NOTICE OF 30-DAY PERIOD FOR PUBLIC COMMENT

Preliminary Findings Regarding a Significant Revision to a
Federally Enforceable State Operating Permit (FESOP)

for Poly-Wood, LLC in Kosciusko County

Significant Permit Revision No.: 085-50306-00132

The Indiana Department of Environmental Management (IDEM) has received an application from Poly-Wood, LLC, located at 1001 W Brooklyn Street, Syracuse, Indiana 46567, for a significant revision of its FESOP issued on February 7, 2020. If approved by IDEM's Office of Air Quality (OAQ), this proposed revision would allow Poly-Wood, LLC to make certain changes at its existing source. Poly-Wood, LLC has applied to add screw powder coating machines, metal cutting lasers, foam and plastic co-extruders, plastic injection molding machines, dust collectors, CNC machines, an emergency generator, plastics dryer, welding stations and cobot, cleaning lasers, and a hydraulic press brake. The source is also updating the PM, PM10, and PM2.5 emission factors used to calculate potential emissions from Re grind Line #1 to 4.16 lb/ton based on most recent stack testing results. Additionally, the source will remove extruders and CNC machines.

The applicant intends to construct and operate new equipment that will emit air pollutants; therefore, the permit contains new or different permit conditions. In addition, some conditions from previously issued permits/approvals have been corrected, changed, or removed. These corrections, changes, and removals may include Title I changes (e.g., changes that add or modify synthetic minor emission limits). The potential to emit regulated air pollutants will continue to be limited to less than the Title V and PSD major threshold levels. IDEM has reviewed this application and has developed preliminary findings, consisting of a draft permit and several supporting documents, which would allow the applicant to make this change.

IDEM is aware that the some of the facilities added with this modification have been constructed and operated prior to receipt of the proper permit. IDEM is reviewing this matter and will take appropriate action. This draft permit contains provisions to bring unpermitted equipment into compliance with construction and operation permit rules.

A copy of the permit application and IDEM's preliminary findings have been sent to:
