Paper Recycling 3-6 Grade

Hi there, I'm Paper Guy and I come from trees grown especially for papermaking.

Have you ever thought about all the places where you use paper products? You use paper to write or draw on and you may even eat off of a paper product. Some of the paper products can be recycled and others cannot.

Paper products that can be recycled are everything from paperboard (cereal box) to newspaper. Paper products that cannot be recycled are items that are a one-time-use product such as a paper towel.

Throughout the school year don't forget to clean out your desk and folders. Don't forget to recycle the paper you don't need any more.

Instructions:

Circle four paper items from the list below that are made for a one-time-use and CANNOT be recycled.

 Paper Towel

 Paper Plate

 Tissue
(Kleenex™)

 Toilet Paper

 Junk Mail

 Magazine

 Paperboard
(Cereal Box)

 Lined School Paper

Paper Guy

To find out where you can recycle your paper, visit me at:

www.idem.IN.gov/files/swmd/map.html

Correct answers:
Paper Plate, Tissue (Kleenex), Paper Towel and Toilet Paper.
