

Bartholomew County SWMD Electronics Recycling Expands

In December 2012 the Bartholomew County SWMD successfully expanded their electronics recycling program to include other items in addition to computers. Their collection program now includes most electronics that utilize a wall plug-in. To date they have diverted 59,081 lbs (29.54 tons) of materials away from the landfill.

Green Wave of Indianapolis provides the recycling service of these electronics. The program is free to residents of Bartholomew County and is available at both the landfill and recycling center. For more information on what specific items are accepted, visit the Bartholomew County SWMD website [<http://www.bcswmd.com/php/recycle8.php>.]
