REPLY TO THE ATTENTION OF: AR-18J

Matt Stuckey
Assistant Commissioner
Office of Air Quality
Indiana Department of Environmental Management
100 North Senate Avenue
Indianapolis, Indiana 46204

Dear Mr. Stuckey,

Thank you for your letter dated June 20, 2022, regarding Indiana's 2022 Assessment for Ongoing Data Requirements for the 2010 Primary 1-Hour Sulfur Dioxide National Ambient Air Quality Standard. The letter included a request to delist a facility that you had previously listed as subject to the requirements of the sulfur dioxide (SO₂) Data Requirements Rule (DRR). The list identifies SO₂ sources for further evaluation and air quality characterization.

On January 7, 2016, you identified the Duke Energy – Gallagher Station facility as being subject to the requirements of the DRR due to emissions over 2,000 tons per year of SO₂ in 2014, 3,524 tons to be exact. In your June 20, 2022 correspondence, you note that Duke Energy – Gallagher Station was permanently shut down in June 2021 and is currently being dismantled.

We have reviewed the information and concur that Duke Energy – Gallagher Station qualifies not to be listed as subject to the requirements of the DRR. Accordingly, we will remove this facility from the list of sources subject to the requirements of the DRR.

Again, thank you for your letter and for your efforts to implement this important standard. Should you have any questions, please do not hesitate to contact me at 312-886-6043 or mooney.john@epa.gov.

Sincerely,

John Mooney
Director
Air and Radiation Division
