# Office of Air Quality

## Boiler MACT

- Published within the Federal Register on [January 31, 2013](#)
- A NESHAP for Hazardous Air Pollutants for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters
- Currently working with the OAQ in understanding the effect this rule will have
- Outreach will be coming
- Questions can be directed to Ms. Krista McKenna at [kmckenna@idem.in.gov](mailto:kmckenna@idem.in.gov) or (317) 234-3913

# Office of Land Quality

## LED Lamp Waste

- IC 13-20-.5-10-1 disposal prohibition applies to:
  - Covered entities [IC 13-11-2-47.7]
    - Household, public school or small business.
  - Covered electronic devices [IC 13-11-2-47.5]
    - Computer, fax machine, DVD player, VCR or other video device that is sold to a covered entity.
- Therefore, a spent LED lamp would not be subject to IC 13-20-.5-10-1 .

# Office of Land Quality

## LED Lamp Waste

- 329 IAC 16-2-17(2) defines e-waste as an electric component, such as:
  - Diode
  - Resistor
  - Capacitor
  - Coil
- Therefore, a spent LED lamp would be e-waste under this rule.

# Office of Land Quality

## LED Lamp Waste

- 329 IAC 16-3-1 excludes the following:
  - A site where less than 23 tons of e-waste is enclosed in a building or trailer.
  - Storage or processing that takes place where the e-waste is generated (households and CESQG).
  - Hazardous waste generator, other than CESQG, that comply with certain conditions related to hazardous e-waste.
- LED lamps would be exempt from 329 IAC 16 if one of the eight exclusions are met.

# Office of Land Quality

## LED Lamp Waste

- If excluded from 329 IAC 16 and IC 13-20.5, then make a waste determination on the spent lamps and manage accordingly.
- If hazardous, then you may choose to manage spent lamps in accordance with 329 IAC 16.
  - Spent lamps managed as “e-waste” will not count toward generator status .
