On November 5, 2015 the Indiana Department of Environmental Management (IDEM) issued the final NPDES General Permit for Once Through Noncontact Cooling Water in a new format. This administrative NPDES general permit will supersede and replace the requirements for these discharges which are currently regulated under Article 15, Rule 8 of Title 327 of the Indiana Administrative Code (327 IAC 15-8). These include the following types of discharges to surface waters of the state:

Once Through Noncontact Cooling Water. The purpose of this permit is to establish requirements for point source discharges of cooling water that is used for the sole purpose of removing unwanted heat from a process; only makes one pass through a unit that exchanges heat between the process and the cooling water (generally a heat exchanger); and does not come into contact with any raw material or manufactured product.

IDEM public noticed the draft general permit from December 15, 2014 and the comment period ended on February 6, 2015. Each general permit contains specific eligibility requirements. Ineligible discharges will require an individual NPDES permit or an alternate general permit (if available). Only facilities existing within the boundaries of Indiana may obtain NPDES general permit coverage.
