NOTICE OF 30-DAY PERIOD FOR PUBLIC COMMENT

Preliminary Findings Regarding a
Minor Source Operating Permit (MSOP)

for D.A. Hochstetler & Sons, LLP in LaGrange County

MSOP No.: M087-50182-00710

The Indiana Department of Environmental Management (IDEM) has received an application from D.A. Hochstetler & Sons, LLP, located at 4165 South 500 West, Topeka, Indiana 46571, for a MSOP with new source review. If approved by IDEM's Office of Air Quality (OAQ), this proposed permit would allow D.A. Hochstetler & Sons, LLP to make certain changes at its existing source and to continue to operate its existing source. D.A. Hochstetler & Sons, LLP has applied for the following:

- (1) The removal of the existing welding units
- (2) The removal of a water heater
- (3) The removal of the surface coating booth
- (4) The removal of the 0.72 MMBtu/hr natural gas-fired generator
- (5) The construction of two (2) natural gas-fired non-emergency generators
- (6) The construction of a natural gas-fired emergency generator
- (7) The construction of a fiber laser cutter and plasma cutter
- (8) The construction of a COBOT robotic welding unit, 10 new MIG welding stations and a TIG welding station.
- (9) The construction of twenty-four (24) metal processing facilities.
- (10) The construction of one natural gas-fired water heater.

The applicant intends to operate new equipment that will emit air pollutants; therefore, the permit contains new or different permit conditions. In addition, some conditions from previously issued permits/approvals have been corrected, changed, or removed. These corrections, changes, and removals may include Title I changes (e.g., changes that add or modify synthetic minor emission limits). IDEM has reviewed this application and has developed preliminary findings, consisting of a draft permit and several supporting documents, which would allow the applicant to make this change.

IDEM is aware that the natural gas-fired non-emergency generators and emergency generator have been constructed and operated prior to receipt of the proper permit. IDEM is reviewing this matter and will take appropriate action. This draft permit contains provisions to bring unpermitted equipment into compliance with construction and operation permit rules.

A copy of the permit application and IDEM's preliminary findings have been sent to:
