1	APPEARANCES:
2	BOARD MEMBERS:
3	Beverly Gard, Chairman
4	Angelique Collier Paul Gilson
5	Dr. Ted Niemiec Dr. Joanne Alexandrovich
6	William Etzler Chris Horn
7	Michael Schuler Calvin Davidson
8	R. T. Green Dan Bortner
9	Mark A. Wasky, Proxy, Indiana Economic Development Corporation
10	Katherine Nelson, Proxy, Lieutenant Governor
11	Bruno Pigott, IDEM Commissioner (Nonvoting)
12	
13	IDEM STAFF MEMBERS:
14	Ryan Clem Nancy King
15	Keelyn Walsh Dan Watts
16	Karla Kendrick Martha Clark Mettler
17	Chris Pedersen Matt Stuckey
18	Jerry Dittmer Mark Derf
19	Eileen Hack Beth Admire
20	Paul Higginbotham
21	PUBLIC SPEAKERS:
22	Craig Williams
23	

1 1:32 o'clock p.m. February 10, 2021 2 3 CHAIRMAN GARD: I'm going to call the meeting of February the 10th, 2021 of the Indiana 4 5 Environmental Rules Board to order. I'm going to 6 call the roll to make sure that there is a quorum here, and then after that, I'm going to have Ryan 7 go through the mechanics of this. You all have 8 probably done enough Zoom that you're pretty 9 familiar with it, but we'll review it. 10 Mr. Etzler? 11 12 (No response.) 13 CHAIRMAN GARD: When I call your 14 name, say "Yes." 15 Dr. Alexandrovich? 16 DR. ALEXANDROVICH: Yes. 17 CHAIRMAN GARD: You're here. 18 Mr. Bortner? 19 MR. BORTNER: Yes. 20 CHAIRMAN GARD: Ms. Collier? 21 MS. COLLIER: Yes. 22 CHAIRMAN GARD: Mr. Davidson? 23 MR. DAVIDSON: Yes.

1	CHAIRMAN GARD: Mr. Gilson?
2	MR. GILSON: Here.
3	CHAIRMAN GARD: Mr. Green?
4	MR. GREEN: Here.
5	CHAIRMAN GARD: Mr. Horn?
6	(No response.)
7	CHAIRMAN GARD: Ms. Nelson?
8	MS. NELSON: Here.
9	CHAIRMAN GARD: Dr. Niemiec?
10	DR. NIEMIEC: Yes.
11	CHAIRMAN GARD: Comm. Pigott?
12	COMM. PIGOTT: Here.
13	CHAIRMAN GARD: Mr. Rulon?
14	(No response.)
15	CHAIRMAN GARD: Mr. Schuler?
16	MR. SCHULER: Yes.
17	CHAIRMAN GARD: Ms. Valiquett?
18	(No response.)
19	CHAIRMAN GARD: And Mr. Wasky?
20	MR. WASKY: Present.
21	MR. ETZLER: Chairman Gard, Bill
22	Etzler is on also. I was on mute; sorry.
23	CHAIRMAN GARD: Twelve, so we but

we have a quorum. It takes eight to have a quorum, and I know we have 13, counting me.

Okay. Our first order of business today -- well, Ryan, you go through the mechanics of this before we start on that.

MR. CLEM: Sure. Happy to. Thank you, Chairwoman Gard, and thanks, everyone, for joining us today. My name is Ryan Clem, with IDEM Communications.

We will be taking questions and comments from the public at today's meeting. If you have a question or a technical issue during the presentation, please use the raised hand or chat feature, and to access those features, at the bottom or top of your screen, depending on what device you have, you'll see a menu in the middle or somewhere.

In that menu, there is a chat icon, which you can click on to show the dia -- the chat dialogue. You should also see the raised hand option there. So, please utilize the raised hand or chat features if you have any questions or comments, and you'll be called upon at the

appropriate time.

For those joining us via phone, you can also raise your hand by pressing star nine, and we'll call on you then. When called upon, you'll also need to unmute your phone by pressing star six.

For everyone in today's meeting, please identify yourself when speaking. If any members of the media have joined us, please utilize the chat feature or e-mail media@idem.in.gov if you have any questions. The meeting -- this meeting is being recorded and will be posted on IDEM's Web site.

And with that, I'll turn the meeting back over to you, Chairwoman Gard.

CHAIRMAN GARD: Thank you, Ryan. I appreciate that, and thank all of you all for being here today.

Our first order of business today is the approval of the summary of the November 18th, 2020 Board meeting. Are there any additions or corrections to the summary as presented?

(No response.)

```
CHAIRMAN GARD: If not, I need a
1
    motion to approve them as distributed.
2
                MR. BORTNER: So moved, Madam Chair,
3
4
    Dan Bortner.
5
                CHAIRMAN GARD:
                                 Is there a second?
                MR. GREEN: Second, R. T. Green.
6
7
                CHAIRMAN GARD: All in favor, say
8
    aye.
            (Board members responded, "Aye.")
9
                CHAIRMAN GARD: Any opposed, nay.
10
11
                       (No response.)
                CHAIRMAN GARD: The minutes from
12
    November 18th, 2020 are approved.
13
14
           Nancy, it says on here, "roll call."
                                                   Is
15
    that necessary?
16
                MS. KING:
                            No.
17
                CHAIRMAN GARD:
                                 Okay.
           Comm. Pigott, you have a report.
18
19
                COMM. PIGOTT: Thank you, Chairwoman
20
           I appreciate everybody's attendance today.
    Gard.
21
           I've got three things I want to report on.
    First, one of our -- just our metrics, in terms
22
23
    of how we're doing as an agency. As you know,
```

the COVID pandemic has really impacted the work of a lot people. Not only are people working at home, but to some degree, some of the work that some organizations do has been kind of cut back a little bit.

At IDEM, some of our inspections had been reduced for some period of time during the big lockdown period, or hunker-down period, as Gov. Holcomb had indicated, but for the most part, we're back up and doing all of our inspections. In terms of the work we're doing, we measure progress in terms of our permits, our water quality, our air quality, and our inspections.

In terms of permits, we continue to issue permits in less time than is allocated and under statute, and in about 65 percent of the time allowed. So, we're pretty happy with that.

We've got a couple of big permits that we're working on, one of which is the U.S. Steel Gary Works permit. Paul Higginbotham and his group in Office of Water Quality are diligently working to issue, or reissue, that permit. It's probably

the biggest permit that the Office of Water issues.

But we're doing really well overall in terms of getting our permits done on time in real time, and so, I'm proud of all of the folks in each of the program areas for the work they're doing in that respect.

In terms of inspections, we set a new goal in 2017 of getting our inspection reports done in seven days after we conduct an inspection, on average. We recognize some inspections are really big and need some more time, and putting together a report would take some more time. But we set this ambitious goal at a time when most of our inspection reports were issued in 45 days, not seven days.

I'm able to report today that, on average, we get our inspections done to date and the inspection report out to facilities in just over four days after an inspection is conducted. So, we've become quite efficient at getting our inspection reports out.

Our water quality, drinking water quality,

continues to be good, whereas 99 percent of the citizens in the State of Indiana drink safe and clean water. Those that report violations are largely paperwork violations.

Air quality is improving. Our National Ambient Air Quality Standards, we're getting better and better. We've been working, and over the last year have had more redesignations to attainment than we have had in several years. So, I feel as though our core work has been done very well.

With some of the untold stories are the work that people who aren't attached to permits or compliance metrics do on a daily basis. Not only do we have permit writers and inspectors, but we also have a group of scientists throughout our agency that conduct work, both in air quality and land quality, and in water quality.

And, you know, they do really good work and they've been working really hard. In our Office of Water Quality, for example, our -- many states have reported that they haven't been able to get out and do all of the sampling that we're

required to do in order to ensure that we have a good sense of the water quality around the state. In our state, however, our folks have been able to get out and meet all of the EPA commitments in terms of our probablistic sampling.

And there's one project I want to share with you today that bears just a little back story before I jump into it. I'm going to share my screen with you in a minute, but first, I want to say that 21 years ago I joined the Department of Environmental Management, and just before, I mean a month before I joined, there was an environmental emergency on the White River, known these days as the White River Fish Kill.

Over a million fish were killed on the White River in 1999, at the end of 1999, when a corporation called the Guide Corporation emptied out its wastewater treatment facility into Anderson and killed the Anderson wastewater treatment plant and emptied its contents out into the White River, which ended up killing, as I indicated, a million fish and resulted in probably the worst environmental catastrophe that

we've had since the inception of the agency.

And that -- that really helped to focus
the agency a lot. We've improved our emergency
response capabilities as a result of that
project. We also received a good deal of money,
and many people, both at the Department of
Natural Resources and at the Department of
Environmental Management, were assigned the task
of taking the proceeds we received from penalties
associated with the Guide Corporation to
restoring the White River.

I know Beth Admire and Nancy King and Carl at DNR worked really hard to fund -- help fund projects to restore the White River. And 20 years later, our Watershed Assessment and Planning folks undertook a project called the 2020 White River Mainstem Project, and one of the purposes of this project was to determine what -- what -- what does the White River look like today?

So, today I want to share with you a little bit of the work that our Watershed
Assessment and Planning Branch has undertaken.

Can you see my shared screen? If you can, you'd see it says, "2020 White River Mainstem Project."

Can you see that --

4 MR. CLEM: Yes.

COMM. PIGOTT: -- on your screen?
You can? Good.

Okay. So, this is -- this is available on our Web site. It's a story map. You know, the White River is a long and winding river. It goes through the heart of Indiana, and it's important, because it's -- it goes through many streams -- I mean many urban centers in the city, and it's in rural areas.

Our staff decided that they wanted to go out and assess the conditions of the West Fork of the White River, and the White River from its headwaters to the Wabash River. You can look at this project. The White River Mainstem Project is at our Web site, and I'm going to give you just a short look at what you'll see if you take a look at this.

We entered into a massive project to help investigate: What does the White River look like

today? The White River is 356 miles. It goes through urban areas and rural areas, areas that look like this, which are beautiful, and areas that are, frankly, much more urban, and you see all sorts of wildlife around there.

Let me just show you a couple of the lo -some of the locations that we looked at. You can
see on this map the -- all of the red is
essentially the White River, and when I place my
cursor over this map, you can see indicators pop
up. All of those indicators are places where the
agency sampled to try to get an understanding of
what the health of the White River looks like
today.

And if you visit the Web site and take a look at this, you can see pictures of the places we sampled, and they're on the left-hand part of the screen, and you can click on them, and it'll show you where we sampled, what it looks like from an aerial perspective, and what it looks like on the ground.

It's -- whoops. Darn it. It's a really great story map that shows the work that our

folks did to determine what water quality looks like in the White River. And we sampled at hundreds of locations. We sampled taking samples of the water, we collected fish with shocking, we looked at mackerel invertebrates, we conducted outreach events, and we've put it all on the Web site, all of the work that our folks did to look at the water quality in the White River.

And I would just urge you, if you get a minute, to take a look at this Web site and -- because it's really useful. It highlights the quality and how the work that has been done by the Department of Natural Resources and IDEM has actively restored the river and made the river once again a vibrant place.

It shows where we conducted our sampling that -- both in urban areas and in the rural areas in terms of shocking fish. This is a picture of a boat that we used in the areas. We did electro-fishing, where you put electricity in the water and grab the fish with nets, and the different kinds of fish we collected.

This project is currently still underway.

We collected 17,230 fish, 94 species, and you can see, if you look at the map, the different kinds of fish that were collected at the different sites, and what we would consider the health of the areas that we sampled, because it's a diverse area with a variety of different kinds of fish.

You can see that some areas -- and you can see the map. It's really intuitive. A red dot would indicate that we think that the health of the river at that place may be impacted, that maybe you didn't see a wide variety of fish populations. A green dot would be pretty darn good, and a blue dot is even better.

And we measured that by the variety of species and methodologies that we used, including an index of biological integrity. And we measured the water quality by looking at water chemistry in those areas as well. This effort was taken -- undertaken by the staff. It was undertaken as a result of scientific curiosity about how have we fared since the White River Fish Kill, and how have we done in terms of restoring the quality of the river?

And I'm really proud of the staff.

They've done not only a great job of getting out there and collecting this information by going out into the streams, but also of putting this in a format that is easy to view, is basically understandable by the general public, and provides people with a good sense of what the river looks like, both pictorially and in a narrative format.

So, I just want to say that if you get a chance, you should take a look at this. I don't want -- I could go on and on about this, but I don't -- I don't have all day to talk about it, but our staff were out there in the field looking at these -- the water quality. And the Web site explains what we did in a way that is easy to understand and, I think, very valuable.

So, again, I would urge you all to take a look at the story -- we call it a story map -- that contains information about the White River Mainstem Project. It's a wonderful effort by our staff, and I'm just really pleased with their -- the work that was done.

Joanne, you had raised your hand, and I wanted to be able to answer your question.

DR. ALEXANDROVICH: Thank you, Bruno. That is a really neat study, it sounds like. I look forward to checking out the Web site, but I have three questions. I'm wondering how many -- are there CSO's on the White River that were studied? Does any of the data that's been collected -- can that shed light on our question of the recreational water quality criteria? And my third is: How long -- how much time was put into this? How long did the study take?

COMM. PIGOTT: Oh, geez. You know, I

COMM. PIGOTT: Oh, geez. You know, I don't have the answer in terms of how long this study took. It was -- although Eileen Hack is on.

Eileen, I don't know if you can turn on your microphone, but if you can and you can answer that question.

It was during 2020, but -- and it may have taken all summer long, but I don't know if it was even before that.

Eileen, are you there and able to answer

that?

MS. HACK: I am, and I believe that started in the spring. I know they went through October. So, there were -- they collected water chemistry samples in the spring, summer and fall, and then some of the fish samples were collected towards the August/September/October area, and then they also collected aquatic insect samples. So, it was a pretty intensive effort from the spring through really, I think, almost the end of October.

COMM. PIGOTT: The -- the project did collect water chemistry, and -- but when I talked to staff, they had not finished evaluating the water chemistry. So, it was a project where you take just a ton of samples, and then we don't have a real read yet on the water chemistry aspect of this in terms of what it looked like.

It's easier, of course, to understand what kind of fish you can collect, and you get some immediate feedback when you're out in the field, but the water chemistry will take some time to evaluate. So, I'm not sure that we can make any

conclusions about the water chemistry that would assist in terms of the 2012 rec criteria.

it on the screen now.

- I will say I'd expect that E. Coli levels
 would be lower, despite the fact that the
 sampling ran through different areas of very
 large communities that are under federal consent
 decrees, including Indianapolis. If I remember
 correctly, one of the sampling locations was
 right on New York Street, and therefore -- and
 I'm trying to pick it up. There is a picture of
 - And so, it wound its way through different areas that did include areas impacted or downstream of CSO's. I think this site -- no, that's New York Street again. It may have actually -- maybe it's not New York Street, but one below it, where it was awfully close to discharge points along CSO's in a wastewater treatment facility. At least that was my recollection when I saw the sampling points earlier.
 - So, yes, we -- oh, Harding Street, that's the one. You know, I'll bet that's really close

- 1 to the outfall for the main wastewater treatment
- 2 plant. Now, of course, the other sampling
- 3 locations also, you know, have been influenced by
- 4 CSO discharges. In Indianapolis, for example,
- 5 there are about 144 CSO outfalls, and in Anderson
- 6 and in Muncie there are CSO outfalls as well, and
- 7 all of that travels downstream.
- 8 So, it's inevitable that the water
- 9 chemistry samples we took would capture levels of
- 10 pollutants that could be influenced by CSO's.
- 11 But we don't have complete data in terms of what
- 12 that could tell us for especially the rec
- 13 criteria. A very good question, though.
- 14 Thank you.
- 15 CHAIRMAN GARD: Bruno, that was just
- 16 fascinating. Thank you for showing us that. How
- 17 many years do you think it took the river to get
- 18 to the point that the wildlife was coming back?
- 19 COMM. PIGOTT: Well, you know, I
- 20 don't have a quick answer to that. You know,
- 21 Nancy's worked very closely with Beth Admire, and
- 22 I know that over the years and since the
- 23 settlement with the Department of Justice and the

- funds that came in, we did spend at least a
 decade improving that water body, if not more.
- And Nancy, do you have any kind of idea of how long before we saw results, from your conversations with Beth or DNR, in this regard?
- 6 MS. KING: Yeah. Actually, I think
- 7 Beth is on, and I think she --
- 8 COMM. PIGOTT: Oh, good.
- 9 MS. KING: -- could provide some more
 10 accurate information. She was the trustee who
 11 worked on it a little more than I did back then.
- So, I think, Beth, if you're on, if you
 could give some information on that, that would
 be great.
- COMM. PIGOTT: Hey, Beth.
- MS. ADMIRE: Hey. Hi, everybody.
- 17 Beth Admire talking.

19

- 18 The -- after the White River Fish Kill
- 20 White River. We revisited our restocking effort

settlement, we restocked a number of fish in the

- 21 at five and ten years, and it really was making a
- 22 good bit of difference in the river. Obviously
- 23 the City of Indianapolis, the Clean River

- Authority Now undertook a pretty lengthy combined sewer overflow long-term control plan to abate the combined sewer overflows in the White River, so that is also assisting the recovery.
 - Interestingly, we initiated at IDEM, after the White River Fish Kill, a series of White River cleanups where a number of our employees would go out into the river and just pick up trash. That has continued not only at IDEM, but all along the river for years and years. I actually just received a newspaper article last year where a football team did a river cleanup as part of its community service.
 - COMM. PIGOTT: Yeah, that -- it's been a really -- a really great effort, and, you know, the credit goes to a whole bunch of people. We've worked in concert with DNR.
 - Beth, do you want to talk about some of the folks at DNR that have worked on this with us?
- MS. ADMIRE: Sure.

Well, Bill James was one of the primary
people to work on this. A couple of the folks

have retired, Bill James. John Davis just recently retired.

Carl Woodridge, who is the Natural
Resource Damages Program Manager at DNR, was
actually at IDEM, and -- initially -- and started
working on the White River restoration with us,
and he's now over at DNR. So, there has been a
really large co-agency effort, if you will, in
the White River.

COMM. PIGOTT: Yeah, and it's been terrific. And not only have we increased the fish population through the restocking efforts, not only have we tried to restore habitat, but we've also tried to increase the recreational opportunities for individuals. I believe you guys have put in boat ramps throughout the area.

And so, the effort has been really multifactorial and has been really quite successful, and I think that the White River Mainstem Assessment Project will highlight just how resilient the river has been despite a really huge environmental impact.

But it needed help, and it got it. It got

it from devoted public servants like Beth and Carl and a whole bunch of people who spent time and NRD money to ensure that we restored the river.

And I'm just so excited about the progress we're going to make because of the work that the Citizens Energy and the Cities of Muncie and Anderson are doing to reduce their CSO overflows dramatically. And that will have such a huge impact on the river. Just a real success story, I will say.

So, Beth, thanks to you, thanks to all of our partners for that work, and the Watershed Assessment and Planning Branch, thank you guys for all of the work you've done to conduct this assessment and not only make it a scientific endeavor, but something that the public can visit and see and understand.

We're also doing outreach events. I think we're doing an outreach event in February for this project as well. So, we're trying to get the word out regarding our project and let people know where they can go to see what the river

- 1 looks like. Our next -- our next -- let's see.
- 2 Oh, it looks like our next outreach event --
- 3 well, we had one in February, February 4th, it
- 4 looks like.

July 17th we're going to have a Free

Paddle Friday and White River Alliance Annual

Meeting at the White River Canoe Company. We're

just working with as many partners as possible to

ensure that we have, you know, increased

awareness of the success of this project.

- So, I really wanted to bring that news to you folks on the Board, because oh so often we talk about the rules, but we -- or we talk about, you know, stuff like permits, but we don't get to see some of the progress that we make in other areas in our agency and with our partners in other agencies. So, that was the second thing I wanted to bring up.
- The third thing I want to talk about, and then I'll excuse myself from talking, is the legislative session. Now, there's one bill that IDEM has -- has been interested in. It's -- we -- in every session, we generally have some

proposed legislation, and this year is no exception.

It's some very minor -- very minor

adjustments to the laws that we were seeking in

our agency legislation, one of which is we have a

program where we verify tax exemptions for

industries that are -- that are putting in place

pollution control equipment, especially for water

quality.

And we really don't think the agency should be in the tax exemption business, so we're seeking to extract the agency from that process, although we'd be happy to be consulted if necessary, if there is the need.

One of the things we're working on is rules regarding fees, and you'll see, as we come up through the year, proposals for fee increases in the Office of Water Quality and the Office of Land Quality. The legislature, of course, as you know, allowed the Environmental Rules Board to approve the increases for the Department of Environmental Management. We, as you will remember, proposed the increases for the Office

of Air Quality, which were approved, and we'll come forward for Water as well.

We have a deadline for getting that done of early next year, and given the pace of our rulemakings and the required number of public hearings and the input and the importance of this project, we're seeking to push that deadline back a year so that we can have the appropriate input, and so that you folks have the appropriate ability to consider what we're asking for in terms of fee increases.

So, that bill was introduced by

Sen. Messmer, the Chair of the Senate Environment

Committee, and it did not include the fee

increase -- I mean the deadline for fee increase

submissions being pushed back, but it did have

the other provisions. It passed through the

Senate and will be considered in the House. And

so, we're hoping that that goes through.

The other bill that we're really watching is Senate Bill 389. Senate Bill 389 was introduced by Sen. Garten and was heard in Sen. Messmer's Environment Committee. This bill

is a fairly simple bill. It simply removes IDEM from the ability to protect wetlands that are not protected under federal law.

Currently -- I mean in the early 2000's, the Supreme Court, in a decision called the Swank Decision, limited the jurisdiction of the U.S. Army Corps of Engineers over wetlands to water bodies that were abutting -- or wetlands that abutted waters of the United States, and the other wetlands, which aren't any different in function or performance, were left unprotected.

Foresighted legislators passed a law that allowed IDEM to protect those other state wetlands, and we've operated a state wetland program. We call it an isolated wetland program, although the wetlands couldn't be really defined as all isolated, but it just described their distance from a navigable water body.

But IDEM has the authority currently, under law, to protect all of those wetlands, and this bill would eliminate the protection of those wetlands. And it was heard in the House -- I mean in the Senate. It passed the Senate

Environment Committee, it was heard in the full Senate, and passed out of the full Senate and will be considered in the House of Representatives.

We testified against the bill. We believe that wetlands are important. One of the stories that you may remember is the story of the Grand Kankakee Marsh. A hundred years ago -- a hundred years ago almost exactly -- the Grand Kankakee Marsh was the second-largest wetlands in the United States, and it stretched from South Bend all of the way to Illinois and into Illinois.

And that wetland area did make it hard for transportation routes and for farming, and as a result, the State of Indiana decided to invest money to drain those wetlands and to straighten and channelize the Kankakee River, which stretched for 240 miles and was really sinuous; it had over 2,000 bends and curves in it. It was straightened out and became a river that was about 80 miles instead of 240 river miles long. It was deepened.

And while the -- that effort helped to

ensure that more farmland was created, it also had some negative consequences. Almost immediately it resulted in flooding in that area, and flooding that has existing now for a hundred years.

And ever since that time, the state has invested money to try to increase the number of flood plains and expand the number of wetlands that exist in that area, because wetlands and flood plains help to store the water and reduce flooding, and that's one of the huge economic consequences of impacting our wetlands is the loss of the ability to control flooding.

And so, one of the big arguments that we've got about removing protections for these wetlands that are not protected under the federal law is to consider the economic benefit that the wetlands provide. There certainly are stories that some of the wetlands that we are charged with protecting are mere wet spots in farm fields, but most of the time that's just not the case.

And we're finding that the wetlands that

we do protect help provide resources not only for preventing flooding, but also recharging our groundwater aquifers, filtering pollutants out, and ensuring that most of our drinking water systems -- most of them are -- get their water from the ground -- are able to get safe and clean water to the residents in the State of Indiana.

We've testified against the legislation, and so has the Department of Natural Resources. The Governor's expressed concern about this legislation, and we will be meeting with members of the House Environment Committee and folks to talk about how we might address concerns that some people have raised, and transform this legislation into something that is -- actually improves the program instead of eliminating the program. And so, that's -- that's the big bill that we're looking at today.

And that's my report, Sen. Gard, and I'm happy to answer any questions.

CHAIRMAN GARD: Yes.

Are there any questions? Joanne has her hand up, and I -- afterwards, then, I want to

make some comments about the wetlands bill as
well.

- DR. ALEXANDROVICH: Thanks, Chairman Gard.
 - Bruno, do you have any -- can you give us a rough estimate of how many acres would no longer be protected and how that compares to what will remain protected?
 - about 80 -- so -- and I don't have the figures in front of me, but we do have them, and I would just say that of the remaining wetlands in the state, about 85 percent of them would be our -- protected under our current state law, and the remainder under the federal law.
 - So, by eliminating the protection of this -- eliminating this law, we lose the protection of the vast majority of wetlands that exist today. And now, to get more precise figures, I'll -- and we're happy to do so. We'll get our folks to provide that. And I know we've been -- we've got that information. I just don't have it right in front of me.

CHAIRMAN GARD: Anyone else have a question?

(No response.)

CHAIRMAN GARD: Bruno, thank you for giving that report on the legislature.

And I want to make a couple of comments about Senate Bill 389. I am really concerned if this bill passes. I've just been really concerned about it. I was the lead sponsor on the bill. Rep. Wolkins -- it was a House Bill -- he was the author of the bill, and this -- we worked hard for a long time on this bill. It wasn't something that was just thrown together before a session.

We -- back then we had the Environmental Quality Service Council, and we spent some time during the summer studying the issue. The Swank Decision had not been out for too long. You needed to understand that before you could really delve into this. This is really very complicated when you get into it. It's not -- it's not easy.

These isolated wetlands now, there are various classifications of those wetlands,

- depending on a number of things, but a lot of the legislators -- well, very few of them were around at the Swank Decision, and most of them don't
- have any idea what the Swank Decision says or does and the relationship there.
- So, if any of you know any of these House
 members very well and have some influence, I
 think it's appropriate to talk to them about it,
 but I am really concerned about it.
 - Before I lose my voice, let me call on Chris Pedersen for the Rulemaking Report.

- MS. PEDERSEN: Good afternoon. I'm
 Chris Pedersen, in the Rules Development Branch
 of the Office of Legal Counsel.
 - The next Board meeting is tentatively scheduled for May 12th, 2021, and it will also be a Zoom meeting. At that meeting, we anticipate presenting two final adoption and three preliminarily -- preliminary adoption rulemakings.
 - The NOx Emissions Monitoring Rule was preliminarily adopted in November, and that rule revises the existing monitoring and reporting

requirements for certain large fossil fuel boilers to add an alternative for monitoring and reporting of NOx emissions that is consistent with the federal requirements.

Also the Metals Criteria rulemaking. That was also preliminarily adopted in November. This rule revises Indiana's aquatic life and human health ambient water quality criteria for certain metals. It's based on federal recommendations and current science. Some proposed criteria would be more stringent and some less stringent than the current criteria. This rule is getting ready to go into a comment period, and so, the schedule of the rulemaking is dependent on the number and complexity of the comments that are received.

For preliminary adoption, the Solid Waste Financial Assurance rulemaking is scheduled for May, and that rule revises the financial assurance requirements for solid waste facilities to provide compliance flexibility and to improve the administration of the final assurance requirements. It also resolves inconsistences

across financial assurance requirements for various waste programs.

The Satellite Manure Storage Structure
Reference Updates rulemaking. It updates
references to the Natural Resources Conservation
Service Standards for the design and construction
of satellite manure storage structures to be
consistent with the standards for similar
structures at confined feeding operations.

And finally, the BP Temporary Alternative Opacity Limitations Rule. This establishes a temporary alternative opacity limitation for the BP Whiting Refinery in Lake County, at the request of the company. The alternative limits are requested to reduce the risk for explosions from emissions passing through electrostatic precipitators during startup, shutdown and hot standby events.

And that is my update on upcoming rules.

I'll be happy to answer any questions about the agency rulemakings or schedules.

CHAIRMAN GARD: Are there any questions for Chris on rulemaking?

(No response.)

CHAIRMAN GARD: If not, thank you,
Chris.

Today we will have hearings and Board action on final adoption of the following rules: Cold Cleaning Degreasing Alternative, Hazardous Waste Financial Assurance, and Vertellus Particulate Matter Revisions. I'm not pronouncing that right at all.

After Board action on the rules, there will be a Board discussion of the hearing on the citizens petition that we held on October 28th.

The rules being considered at today's meeting were included in the Board packet and are available for public inspection on the IDEM Web site at least one week prior to each of the Board meetings.

A written transcript of today's meeting will be made. The transcript and any written submissions will be open for public inspection at the Office of Legal Counsel. A copy of the transcript will be posted on the Rules page of the agency Web site when it becomes available.

- Now we'll move on to the public hearing.

 This is a public hearing before the Environmental
 Rules Board of the State of Indiana concerning
 final adoption of amendments to rules at

 IAC 8-3, Cold Cleaning Degreasing Alternative
- Rules. The proposed rule as preliminarily

 adopted found in today's Board packet is entered

 into the record of the hearing.
- 9 Keelyn Walsh will present the rules to the 10 Board.

- MS. WALSH: Good afternoon, members of the Board. I'm Keelyn Walsh, with the Rules Development Section of the Office of Legal Counsel, and I'm presenting Rule No. 18-542, Cold Cleaning Degreasing Alternative, for your consideration.
 - Cold cleaning is one of four types of degreasing operations in which industrial sources dip or spray machinery parts with a solvent.

 Indiana's current state rule at 326 IAC 8-3-8 requires sources operating cold cleaner degreasers to utilize a low vapor pressure solvent for cleaning or degreasing machine parts.

The current rule does not provide an option for sources to use a higher vapor pressure solvent with a control device.

IDEM is proposing to amend 326 IAC 8-3-1, 8-3-2, 8-3-3, 8-3-4, and 8-3-8 to allow for the use of an alternative control device for solvents with a higher vapor pressure, in order to control emissions from cold cleaning degreasing activities for users currently required to use a low vapor pressure solvent to comply with the state rule. These amendments are consistent with U.S. EPA regulations and will ensure smoother and more efficient operations for industrial sources in the state.

This rule is being presented again for final adoption because the proposed rule published in the Indiana Register on January 22nd, 2020, unintentionally omitted several comments that were received during the second notice of comment period. A new proposed rule was published in the Register on January 6th, 2021 that contains the comments received during the second notice of comment

Is there

period. The comments and responses were included 1 in the Board packet for the preliminary adoption hearing on January 8, 2020, and the draft rule 3 included all of the changes related to those 4 5 comments. IDEM requests that the Board final adopt 6 7 this rule as presented, and program staff are available to answer any further questions you may 8 9 have. 10 Thank you. 11 CHAIRMAN GARD: Are there any questions for Keelyn or anybody else on this 12 rule? 13 14 (No response.) 15 CHAIRMAN GARD: Thank you, Keelyn. 16 MS. WALSH: Uh-huh. 17 CHAIRMAN GARD: Who has signed up to speak on the rule? 18 19 (No response.) 20 CHAIRMAN GARD: No one? Okay. The Board will now consider final adoption of 21 amendments to 326 IAC 8-3, Cold Clean -- Cold 22

Cleaner Degreasing Alternative Rules.

1	any Board discussion?
2	(No response.)
3	CHAIRMAN GARD: Is there a motion to
4	final adopt IDEM's proposed rules as presented?
5	MR. DAVIDSON: So moved, Calvin.
6	CHAIRMAN GARD: Is there a second?
7	MS. NELSON: Moved, Katie.
8	CHAIRMAN GARD: I'll call the roll.
9	Mr. Etzler?
10	MR. ETZLER: Yes.
11	CHAIRMAN GARD: Dr. Alexandrovich?
12	DR. ALEXANDROVICH: Yes.
13	CHAIRMAN GARD: Mr. Bortner?
14	MR. BORTNER: Yes.
15	CHAIRMAN GARD: Ms. Collier?
16	MS. COLLIER: Yes.
17	CHAIRMAN GARD: Mr. Davidson?
18	MR. DAVIDSON: Yes.
19	CHAIRMAN GARD: Mr. Gilson?
20	MR. GILSON: Yes.
21	CHAIRMAN GARD: Mr. Green?
22	MR. GREEN: Yes.
23	CHAIRMAN GARD: Mr. Horn?

1	(No response.)
2	CHAIRMAN GARD: Ms. Nelson?
3	MS. NELSON: Yes.
4	CHAIRMAN GARD: Dr. Niemiec?
5	(No response.)
6	CHAIRMAN GARD: Mr. Rulon?
7	(No response.)
8	CHAIRMAN GARD: Mr. Schuler?
9	MR. SCHULER: Yes.
LO	CHAIRMAN GARD: Ms. Valiquett?
L1	(No response.)
L2	CHAIRMAN GARD: Mr. Wasky?
L3	MR. WASKY: Yes.
L 4	CHAIRMAN GARD: The Chair votes aye.
L5	The rule is adopted with 12 ayes and zero nays.
L6	This is a public hearing before the
L7	Environmental Rules Board of the State of Indiana
L8	concerning final adoption of amendments to rules
L9	at 329 IAC 3.1-14 and 329 IAC 3.1-15, Hazardous
20	Waste Financial Assurance Rules. The proposed
21	rules as preliminarily adopted with IDEM's
22	suggested changes incorporated found in today's
23	Board packet is entered into the record of the

- 1 hearing.
- 2 Dan Watts will present the rule to the
- 3 Board.
- 4 Dan?
- MR. WATTS: Good afternoon, members
- 6 of the Board. I'm Dan Watts of the Rules
- 7 Development Branch. I'm presenting LSA
- 8 Document 14-287 for final adoption. This
- 9 rulemaking makes vital updates and corrections to
- 10 address longstanding issues in the Hazardous
- 11 Waste Financial Assurance Rules at 329 IAC 3.1-14
- 12 and 3.1-15.
- The main amendments in the rulemaking
- 14 include adding specific financial assurance
- 15 requirements for hazardous waste facilities
- 16 subject to corrective action, making corrections
- 17 to the wording of the financial assurance forms,
- 18 updating rule language to comport with current
- 19 rules drafting standards, and making any other
- 20 needed changes or corrections observed in the
- 21 rule language.
- 22 Since the preliminary adoption of the
- 23 rulemaking, changes to the rule proposed for

final adoption have been limited to typographical and formatting errors or rephrasing of rule language based on LSA recommendations. An example is replacing the legacy phrase "pursuant to" with the more accurate "in accordance with."

In addition, based on comments received during the preliminary adoption hearing -- or more so a suggestion received during that hearing -- the usages of "insurer" versus "insured" were examined in the proposed rule language, and IDEM did not find any additional instances in which the terms were used incorrectly.

Lastly, during the third comment period held between preliminary and final adoption, no comments were received.

Representatives from IDEM are available to answer any questions that you may have for this rulemaking. The Department requests that the Board adopt this rule so IDEM can move forward with these vital updates to the Hazardous Waste Financial Assurance Rules.

Thank you.

```
CHAIRMAN GARD: Thank you, Dan.
1
           Are there any questions for Dan or any of
2
    the other IDEM people that are present?
3
4
                       (No response.)
5
                CHAIRMAN GARD: If not, is there
6
    anybody that is signed up to speak on this -- on
    this final adoption?
7
                       (No response.)
8
                CHAIRMAN GARD: Okay. With that, the
9
    hearing is concluded. The Board will now
10
    consider final adoption of amendments to
11
    326 IAC 3-1 -- 3.1-14 and 329 IAC 3.1-15,
12
    Hazardous Waste Financial Assurance Rules. Any
13
14
    Board discussion?
15
                       (No response.)
16
                CHAIRMAN GARD: Do I hear a motion to
17
    adopt IDEM's suggested changes to the rule?
                MR. ETZLER: I'll move --
18
19
                CHAIRMAN GARD:
                                 Is there a second?
20
                MR. ETZLER: -- Bill Etzler.
21
                CHAIRMAN GARD: I'm going to call the
22
    roll.
23
           Mr. Etzler?
```

1	MR. ETZLER: Yes.
2	CHAIRMAN GARD: Dr. Alexandrovich?
3	DR. ALEXANDROVICH: Yes.
4	CHAIRMAN GARD: Mr. Bortner?
5	MR. BORTNER: Yes.
6	CHAIRMAN GARD: Ms. Collier?
7	MS. COLLIER: Yes.
8	CHAIRMAN GARD: Mr. Davidson?
9	MR. DAVIDSON: Yes.
10	CHAIRMAN GARD: Mr. Gilson?
11	MR. GILSON: Yes.
12	CHAIRMAN GARD: Mr. Green?
13	MR. GREEN: Yes.
14	CHAIRMAN GARD: Mr. Horn?
15	(No response.)
16	CHAIRMAN GARD: Ms. Nelson?
17	MS. NELSON: Yes.
18	CHAIRMAN GARD: Dr. Niemiec?
19	DR. NIEMIEC: Yes.
20	CHAIRMAN GARD: Mr. Rulon?
21	(No response.)
22	CHAIRMAN GARD: Mr. Schuler?
23	MR. SCHULER: Yes.

1	CHAIRMAN GARD: Ms. Valiquett?
2	(No response.)
3	CHAIRMAN GARD: Ms. Valiquett?
4	(No response.)
5	CHAIRMAN GARD: Mr. Wasky?
6	MR. WASKY: Yes.
7	CHAIRMAN GARD: The Chair votes aye.
8	The vote is 12 ayes, zero nays. The changes are
9	adopted.
10	Is there a motion to adopt Indiana's
11	proposed rule as amended? We need a
12	MR. ETZLER: So moved, Bill Etzler.
13	CHAIRMAN GARD: Is there a second?
14	MR. GREEN: Second, R. T. Green.
15	CHAIRMAN GARD: I'll call the roll.
16	Mr. Etzler?
17	MR. ETZLER: Yes.
18	CHAIRMAN GARD: Dr. Alexandrovich?
19	DR. ALEXANDROVICH: Yes.
20	CHAIRMAN GARD: Mr. Bortner?
21	MR. BORTNER: Yes.
22	CHAIRMAN GARD: Ms. Collier?
23	MS. COLLIER: Yes.

1	CHAIRMAN GARD: Mr. Davidson?
2	MR. DAVIDSON: Yes.
3	CHAIRMAN GARD: Mr. Gilson?
4	MR. GILSON: Yes.
5	CHAIRMAN GARD: Mr. Green?
6	MR. GREEN: Yes.
7	CHAIRMAN GARD: Ms. Nelson?
8	MS. NELSON: Yes.
9	CHAIRMAN GARD: Dr. Niemiec?
10	DR. NIEMIEC: Yes.
11	CHAIRMAN GARD: Mr. Schuler?
12	MR. SCHULER: Yes.
13	CHAIRMAN GARD: Ms. Valiquett?
14	(No response.)
15	CHAIRMAN GARD: Mr. Wasky?
16	MR. WASKY: Yes.
17	CHAIRMAN GARD: And the Chair votes
18	aye. The proposed rule is adopted 12 to zero.
19	Okay. This is a public hearing before the
20	Environmental Rules Board of the State of Indiana
21	concerning final adoption of amendments to rules
22	at 326 IAC 6.5-6-31, Vertellus Particulate Matter
23	Revisions. The proposed rule as preliminarily

adopted and found in today's Board packet is entered into the record of the hearing.

consideration.

- 3 Keelyn Walsh will present the rule to the 4 Board.
- MS. WALSH: Hello again. I'm Keelyn
 Walsh, and I'm presenting Rule No. 19-82,
 Vertellus Emission Limits Updates, for your

Vertellus is a chemical manufacturing company in Indianapolis, Indiana, and has requested revisions to its particulate matter emission limits listed at 326 IAC 6.5-6-31.

These revisions remove units that are no longer operating or have been demolished at the facility, make changes to particulate matter emission limits on other units impacted by U.S. EPA's recently adopted sulfur dioxide limits at 326 IAC 7-4-2.1(a)(4), update existing language, and add new language pertaining to the types of gases burned in certain units.

Marion County's one-hour SO2 monitoring data was found to exceed the one-hour National Ambient Air Quality Standard of 75 parts per

billion for the period between 2010 through 2012, and the county was consequently designated as nonattainment by U.S. EPA. The 2010 one-hour SO2 limits were incorporated into Indiana's State Implementation Plan on January 1st, 2017, and therefore revisions are required for some sources listed at 326 IAC 7-4-2.1 in order to demonstrate attainment of the new one-hour SO2 standard.

Additionally, petroleum oil was burned at several Vertellus units, which helped contribute to monitored violations of the one-hour SO2 standard in Marion County. These units have since switched to burning natural gas, which reduces SO2 emissions and allows Vertellus to remain in compliance with its revised SO2 limits to ensure continued attainment of the one-hour SO2 standard. Revisions to the particulate matter emission limits at 326 IAC 6.5-6-31 are needed for consistency with the process changes that Vertellus has made to comply with the new SO2 standards.

Finally, language is being added at 326 IAC 6.5-6-31(b)(2) to indicate that certain

- 1 units burn both natural and landfill gases.
- 2 Increases in several emission limits represent
- 3 adjustments in the potential amount of natural
- 4 gas a unit can burn rather than the actual amount
- of gas burned, and modeling has shown no
- 6 increased emission concentrations at the modeled
- 7 receptors.

8 Vertellus anticipates that switching from

9 petroleum fuels to natural gas, as well as

10 reducing the amount of landfill gas burned, will

11 result in an emissions decrease of 14.1 tons per

12 year as compared to the amount currently listed

in Indiana's SIP, and allow the area to

14 demonstrate attainment of U.S. EPA's National

15 Ambient Air Quality Standards. Once the

16 revisions in this rulemaking are completed, IDEM

17 will submit the final rule to U.S. EPA as a SIP

18 revision.

19 IDEM requests that the Board final adopt

20 this rule as presented, and program staff are

21 available to answer any further questions you may

22 have.

Thanks.

1 CHAIRMAN GARD: Thank you. Are there any questions for Keelyn or any 2 of the other staff? 3 4 (No response.) 5 CHAIRMAN GARD: Okay. Are there any people that have signed up to speak? 6 7 (No response.) CHAIRMAN GARD: Anybody not signed up 8 9 want to speak? 10 (No response.) CHAIRMAN GARD: This hearing is 11 concluded. The Board will now consider final 12 13 adoption of amendments to 326 IAC 6.5-6-31, 14 Vertellus Particulate Matter Revisions. Is there any Board discussion? 15 16 (No response.) 17 CHAIRMAN GARD: Motion -- I need a motion to final adopt IDEM's proposed rules as 18 19 presented. 20 MR. DAVIDSON: So moved, Calvin. 21 CHAIRMAN GARD: Is there a second? 22 MR. GREEN: R. T. Green, second. 23 CHAIRMAN GARD: Roll call.

1	Mr. Etzler?
2	MR. ETZLER: Yes.
3	CHAIRMAN GARD: Dr. Alexandrovich?
4	DR. ALEXANDROVICH: Yes.
5	CHAIRMAN GARD: Mr. Bortner?
6	MR. BORTNER: Yes.
7	CHAIRMAN GARD: Ms. Collier?
8	MS. COLLIER: Yes.
9	CHAIRMAN GARD: Mr. Davidson?
10	MR. DAVIDSON: Yes.
11	CHAIRMAN GARD: Mr. Gilson?
12	MR. GILSON: Yes.
13	CHAIRMAN GARD: Mr. Green?
14	MR. GREEN: Yes.
15	CHAIRMAN GARD: Ms. Nelson?
16	MS. NELSON: Yes.
17	CHAIRMAN GARD: Dr. Niemiec?
18	DR. NIEMIEC: Yes.
19	CHAIRMAN GARD: Mr. Schuler?
20	MR. SCHULER: Yes.
21	CHAIRMAN GARD: Mr. Wasky?
22	MR. WASKY: Yes.
23	CHAIRMAN GARD: And the Chair votes

aye. The rule is final adopted 12 ayes, zero nays.

Now we're going to go into the citizens petition discussion. This will be an open discussion on the citizens petition hearing that was held on October the 24th of last year. Most of our Board Members were able to attend, and hopefully those that weren't have viewed the hearing, which was placed on IDEM's Web site shortly after the public hearing. Documents from the hearing were included or were provided to Board Members and were also placed on the Web site.

As noted in the question list provided in the Board packet, three sets of questions were submitted. Recently -- shortly before the Board packet was sent out, the Petitioners requested additional time to respond in writing. When both sides have completed their responses, they will be provided to the Board, and we will continue our discussions at the next Board meeting.

While we do not have the responses for the discussion today, we have in the past generally

- 1 used this time to ask questions of those who have
- 2 testified and the agency. I know some Board
- 3 members may have additional questions for IDEM or
- 4 the Petitioners. Several of the Petitioners are
- 5 with us today, as well as agency technical staff,
- 6 to assist our discussion.
- 7 Could those of you speaking for the
- 8 Petitioners today please identify yourselves? Do
- 9 we know who's going to be speaking for the
- 10 Petitioners, if anybody?
- 11 Ryan, do you see anybody?
- 12 MR. CLEM: I do not, Chair Gard.
- 13 CHAIRMAN GARD: Okay.
- MR. CLEM: Hold it; I'm sorry. We do
- 15 have -- Tim Healy has his hand up.
- 16 CHAIRMAN GARD: Yeah, I just -- his
- 17 hand just came up.
- 18 Okay. Martha, could you please introduce
- 19 the IDEM staff in the meeting today available to
- 20 answer questions?
- MS. CLARK METTLER: Yeah, sure. So,
- 22 I'm Martha Clark Mettler. I'm the Assistant
- 23 Commissioner of the Office of Water Quality. I

want to take this opportunity to thank the Board members who submitted questions. Our -- it's obvious you've all been thinking about this, and some of them are quite challenging and we're working on getting responses, and I'm happy to answer any other questions you have today.

We've got Paul Higginbotham, who is the Deputy Assistant Commissioner, Office of Water Quality, and Jerry Dittmer, who is the Chief of our Permits Branch, and any of us can field questions that you may have. And I just saw Craig Williams' picture pop up, and he's one of the lead spokespeople for the Petitioners, so I thought I'd introduce him, too.

CHAIRMAN GARD: Okay. Thank you, Martha.

During the testimony, we heard about the discussion between IDEM and the Petitioners on this subject in the past. I think it would be beneficial for both sides to use the time between now and the next meeting to share and discuss their responses with their -- each other and work on developing options for the Board to consider

1 what the next steps would be.

and I would -- I'd like to really encourage the Petitioners to sit down with IDEM, and it seemed to me that there was a process in the statute, and I know that -- because we worked on this for quite some time -- there was a provision in there that I thought would take care of the situation that you find yourself in now, but it was a provision that essentially said when you reach that point of really diminishing returns based on your investment, you know, you -- that was as far as you were expected to go.

And I still don't understand why that hasn't worked for you all. And, you know, whether the process hasn't been followed correctly or what the issue is, but I really would like to know what there is in the current statute that makes that unworkable.

Is there any more discussion from the

Board on this, questions that they want to ask?

MR. WILLIAMS: Chairwoman Gard, this
is Craig Williams. If I can speak to our efforts

1 to date.

CHAIRMAN GARD: Yes, please do.

MR. WILLIAMS: Thank you. First of all, thank you, everybody, for the submission of your questions.

As we were moving through them, we realized that the -- we feel that our ask is simple on its face. We're simply asking to find the regulatory compliance that the '94 policy provides, but the application of that is complex and involves a lot of moving parts. And as we began working through the questions that were provided, we felt that we really needed to take the time to dig into them and provide thorough answers.

We are -- we are in the process of reaching out to Paul and his crew to try to set up maybe some calls or meetings in early March, and as long as he and his staff are on board with it, I think our desire is to try to get a single document returned to the Rules Board with all of the questions and our responses in one place.

That way it'll be, I think, easier to see

where -- where we come together, where we agree.

And the places where we may have some differences, it might help provide us the ability to sort of get a direction on where we need to move going forward. So, we look forward to that, and rest assured, we have -- we have been very well received by these last however, six or seven years, I think, that this has been a topic of discussion, and as I think Paul alluded to at the last meeting, we just sort of felt that we couldn't find an appropriate way to get us to that place of regulatory compliance or regulatory certainty that we were seeking.

And we've brought on a couple of folks that I think are going to help us find some pathways to do that, so we look forward to working with them all. And we just appreciate your patience in this process.

CHAIRMAN GARD: Well, thank you,

Craig. We appreciate the time that you have put
in on this and are going to put in on this.

This -- as you alluded to, this is -- it seems
simple on the surface, but it's quite complicated

- when you really get into the weeds. And, you know, you still have water quality standards
- you're going to have to meet, and so, you know,
- 4 the process you use to get there we're going to
- 5 have to talk about.
- Is there -- are there any questions from
- 7 the Board for Mr. Williams or the other -- there
- 8 are two people with their hands up, and I can't
- 9 see -- oh, Dr. Alexandrovich, and then the other
- 10 one doesn't have a name.
- MR. HIGGINBOTHAM: Paul Higginbotham
- 12 is the other one.
- 13 CHAIRMAN GARD: Okay. Thank you,
- 14 Paul.
- Joanne, and then we'll get to Paul.
- DR. ALEXANDROVICH: Thank you.
- 17 As many people might recognize, I'm never
- 18 short of questions. I just want to make sure to
- 19 ask Craig, because I did submit questions,
- 20 surprise, surprise, and Nancy asked me who to
- 21 direct the questions to, and I kind of went
- 22 through them and said, "This one was maybe for
- 23 IDEM, and this one was for the Petitioners."

So -- but, you know, I didn't want to 1 limit it to that. So, Craig, I just want to make 2 sure that you've gone through the whole set of 3 4 questions and you feel like you can speak to them if you want to. 5 MR. WILLIAMS: Yeah. Thank you very 6 7 much. We are going through both sets of questions, and, you know, there are some that are 8 just very obviously for the agency to answer, but there are some that we think that we'd be able to 10 provide a little bit of insight to as well, and 11 so, we've received the whole list and we're 12 working through both sets. Thank you. 13 14 DR. ALEXANDROVICH: So, did I 15 understand you said that you and IDEM have agreed that it'll be -- all of these responses are going 16 17 to be in one document --18 We are --MR. WILLIAMS: 19 DR. ALEXANDROVICH: -- or you're 20 working on that? MR. WILLIAMS: We'll be working with 21

Paul, and as long as Paul and his team are

amenable to that, that is our desire. We felt

22

- 1 that that may help. That way you're not trying
- 2 to refer to a bunch of different documents
- 3 that -- we thought that that might help bring a
- 4 little bit of congruity to the whole process,
- 5 yes.
- 6 DR. ALEXANDROVICH: And if you can
- 7 agree on an answer, that means at least you're on
- 8 the same page to start.
- 9 MR. WILLIAMS: Sure.
- DR. ALEXANDROVICH: Thank you.
- 11 CHAIRMAN GARD: Paul?
- MR. HIGGINBOTHAM: Thank you,
- 13 Chairwoman Gard.
- I just wanted to kind of reiterate what
- 15 you had mentioned, as well as Craig, and yes, we
- are more than willing to sit down with the
- 17 Petitioners and Craig and his folks, and that'd
- 18 actually probably be more beneficial for the
- 19 Board for us to do that, to have those
- 20 discussions and bring something back to you guys
- 21 at a future meeting.
- That'll help us work through those issues
- 23 the best we can. I'm sure there may be spots

```
where we'll have to agree to disagree, but at
1
    least we'll have those noted accordingly. But we
2
    work well with these folks, and we'll continue to
3
4
    do that to try to find some type of resolution
    and move things forward.
5
                CHAIRMAN GARD: Good.
                                        Thank you.
6
                                                    We
7
    appreciate that.
           And I would -- I would really like an
8
9
    answer as to why the current -- what we call
    knee-of-the-curve provision in the current
10
    statute isn't adequate for their situation, and
11
12
    so, if -- if you make sure that that question's
13
    answered during your deliberations, I'd
14
    appreciate that.
           Any other comments, questions for either
15
    the Petitioners or IDEM staff?
16
17
                       (No response.)
18
                CHAIRMAN GARD:
                                      Okay. Well, if
                                 No?
    there aren't, we'll move on to Open Forum.
19
20
    there anyone in the audience that would like
21
    to --
22
                     (Telephone rang.)
```

CHAIRMAN GARD:

I don't know if you

```
can hear that phone, but I could; sorry.
1
    there anyone in the audience that would like to
2
    speak?
            It's Open Forum.
3
4
                       (No response.)
5
                CHAIRMAN GARD: I don't think so.
           Well, the next meeting of the
6
    Environmental Rules Board is tentatively set for
7
    Wednesday, May 12th, 2021 at 1:30 p.m.
8
    meeting will be a remote meeting like today's.
    The date is tentative and subject to change. We
10
    will keep everyone updated when that is confirmed
11
    or another date is chosen.
12
13
           Is there a motion to adjourn?
14
                       (No response.)
15
                CHAIRMAN GARD: Is there a motion
16
    to --
17
                DR. NIEMIEC: So moved.
                                          This is Ted
18
    Niemiec.
19
                CHAIRMAN GARD: Is there a second?
20
                MR. GREEN: R. T. Green, second.
                CHAIRMAN GARD: Okay. All in favor,
21
22
    say aye.
23
            (Board members responded, "Aye.")
```

1	CHAIRMAN GARD: Opposed, nay.
2	(No response.)
3	CHAIRMAN GARD: We are adjourned.
4	You all be safe. It's snowing here now.
5	- - -
6	Thereupon, the proceedings of February 10, 2021 were concluded
7	at 2:48 o'clock p.m.
