## ATTACHEMENT 'A'

### Response to question #3 in Section C Environmental Management Assessment

The following deficiencies were identified during the most recent EMS assessment:

- **Air emission management** : A few minor discrepancies were identified for air reports required to be maintained to meet site's MSOP permit. These discrepancies have since been corrected
- **Waste management** : a few waste containers were not labeled & site has reinforced the container management requirements to employees and continue to conduct waste audits
- **Monitoring & measurement** : assessment identified one of the wastewater samplers being out of calibration. It has since been calibrated
- **Energy management** : Site did not have a formal written energy management program. Site is working on implementing an energy program during the middle of this year
- **Spill prevention & reporting** : assessment recommended that site enhance spill investigation process to identify root cause so appropriate corrective/preventive actions are implemented. Site is in the process of retraining affected site personnel to report/investigate & mitigate spills
