The purpose of this Process Flow diagram is to provide an example of information that may need to be included in the process flow diagram that is required for form GSD-03. A Process Flow diagram is required for each process that is included in the air permit application submitted to IDEM, OAQ. This is only an example and has not been drawn to scale. You are not limited to this illustration; add any information you feel is necessary to fully describe the process. If you do not provide the enough information to adequately describe the process, the application process may be stopped.

If you have any questions, please contact the Air Permits Branch in IDEM's Office of Air Quality.
