section 6. Notice.

Notice of any special meeting of the Board of Directors shall be given at least twenty four hours previously thereto by written notice delivered personally or sent by mail, email or telegram to each Director at his address as shown by the records of the Academy, and by posting a public notice twenty four hours prior to the meeting. If mailed, such notice shall be deemed to be delivered when deposited in the United States mail in a sealed envelope so addressed, with postage thereon prepaid. Any Director may waive notice of any meeting. The attendance of a Director at any meeting shall constitute a waiver of notice of such meeting, except where a Director attends a meeting for the express purpose of objecting to the transaction of any business because the meeting is not lawfully called or convened. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the Board need be specified in the notice or waiver of notice of such meeting, unless specifically required by law or by these by-laws.

Section 7. Quorum.

A majority of the Board of Directors either attending or participating in the meeting telephonically shall constitute a quorum for the transaction of business at any meeting of the Board.

Attachment #11: ByLaws

BYLAWS

PAGE 3 of 8

Section 8. Manner of Acting.

The act of a majority of the Directors present at a duly called and attended meeting or participating in the meeting telephonically at which a quorum is present shall be the act of the Board of Directors, unless the act of a greater number is required by law or by these by-laws.

Section 9. Vacancies.

Any vacancy occurring in the Board of Directors and any directorship to be filled by reason of an increase in the number of directors may be filled by the affirmative vote of a majority of the remaining directors, though less than a quorum of the Board of Directors. A Director selected to fill a vacancy shall at least one full year to remain as a Director.

Section 10. Compensation.

Directors shall receive a stipend of \$250.00 per year for their service and reimbursement for mileage and other Board related expenses. A Director may not receive reimbursement for cell phone or internet use.

Section 11. Informal Action by Directors.

Any action required by law to be taken at a meeting of directors, or any action which may be taken at a meeting of directors, may be taken without a meeting if a consent is verbal or in writing, setting forth the action so taken, shall be signed and approved by all of the Directors.

Section 12. Removal of a Director.

Any Director may be removed as a Director of the Academy by the vote of two-thirds of all duly elected Directors for violating these By-Laws, neglect of duty of office, or behavior injurious to the Academy. No such action shall be taken until the Director has been advised of specific charges, given a reasonable time to prepare a response, and afforded a full hearing before the entire Board of Directors.

ARTICLE II: OFFICERS

Section 1. Officers.

The officers of the Academy shall be a President, one Vice President, a Secretary, and a Treasurer and such other officers as may be elected in accordance with the provisions of this Article. The Board of Directors may elect or appoint such other officers, including one or more Assistant Secretaries and one or more Assistant Treasurers, as it shall deem desirable, such officers to have the authority and perform the duties prescribed, from time to time, by the Board of directors. Any two or more offices may be held by the same person, except the offices of President and Secretary.

Attachment #11: ByLaws

BYLAWS

PAGE 4 of 8

Section 2. Election and Term of Office.

The officers of the Academy shall be elected annually by the Board of Directors at the regular annual meeting of the Board of Directors. If the election of officers shall not be held at such meeting, such election shall be held as soon thereafter as conveniently may be. New offices may be created and filled at any meeting of the Board of Directors. Each officer shall hold office at least one school year term.

Section 3. Removal.

Any officer appointed by the Board of Directors may be removed by the Board of Directors whenever in its judgment the best interests of the Academy would be served thereby, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed.

Section 4. Vacancies.

A vacancy in any office because of death, resignation, removal, disqualification or otherwise, may be filled by the Board of Directors for the unexpired portion of the term.

Section 5. President.

The President shall be the principal executive officer of the Academy and shall in general supervise and control all of the business and affairs of the Academy. The President shall preside at all meetings of the members and of the Board of Directors. The President may sign, with the Secretary or any other proper officer of the Academy authorized by the Board of Directors, any deeds, mortgages, bonds, contracts, or other instruments which the Board of Directors has authorized to be executed, except in cases where the signing and execution thereof shall be expressly delegated by the Board of Directors or by these by-laws or by statute to some other officer or agent of the Academy; and in general he shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board of Directors from time to time.

Section 6. Vice President.

In the absence of the President or in event of his/her inability or refusal to act, the Vice President (or in the event there be more than one Vice President, the Vice President shall perform the duties of the President, and when so acting, shall have all the powers of and be subject to all the restrictions upon the President. The Vice President shall perform such other duties as from time to time may be assigned to him by the President or by the Board of Directors.

Section 7. Treasurer.

If required by the Board of Directors, the Treasurer shall give a bond for the faithful discharge of his duties in such sum and with such surety or sureties as the Board of Directors shall determine. The Treasurer shall have charge and custody of and be responsible for all funds and securities of the Academy; receive and give receipts for moneys due and payable to the

Attachment #11: ByLaws

BYLAWS
PAGE 5 of 8

Academy from any source whatsoever, and deposit all such moneys in the name of the BY-the Academy in such banks, trust companies or other depositories as shall be selected in accordance with the provisions in Article VII of these by-laws; and in general perform all the duties incident to the office of Treasurer and such other duties as from time to time may be assigned by the President or by the Board of Directors.

Section 8. Secretary.

The Secretary shall keep the minutes of the meetings of the members and of the Board of Directors in one or more books provided for that purpose; see that all notices are duly given in accordance with the provisions of these by-laws or as required by law; be custodian of the corporate records and of the seal of the Academy and see that the seal of the Academy is affixed to all documents, the execution of which on behalf of the Academy under its seal is duly authorized in accordance with the provisions of these by-laws; keep a register of the post-office address of each member which shall be furnished to the Secretary by such member; and in general perform all duties incident to the office of Secretary and such other duties as from time to time may be assigned to him by the President or by the Board of Directors.

Section 9. Assistant Treasurers and Assistant Secretaries.

If required by the Board of Directors, the Assistant Treasurers shall give bonds for the faithful discharge of their duties in such sums and with such sureties as the Board of Directors shall determine. The Assistant Treasurers and Assistant Secretaries, in general, shall perform such duties as shall be assigned to them by the Treasurer or the Secretary or by the President or the Board of Directors.

ARTICLE III

COMMITTEES

Section 1. Committees of Directors.

The Board of Directors, by resolution adopted by a majority of the Directors in office, may designate and appoint one or more committees, each of which shall consist of two or more Directors, which committees, to the extent provided in said resolution, shall have and exercise the authority of the Board of Directors in the management of the Academy, except that no such committee shall have the full authority of the Board of Directors.

Section 2. Nominating Committee.

There shall be a Nominating Committee which shall be appointed and operate as follows:

- a. Chairman.** The President of the Board of Directors shall appoint a Chairman of the Nominating Committee, who must be a Director who has served at least one year term as a Director. Upon the expiration of the Chairman's term or upon a vacancy in the position, the President shall appoint a successor.

Attachment #11: ByLaws

BY LAWS OF THE INDIANAPOLIS STEAM ACADEMY

PAGE 6 of 8

- b. Members.** The Chairman shall appoint two additional members to the Committee. In order to stagger the terms of the committee members, one of the appointed members shall serve an initial two year term, and the other shall serve an initial one year term. Upon the expiration of the initial terms and of any succeeding terms, subsequent members shall be appointed to serve up to a three year term. Upon any vacancy in either of the members' positions, the Chairman shall appoint a new member to fill the unexpired term.
- c. Duties.** The Nominating Committee shall be charged with reviewing all applications and interviewing all applicants for member on the Board of Directors. Any person nominated or wishing to be considered for a position on the Board shall submit an application together with all supplemental information to the Board of Directors. Applications and supplemental information shall be submitted no less than 30 days prior to the date on which the vacancy is to be filled except in cases where through death, resignation or otherwise a vacancy on the Board must be filled more quickly, in which case the Nominating Committee, acting unanimously, may prescribe a different submission schedule. No person may be placed in nomination for a position on the Board without having first been screened by the Nominating Committee in accordance with the procedures set forth in this paragraph c.

Section 3. Other Committees.

Other committees not having and exercising the authority of the Board of Directors in the management of the Academy may be appointed in such manner as may be designated by a resolution adopted by a majority of the Directors present at a meeting at which a quorum is present. Except as otherwise provided in such resolution, all such committees shall include at least one Board member and the President of the Academy shall appoint the members thereof or accept volunteers. Any member thereof may be removed by the person or persons authorized to appoint such member whenever in their judgment the best interests of the Academy shall be served by such removal.

Section 4. Term of Office.

Each member of a committee shall continue as such until the next annual meeting of the Board of the Academy and until his successor is appointed, unless the committee shall be sooner terminated, or unless such member be removed from such committee, or unless such member shall cease to qualify as a member thereof.

Section 5. Chairman.

One member of each committee shall be appointed chairman by the person or persons authorized to appoint the members thereof.

Attachment #11: ByLaws

BY LAWS OF THE INDIANAPOLIS STEAM ACADEMY

PAGE 7 of 8

Section 6. Vacancies.

Vacancies in the membership of any committee may be filled by appointments made in the same manner as provided in the case of the original appointments.

Section 7. Quorum.

Unless otherwise provided in the resolution of the Board of Directors designating a committee, a majority of the whole committee shall constitute a quorum and the act of a majority of the members present at a duly called meeting or participating in the duly called meeting telephonically at which a quorum is present shall be the act of the committee.

Section 8. Rules.

Each committee may adopt rules for its own government not inconsistent with these by-laws or with rules adopted by the Board of Directors.

ARTICLE IV

CONTRACTS, CHECKS, DEPOSITS AND FUNDS

Section 1. Contracts.

The Board of Directors may authorize any officer or officers, agent or agents of the Academy, in addition to the officers so authorized by these by-laws, to enter into any contract or execute and deliver any instrument in the name of and on behalf of the Academy, and such authority may be general or confined to specific instances.

Section 2. Checks, Drafts, etc.

All checks, drafts or orders for the payment of money, notes or other evidences of indebtedness issued in the name of the Academy, shall be signed by such officer or officers, agent or agents of the Academy and in such manner as shall from time to time be determined by resolution of the Board of Directors. In the absence of such determination by the Board of Directors, such instruments shall be signed by the Treasurer or Assistant Treasurer and countersigned by the President or a Vice President of the Academy. Any amounts in excess of \$[10,000] shall first require an affirmative vote of a majority of the Directors present at a meeting at which a quorum is present.

Section 3. Deposits.

All funds of the Academy shall be deposited from time to time to the credit of the Academy in such banks, trust companies or other depositaries as the Board of Directors may select.

Section 4. Gifts.

The Board of Directors may accept on behalf of the Academy any contribution, gift, bequest or devise for the general purposes or for any special purpose of the Academy.

Attachment #11: ByLaws

BY-LAWS
PAGE 8 of 8

ARTICLE V BOOKS AND RECORDS

The Academy shall keep correct and complete books and records of account and shall also keep minutes of the proceedings of its Board of Directors and committees having any of the authority of the Board of Directors.

ARTICLE VI FISCAL YEAR

The fiscal year of the Academy shall begin on the first day of July and end on the last day of June in each year.

ARTICLE VII WAIVER OF NOTICE

Whenever any notice is required to be given under the provisions of the state's Non-Profit School Act or under the provisions of the articles of the Academy or the by-laws of the Academy, a waiver thereof in writing signed by the person or persons entitled to such notice, whether before or after the time stated therein, shall be deemed equivalent to the giving of such notice.

ARTICLE VIII AMENDMENTS TO BY-LAWS

These by-laws may be altered, amended or repealed and new by-laws may be adopted by a two-third (2/3) vote of all the Directors then serving on the Board at any regular meeting properly called or at any special meeting properly called, if at least two days' written notice is given of intention to alter, amend or repeal or to adopt new by-laws at such meeting.

ARTICLE IX DISPOSITION OF CHARTER SCHOOL ASSETS UPON DISSOLUTION

Pursuant to IC § 20-24-3-3 upon dissolution of the Indianapolis (Indy) STEAM Academy, the Board of Directors and CEO/Founder shall take the following actions regarding the disposition of the school's assets and funds (1) identify all remaining assets, except funds specified in subdivision; (2) funds/assets shall be used for nonprofit educational purposes; and (3) remaining fund received from the [Indiana Department of Education] shall be returned to the department not more than thirty (30) days after dissolution.

**INDIANAPOLIS (INDY) STEAM ACADEMY
GOVERNING BOARD
CODE OF ETHICS**

The Indianapolis (Indy) STEAM Academy Governing Board of Directors desire to operate in the most ethical and conscientious manner possible and to that end the board adopts this Code of Ethics and each member of the board agrees that he or she will:

Domain I: Governance Structure

1. Recognize that the authority of the board rests only with the board as a whole and not with individual members and act accordingly.
2. Support the delegation of authority for the day-to-day administration of the charter school to the school leader and act accordingly.
3. Honor the chain of command and refer problems or complaints consistent with the chain of command.
4. Recognize that the school leader should be present at all meetings of the board except when his or her contract, salary or performance is under consideration.
5. Not undermine the authority of the school leader or school administration.
6. Use reasonable efforts to keep the school leader informed of concerns or specific recommendations that any member of the board may bring to the board.

Domain II: Strategic Planning

1. Reflect through actions that his or her first and foremost concern is for educational welfare of children attending the charter school.
2. Participate in all planning activities to develop the vision and goals of the board.
3. Work with the board and the school leader to ensure prudent and accountable uses of the resources of the charter school.
4. Render all decisions based on available facts and his or her independent judgment and refuse to surrender his or her judgment to individuals or special interest groups.
5. Uphold and enforce all applicable laws, all rules and guidelines of the State Board of Education and the board.

Domain III: Board and Community Relations

1. Seek regular and systemic communications among the board and students, staff, and the community.
2. Communicate to the board and the school leader expressions of public reaction to board policies and charter school programs.

Domain IV: Policy Development

1. Work with other board members to establish effective policies for the charter school.
2. Make decisions on policy matters only after full discussion at publicly held board meetings.
3. Periodically review and evaluate the effectiveness of policies on charter school programs and performance.

Attachment 11: Code of Ethics Policy

Code of Ethics Policy

Page 2 of 2

Domain V: Board Meetings

1. Attend and participate in regularly scheduled and called board meetings.
2. Be informed and prepared to discuss issues to be considered on the board agenda.
3. Work with other board members in a spirit of harmony and cooperation in spite of differences of opinion that may arise during the discussion and resolution of issues at board meetings.
4. Vote for a closed executive session of the board only when applicable law or board policy requires consideration of a matter in executive session.
5. Maintain the confidentiality of all discussions and other matters pertaining to the board and the charter school, during executive session of the board.
6. Make decisions in accordance with the interests of the charter school as a whole and not any particular agreement thereof.
7. Express opinions before votes are cast, but after the board vote, abide by and support all majority decisions of the board.

Domain VI: Personnel

1. Consider the employment of personnel only after receiving and considering the recommendation of the school leader.
2. Support the employment of people best qualified to serve as employees of the charter school and insist on regular and impartial evaluations of charter school staff.
3. Comply with all applicable laws, rules, regulation, and all board policies regarding employment of family members.

Domain VII: Financial Governance

1. Refrain from using the position of board member for personal or partisan gain or to benefit any person or entity over the interest of the charter school.

Conduct as a Board Member

1. Devote sufficient time, thought and study to the performance of the duties and responsibilities of a member of the board.
2. Become informed about current educational issues by individual study and through participation in programs providing needed education and training.
3. Communicate in a respectful professional manner with and about fellow board members.
4. Take no private action that will compromise the board or charter school administration.
5. Participate in all required training programs developed for board members by the board or the State Board of Education.
6. In the annual report, submitted to the Department, disclose the status of board member compliance with the Code of Ethics.

This policy was adopted by the Indianapolis STEAM Academy Board of Directors on November 14, 2017.

Conflict of Interest Policy

Article I: Purpose

The purpose of this Board Conflict of Interest Policy is to protect the Indianapolis STEAM Academy's interest when it is contemplating entering into a transaction or arrangement that might benefit the private interest of an officer or director of the Academy or might result in a possible excess benefit transaction. This policy is intended to supplement but not replace any applicable state and federal laws governing conflict of interest applicable to nonprofit and charitable organizations. This policy is also intended to identify "independent" directors.

Article II: Definitions

1. Interested Person

Any director, principal officer, or member of a committee with Board of Directors delegated powers, who has a direct or indirect financial interest, as defined below, is an interested person.

2. Financial Interest

A person has a financial interest if the person has, directly or indirectly, through business, investment, or family:

- a. An ownership or investment interest, in any entity with which the Indianapolis STEAM Academy has a transaction or arrangement,
- b. A compensation arrangement with the Indianapolis STEAM Academy or with any entity or individual with which the Indianapolis STEAM Academy has a transaction or arrangement, or
- c. A potential ownership or investment interest in, or compensation arrangement with, any entity or individual with which the Indianapolis STEAM Academy is negotiating a transaction or arrangement.

Compensation includes direct and indirect remuneration as well as gifts or favors that are not insubstantial. A financial interest is not necessarily a conflict of interest. A person who has a financial interest may have a conflict of interest only if the Board or Policy Committee decides that a conflict of interest exists, in accordance with this policy.

Article III: Conflict of Interest Procedures

1. Duty to Disclose

In connection with any actual or possible conflict of interest, an interested person must disclose the existence of a financial interest and be given the opportunity to disclose all material facts to the Board of Directors and members of Policy Committee - Board of Directors delegated powers to consider the proposed transaction or arrangement.

Attachment 11: Conflict of Interest Policy

Conflict of Interest Policy

Page 2 of 4

2. Recusal of Self

Any director may recuse himself or herself at any time from involvement in any decision or discussion in which the director believes he or she has or may have a conflict of interest, without going through the process for determining whether a conflict of interest exists.

3. Determining Whether a Conflict of Interest Exists

A financial interest is not necessarily a conflict of interest. A person who has a financial interest may have a conflict of interest only if the appropriate Board of Directors or Policy Committee decides that a conflict of interest exists. After disclosure of the financial interest and all material facts, and after any discussion with the interested person, he/she shall leave the Board of Directors or Policy Committee meeting while the determination of a conflict of interest is discussed and voted upon. The remaining board or Policy Committee members shall decide if a conflict of interest exists.

Notwithstanding anything herein, a conflict of interest shall not exist and no review or action by any Board of Directors or Policy Committee shall be necessary for one or more grants in an aggregate amount of Five Thousand Dollars (\$5,000) or less in any single calendar year, from the

Indianapolis STEAM Academy to an organization that is tax exempt under Section 501(c)(3) of the Internal Revenue Code, where a financial interest as described herein exists.

4. Procedures for Addressing a Conflict of Interest

- a. An interested person may make a presentation at the Board of Directors or Policy Committee meeting, but after the presentation, he/she shall leave the meeting during the discussion of, and the vote on, the transaction or arrangement involving the possible conflict of interest.
- b. The Chairperson of the Board of Directors or Policy Committee shall, if appropriate, appoint a disinterested person or Policy Committee to investigate alternatives to the proposed transaction or arrangement.
- c. After exercising due diligence, the Board of Directors or Policy Committee shall determine whether the Indianapolis STEAM Academy can obtain with reasonable efforts a more advantageous transaction or arrangement from a person or entity that would not give rise to a conflict of interest.
- d. If a more advantageous transaction or arrangement is not reasonably possible under circumstances not producing a conflict of interest, the Board of Directors or Policy Committee shall determine by a majority vote of the disinterested directors whether the transaction or arrangement is in the Indianapolis STEAM Academy's best interest, for its own benefit, and whether it is fair and reasonable. In conformity with the above determination it shall make its decision as to whether to enter into the transaction or arrangement.

Attachment #11: Conflict of Interest Policy

Conflict of Interest Policy

Page 3 of 4

5. Violations of the Conflicts of Interest Policy

- a. If the Board of Directors or Policy Committee has reasonable cause to believe a member has failed to disclose actual or possible conflicts of interest, it shall inform the member of the basis for such belief and afford the member an opportunity to explain the alleged failure to disclose.
- b. If, after hearing the member's response and after making further investigation as warranted by the circumstances, the Board of Directors or Policy Committee determines the member has failed to disclose an actual or possible conflict of interest, it shall take appropriate disciplinary and corrective action.

Article IV: Records of Proceedings

The minutes of the Board of Directors and all committees with board delegated powers shall contain:

- a. The names of the persons who disclosed or otherwise were found to have a financial interest in connection with an actual or possible conflict of interest, the nature of the financial interest, any action taken to determine whether a conflict of interest was present, and the Board of Director's or Policy Committee's decision as to whether a conflict of interest in fact existed.
- b. The names of the persons who were present for discussions and votes relating to the transaction or arrangement, the content of the discussion, including any alternatives to the proposed transaction or arrangement, and a record of any votes taken in connection with the proceedings.

Article V: Compensation

- a. A voting member of the Board of Directors who receives compensation, directly or indirectly, from the Indianapolis STEAM Academy for services is precluded from voting on matters pertaining to that member's compensation.
- b. A voting member of any committee whose jurisdiction includes compensation matters and who receives compensation, directly or indirectly, from the Indianapolis STEAM Academy for services is precluded from voting on matters pertaining to that member's compensation.
- c. A voting member of the Board of Directors or any committee whose jurisdiction includes compensation matters and who receives compensation, directly or indirectly, from the Indianapolis STEAM Academy, either individually or collectively, is prohibited from providing information to any committee regarding compensation.

Attachment #11: Conflict of Interest Policy

Conflict of Interest Policy

Page 4 of 4

Article VI : Annual Statements

1. Each director, principal officer and member of a committee with Board of Directors delegated powers shall annually sign a statement which affirms such person:
 - a. Has received a copy of the conflicts of interest policy,
 - b. Has read and understands the policy,
 - c. Has agreed to comply with the policy, and
 - d. Understands the Indianapolis STEAM Academy is charitable and in order to maintain its federal tax exemption it must engage primarily in activities which accomplish one or more of its tax-exempt purposes.
2. Each voting member of the Board shall annually sign a statement which declares whether such person is an independent director.
3. If at any time during the year, the information in the annual statement changes materially, the director shall disclose such changes and revise the annual disclosure form.
4. The Policy Committee shall regularly and consistently monitor and enforce compliance with this policy by reviewing annual statements and taking such other actions as are necessary for effective oversight.

Article VII: Periodic Reviews

To ensure the Indianapolis STEAM Academy operates in a manner consistent with charitable purposes and does not engage in activities that could jeopardize its tax-exempt status, periodic reviews shall be conducted. The periodic reviews shall, at a minimum, include the following subjects:

- a. Whether compensation arrangements and benefits are reasonable, based on competent survey information (if reasonably available), and the result of arm's length bargaining.
- b. Whether partnerships, joint ventures, and arrangements with management organizations conform to the Indianapolis STEAM Academy's written policies, are properly recorded, reflect reasonable investments or payments for goods and services, further charitable purposes and do not result in inurement, impermissible private benefit or in an excess benefit transaction.

Article VIII

Use of Outside Experts

When conducting the periodic reviews as provided for in Article VII, the Indianapolis STEAM Academy may, but need not, use outside advisors. If outside experts are used, their use shall not relieve the Board of Directors of its responsibility for ensuring periodic reviews are conducted.

This Conflict of Interest Policy was adopted by the Indianapolis STEAM Academy Board of Directors on November 14, 2017.

Statement of Assurances
(Exhibit E)

Exhibit E

Statement of Assurances

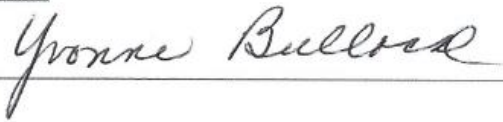

The charter school agrees to comply with all of the following provisions: (*Read and check*)

- ☒ 1. A resolution or motion has been adopted by the charter school applicant's governing body that authorizes the submission of this application, including all understanding and assurances contained herein, directing and authorizing the applicant's designated representative to act in connection with the application and to provide such additional information as required.
- ☒ 2. Recipients operate (or will operate if not yet open) a charter school in compliance with all federal and state laws, including Indiana Charter Schools Law as described in all relevant sections of IC § 20-24.
- ☒ 3. Recipients will, for the life of the charter, participate in all data reporting and evaluation activities as required by the ICSB and the Indiana Department of Education. See in particular IC § 20-20-8-3 and relevant sections of IC § 20-24.
- ☒ 4. Recipients will comply with all relevant federal laws including, but not limited to, the *Age Discrimination in Employment Act* of 1975, Title VI of the *Civil Rights Act* of 1964, Title IX of the *Education Amendments* of 1972, section 504 of the *Rehabilitation Act* of 1973, Part B of the *Individuals with Disabilities Education Act*, and section 427 of the *General Education Provision Act*.
- ☒ 5. Recipients will comply with all provisions of the Non regulatory Guidance—Public Charter Schools Program of the U.S. Department of Education, which includes the use of a lottery for enrollment if the charter school is oversubscribed, as well as with applicable Indiana law. See also relevant sections of IC § 20-24.
- ☒ 6. Recipients shall ensure that a student's records, and, if applicable, a student's individualized education program as defined at 20 U.S.C. § 1401(14) of the *Individuals with Disabilities Education Act*, will follow the student, in accordance with applicable federal and state law.
- ☒ 7. Recipients will comply with all provisions of the *Elementary and Secondary Education Act* of 1965, as amended by the *Every Student Succeeds Act* of 2015 ("ESSA"), including but not limited to, provisions on school prayer, the Boy Scouts of America Equal Access Act, the Armed Forces Recruiter Access to Students and Student Recruiting Information, the Unsafe School Choice Option, the Family Educational Rights and Privacy Act ("FERPA") and assessments.
- ☒ 8. Recipients will operate with the organizer serving in the capacity of fiscal agent for the charter school and in compliance with generally accepted accounting principles.
- ☒ 9. Recipients will at all times maintain all necessary and appropriate insurance coverage.
- ☒ 10. Recipients will indemnify and hold harmless the ICSB, the State of Indiana, all school corporations providing funds to the charter school (if applicable), and their officers, directors, agents and employees, and any

Attachment #12: Statement of Assurances (Exhibit E)

Page 2 of 2

successors and assigns from any and all liability, cause of action, or other injury or damage in any way relating to the charter school or its operation.	
<input checked="" type="checkbox"/> 11. Recipients understand that the ICSB may revoke the charter if the ICSB deems that the recipient is not fulfilling the academic goals, fiscal management, or legal and operational responsibilities outlined in the charter.	
Signature from Authorized Representative of the Charter School Applicant	
I, the undersigned, am an authorized representative of the charter school applicant and do hereby certify that the information submitted in this application is accurate and true to the best of my knowledge and belief. In addition, I do hereby certify to the assurances contained above.

Insurance Estimate: Indianapolis STEAM Academy

Prepared on: August 20, 2018
By: Chad Miller

To Whom It May Concern:

We appreciate the opportunity to provide the outlined insurance estimate for Indianapolis (Indy) STEAM Academy.

Miller Insurance group has operated as an independent agency in Indiana since 1937. We have earned outstanding relationships built on trust, industry knowledge, and service excellence. We are a supporter of quality education in Indiana, whether it be a traditional public school, charter school, or independent school, we want all students in Indiana to have the opportunity to receive an excellent education regardless of the zip code in which they are born. One of our agents, Chad Miller, spent six years working in a public charter school, four of which were as an administrator. Our agency is uniquely positioned to provide coverage which meet the requirements of the law and ICSB, and to advise our clients on school-specific strategies to mitigate risk.

Indiana Charter School Board General Requirements

- We are licensed to do business in The State of Indiana as required by law.
- We will utilize the following carriers, which are admitted in the State of Indiana, to place Indy STEAM Academy's exposure: Hanover Insurance, Liberty Mutual, Markel, Selective, and Travelers Insurance. We also have access to secondary markets in the event Indy STEAM Academy is not able to be placed with a standard carrier.
- We will only place this school with at least an "A" rated insurance carrier as determined by A.M. Best rating guidelines.

Indiana Charter School Board Minimum Insurance Requirements

On behalf of Indy STEAM Academy, the following coverages can be secured to meet all requirements of the ICSB and/or additional insureds as appropriate:

- **Workers' Compensation Liability:** Workers' compensation for all employees as required by Indiana law (see IC § 22-3).
- **Commercial General Liability:** Commercial general liability in an occurrence form, with limits of not less than \$1,000,000 per occurrence and \$2,000,000 aggregate for bodily injury, personal injury and property damage liability coverage. Liability coverage shall include the following: all premises and operations, products/completed operations, independent contractors, separation of insureds, defense and contractual liability. Such comprehensive general liability insurance must expressly cover sexual abuse/molestation liability, and medical payments of \$5,000. The ICSB and the IDOE must each be named as an Additional Insured on a primary, non-contributory basis for any liability arising directly or indirectly from all school business, including school-

millerinsurancegrp.com
info@millerinsurancegrp.com

sanctioned functions that may take place outside of normal school hours. As noted above, a copy of the endorsement reflecting these additions must be submitted to the ICSB.

- **Educators' Legal Liability (including Directors' and Officers' and Employment Practices Liability):** Liability insurance covering the school and its directors and officers from liability claims arising from wrongful acts, errors or omissions with regard to the conduct of their duties related to operation and management of the school with limits of not less than \$1,000,000 per occurrence and \$3,000,000 aggregate.
- **Automobile Liability:** Required when any motor vehicle (whether owned, non-owned or hired) is used in connection with all school business, including school-sanctioned functions that may take place outside of ICSB Insurance Requirements Page 2 normal school hours, with limits of not less than \$1,000,000 per occurrence for bodily injury and property damage. NOTE: such liability insurance provides coverage for the school only. The ICSB strongly encourages schools to establish a policy whereby any school employee who drives a personally-owned vehicle for school-related business (including field trips or conferences) must have personal auto coverage of at least \$100,000, and that all such employees must provide certificates of insurance to keep on file at the school.
- **Umbrella/Excess Liability:** Umbrella or Excess Liability Insurance with limits of not less than \$3,000,000 to provide additional limits for underlying general, automobile, employers' and educators' legal liability.
- **Property Insurance:** Property insurance from an A-rated insurance carrier for full Replacement Cost of property, whether by lease or other agreement, from physical loss or damage. Such insurance shall cover boiler and machinery exposures and business interruption/ extra expense losses. If the charter school is leasing its property, the ICSB will accept insurance in the name of either the school or the property owner.
- **Student Accident Coverage:** All Indiana High School Athletic Association (IHSAA) schools must include coverage for athletic participation.
- **Employee Dishonesty Liability:** Employee Dishonesty liability insurance in the amount of at least \$250,000 for all school employees. Note that the state of Indiana has specific fidelity bond requirements for certain school employees.
- **Cyber Liability:** Schools may wish to obtain cyber liability insurance, depending upon the school model.
- **Foreign Travel/Field Trip Liability:** Schools may wish to obtain liability insurance covering field trips and/or foreign travel, depending upon the school model. Additional Requirements For Schools

Indiana Charter School Board Additional Requirements

We are also aware that contracting with an Educational Management Organization Charter schools authorized by the ICSB that enter into a management agreement with an Educational Management Organization ("EMO") must factor in these additional requirements:

- The service agreement between the charter school and the EMO must require the school to be named as an Additional Insured on the EMO's liability policies.
- The EMO must obtain liability insurance coverage from an A-rated carrier naming the ICSB and the IDOE as Additional Insured on a primary, non-contributory basis. As noted above, a copy of the endorsement reflecting these additions must be submitted to the ICSB.

Attachment #15: Insurance Coverage
Miller Insurance Group
Page 3 of 4

millerinsurancegrp.com
 info@millerinsurancegrp.com

- Workers' compensation insurance that complies with state law must be carried by whichever entity employs the school's staff. If both the school and the EMO employ staff, then each entity must carry the appropriate insurance coverage for their respective employees. If the school does not employ any of the staff or administration and does not carry workers' compensation insurance, then the service agreement between the charter school and the EMO must include a provision to indemnify the school against any liability for workers' compensation claims.

Based on the initial estimates, and the programming required, it would be our counsel that the following estimates could be used for budgeting purposes

Year One Projection (2019-2020 Academic Year) – New School with Leased Space

Property and Casualty Insurance Coverage	Annual Premium
Liability	
Directors and Officers Liability, Educators Legal Liability, and Employment Practices Liability	\$4,780
Workers Compensation/Employer's Liability	\$5,460
Commercial General Liability (including "Abuse" or "Molestation")	\$2,435
Automobile Liability	\$1,035
Employee Dishonesty Liability	\$1,255
Cyber Liability	\$840
Umbrella Liability	\$3,050
Liability Cost	\$18,855
Property	
Business Auto	\$2,005
Business Personal Property & Business Income and Extra expense	\$1,125
Property Cost	\$3,130
Total Cost	\$21,985
Optional Coverages	
Law Enforcement Professional	\$1,760
Foreign Travel Liability	\$1,245

Estimates were made based on the following based on the following:

- 200 Students
- 25 Staff Members
- One commercial auto (likely 16-passenger van)
- Business Personal Property is estimated at \$325,000

info@millerinsurancegrp.com

Medical Insurance Coverage	Monthly Premium
Medical (<i>Individual</i> : \$3,000 deductible / \$6,000 out of pocket max <i>Family</i> : \$6,000 / \$12,000)	
Employee Only	\$534
Employee and Child(ren)	\$936
Employee and Spouse	\$994
Family	\$1,260

***Important note:** Insurance market conditions can change quickly, which makes it difficult to project insurance costs for the fall of 2019. This estimate has been put together using knowledge from our carrier companies and our experience insuring charter schools. Insurance rates can be affected by a number of factors and therefore come with a high degree of variability.

Should you have any questions, feel free to contact me by phone or through email.

For our youth,

A handwritten signature in blue ink that reads "Chad F. Miller". The signature is fluid and cursive, with the first name "Chad" and last name "Miller" clearly distinguishable.

Budget and Staffing Workbook

Attachment #16: Budget and Staffing Workbook
School Enrollment Projections

School Enrollment Projections

(must align with Charter Application Enrollment Plan)

School Name: **Indianapolis (Indy) STEAM Academy**
 Planned Opening Year: **2019-20**

Enrollment	Year 1	Year 2	Year 3	Year 4	Year 5
Kindergarten	75	75	75	75	75
Grade 1	75	75	75	75	75
Grade 2	50	75	75	75	75
Grade 3		50	75	75	75
Grade 4			50	75	75
Grade 5				50	75
Grade 6					50
Grade 7					
Grade 8					
Grade 9					
Grade 10					
Grade 11					
Grade 12					
Adult					
Total Enrollment:	200	275	350	425	500
Special Education #	20	27	42	64	75
English Learners #	30	55	70	107	125
FRL #	170	234	298	362	425
Basic Grant	\$ 1,070,400.00	\$ 1,471,800.00	\$ 1,873,200.00	\$ 2,274,600.00	\$ 2,676,000.00
Complexity	\$ 282,344.50	\$ 388,638.90	\$ 494,933.30	\$ 601,227.70	\$ 705,861.25
Adult Grant	\$ -	\$ -	\$ -	\$ -	\$ -
Total:	\$ 1,352,744.50	\$ 1,860,438.90	\$ 2,368,133.30	\$ 2,875,827.70	\$ 3,381,861.25

The complexity amount is an **estimate** based on the complexity index for proposed location of the charter school multiplied by the estimated number of students eligible to receive free or reduced lunch. The school's actual first-year complexity amount will be based on the percentage of students who qualify for SNAP, TANF, or foster care services.

Attachment #16: Budget and Staffing Workbook
Five-Year Budget
Page 1 of 3

Expected New School Annual Operating Budget -- YEAR 1 -- Fiscal Year July 1-June 30							
School Name: Indianapolis (Indy) STEAM Academy							
Planned Opening Year: 2019-20							
Special Instructions for Schools Contracting with a Management Company: Please include a note in the assumptions column and budget narrative if any of the listed amounts include additional service, consulting, facility, or licensing fees paid to a management company or affiliate of a management company that are not included in Line 97 (CMQ/EMO fee). For example, you should note any additional fees for instructional or support supplies and resources; license fees for materials, software, or educational programming; or fees related to the management, sale, or lease of real estate. Please also state whether your facility is leased or purchased from a management company or affiliate of a management company.							
REVENUES	Year 0	Year 1	Year 2	Year 3	Year 4	Year 5	Assumptions

Footnotes:

- (1) The foundation amount for all charter schools in FY2019 is \$5,352, regardless of corporation of legal settlement. Students in Full Day Kindergarten are treated as 1 student, 1/2 day kindergarten is treated as 0.5 for purposes of ADM.
- (2) For the 2018-19 FY, new charter schools are entitled to \$500 per student to be used for capital, technology, and transportation costs. Subsequent awards depend on continued funding of the grant in the biennial budget. See IC 20-24-13 for additional criteria and more details.
- (3) This is a competitive grant. Funding is not guaranteed. The funding for the PCSP grant is distributed through reimbursement process. Contact IDOE's Office of Title Grants and Support for more information.
- (4) Unrestricted Federal Revenue Direct from the Federal Government; Restricted Federal Revenue Direct from the Federal Government; Restricted Federal Revenue Through the State, etc.
- (5) Includes the Head of School, School Leader, Executive Director, Chief Executive Officer, as well as associate or assistant executive positions.
- (6) Includes Vice- and Assistant Principals.
- (7) Includes Chief Academic Officers, Directors, Deans, and Coordinators of: Curriculum, Instruction, Faculty, Students, Assessment, Student Affairs, Student Achievement, and similar positions.
- (8) SBOA/Form 9 Classification of teachers is as follows: Expense Accounts: Preschool - 11015; Full Day Kindergarten - 11050; Elementary School - 11100; Middle/Junior High School - 11200; and High School - 11300. Object Accounts: Certified Salaries - 110; Non-Certified Salaries - 120; (Temporary) Licensed Employees - 135; (Temporary) Non-Licensed Employees - 136; Stipends - 131; and (Temporary or Permanent) Overtime Salaries - 140.
- (9) Includes Social Workers, Counselors, Psychologists, and Speech, Occupational, and Physical Therapists.
- (10) Secretary, Receptionist, Attendance Clerk, Office Manager, Cafeteria Worker, and other full or part-time employees not specifically described.
- (11) Includes Staffing for Instruction and Curriculum Development, Instructional Staff Training, etc.
- (12) Social Security for both Certified and Uncertified Workers.
- (13) Includes Group Life Insurance, Group Health Insurance, Group Accident Insurance, Other Authorized Group Insurance, and Workers Compensation Insurance (does not include Unemployment Insurance).
- (14) Includes Severance/Early Retirement Pay, Public Employees Retirement Fund, Teachers Retirement Fund, Public Employees Retirement Fund (Optional Contribution), Teacher Retirement Fund (Optional Contribution).
- (15) Any other benefits not otherwise classified above.
- (16) Includes Systems Analysis and Planning, Application Development, Systems Operations, Network Support, and Hardware Maintenance and Support.
- (17) Expenses associated with extra-curricular or athletic activities.
- (18) One half percent (0.5%) of the Basic/Adult Learner Grant amount.
- (19) Include only those fees (per-pupil, contingent, or fixed) paid to a management company for educational or management services and describe how the fee is calculated in the budget narrative. All other amounts paid to a management company or affiliate of the management company must be accounted for elsewhere in this worksheet.
- (20) Schools are required to maintain an account in reserve to cover expenses for school closing. \$10,000 should be placed in reserve starting in year 2 with a balance of \$30,000 by year 4.

Indy STEAM Academy

Attachment #17

Budget Narrative

Indy STEAM was awarded the Charter Schools Program grant in the amount of \$900,000 in March 2018 for a three-year period (Pre-opening, Year 1 and Year 2). At the time of the award, Indy STEAM Academy was not authorized. It was our understanding that we would have 18 months to expend the first round of funds, which would give us time to get authorized. We were not able to get authorized June 2018, so the Indiana Department of Education (IDOE) revoked our funds. The IDOE indicated that once we are authorized that we could reapply for these funds. We hope that we are able to get authorized and that the IDOE will restore our funds. Indy STEAM Academy has developed this application with the assumption that we would have the CSP grant; but we have established a budget without the CSP grant funds to demonstrate that we will still be able to operate and successfully implement the STEAM model with fidelity. However, we will have to secure funds to cover start-up costs. If the academy is authorized and is able to receive additional funds through the CSP grant, it would allow us to have “state of the art” equipment like maker spaces and 3D printers as well as additional funds to purchase more facility space to spread out to have a science lab and engineering lab. Additional grant funds would allow the academy to have more classroom assistants for a 2:1 ratio instead of one per grade level. As stated previously, the budget provided without grant funds will allow the academy to operate as planned. In year 3, there will be more funds through our basic state aid to buy additional resources and technology. The academy plans to apply for additional grant funds from organizations like the Walton Foundation in addition to other local, state, and national competitive and discretionary grants.

Budget Narrative: Revenues Year One

The projected **Year One** budget anticipates the enrollment of 200 students grades K-2 with the Basic Grant revenue of approximately **\$5,352** per-pupil with complexity for a total of **\$1,352,744.50**. The academy anticipates receiving federal revenues through reimbursement for student breakfast, lunch and textbooks based on 85% free and reduced lunch totals. We anticipate receiving Title I revenues which are based on an 85% poverty index (170 students) @ \$555.00 per student for a total of \$94,350. Title II revenues are based on an 85% poverty index @ \$9.00 per student for a total of \$1,800.00. We anticipate receiving \$4,800 from federal funds and \$7,500 in state funds to support the instruction of our English Language Learners which is based on the assumption of approximately 15% (30) students. The academy anticipates receiving \$46,000 from the state and \$10,000 from federal funds to support the instruction of Special Needs students. The academy anticipates receiving \$26,000 for Title IV at a rate of \$131.00 per student for a total of \$26,200. The academy anticipates receiving funds to support summer school - \$50,000 for approximately 100 students at a rate of \$500.00 per student and funds for remediation of all students in the amount of \$25,000 at the rate of \$125.00 per student. The **total revenues for Year One are \$1,605,144.50**. This is a very modest, but adequate budget and we plan to operate within our means until we can secure additional funding sources.

Budget Narrative: Expenditures Year One

Staffing expenditures include salaries for the following staff: (1) Head of School \$95,000.00, (1) Business Manager \$50,000; (1) Office Manager \$35,000.00, (2) Instructional Coaches @ \$50,000.00, (3) Lead Teachers \$45,000; (4) Fine Arts teachers including librarian \$40,000.00; (5) Novice Teachers \$35,000; (1) Special Education Resource Teacher \$40,000, (1) ELL Resource Teacher \$45,000; (1) Parent Coordinator \$35,000; (3) Teacher Assistants \$25,000, (1) School Nurse \$40,000; (.25) Speech Therapist; (.25) \$50,000; School Psychologist(.25) \$50,000; (1.5) custodians \$25,000.00 each; and (1) cafeteria worker \$20,000 Note: The total costs for staff salaries for Year One is \$1,083,000. Benefits including health insurance and retirement will be approximately 28% of annual salaries which is a total of \$295,508.50. The total cost for salaries and benefits for Year One is \$1,378,508.50.

Instructional Supplies and Resources expenditures include textbooks and consumable workbooks \$46,000, library books \$4,000, assessment materials \$15,000, classroom supplies \$14,000, instructional software \$15,000, field trips, \$8,000, and enrichment materials for Success Time, After School Tutoring, Extra-curricular program, Science Kits, Engineering modules, and math manipulatives totaling \$32,000. The total costs for instructional supplies and resources is \$161,000.

Support Supplies and Resources expenditures include computers for administrative staff \$2,100, software \$400, operational supplies for the office, cafeteria, and maintenance \$14,000, association dues and fees \$1,000 and professional development for staff prior to the beginning of the school year \$40,000. The total cost for support supplies and resources is \$57,500.

Technology expenditures include computers & I-pads for students \$20,000, printers and interactive whiteboards \$14,000 and instructional software licenses \$15,000. The academy would like for each classroom to have an interactive whiteboard and one-to-one student computing. The current funds will provide approximately 100 computers. We would like a combination of computers and I-Pads which are more suitable for younger students. We will need additional grant funds in addition to this allocation. The total cost for technology is \$49,000.

Purchased or Contract Services expenditures include audit fees \$10,000, printing and copy machine lease \$9,000, technical services for file server and technical troubleshooting \$10,000 phone and internet service \$7,500, student management system \$15,554, insurance \$21,985, food service, \$140,000, travel \$4,000, postage \$2,400, transportation for fieldtrips \$8,000 and promotional expenses \$1,000. The approximate cost for contract services is \$229,439.

Facilities Expenses include the facility lease \$200,000, interest \$10,000, equipment (debt service) \$113,753 and interest on loan \$7,000, gas and electric \$24,000, water and sewage \$1,500, repairs and maintenance \$6,000, waste disposal \$3,600, playground equipment, cafeteria tables, and maintenance equipment \$7,000. The total cost for Facility expenses is \$389,853.

Governing Board Expenses include Board on Track Membership fee \$10,500, Board training \$1,000, supplies \$1,000 and legal services \$10,000. The total cost for governing board expenses is \$26,500.

Other Expenditures include administrative fee for authorizer \$26,760, bank fees \$180.00 for a total of \$26,940. The academy will save \$10,000 each remaining year up to \$40,000 for dissolution.

The pie chart below identifies the breakdown of expenditures by percentages for Year One:

The chart clearly demonstrates that the major expense for the academy will be personnel salaries and benefits which are 60% of the budget expenditures. The second greatest cost factor is facilities which is 17% of the budget. Purchase services are 10% and supplies and materials are 7% of the total budget. Indy STEAM Academy realizes the importance of meeting its enrollment targets each year to afford its operational costs.

The academy will seek funds from the Walton Foundation, and Charter School program grants. Included in this narrative is a wish list of start-up costs using CSP grant funds. The budget for Year One has a very small surplus

because we are strategically using funds to build our program. The first two years will be lean; however, starting year three, there will be large surpluses to cover any additional needs. The academy anticipates more savings in Years 3-5 to demonstrate the academy's ability to sustain itself in the upcoming years. These budget years have significant carryover to compensate for unexpected costs and cover shortfalls if the academy does not meet its minimum enrollment targets, or if there is a change in state and funding sources. All efforts will be made to ensure a stable enrollment by achieving 95% of our targeted enrollment and by retaining approximately 85% of our current students and staff each year. The academy believes that the innovative instructional model will attract and retain students to achieve our enrollment goals.

Sufficient Funding to Open:

Indy STEAM Academy will have sufficient fund to open as budgeted without grant funds. We will be able to provide supplies, materials and technology to effectively implement our instruction model. We will receive \$325,000 from **Charter Schools Capital (see Attachment #10)** upon authorization to support opening costs until the academy can receive its first installment. As with any start-up, the first two years will be spent building our program. We will stay focused and on target to implement our model with fidelity. The Five-Year budget demonstrates our ability to sustain the program as we **remain conservative and spend only what is needed** in Years 3-5 to save for the future and unexpected expenses.

Contingency Plans:

Contingency Plan A: Reduce Staff and Expenditures

If enrollment targets are not met, the academy will still be able to operate with the appropriate ratio of staff (25:1) to accommodate the lower number of students enrolled. The academy will reduce instructional supplies and materials, support supplies and resources, and contracted services by 25%; however, the facility expenditures will remain the same since the academy will continue to operate with the existing lease and utility costs. The chart below identifies a Five-Year budget with a reduction of 50 students less than the proposed targeted enrollment each year. The chart demonstrates that the academy will be able to operate and maintain the integrity of programs and services with reduced student enrollment **revenues and expenditures based on 150 students** if this scenario were to occur.

Five Year Reduced Budget Summary

	Year 0	Year 1	Year 2	Year 3	Year 4	Year 5
Reduced Enrollment	Planning	150	200	250	300	350
Basic State Aid	-	\$1,014,450	\$1,352,744	\$1,690,750	\$2,028,900	\$2,367,050
Revenues	-	\$1,704,541	\$2,006,278	\$2,426,856	\$2,971,631	\$3,495,218
Expenditures	-	\$1,702,305	\$1,978,539	\$2,355,335	\$2,594,427	\$3,022,384
Surplus	-	\$2,236	\$27,739	\$71,521	\$377,204	\$472,834

Contingency Plan B: Maintain a Wait List

The academy will maintain a "Wait List" of at least 10% more students than the targeted enrollment each year to ensure that our enrollment targets are met. The chart below identifies the ideal number of students to have on our wait list to ensure that our targeted enrollment is met. This wait list will provide a pipeline of additional students from which to draw to ensure that our enrollment targets are met, if there are "No Shows."

	Year 1	Year 2	Year 3	Year 4	Year 5
Enrollment Target	200	275	350	425	500
Wait List	20	27	35	42	50

Attachment #17 Budget Narrative
Contingency Plan C: "Over Enroll"

Page 4 of 5

The academy could "over enroll" the number of seats anticipated to ensure that the targets are met. The academy has considered that there could be "No Shows" at the beginning of the school year for a variety of reasons, so this overage would balance the number of students needed to ensure that our enrollment targets are met. If all students "Show," the Board of Directors would reserve the right to open additional classes to ensure stable enrollment.

	Year 1	Year 2	Year 3	Year 4	Year 5
Enrollment Target	200	275	350	425	500
Over Enrollment	225	300	375	450	525

Contingency Plan D: Last Resort - Use Contingency Funds to Cover Enrollment Shortfalls

Indy STEAM Academy could use contingency funds to cover enrollment shortfalls as identified in the chart below. The contingency funds are divided by the Basic State Aid +complexity per pupil amount (6,763) to determine the number of students that could be covered using these funds. However, the academy is committed to meeting its enrollment targets, so these funds can be used for other unanticipated emergencies.

Contingency Funds

	Year 2	Year 3	Year 4	Year 5
Surplus	\$36,979	\$95,361	\$502,937	\$630,444
Students per BSA \$6,793 +complexity	5	14	74	93

Sufficient Funding

The Five-Year Budget Plan is aligned with the projected revenues and expenditures which will be in balance each year when enrollment projections are met. The ending cash balances and surplus funds over a five- year period are identified below:

Enrollment Projections		Year 1	Year 2	Year 3	Year 4	Year 5
		200	275	350	425	500
Basic Grant (\$5,352)		Year 1	Year 2	Year 3	Year 4	Year 5
+complexity		\$1,352,744.50	\$1,860,438.90	\$2,368,133.30	\$2,875,827.70	\$3,381,681.25
Cash Balances	Year 0	Year 1	Year 2	Year 3	Year 4	Year 5
Revenues	-0-	\$2,272,722.50	\$2,675,038.90	\$3,235,809.30	\$3,962,175.70	\$4,660,291.25
Expenditures	-0-	\$2,269,740.50	\$2,638,059.23	\$3,140,447.92	\$3,459,237.93	\$4,029,846.58
Surplus	-0-	\$2,982.00	\$36,979.67	\$95,361.38	\$502,937.77	\$630,444.67

Sufficient Funds

a) Start-up Costs: Indy STEAM Academy will begin recruitment and enrollment campaigns immediately after authorization from November through June to prepare for the first day of school (July,30, 2019). We no longer have the CSP grant award, but hope to be able to get these funds back after authorization. The academy will also apply for Walton Foundation funds. The academy would like to hire an office manager, business manager, and parent and community engagement specialist to assist with recruitment and enrollment efforts. The academy would also like to hire two coaches (on stipend) to work on developing curriculum maps to align our curriculum with the Indiana Academic Standards. The academy would like to hire (stipend) a technology specialist work periodically on stipend to assist with setting up PowerSchool, Student Information System) and technology for instructional use. The academy would like to provide professional development two weeks prior to the start of school to help teachers become acclimated with the culture and climate and familiarize themselves with the curriculum and instructional model. We will apply for grant funds from Project Lead the Way for our STEAM coach to participate in the "Train the Trainer" program.

The academy's recruitment and marketing team understands the sense of urgency to ensure that the academy is able to operate well above its minimum target enrollment. The recruitment and marketing team has planned a strong campaign as identified in this application to achieve these goals. The academy plans to conduct three major fundraisers each year, find additional grant funding sources, and seek donations and in-kind resources and services from external partners to help offset start-up costs and funds for additional equipment. The academy's administrative team will be lean, meaning CEO/Head of School will serve in the capacity of Superintendent/Principal to keep administrative costs low the first two years of operation. An Assistant Principal and Director of Special Education will be hired in Year 3. The academy will partner with Indiana Charter School Resource Network to identify service providers.

b) Special Education Costs:

Indy STEAM Academy will hire one Special Education Resource teacher to provide services for students with IEP's or who are suspected of or in the process of being identified with special needs. The academy will also contract .25 FTE Speech Therapist and School Psychologist to address the needs of students. The academy will partner with Marian University to assist us with managing special education services paperwork and mandated reporting until Year 3 where we will hire a .50 Special Education Director. The academy will hire an additional Special Education Resource Teacher as our numbers of students receiving services increase.

c) Transportation Costs

Indy STEAM Academy will provide transportation for homeless students to comply with the federal McKinney-Vento Homeless Act, 42 USC 11431, and for students with disabilities whose IEPs require transportation in compliance with the Individuals with Disabilities Education Act and 511 IAC 7-43-1(u) through a private contracted bus service. Once The academy reaches full-capacity in Year 7, we will provide middle school students (Grades 6-8) with free monthly IndyGo bus passes and discounted or free passes to their parents or guardians.

d) Retirement Plan Contributions

The State of Indiana has a mandatory requirement to join the Teachers Retirement Fund. The budget factors an additional 28% of annual salaries to cover retirement and health insurance contributions. The academy will contract with a service provider to assist with direct deposit, selecting health care providers, making contributions to retirement funds.
