All will be inducted today!

Not yet a member?

Applications are available online at  
<https://www.in.gov/idem/5157.htm> or  
by emailing [partners@idem.IN.gov](mailto:partners@idem.IN.gov)

# Membership

- Membership is free and voluntary
- Applicants must commit to the Partners Pledge to be inducted into the program
- Contingent on having and maintaining a standard of environmental compliance
- Each Partner is required to complete a pollution prevention activity report to retain membership (due June 1<sup>st</sup> every year)

# Become a Partner if you want to:

- Network with other Indiana businesses regarding P2
- Have your organization be recognized as a pollution prevention leader in Indiana
- Learn how P2 can improve your business practices
- Earn extra points on RMDB grant and GAEE ranking
- Get reduced ticket pricing for the annual conference
- Stay up to date with pollution prevention technologies
- Become more aware of and involved in IDEM's efforts to integrate P2 into various programs
- Hear how other businesses have implemented successful P2 technologies

From 2007 to 2017, the Partners  
for Pollution Prevention have...

Reduced over 16 trillion  
pounds of air emissions

This included  
almost 63 million  
pounds of air  
toxics reductions

The image shows three large, cylindrical drums, likely for hazardous waste, stacked on a wooden pallet. The drums have a blue upper half and a yellow lower half. Each drum has a white label on its top surface. The pallet is made of wooden slats. The background is a plain, light-colored wall.

Reduced over 733 million  
pounds of hazardous  
waste

Eliminated 152 million  
pounds of solid waste  
out of their processes

Conserved over 41 billion  
kilowatt-hours of electricity

The image shows an industrial gas processing facility. In the foreground, a large, yellow-painted metal pipe with a flange and numerous bolts curves from the right towards the center. It is supported by concrete blocks. To the left, there is a covered walkway with a metal frame and roof, under which more industrial equipment and pipes are visible. The ground is covered in dark gravel. In the background, there are more industrial structures, including a tall vertical pipe and a small yellow building. The sky is clear and blue.

Conserved  
over 547  
million therms  
of natural gas

Conserved almost 7 billion  
gallons of water

Reduced over 70  
million pounds of water  
pollution

Recycled almost 2 billion pounds  
of materials

Data for these total emission and waste reductions came from the Annual Recertification (AR) reports submitted from members in 2008 through 2018

# Reminders

- Annual Pledge Recertification (APR) forms were due **June 1, 2019**
- We received only 68.75% of the report forms from Partners by the deadline in 2019
- Please submit your forms for inclusion in required annual reports

# Call for P2 Success Stories

- Seeking topics for program promotion
- Ideas such as:
  - Projects from your own local facility
  - Speakers you've heard at other conferences
  - Success stories from facilities in other states
- Please send ideas to [partners@idem.IN.gov](mailto:partners@idem.IN.gov)
