

# What happens when I e-cycle?

**RECYCLED METALS**  
Used in new electronics, jewelry, automobiles, and other products.

**RECYCLED PLASTICS**  
Made into many different things like garden furniture and non-food containers.

## NEW PRODUCTS

Electronics are dropped off at Indiana E-Cycle registered collector

Indiana E-Cycle registered collector sends item to Indiana E-Cycle registered recycler

If electronics are reusable, the collector or e-cycler may destroy personal information, refurbish and resell or donate items.

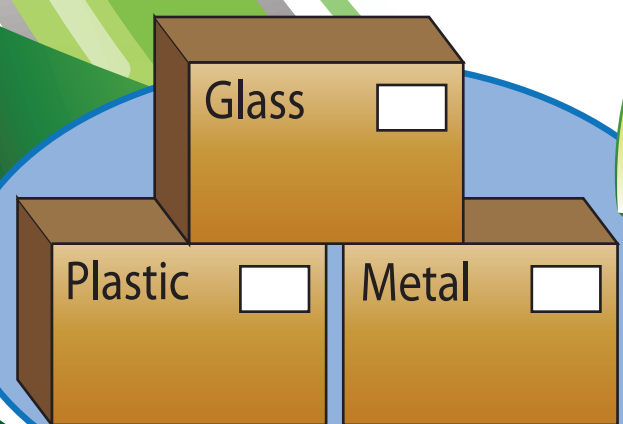

## REMANUFACTURE

Once the buyer receives the commodities, they are processed and manufactured into new items

## RECYCLE

E-cycler takes items apart

E-cycler packages and ships different commodities (plastic, metal, glass, etc.) to buyers

E-cycler sorts different components of electronic devices (metals, plastic, glass, etc.)
