

TITLE 326 AIR POLLUTION CONTROL DIVISION

Rule Information Sheet

State Sulfur Dioxide and Porter County Ozone Designations
LSA Document #21-515

Overview

Indiana's attainment status tables at 326 IAC 1-4 are periodically updated to reflect each county's attainment status. This rulemaking updates the attainment designation status for ninety of Indiana's ninety-two counties for SO₂ to accurately reflect the federal language used in the Code of Federal Regulations (CFR) at 40 CFR 81.315. This rulemaking also updates the designation status of Porter County under the 2015 8-hour ozone NAAQS based on the final rule published by U.S. EPA in the Federal Register (FR) on June 14, 2021 (86 FR 31438). In order to avoid conflict with ongoing litigation concerning a challenge to the designation status for several townships in Huntington County, the rule language differs from what is currently reflected in 40 CFR 81.315 and will be updated, if necessary, once the challenge is resolved.

Daviess and Pike counties have been omitted from this rulemaking and are included in a separate rulemaking that amends the attainment designation status for the 2010 1-hour primary NAAQS for SO₂ for two townships that were redesignated from nonattainment to attainment by U.S. EPA in a final rule published on March 2, 2021 (86 FR 12107). To ensure the timely update of the attainment status for these two counties, the separate rule was initiated before this rulemaking updating the SO₂ redesignation status for the ninety remaining counties in Indiana. Therefore, the updates for both the primary 1-hour SO₂ standard and the 1971 secondary 3-hour SO₂ standard for Daviess and Pike counties are contained in the separate rulemaking to avoid confusion and any potential crossover errors between the two rules.

Affected Persons

Sources located in any one of the ninety Indiana counties being updated for SO₂ in this rulemaking that are subject to the federal NAAQS, as well as sources in Porter County that are regulated under the 2015 8-hour ozone NAAQS.

Reasons for the Rule

This rule is a technical amendment to ninety counties in Indiana's attainment designation status tables for SO₂ and Porter County for the 2015 8-hour ozone standard to ensure that state rules are consistent with federal standards.

Economic Impact of the Rule

Because this rule is only a technical amendment to the state's attainment designation status tables, this rule has no economic impact beyond that already imposed by the federal law.

Scheduled Board Action and Hearings

Public Hearing: February 9, 2022, at 1:30 p.m., at the Indiana Government Center South, 10 North Senate Avenue, Conference Room A, Indianapolis, Indiana.

The public may attend the ERB meeting in person or join by using the following Zoom link, meeting ID, and passcode, or telephone numbers that can be found prior to the meeting at:
