Our office received your NPDES Notice of Intent (NOI) submittal on December 13, 2023, regarding the above-referenced facility. We are pleased to inform you that the submittal is sufficient to comply with the NOI requirements for 327 IAC 15-7 and that general permit coverage for this mine will be renewed.

We have reviewed your request and have determined that the activities associated with it will not violate the antidegradation rules as set forth in 327 IAC 2-1.3. Our office has further determined that the request will not affect this facility's eligibility for coverage under the general permit rules outlined in 327 IAC 15-1 through 15-4 and 327 IAC 15-7, Facilities Engaged in Mining of Coal, Coal Processing, and Reclamation Activities. Therefore, your petition to obtain permit coverage as is described in your NOI has been approved in accordance with Indiana rules promulgated under 327 IAC 15-7 and 327 IAC 2-1.3. Coverage for the facility will include all outfalls listed on the first table of Attachment 1 to this correspondence.

The NPDES general permit identification number assigned to this facility is referenced above. This renewal of NPDES general permit coverage for this facility **will become effective on April 1, 2024.** The new expiration date is **March 31, 2029.** You are required to continue following all terms and conditions of 327 IAC 15-7. In order to receive authorization to discharge beyond the date of expiration, you must submit a renewal NOI to IDEM no later than ninety (90) days prior to the expiration date.

One condition of your permit requires periodic reporting of several effluent parameters. You are required to submit both federal discharge monitoring reports (DMRs) and state Monthly Monitoring Reports (MMRs) on a routine basis. Please be advised that IDEM has also recently developed a Quarterly Monitoring Report (QMR)

form which you may find useful for some of your outfalls that have quarterly monitoring and reporting requirements. Both forms can be found on IDEM's website at <https://www.in.gov/idem/cleanwater/wastewater-compliance/wastewater-reporting-forms-notices-and-instructions/>.

All NPDES permit holders are required to submit their monitoring data to IDEM using NetDMR. Please contact Helen Demmings (317) 232-8815 if you would like more information on NetDMR or see IDEM's website at <https://www.in.gov/idem/cleanwater/resources/netdmr/>. Please note that all current agency rules, including the general NPDES permits-by-rule 327 IAC 15, are posted at <https://www.in.gov/idem/legal/environmental-laws-and-rules/>.

Please note that IDEM is required to serve notice of its decision to accept your facility for renewal of coverage under the general permit in accordance with the requirements of 327 IAC 5-3-14. It should also be noted that any appeal must be filed under procedures outlined in IC 13-15-6, IC 4-21.5, and the enclosed Public Notice. The appeal must be initiated by filing a petition for administrative review with the Office of Environmental Adjudication (OEA) within fifteen (15) days of the emailing of an electronic copy of this letter or within eighteen (18) days of the mailing of this letter. The addresses are as follows:

100 North Senate Avenue
Indianapolis, IN 46204

Commissioner
Indiana Department of Environmental Management
Indiana Government Center North
Room 1301

The OEA will provide parties who request review of this acceptance for coverage with notice of prehearing conferences, preliminary hearings, hearing, and stays or orders disposing of all proceedings. Nonparties may receive such notices without intervening and formally becoming parties in the proceeding by requesting copies of such notices from the OEA.
