Glass Recycling 3-6 Grade

Hi there, I'm Dottie Bottle and I'm here to tell you all about me!

Did you know that I am made mostly from sand. People have been making glass like me for the last 4,500 years!

Glass can be recycled over and over again. There is no limit to the number of times I can be recycled. In the landfill, glass like me can take a million years to break down. When glass is recycled, it can be turned into new glass bottles, jars, tiles, marbles, fiberglass insulation and even road paving.

Word Unscramble

Unscramble each word in the jars to discover how they are a part of me!
