**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 52**

**Air Plan Approval; Indiana; Cross-State Air Pollution Rule**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) is approving a state submittal concerning the Cross-State Air Pollution Rule (CSAPR) that was submitted by Indiana on November 27, 2017 as a revision to the Indiana state implementation plan (SIP). Under CSAPR, large electricity generating units (EGUs) in Indiana are currently subject to Federal implementation plans (FIPs) requiring the units to participate in CSAPR’s Federal trading program for annual emissions of nitrogen oxides (NOX), one of CSAPR’s two Federal trading programs for annual emissions of sulfur dioxide (SO2), and one of CSAPR’s two Federal trading programs for ozone season emissions of NOX. This action approves the State’s regulations requiring large Indiana EGUs to participate in new CSAPR state trading programs for annual NOX, annual SO2, and ozone season NOX emissions integrated with the CSAPR Federal trading programs, replacing the corresponding FIP requirements. EPA is approving the State’s submission because it meets the requirements of the Clean Air Act (CAA or Act) and EPA’s regulations for approval of a CSAPR full SIP revision replacing the requirements of a CSAPR FIP. Under the CSAPR regulations, approval of the SIP revision automatically eliminates Indiana’s units’ requirements under the corresponding CSAPR FIPs addressing Indiana’s interstate transport (or “good neighbor”) obligations with respect to the 1997 fine particulate matter (PM2.5) national ambient air quality standard (NAAQS), the 2006 PM2.5 NAAQS, the 1997 ozone NAAQS, and the 2008 ozone NAAQS. Like the CSAPR FIP requirements that are being replaced, approval of the SIP revision fully satisfies Indiana’s good neighbor obligations with respect to attainment and maintenance of the 1997 PM2.5 NAAQS, the 2006 PM2.5 NAAQS, and the 1997 ozone NAAQS and partially satisfies Indiana’s good neighbor obligation with respect to attainment and maintenance of the 2008 ozone NAAQS. EPA proposed approval of the State’s submission on August 14, 2018. **DATES:** This final rule is effective on December 17, 2018.

**ADDRESSES:** EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2017–0700. All documents in the docket are listed on the www.regulations.gov website. Although listed in the index, some information is not publicly available, i.e., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through www.regulations.gov or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Sarah Arra, Environmental Scientist, at (312) 886–9401 before visiting the Region 5 office.

**FOR FURTHER INFORMATION CONTACT:**

**SUPPLEMENTARY INFORMATION:**
Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA. This supplementary information section is arranged as follows:

I. Overview
II. Background on CSAPR and CSAPR-Related SIP Revisions
III. Indiana’s SIP Submittal and EPA’s Analysis
IV. Final Action
V. Incorporation by Reference
VI. Statutory and Executive Order Reviews

**I. Overview**

EPA is approving a November 27, 2017 submittal as a revision to the Indiana SIP to include CSAPR state trading programs for annual emissions of NOX and SO2 and ozone season emissions of NOX. Large EGUs in Indiana are subject to CSAPR FIPs that require the units to participate in the Federal CSAPR NOX Annual Trading Program, the Federal CSAPR SO2 Group 1 Trading Program, and the Federal CSAPR NOX Ozone Season Group 2 Trading Program. CSAPR provides a process for the submission and approval of SIP revisions to replace the requirements of CSAPR FIPs with SIP requirements under which a state’s units participate in CSAPR state trading programs that are integrated with and, with certain permissible exceptions, substantively identical to the CSAPR Federal trading programs.

The submission incorporates into Indiana’s SIP state trading program regulations for annual NOX, annual SO2, and ozone season NOX emissions that replace EPA’s Federal trading program regulations for these emissions from...
Indiana units. EPA is approving the submission as a SIP revision because it meets the requirements of the CAA and EPA’s regulations for approval of a CSAPR full SIP revision replacing a Federal trading program with a state trading program that is integrated with and substantively identical to the Federal trading program. Under the CSAPR regulations, approval of the submission as a SIP revision automatically eliminates the obligations of large EGUs in Indiana to participate in CSAPR’s Federal trading programs for annual NOX, annual SO2, and ozone season NOX emissions under the corresponding CSAPR FIPs. EPA finds that approval of the SIP revision fully satisfies Indiana’s obligations pursuant to the “good neighbor” provisions of CAA section 110(a)(2)[D][i][i] to prohibit emissions which will significantly contribute to nonattainment or interfere with maintenance of the 1997 PM2.5 NAAQS, the 2006 PM2.5 NAAQS, and the 1997 ozone NAAQS in any other state and partially satisfies Indiana’s corresponding obligation with respect to the 2006 ozone NAAQS.

Approval of the submission as a SIP revision also removes from Indiana’s SIP most of the State’s rules implementing the discontinued Clean Air Interstate Rule (CAIR) trading programs, including all of the State’s rules for the annual NOX and annual SO2 trading programs and portions of the State’s rule for the ozone season NOX trading program. The discontinued CAIR state trading programs established under these rules have been replaced by CSAPR trading programs for the affected EGUs.

II. Background on CSAPR and CSAPR-Related SIP Revisions

EPA issued CSAPR 1 in 2011 and the CSAPR Update 2 in 2016 to address the requirements of CAA section 110(a)(2)[D][i][i] concerning interstate transport of air pollution. As amended (including by the CSAPR Update), CSAPR requires 27 eastern states to limit their statewide emissions of SO2 and/or NOX in order to mitigate transported air pollution unlawfully impacting other states’ ability to attain or maintain four NAAQS. The 1997 annual PM2.5 NAAQS, the 2006 24-hour PM2.5 NAAQS, the 1997 ozone NAAQS, and the 2008 ozone NAAQS. The CSAPR emissions limitations are defined in terms of maximum statewide “budgets” for emissions of annual SO2, annual NOX, and/or ozone season NOX by each covered state’s large EGUs. The CSAPR state budgets are implemented in two phases of generally increasing stringency: The Phase 1 budgets apply to emissions in 2015 and 2016; and the Phase 2 and CSAPR Update budgets apply to emissions in 2017 and later years. As a mechanism for achieving compliance with the emissions limitations, CSAPR establishes five Federal emissions trading programs: A program for annual NOX emissions; two geographically separate programs for annual SO2 emissions; and two geographically separate programs for ozone season NOX emissions. CSAPR also establishes FIP requirements applicable to the large EGUs in each covered state.3 Currently, the CSAPR FIP provisions require each state’s units to participate in up to three of the five CSAPR trading programs. CSAPR includes provisions under which states may submit and EPA will approve SIP revisions to modify or replace the CSAPR FIP requirements while allowing states to continue to meet their transport-related obligations using either CSAPR’s Federal emissions trading programs or state emissions trading programs integrated with the Federal programs, provided that the SIP revisions meet all relevant criteria.4 Through such a SIP revision, a state may replace EPA’s default provisions for allocating emissions allowances among the state’s units, employing any state-selected methodology to allocate or auction the allowances, subject to timing conditions and limits on overall allowance quantities. In the case of CSAPR’s Federal trading programs for ozone season NOX emissions (or an integrated state trading program), a state may also expand trading program applicability to include certain smaller EGUs.5 If a state wants to replace the CSAPR FIP requirements with SIP requirements under which the state’s

3 States are required to submit good neighbor SIPs three years after a NAAQS is promulgated. CAA section 110(a)[1] and (2). Where EPA finds that a state fails to submit a required SIP or disapproves a SIP, EPA is obligated to promulgate a FIP addressing the deficiency. CAA section 110(c).
4 See 40 CFR 52.38, 52.39. States also retain the ability to submit SIP revisions to meet their transport-related obligations using mechanisms other than the CSAPR federal trading programs or integrated state trading programs. States covered by both the CSAPR Update and the NOX SIP Call have the additional option to expand applicability under the CSAPR NOx Ozone Season Group 2 Trading Program to include non-EGUs that would have participated in the NOX Budget Trading Program.
5 States covered by both the CSAPR Update and the NOX SIP Call have the additional option to expand applicability under the CSAPR NOx Ozone Season Group 2 Trading Program to include non-EGUs that would have participated in the NOX Budget Trading Program.
6 CSAPR also provides for a third, more streamlined form of SIP revision that is effective only for control periods in 2016 (or 2018 for CSAPR NOx Ozone Season Group 2 units) and is not relevant here. See §52.38(a)[3], (b)[3], (b)[7]; §52.39(d), (g).
7 40 CFR 52.38(a)[4], (b)[4], (b)[8]; 52.39(e), (h).
8 40 CFR 52.38(a)[5], (b)[5], (b)[9]; 52.39(f), (i).

6 CSAPR also provides for a third, more streamlined form of SIP revision that is effective only for control periods in 2016 (or 2018 for CSAPR NOx Ozone Season Group 2 units) and is not relevant here. See §52.38(a)[3], (b)[3], (b)[7]; §52.39(d), (g).
7 40 CFR 52.38(a)[4], (b)[4], (b)[8]; 52.39(e), (h).
8 40 CFR 52.38(a)[5], (b)[5], (b)[9]; 52.39(f), (i).
SIP that was the basis for a particular set of CSAPR FIP requirements, the obligation to participate in the corresponding CSAPR Federal trading program is automatically eliminated for units subject to the state’s jurisdiction without the need for a separate EPA withdrawal action, so long as EPA’s approval of the SIP revision as meeting the requirements of the CSAPR regulations is full and unconditional.9 Approval of a full SIP revision does not terminate the obligation to participate in the corresponding CSAPR Federal trading program for any units located in any Indian country within the state’s borders, and if and when a unit is located in Indian country within a state’s borders, EPA may modify the SIP approval to exclude from the SIP, and include in the surviving CSAPR FIP instead, certain trading program provisions that apply jointly to units in the state and to units in Indian country within the state’s borders.10 Finally, if at the time a full SIP revision is approved EPA has already started recording allocations of allowances for a given control period to a state’s units, the Federal trading program provisions authorizing EPA to complete the process of allocating and recording allowances for that control period to those units will continue to apply, unless EPA’s approval of the SIP revision provides otherwise.11

The CSAPR rulemaking, EPA determined that air pollution transported from Indiana would unlawfully affect other states’ ability to attain or maintain the 1997 PM2.5 NAAQS, the 2006 24-hour PM2.5 NAAQS, and the 1997 ozone NAAQS and therefore included the State’s EGUs in the CSAPR Federal trading programs for SO2 and annual NOX to address the State’s obligations regarding transported PM2.5 pollution and the original CSAPR Federal trading program for ozone season NOX (to address the State’s obligations regarding transported ozone pollution).12 In the CSAPR Update rulemaking, EPA determined that air pollution transported from Indiana would unlawfully affect other states’ ability to attain or maintain the 2008 ozone NAAQS, established a more pollution transported from Indiana rulemaking, EPA determined that air pollution.12 In the CSAPR Update rulemaking, EPA found that the EGUs’ participation in the SO2 and annual NOX Federal trading programs fully addresses Indiana’s good neighbor obligations with respect to attainment and maintenance of the 1997 PM2.5 NAAQS and the 2006 PM2.5 NAAQS.13 In the CSAPR Update rulemaking, EPA found that the EGUs’ participation in the ozone season NOX Federal trading program fully addresses Indiana’s good neighbor obligations with respect to attainment and maintenance of the 1997 ozone NAAQS and partially, but not necessarily fully, addresses the State’s good neighbor obligation with respect to attainment and maintenance of the 2008 ozone NAAQS.14

### III. Indiana’s SIP Submittal and EPA’s Analysis

On November 27, 2017, Indiana submitted to EPA provisions that, if approved, would incorporate into Indiana’s SIP state trading program regulations for Indiana’s EGUs that would replace the CSAPR Federal trading program regulations with regard to the units’ SO2, annual NOX, and ozone season NOX emissions. The SIP submittal consists of Indiana Rules 326 IAC 24–5, 326 IAC 24–6, and 326 IAC 24–7. In general, each of Indiana’s CSAPR state trading program rules are designed to replace the corresponding Federal trading program regulations. For example, Indiana Rule 326 IAC 24–5 (Nitrogen Oxides (NOX) Annual Trading Program) is designed to replace subpart AAAA of 40 CFR part 97 (i.e., 40 CFR 97.401 through 97.435). In a letter to EPA dated June 11, 2018, Indiana clarified its interpretation of certain provisions in its three rules, including identification of some minor textural errors that it may correct in subsequent amendments.15

Indiana also requests in its submission the removal from the SIP of the State’s rules for the CAIR state trading programs for NOX and SO2 at 326 IAC 24–1 and 24–2, respectively, and sections 3.5 through 10, and 12 of the State’s rule at 326 IAC 24–3 for the CAIR state trading program for ozone season NOX.16

In a notice of proposed rulemaking published on August 14, 2018 (83 FR 40185), EPA proposed to approve Indiana’s November 27, 2017 SIP submittal (as clarified in the State’s June 11, 2018 letter) designed to replace the CSAPR Federal trading programs. EPA noted that approval of the SIP revision would automatically eliminate Indiana’s EGUs’ requirements under the CSAPR FIPs and would fully satisfy Indiana’s good neighbor obligations with respect to attainment and maintenance of the 1997 PM2.5 NAAQS, the 2006 PM2.5 NAAQS, and the 1997 ozone NAAQS and would partially satisfy Indiana’s good neighbor obligations with respect to attainment and maintenance of the 2008 ozone NAAQS. EPA also proposed to approve the requested removal of the identified portions of the State’s CAIR rules, noting that the CAIR trading programs have been replaced by CSAPR trading programs for affected EGUs. The proposed rulemaking provides additional detail regarding the background and rationale for EPA’s action.

Comments on the proposal were due on or before September 13, 2018. EPA received four sets of comments, only one of which substantively addressed the contents of the proposal; EPA’s response is below.

The State of Maryland submitted a comment on a matter that is separate from this action. It is related to EPA’s June 29, 2018 proposed determination that compliance with the ozone season NOX budgets established in the CSAPR Update represents a full rather than partial remedy for the good neighbor obligations of 20 states, including Indiana, with respect to attainment and maintenance of the 2008 ozone NAAQS. In the proposal for this action, EPA stated that if the June 29, 2018 proposed determination is finalized as proposed, it would negate the approval of Indiana’s CAIR SIP revision would fully address the State’s good neighbor obligation with respect to attainment and maintenance of the 2008 ozone NAAQS.17 The State of Maryland

disagreed with these statements. The comments are outside the scope of this action because EPA has not finalized the June 29, 2018 proposed determination.

IV. Final Action

EPA is approving Indiana’s November 27, 2017, SIP submittal (as clarified in Indiana’s June 11, 2018 letter) concerning the establishment for Indiana units of CSAPR state trading programs for SO2, annual NOX, and ozone season NOx emissions. The revision adopts into the SIP the State trading program rules codified at 326 IAC 24–5 (Nitrogen Oxides (NOx) Annual Trading Program), 326 IAC 24–6 (Nitrogen Oxides (NOx) Ozone Season Group 2 Trading Program), and 326 IAC 24–7 (Sulfur Dioxide (SO2) Group 1 Trading Program).

These Indiana CSAPR state trading programs will be integrated with the Federal CSAPR NOx Annual Trading Program, CSAPR NOx Ozone Season Group 2 Trading Program, and CSAPR SO2 Group 1 Trading Program, respectively, and are substantively identical to the Federal trading programs except with regard to the allowance allocation provisions. Following approval of these portions of the SIP revision, Indiana units therefore will generally be required to meet requirements under Indiana’s CSAPR state trading programs equivalent to the requirements the units otherwise would have been required to meet under the corresponding CSAPR Federal trading programs, but allocations to Indiana units of CSAPR NOx Annual, CSAPR NOx Ozone Season Group 2, and CSAPR SO2 Group 1 allowances for control periods in 2021 and later years will be determined according to the SIP’s allocation provisions in Indiana’s rules instead of the default allocation provisions under the Federal trading program regulations. EPA is approving the SIP revision because they meet the requirements of the CAA and EPA’s regulations for approval of a CSAPR full SIP revision replacing a Federal trading program with a state trading program that is integrated with and substantively identical to the Federal trading program except for permissible differences with respect to emission allowance allocation provisions.

Under the CSAPR regulations, upon EPA’s full and unconditional approval of a SIP revision as correcting the SIP’s deficiency that is the basis for particular CSAPR FIP requirements, the obligation to participate in the corresponding CSAPR Federal trading program is automatically eliminated for units subject to the state’s jurisdiction (but not for any units located in any Indian country within the state’s borders). EPA promulgated the FIP provisions requiring Indiana units to participate in the Federal CSAPR SO2 Group 1, CSAPR NOx Annual, and CSAPR NOx Ozone Season Group 2 trading programs in order to address a lack of provisions in Indiana’s SIP addressing the State’s obligations under CAA section 110(a)(2)(D)(i)(I) with respect to the 1997 PM2.5 NAAQS, the 2006 PM2.5 NAAQS, the 1997 ozone NAAQS, and the 2008 ozone NAAQS. As noted in section II of this action, EPA has previously found that the CSAPR FIP requirements represent a full remedy for Indiana’s obligations with respect to the first three of these NAAQS and a partial, but not necessarily full, remedy for the State’s obligations with respect to the 2008 ozone NAAQS. Approval of the portions of Indiana’s SIP submittal adopting CSAPR state trading program rules substantively identical to the corresponding CSAPR Federal trading program regulations (offering only with respect to the allowance allocation methodology) similarly satisfies Indiana’s obligations pursuant to CAA section 110(a)(2)(D)(i)(I) to prohibit emissions which will significantly contribute to nonattainment or interfere with maintenance of the 1997 PM2.5 NAAQS, the 2006 PM2.5 NAAQS, and the 1997 ozone NAAQS in any other state, and partially satisfies Indiana’s obligations pursuant to CAA section 110(a)(2)(D)(i)(I) to prohibit emissions which will significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in any other state. Thus, the approval corrects the same deficiencies in the SIP that otherwise would be corrected by the CSAPR FIP requirements. Due to this, EPA is fully approving Indiana’s infrastructure SIP obligation under CAA section 110(a)(2)(D)(i)(I) for the 1997 PM2.5 NAAQS, 2006 PM2.5 NAAQS, and 1997 ozone NAAQS (prongs 1 and 2) and is issuing a limited approval on this infrastructure element for the 2008 ozone NAAQS in today’s action. The approval of the portions of Indiana’s SIP submittal establishing CSAPR state trading program rules therefore also results in the automatic termination of the obligations of Indiana units to participate in the Federal CSAPR SO2 Group 1, CSAPR NOx Annual, and CSAPR NOx Ozone Season Group 2 trading programs. EPA is also approving the removal from Indiana’s SIP of the State’s CAIR rules codified at 326 IAC 24–1 (Clean Air Interstate Rule Nitrogen Oxides Annual Trading Program) and 326 IAC 24–2 (Clean Air Interstate Rule Sulfur Dioxide Trading Program) and sections 3, 5 through 10, and 12 of the State’s CAIR rule codified at 326 IAC 24–3 (Clean Air Interstate Rule NOx Ozone Season Trading Program). The discontinued CAIR state trading programs established under the rule provisions being removed have been replaced by CSAPR trading programs for the affected EGUs.

This final rule is effective immediately upon publication in the Federal Register. Section 553(d) of the Administrative Procedure Act (5 U.S.C. 553(d)), which generally provides that final rules may not take effect earlier than 30 days after publication in the Federal Register but allows exceptions where an agency finds good cause and publishes its finding with the rule, applies to this action. Ordinarily, a 30-day transition period before a new rule takes effect would give affected parties an opportunity to adjust their behavior and prepare for compliance. However, in this instance no transition period is necessary because this rule does not impose new requirements. Under CSAPR’s existing requirements, on March 1 of each year affected sources must hold quantities of emissions allowances not less than their emissions during the prior year’s control period. The CSAPR regulations provide for default allocations to affected sources of allowances eligible for use in meeting this requirement. In this rule, in accordance with options CSAPR makes available to states, EPA is approving into Indiana’s SIP the State’s rules which include allocation provisions to replace the default federally-established allocations for control periods in 2021 and later years. The sooner this rule is effective, the sooner allowances eligible for use for the 2021 control period can be issued to affected sources in Indiana in the amounts determined under Indiana’s rules, which will assist the sources in planning to meet their March 1, 2022, compliance requirement. EPA therefore finds good cause to make this
final rule effective immediately upon publication in the Federal Register.

V. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of reference by the Indiana Administrative Code provisions 326 IAC 24–5, 326 IAC 24–6, and 326 IAC 24–7, effective on November 24, 2017. EPA has made, and will continue to make, these materials generally available through www.regulations.gov and at the EPA Region 5 Office (please contact the person identified in the FOR FURTHER INFORMATION CONTACT section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA’s approval, and will be incorporated by reference in the next update to the SIP compilation.23

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. This action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

• Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
• Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
• Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
• Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
• Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
• Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 15, 2019. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen oxides, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide.

Dated: November 27, 2018.

James O. Payne,
Acting Regional Administrator, Region 5.

Part 52 of title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

§ 52.38 [Amended]

2. Section 52.38 is amended:

a. In paragraph (a)(8)(iii), by adding after the text “Georgia,” the text “Indiana,” and

b. In paragraph (b)(13)(iv), by removing the text “Alabama,” and adding in its place the text “Alabama and Indiana.”.

§ 52.39 [Amended]

3. Section 52.39(l)(3) is amended by removing the text “[none].” and adding in its place the text “Indiana.”.

Subpart P—Indiana

4. Section 52.770 is amended:

a. In the table in paragraph (c) by revising the section “Article 24. Trading Programs: Nitrogen Oxides (NOx) and Sulfur Dioxide (SO2)”;

b. In the table in paragraph (e) by revising the entries for “Section 110(a)(2) infrastructure requirements for the 1997 8-Hour Ozone NAAQS”, “Section 110(a)(2) infrastructure requirements for the 1997 PM2.5 NAAQS”, “Section 110(a)(2) Infrastructure Requirements for the 2006 24-Hour PM2.5 NAAQS”, and “Section 110(a)(2) Infrastructure Requirements for the 2008 ozone NAAQS”.

The revisions read as follows:

§ 52.770 Identification of plan.

I. Introduction

Through this interpretive rule, the Federal Maritime Commission is clarifying its interpretation of the scope of 46 U.S.C. 41102(c) (section 10(d)(1) of the Shipping Act of 1984). Section 41102(c) provides that regulated entities "may not fail to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property." This interpretive rule clarifies that in order to violate § 41102(c), a regulated entity must engage in an unjust or unreasonable practice or regulation on a normal, customary, and continuous basis.

II. NPRM and Summary of Comments

On September 7, 2018, the Commission issued a Notice of Proposed Rulemaking (NPRM) seeking public comment on its proposed interpretation. Five comments were received in response to the NPRM, which may be found at the Electronic Reading Room on the Commission’s website at https://www.fmc.gov/18-06/. Comments were received from the American Association of Port Authorities (AAPA), New York New Jersey Foreign Freight Forwarders and Brokers Association (NYNJFFF&BA), World Shipping Council (WSC), International Trade Surety Association (ITSA) and National Customs Brokers and Forwarders Association of America (NCBPFAA). All five comments received by the Commission were in support of the rulemaking.

In their submission, AAPA affirms that the rule would bring the Commission’s interpretation of the Shipping Act’s prohibition on unjust and unreasonable practices and regulations in line with the plain language meaning of the word “practice,” Commission precedent and the intent of Congress. AAPA does not believe that the rule would leave potential claimants without remedies, but that the rule would stop individual instances better suited for resolution under the Carriage of Goods by Sea Act (COGSA) or other venue from being brought to the Commission.

NYNJFFF&BA also argues that the intent of Congress and the plain language reading of § 41102(c) support this rulemaking. NYNJFFF&BA believes that without this rule, ocean transportation intermediaries (OTIs) are at risk of violating the Shipping Act over a single disagreement or accidental misstep, and this risk hinders resolutions through settlement.

NYNJFFF&BA argues that this rule would limit the risk of frivolous claims being brought and allow OTIs to operate and settle claims more fairly and cost effectively. NYNJFFF&BA contends that claims that cannot be settled can still be brought through other venues. In its comment, WSC notes that from 1935 to 2001, the Commission preceded in line with the

3 In addition to its comments on the current interpretive rule, NYNJFFF&BA also encourages the Commission to review other prohibitions in § 41102 as part of future interpretive rulemakings, alleging that its members have been subject to penalties for technical violations involving no injured parties and that these investigations do not serve the purposes of the Shipping Act of 1984. As NYNJFFF&BA notes, these issues are outside the scope of this rulemaking, but the Commission will consider these comments in determining whether to initiate future rulemakings.

1 Some authorities cited herein refer to § 41102(c) while others refer to section 10(d)(1). For ease of reading, we will generally refer to § 41102(c) in analyzing these authorities.
