Indiana ESP facilities must submit an Annual Performance Report (APR) by April 1st of every year, for each calendar year in which the entity has been a member for at least three (3) full months. Membership terms are renewed every four (4) years through submitting your APR. Your APR should be reviewed and signed by a senior manager at your facility prior to submittal. Once signed, e-mail the APR to IDEM at esp@idem.IN.gov. Please do not include any confidential business information in your annual performance report. **Public access laws require IDEM to make the APR publicly available**, which may include posting all portions of your report on the Indiana ESP Web site. Answer the questions as completely as possible.

1. In addition to ESP, please list environmental awards received or voluntary programs participated in during the past twelve (12) months.
 Partners for Pollution Prevention; Carbon Disclosure Project
2. Has your facility taken advantage of any ESP incentives? If so, please describe the implementation process and list additional benefits IDEM should consider.
 We have attended the annual and quarterly meetings to gain more knowledge and network with peers.
3. If your facility was not registered to the ISO 14001 standard prior to becoming an ESP member, has ESP helped you to pursue registration? If so, how has ESP been instrumental in achieving registration?
 N/A

SECTION E**ENVIRONMENTAL IMPROVEMENT INITIATIVE RESULTS****Why do we need this information?**

Facilities need to share the results of the environmental improvement initiative that was pursued during the reporting period. IDEM needs to report cumulative program reduction results.

What do you need to do?

Reference Section F for "Category" and "Indicator" options to complete this section. Summarize your facility's progress on achieving the initiative you identified in the application or last year's APR. For assistance, please call (800) 988-7901 or email esp@idem.IN.gov.

Normalized quantity (Actual current year quantity - Actual baseline quantity) x Normalization factor 704,263,951.25

Briefly describe how you achieved improvements for this environmental initiative or, if relevant, any circumstances that delayed progress.
 We fell short of our goal and actually saw an increase in natural gas usage year-over-year. The main contributor to this is outside temperatures below the previous year, as we utilize natural gas for heating facility in the winter months. An Energy Team was formed in October 2018 to look at projects to improve overall energy efficiency of our facility, include heating of facility and we hope to get back on track for this initiative in 2019.

Normalization factor (Current year production ÷ Baseline year production) 1.005			
Normalized quantity (Actual current year quantity - Actual baseline quantity) x Normalization factor 152,742.17			

Briefly describe *how* you achieved improvements for this environmental initiative or, if relevant, any circumstances that delayed progress.
 We fell short of our goal and actually saw an increase in electrical usage year-over-year. This was in part due to the ramp up of production on two recently installed production lines. An Energy Team was formed in October 2018 to look at projects to improve overall energy efficiency of our facility and we hope to get back on track for this initiative in 2019.

Initiative #3

Category 3: _____ Indicator 3: _____	Baseline (indicate measurement unit)	Current (indicate measurement unit)	Cost Savings
Calendar year			
Actual quantity (per year)			
Production unit (select one)	Earned Labor Hours Production units Production lbs. Other -- specify (e.g. Gallons, length, etc.)		
Production Quantity			NA
Normalization factor (Current year production ÷ Baseline year production)			
Normalized quantity (Actual current year quantity - Actual baseline quantity) x Normalization factor			

Briefly describe *how* you achieved improvements for this environmental initiative or, if relevant, any circumstances that delayed progress.

1. Briefly describe the *impacts or wastes* eliminated resulting from the environmental initiative(s). If multiple initiatives, please indicate which specifically.
 Our third Significant Environmental Aspect Project we are addressing is to recycle 90% of all waste generated. This year we met our goal, recycling 90.7% or 842,031 pounds of waste. We continue to struggle with plastic recycling but have been able to overcome by sorting materials previously included in our mixed plastics.

2. Are there other best management practices (BMPs) you can share correlating to your initiative(s)?
 The implementation of an Energy Team to drive energy efficiency projects. Along with the continued leverage and utilization of our Building Automation System (BAS) to control energy costs for our HVAC systems.

3. If the objectives and targets associated with the environmental improvement initiative(s) were not attained, please verify continued progress toward the environmental initiative(s). If multiple initiatives, please indicate which specifically.
 An Energy Team was formed in October 2018 to look at projects to improve overall energy efficiency of our facility, projects completed at the end of 2018 include the replacement of fluorescent lighting to LED lighting in a couple areas of plant. We hope continued implementation of similar projects help to get us back on track for our energy reduction initiative in 2019.

4. Please provide a narrative summary of progress made toward *qualitative, significant* EMS objectives and targets, if any.
 We have been working for many years to reduce our energy usage, having implemented many low-cost, no-cost items, as well as invested in several larger capital projects to work towards this target. We are now looking deeper for areas to reduce our energy, and working to gather data to be able to focus our attention on the remaining heavier energy use areas of our facility. Examples include projects such as conversion to LED lighting.

5. Please list any state, U.S. EPA, or other partnership programs to which you are reporting this data (e.g., Energy Star, Project XL).
 We report environmental information to the Carbon Disclosure Project.

6. Is your entity willing to share the environmental improvement initiative(s) and its best management practices (BMPs) at the ESP Annual Meeting and/or a Partners for Pollution Prevention quarterly meeting or conference? ☒ Yes ☐ No
