

# Status of Indiana Air Quality 30-Year Trend Charts Southeast Region 1993-2022

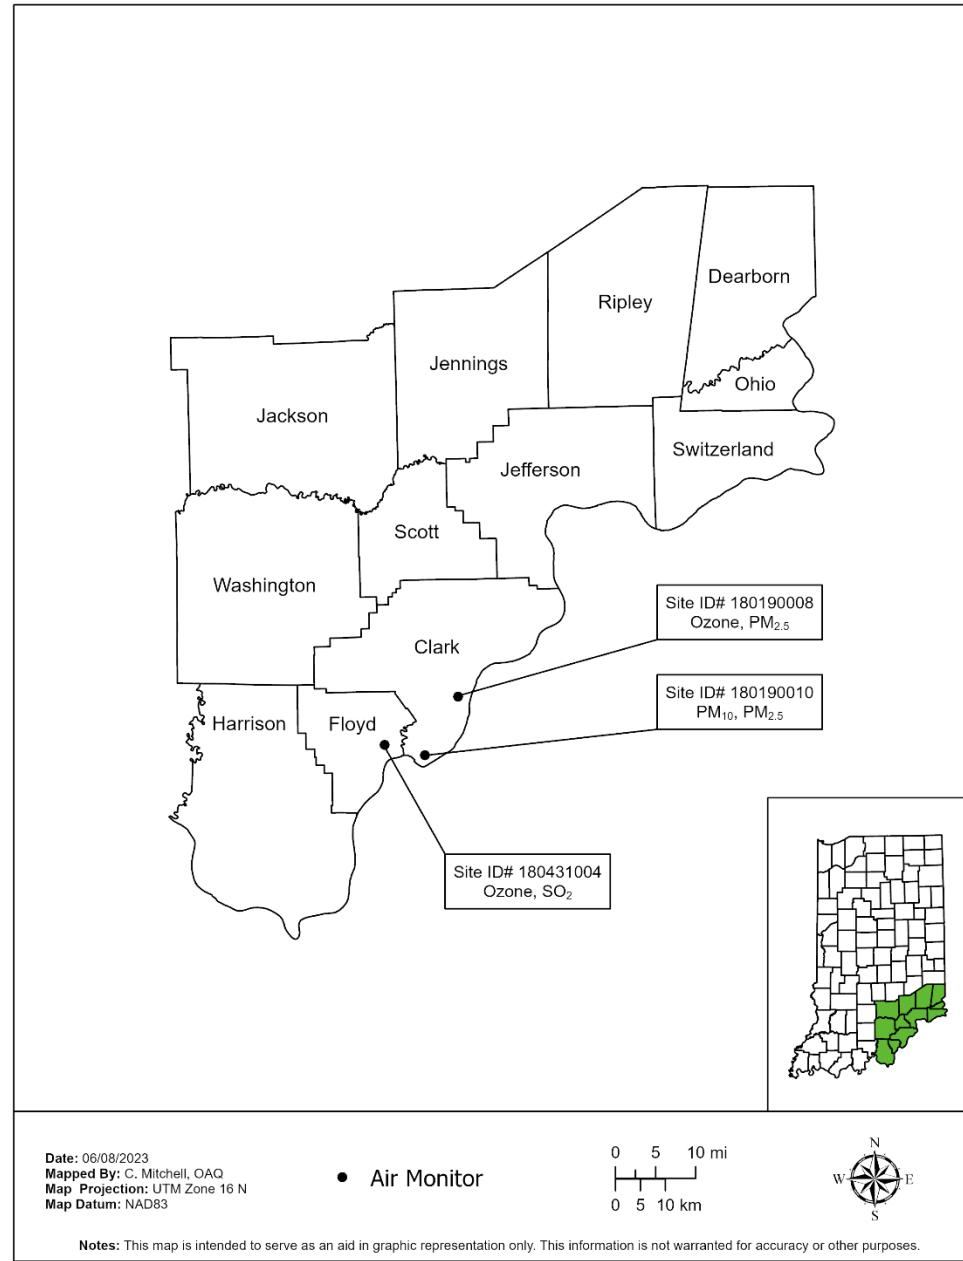

Indiana Department of Environmental Management (IDEM)  
Office of Air Quality

August 2023

# Southeast Region

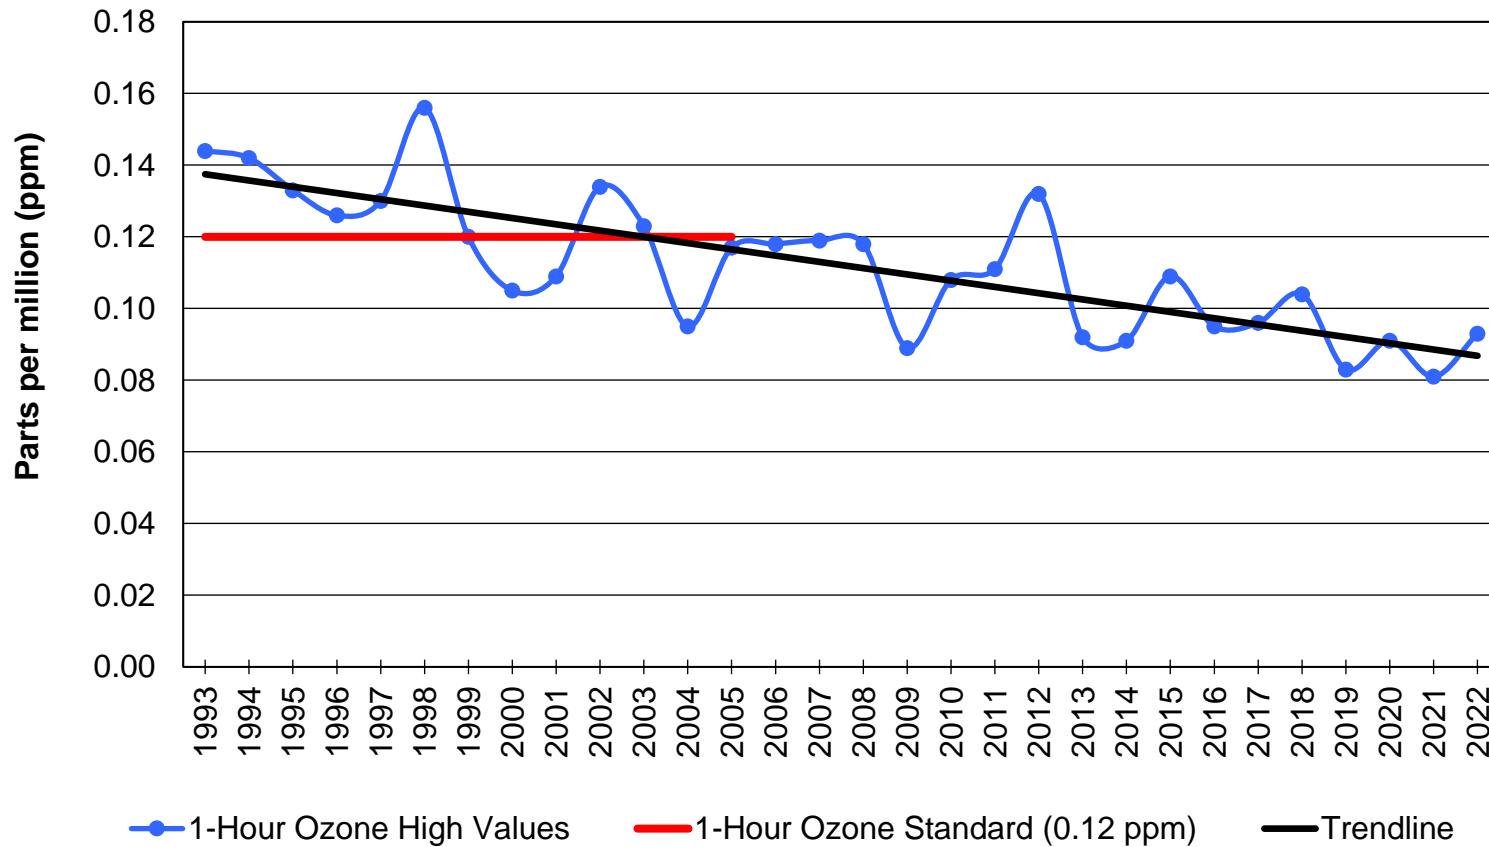

# Southeast Region Monitors Operating In 2022

# Ozone

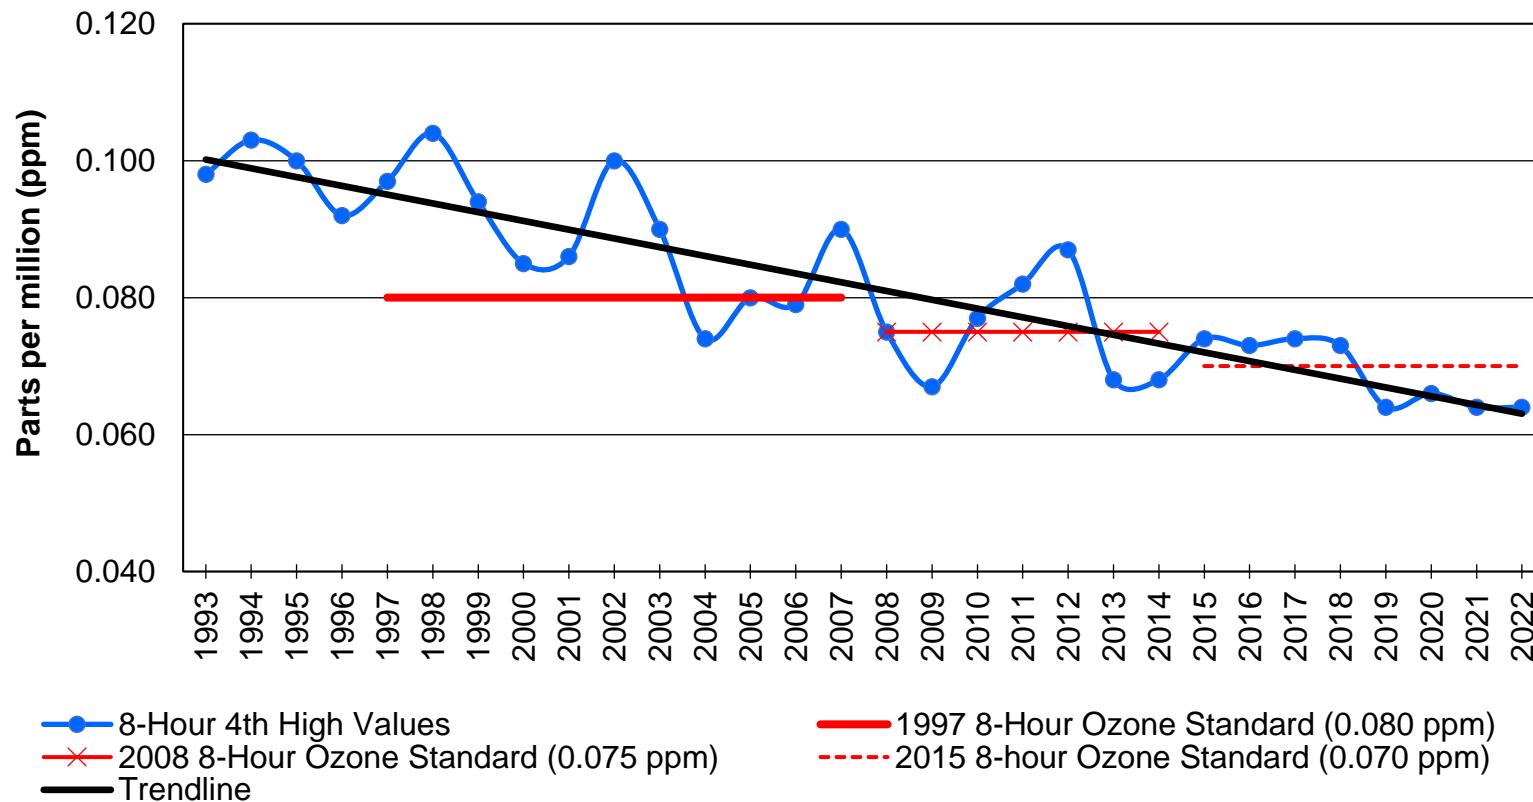

## 1-Hour Ozone High Values Southeast Region

In 1979, United States Environmental Protection Agency (U.S. EPA) established a 1-hour ozone standard ([44 FR 8202](#)). The standard was set at 0.12 parts per million (ppm) not to be exceeded more than once per year on average over three years. In 2005, U.S. EPA revoked the 1-hour standard, however IDEM continues to monitor for the standard.

# Ozone

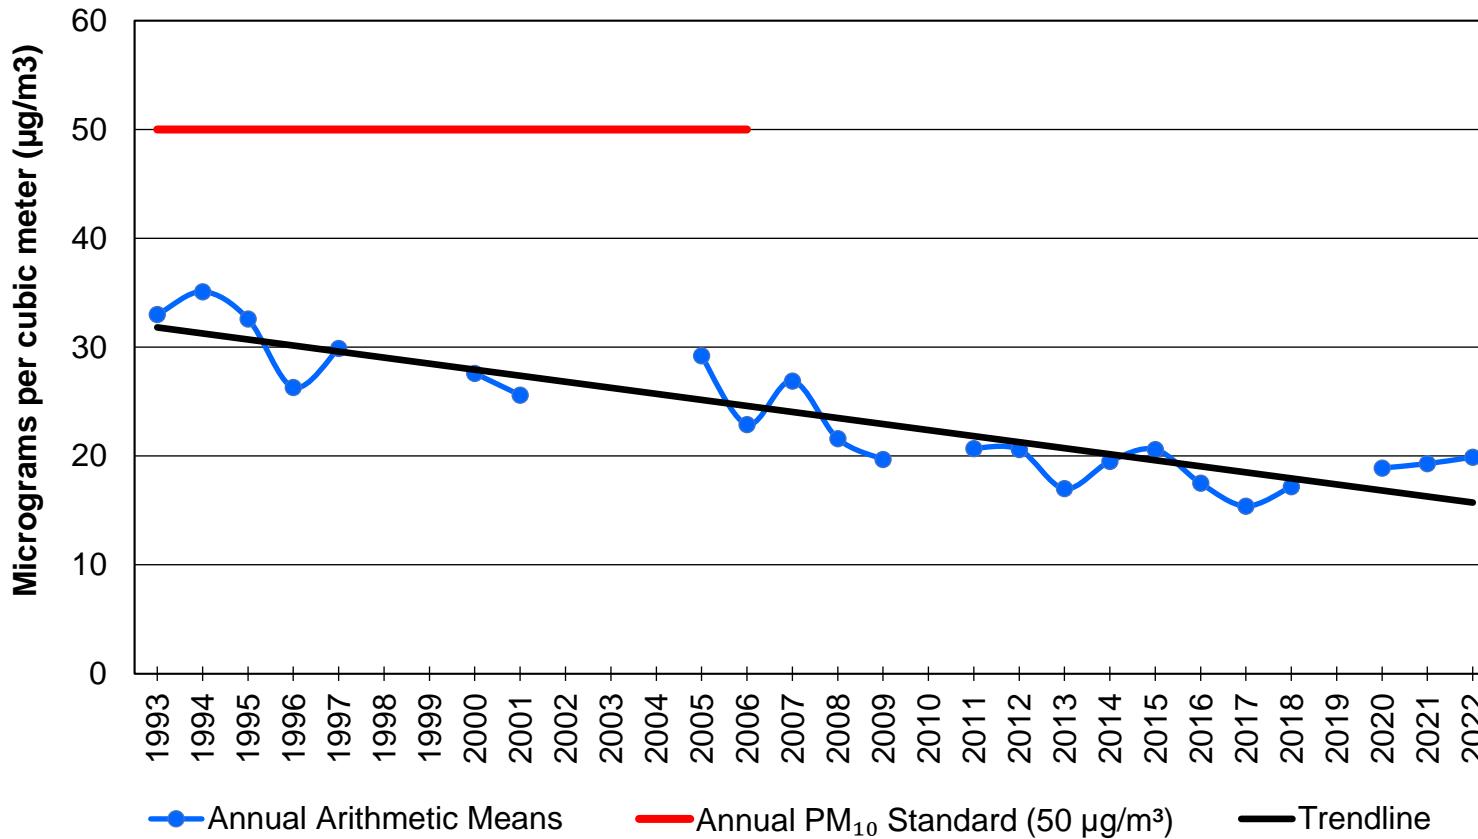

## 8-Hour Ozone 4th High Values Southeast Region

In 1997, United States Environmental Protection Agency (U.S. EPA) established an 8-hour ozone standard ([62 FR 38856](#)). The standard was set at 0.080 parts per million (ppm) not to be exceeded. In 2007, U.S. EPA lowered the 8-hour standard to 0.075 ppm not to be exceeded ([73 FR 16436](#)) and in 2015 further strengthened the standard to 0.070 ppm ([80 FR 65292](#)). Compliance is determined by evaluating the fourth highest daily maximum concentration averaged over a 3-year period.

# Particulate Matter

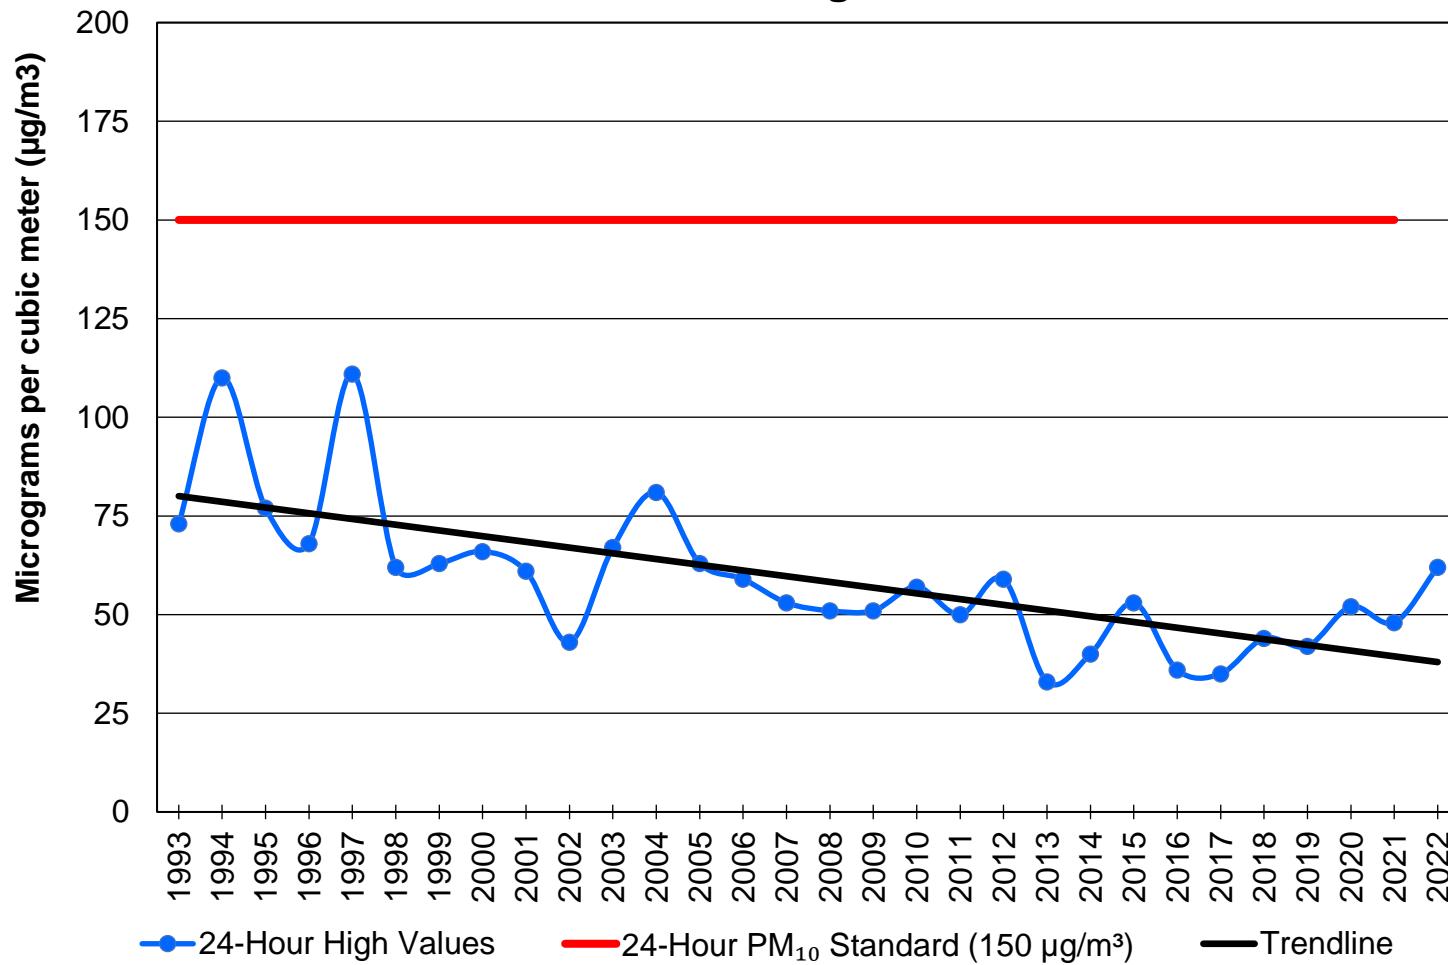

## Annual Arithmetic Mean PM<sub>10</sub> Values Southeast Region

In 1987, United States Environmental Protection Agency (U.S. EPA) established an annual coarse particles (PM<sub>10</sub>) standard ([52 FR 24634](#)). The standard was set at 50 micrograms per cubic meter (µg/m<sup>3</sup>) with the annual arithmetic mean averaged over a 3-year period not to be exceeded. In 2006, U.S. EPA revoked the annual standard, however IDEM continues to monitor for the annual standard in certain regions.

# Particulate Matter

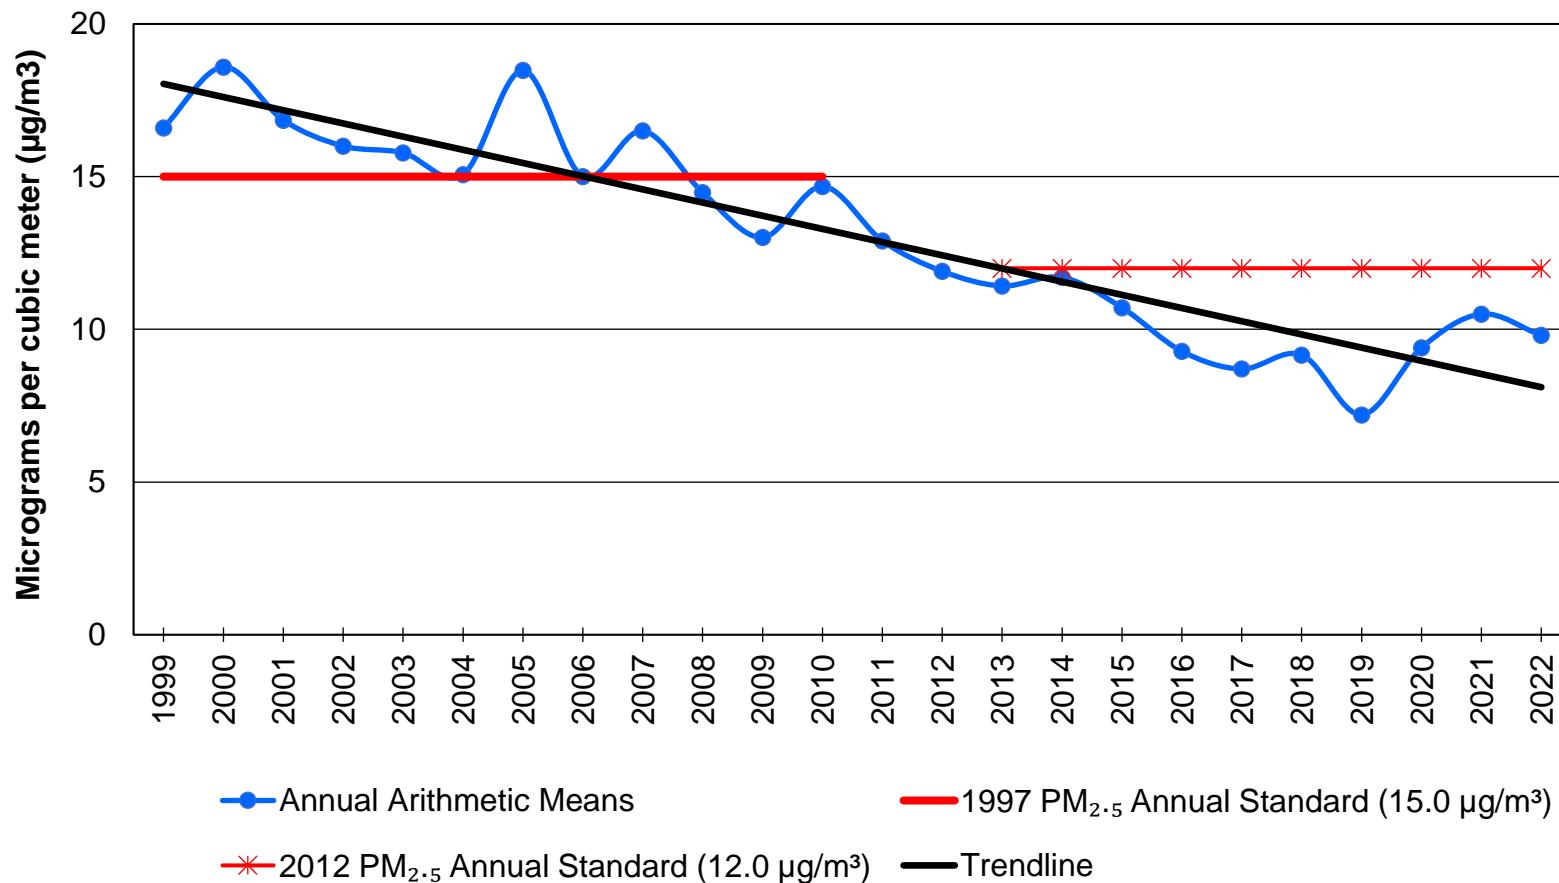

## 24-Hour PM<sub>10</sub> High Values Southeast Region

In 1987, United States Environmental Protection Agency (U.S. EPA) established a 24-hour coarse particles (PM<sub>10</sub>) standard ([52 FR 24634](#)). The standard was set at 150 micrograms per cubic meter (µg/m<sup>3</sup>) not to be exceeded more than once per year on average over three years.

# Particulate Matter

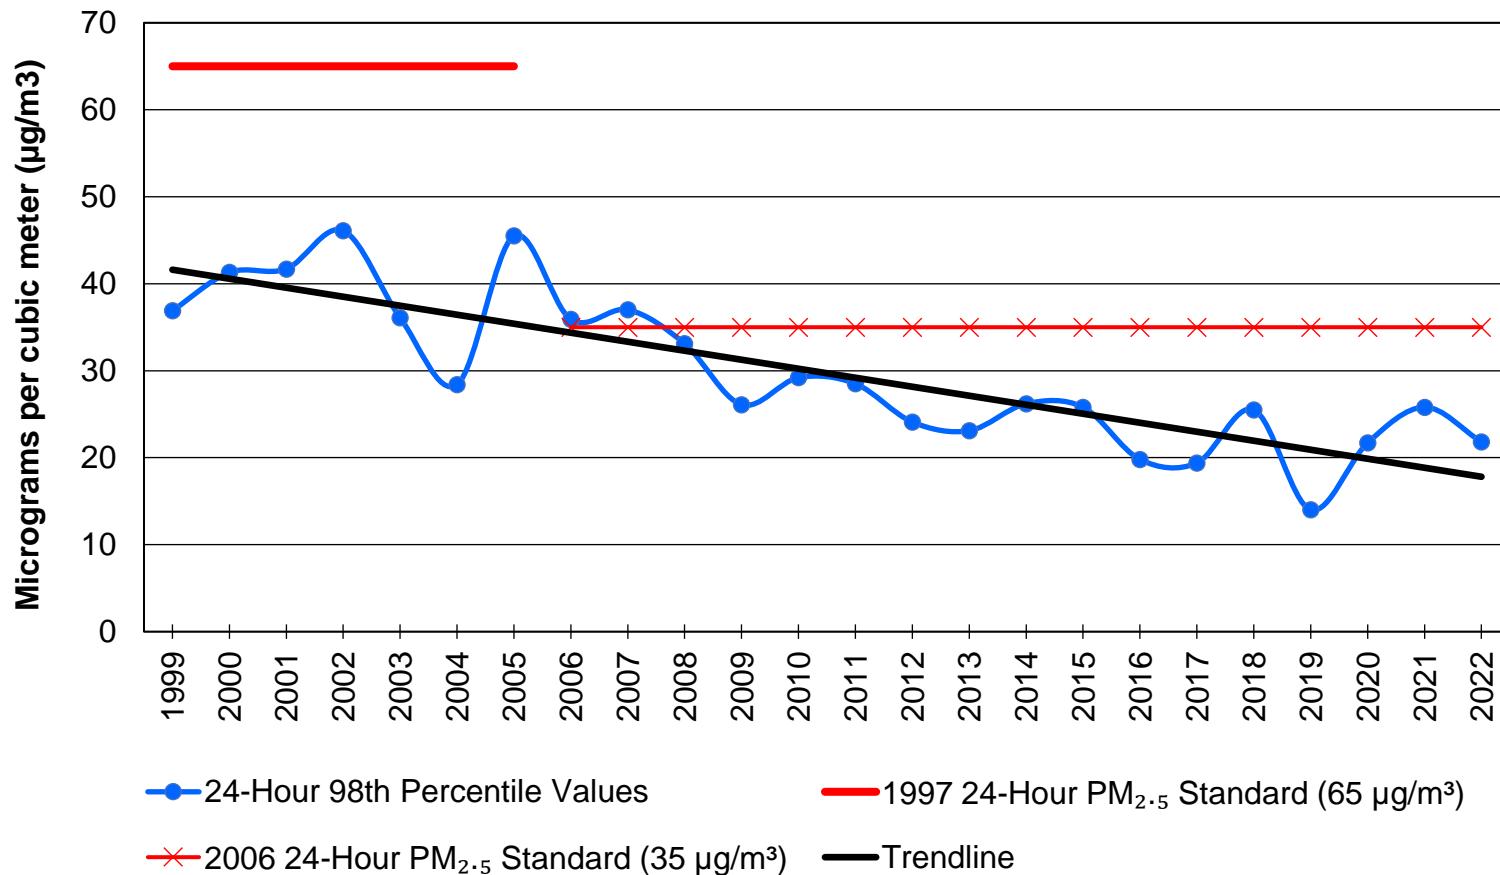

## Annual Arithmetic Mean PM<sub>2.5</sub> Values Southeast Region

In 1997, United States Environmental Protection Agency (U.S. EPA) established an annual fine particles (PM<sub>2.5</sub>) standard at 15 micrograms per cubic meter (µg/m<sup>3</sup>) ([62 FR 38652](#)). In 2013, U.S. EPA lowered the standard to 12 µg/m<sup>3</sup> ([78 FR 3085](#)). Compliance is determined by evaluating the annual arithmetic mean averaged over a 3-year period not to be exceeded.

# Particulate Matter

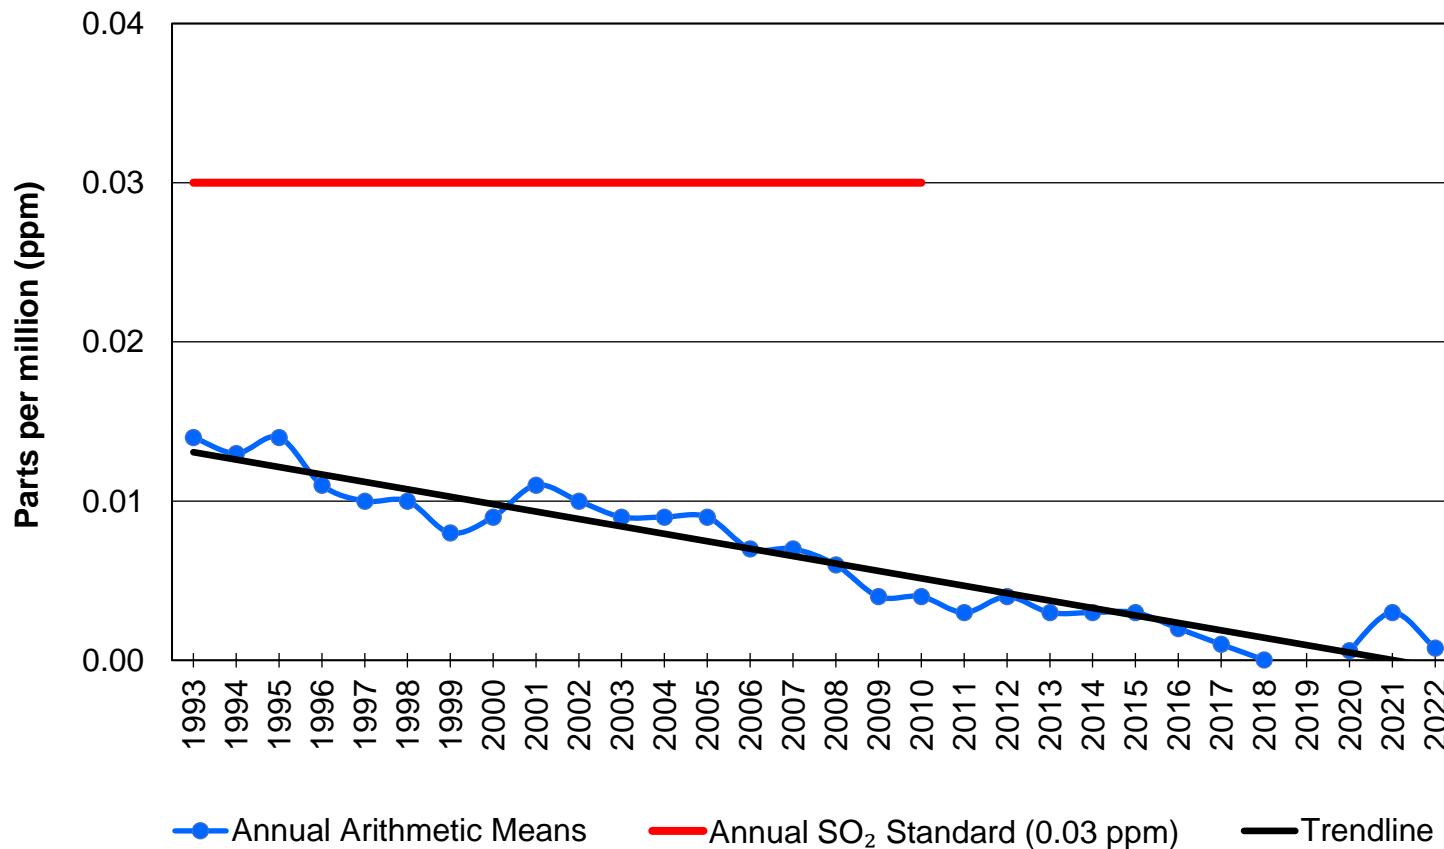

## 24-Hour PM<sub>2.5</sub> 98th Percentile Values Southeast Region

In 1997, United States Environmental Protection Agency (U.S. EPA) established a 24-hour fine particles (PM<sub>2.5</sub>) standard of 65 micrograms per cubic meter (µg/m<sup>3</sup>) ([62 FR 38652](#)). In 2006, U.S. EPA lowered the standard to 35 µg/m<sup>3</sup> ([71 FR 61144](#)). Compliance is determined by evaluating the 98<sup>th</sup> percentile averaged over a 3-year period not to be exceeded.

# Sulfur Dioxide

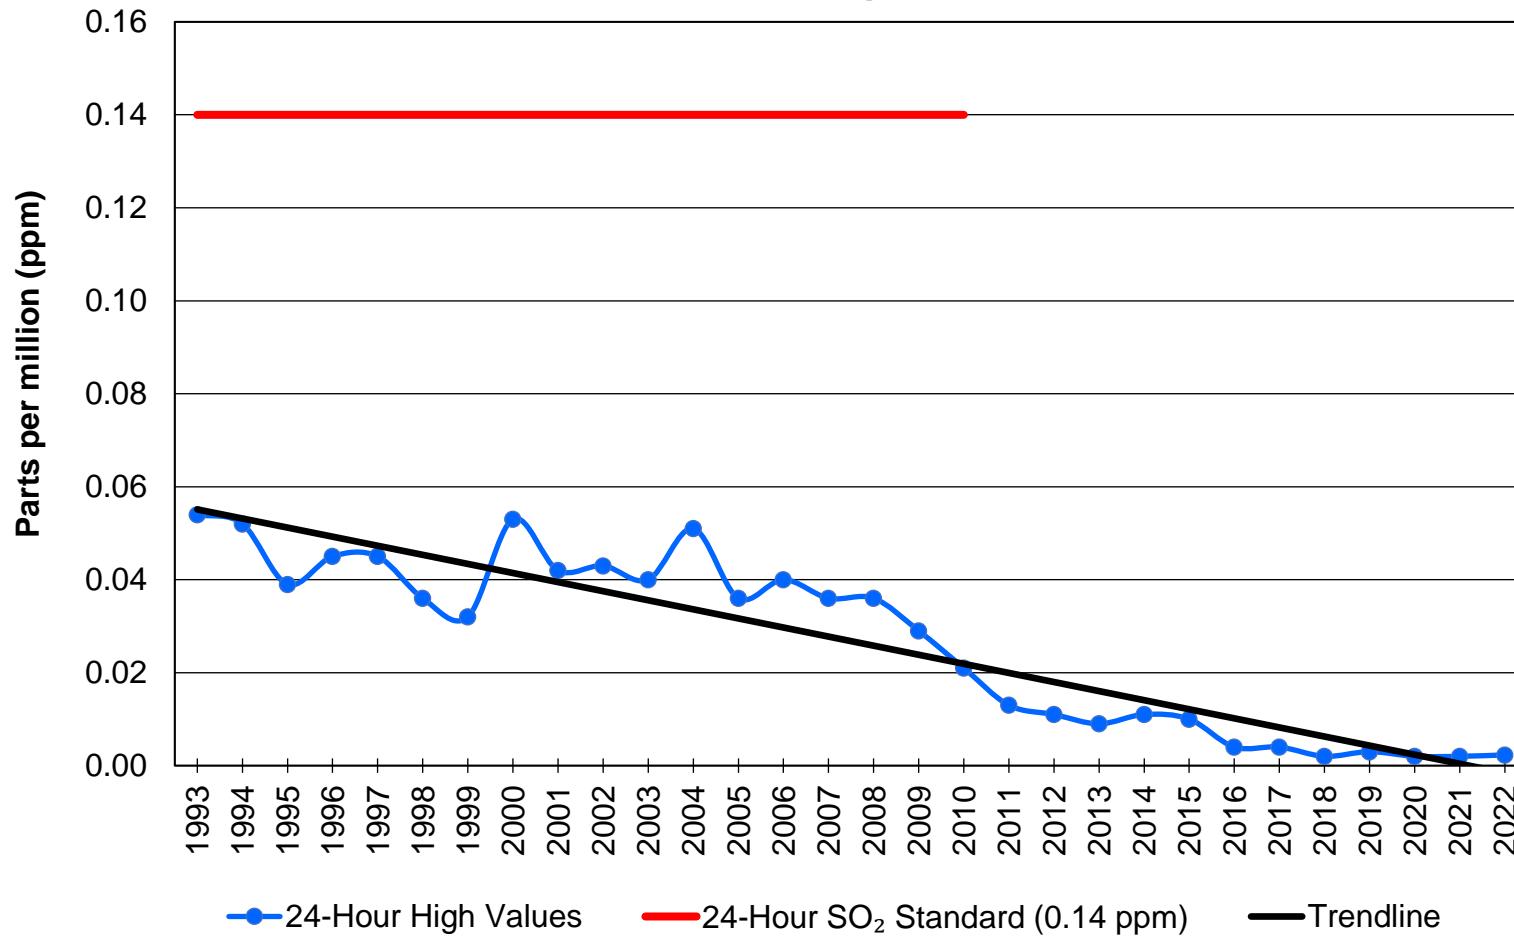

## Annual Arithmetic Mean SO<sub>2</sub> Values Southeast Region

In 1971, United States Environmental Protection Agency (U.S. EPA) established an annual sulfur dioxide (SO<sub>2</sub>) standard ([36 FR 8186](#)). The standard was set at 0.03 parts per million (ppm) and was not to be exceeded. In 2010, U.S. EPA revoked the standard, however IDEM continues to monitor for the annual standard in certain regions.

# Sulfur Dioxide

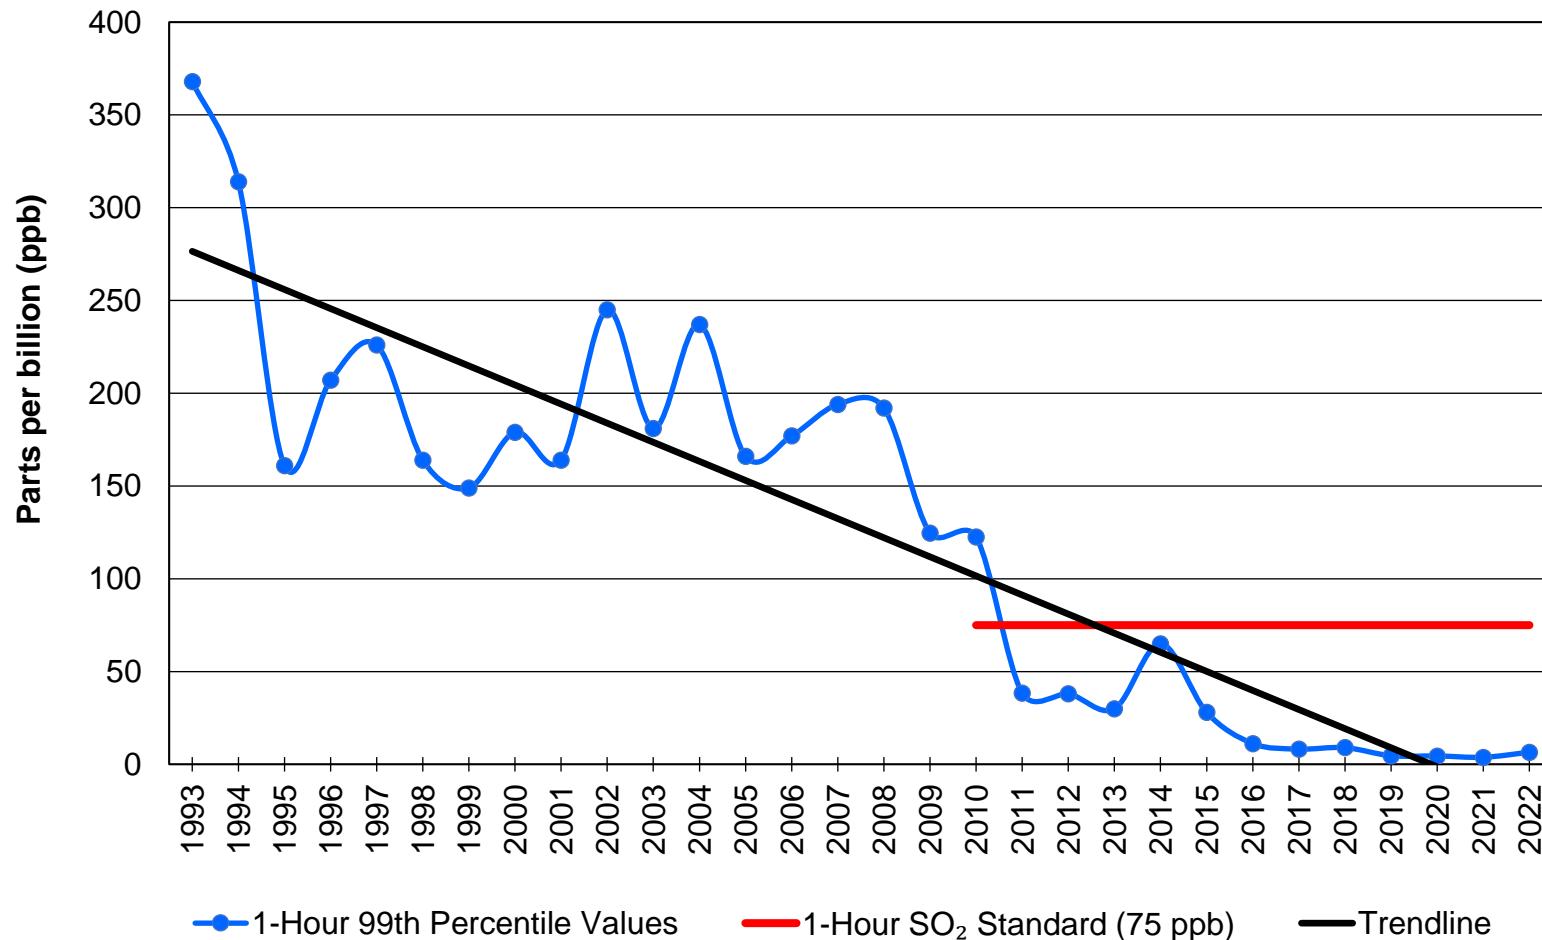

## 24-Hour SO<sub>2</sub> 2<sup>nd</sup> High Values Southeast Region

In 1971, United States Environmental Protection Agency (U.S. EPA) established a 24-hour sulfur dioxide (SO<sub>2</sub>) standard ([36 FR 8186](#)). The standard was set at 0.14 parts per million (ppm) and was not to be exceeded more than once per year, therefore 2<sup>nd</sup>-high values are compared to the standard. In 2010, U.S. EPA revoked the standard, however IDEM continues to monitor for the 24-hour standard in certain regions.

# Sulfur Dioxide

## Highest 1-Hour SO<sub>2</sub> 99th Percentile Values Southeast Region

In 2010, United States Environmental Protection Agency (U.S. EPA) established a 1-hour sulfur dioxide (SO<sub>2</sub>) standard ([75 FR 35520](#)). The standard was set at 75 parts per billion (ppb) with the 99<sup>th</sup> percentile of 1-hour daily maximum concentrations averaged over a 3-year period not to be exceeded.

# Air Quality and You

---
