Eric J. Holcomb  
*Governor*

Bruno L. Pigott  
*Commissioner*

June 20, 2019

Ms. Cathy Stepp  
Regional Administrator  
U.S. EPA, Region 5  
77 West Jackson Boulevard  
Chicago, IL 60604-3950

Re: Full Maintenance Plan Updates for the Indianapolis (Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan and Shelby counties), La Porte County, South Bend-Elkhart (Elkhart and St. Joseph counties), Indiana Portions of the Chicago-Gary-Lake, Illinois-Indiana (Lake and Porter counties), Cincinnati-Hamilton, Ohio-Kentucky-Indiana (Lawrenceburg Township, Dearborn County), and Louisville, Kentucky-Indiana (Clark and Floyd counties) 1997 8-Hour Ozone Areas

Dear Ms. Stepp:

The Indiana Department of Environmental Management (IDEM) submits the Full Maintenance Plan Updates for the Indianapolis, La Porte County, South Bend-Elkhart, Lake and Porter counties, Lawrenceburg Township, and Clark and Floyd counties, Indiana 1997 8-hour ozone areas. The submittals demonstrate that these areas have remained well below the 1997 8-hour Ozone National Ambient Air Quality Standard (NAAQS) and should remain designated as attainment under the standard.

Effective June 15, 2004, United States Environmental Protection Agency (U.S. EPA) designated these areas nonattainment under Subpart 1 of the 1997 8-hour ozone NAAQS. Redesignation to attainment was effective July 19, 2007 for LaPorte County, Clark and Floyd counties, and the South-Bend Elkhart area, October 19, 2007 for Indianapolis, and May 11, 2010, for Lake and Porter counties and Lawrenceburg Township. As part of the redesignation actions, Indiana adopted and U.S. EPA approved maintenance plans for these areas which demonstrated continued attainment of the standard at least ten years after redesignation, as required under Section 175A of the Clean Air Act (CAA).

Under Section 175A(b) of the CAA, states must submit a revision to the first maintenance plan eight years after redesignation to provide for maintenance of the NAAQS for an additional ten years following the end of the first ten-year period. These submittals satisfy that commitment.

Throughout the development of the submittals, IDEM staff worked with U.S. EPA Region 5 to ensure that any potential concerns regarding these submissions were addressed.

IDEM provided a separate 30-day public comment period and opportunity for public hearing for each submittal. IDEM did not receive any public hearing requests or comments. Please refer to the enclosures for further information and dates regarding the public participation process documentation for the submittals.

This request consists of one (1) hardcopy of the required documentation. An electronic version of the submittals in PDF format identical to the hard copies have been sent to Doug Aburano, Chief of U.S. EPA Region 5's Attainment Planning and Maintenance Section and Chris Panos of U.S. Region 5.

IDEM requests that U.S. EPA proceed with review and approval of these submittals. If you have any questions or need additional information, please contact Brian Callahan, Chief, Air Quality Standards and Implementation Section, Office of Air Quality at (317) 232-8244 or [bcallaha@idem.IN.gov](mailto:bcallaha@idem.IN.gov).

Sincerely,

Keith Baugues  
Assistant Commissioner  
Office of Air Quality

**FULL MAINTENANCE PLAN UPDATE  
FOR THE INDIANAPOLIS, INDIANA  
1997 8-HOUR OZONE AREA**

**Boone, Hamilton, Hancock, Hendricks,  
Johnson, Madison, Marion, Morgan,  
and Shelby Counties, Indiana**

Prepared By:

The Indiana Department of  
Environmental Management

June 2019

## **Full Maintenance Plan Update for the Indianapolis, Indiana 1997 8-Hour Ozone Area (Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties, IN)**

### **Background**

On July 18, 1997 (62 FR 38856), United States Environmental Protection Agency (U.S. EPA) promulgated an 8-hour standard of 0.08 parts per million (ppm). The standard is attained when the three-year average of the annual fourth-highest daily maximum eight-hour average ozone concentrations measured at each monitor within an area is less than or equal to 0.08 ppm, when rounded. On April 30, 2004 (69 FR 23857), U.S. EPA published a final rule designating and classifying areas under the 8-hour ozone NAAQS. These designations and classifications became effective June 15, 2004. U.S. EPA designated as nonattainment any area that was violating the 8-hour ozone NAAQS based on the three most recent years of air quality data, 2001-2003.

The CAA contains two sets of provisions, subpart 1 and subpart 2, that address planning and control requirements for nonattainment areas. (Both are found in Title I, part D, of the CAA; 42 U.S.C. 7501-7509a and 7511-7511f, respectively.) Subpart 1 contains general requirements for nonattainment areas for any pollutant, including ozone, governed by a NAAQS. Subpart 2 provides more specific requirements for ozone nonattainment areas.

Under U.S. EPA's implementation rule for the 1997 8-hour ozone standard, (April 30, 2004, 69 FR 23951), an area was classified under subpart 2 based on its 8-hour ozone design value (i.e. the three-year average annual fourth-highest daily maximum 8-hour average ozone concentration) if it had a 1-hour design value at the time of designation at or above 0.121 ppm (the lowest 1-hour design value in Table 1 of subpart 2) (69 FR 23954). All other areas were covered under subpart 1, based upon their 8-hour design values (69 FR 23958).

Effective June 15, 2004, U.S. EPA designated Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties (herein referred to as the "Indianapolis, IN area"), nonattainment under Subpart 1 of the 1997 8-hour ozone NAAQS. The Indianapolis, IN area was redesignated to attainment on October 10, 2007, effective October 19, 2007 (72 FR 59210). As part of the redesignation action, Indiana adopted and U.S. EPA approved a maintenance plan for the Indianapolis, IN area which demonstrated continued attainment of the 1997 ozone standard at least ten years after redesignation, as required under CAA section 175A.

Under CAA section 175A(b), states must submit a revision to the first maintenance plan eight years after redesignation to provide for maintenance of the NAAQS for ten additional years following the end of the first 10-year period. The EPA's final implementation rule for the 2008 ozone NAAQS revoked the 1997 ozone NAAQS and stated that one consequence of revocation was that areas that had been redesignated to attainment (i.e., maintenance areas) for the 1997 standard no longer needed to

submit second 10-year maintenance plans under CAA section 175A(b). In *South Coast Air Quality Management District v. U.S. EPA*, the D.C. Circuit vacated the U.S. EPA's interpretation that, because of the revocation of the 1997 ozone standard, second maintenance plans were not required for "orphan maintenance areas," i.e., areas that had been redesignated to attainment for the 1997 NAAQS (maintenance areas) and were designated attainment for the 2008 ozone NAAQS. *South Coast*, 882 F.3d 1138 (D.C. Cir. 2018). Thus, states with these "orphan maintenance areas" under the 1997 ozone NAAQS must submit maintenance plans for the second maintenance period.

## **Second Maintenance Plan**

The Indianapolis, IN area was redesignated to attainment effective October 19, 2007. Therefore, in accordance with CAA section 175A(b), a second maintenance plan, demonstrating maintenance through October 19, 2027, was due on October 19, 2015.

A September 4, 1992, memorandum from John Calcagni<sup>1</sup> provides guidance on the content of a maintenance plan. The memorandum clarifies that an ozone maintenance plan should address the following items: the attainment volatile organic compounds (VOC) and nitrogen oxides (NO<sub>x</sub>) emissions inventories, a maintenance demonstration showing maintenance for the ten years of the maintenance period, a commitment to maintain the existing monitoring network, factors and procedures to be used for verification of continued attainment of the NAAQS, and a contingency plan to prevent or correct future violations of the NAAQS.

### *Attainment Inventory*

The original CAA section 175A maintenance plan approved by U.S. EPA included an attainment inventory for the Indianapolis, IN area that reflects typical summer day VOC and NO<sub>x</sub> emissions in 2005. Because the Indianapolis, IN maintenance area continued to monitor attainment of the 1997 ozone NAAQS in 2014, this is also an appropriate year to use for an attainment year inventory. As such, Indiana is using 2014 summer day emissions from the U.S. EPA 2014 version 7.0 modeling platform as the basis for the attainment inventory presented in Table 1 below. Table 1 shows VOC and NO<sub>x</sub> emission totals for all sectors in the Indianapolis, IN maintenance area for the 2014 attainment-year. These data are based on the most recently available National Emissions Inventory (2014 NEI version 2). The inventory documentation for this platform can be found here: <https://www.epa.gov/air-emissions-modeling/2014-version-70-platform>.

---

<sup>1</sup> "Procedures for Processing Requests to Redesignate Areas to Attainment," Memorandum from John Calcagni, Director, Air Quality Management Division, September 4, 1992.

**Table 1**  
**2014 Typical Summer Day Volatile Organic Compound (VOC) and Nitrogen Oxide (NO<sub>x</sub>) Emissions for the Indianapolis, Indiana Area (tons per day)**

<b>Source Category</b>	<b>VOC Emissions</b>	<b>NO<sub>x</sub> Emissions</b>
Nonpoint	66.47	9.26
Nonroad	20.21	27.64
Onroad	53.04	110.53
Point	5.31	29.68
<b>Total Area</b>	<b>145.03</b>	<b>177.11</b>

*Maintenance Demonstration*

Indiana is demonstrating maintenance through 2028 by showing that future emissions of VOC and NO<sub>x</sub> for the Indianapolis, IN maintenance area remain at or below attainment year emission levels. 2028 is an appropriate maintenance year because it is 10 years beyond the first 10-year maintenance period. The 2028 emissions inventory is projected from the U.S. EPA 2011 version 6.3 modeling platform. The inventory documentation for this platform can be found here: <https://www.epa.gov/air-emissions-modeling/2011-version-63-platform>. The relevant inventory scenario names are “2014fd” and “2028el.” The 2028 scenario was used to support past air quality modeling to support the regional haze program. The 2028 summer day emissions inventory for the Indianapolis, IN area is summarized in Table 2 below.

**Table 2**  
**2028 Typical Summer Day Volatile Organic Compound (VOC) and Nitrogen Oxide (NO<sub>x</sub>) Emissions for the Indianapolis, Indiana Area (tons per day)**

<b>Source Category</b>	<b>VOC Emissions</b>	<b>NO<sub>x</sub> Emissions</b>
Nonpoint	51.46	13.34
Nonroad	17.71	13.93
Onroad	15.95	28.53
Point	6.59	24.30
<b>Total Area</b>	<b>91.71</b>	<b>80.10</b>

Table 3 shows VOC and NO<sub>x</sub> emission totals for all sectors for the 2014 attainment-year and 2028 maintenance-year for Indianapolis, IN maintenance area.

**Table 3**  
**Change in Typical Summer Day Volatile Organic Compound (VOC) and Nitrogen Oxide (NO<sub>x</sub>) Emissions for the Indianapolis, Indiana Area between 2014 and 2028 (tons per day)**

Source Category	VOC Emissions			NO <sub>x</sub> Emissions		
	2014	2028	Net Change (2014-2028)	2014	2028	Net Change (2014-2028)
Nonpoint	66.47	51.46	-15.01	9.26	13.34	4.08
Nonroad	20.21	17.71	-2.50	27.64	13.93	-13.71
Onroad	53.04	15.95	-37.09	110.53	28.53	-82.00
Point	5.31	6.59	1.28	29.68	24.30	-5.38
<b>Total Area</b>	<b>145.03</b>	<b>91.71</b>	<b>-53.32</b>	<b>177.11</b>	<b>80.10</b>	<b>-97.01</b>

The maintenance demonstration for the Indianapolis, IN area shows maintenance of the 1997 ozone standard maintenance area, by providing emissions information to support the demonstration that future emissions of VOC and NO<sub>x</sub> will remain at or below 2014 emission levels when taking into account both future source growth and implementation of future controls. Table 3 shows that VOC and NO<sub>x</sub> emissions in the Indianapolis, IN area are projected to decrease by approximately 53 tons per day for VOC and 97 tons per day for NO<sub>x</sub> respectively, between 2014 and 2028. The decrease in VOC and NO<sub>x</sub> emissions shown between 2014 (attainment-year) and 2028 (maintenance-year) in Table 3 illustrates the continued maintenance of the 1997 8-hour ozone NAAQS is expected in the Indianapolis, IN maintenance area.

#### *Continued Air Quality Monitoring*

Indiana commits to continue to operate an approved ozone monitoring network in the Indianapolis, IN maintenance area. Indiana commits to consult with U.S. EPA prior to making changes to the existing monitoring network should changes become necessary in the future. Indiana remains obligated to meet monitoring requirements and continue to quality assure monitoring data in accordance with 40 CFR part 58, and to enter all data in the Air Quality System (AQS) in accordance with Federal guidelines.

#### *Verification of Continued Attainment*

Indiana has the legal authority to enforce and implement the requirements of the maintenance plan for the Indianapolis, IN area. This includes the authority to adopt, implement, and enforce any subsequent emission control measures determined to be necessary to correct future ozone attainment problems.

Verification of continued attainment is accomplished through operation of the ambient ozone monitoring network and the periodic update of the area's emissions inventory. Indiana will continue to operate an approved ozone monitoring network in the Indianapolis, IN maintenance area.

In addition, to track future levels of emissions, Indiana will continue to develop and submit to U.S. EPA updated emission inventories for all source categories at least once every three years, consistent with the requirements of 40 CFR part 51, subpart A, and in 40 CFR 51.122. The Consolidated Emissions Reporting Rule (CERR) was promulgated by U.S. EPA on June 10, 2002 (67 FR 39602). The CERR was replaced by the Annual Emissions Reporting Requirements (AERR) on December 17, 2008 (73 FR 76539). Indiana has an Emission Reporting Rule, 326 Indiana Administrative Code (IAC) 2-6, requiring certain sources, based on potential-to-emit emissions and location, to report emissions annually or once every three years.

### *Contingency Plan*

Indiana hereby commits to adopt and implement expeditiously necessary corrective actions in the following circumstances:

#### Warning Level Response

A Warning Level Response shall be prompted whenever an annual (1-year) fourth high monitored value of 0.089 ppm occurs in a single ozone season, or a two (2)-year average fourth high monitored value of 0.085 ppm or greater occurs within the maintenance area. A Warning Level Response will consist of a study to determine whether the ozone value indicates a trend toward higher ozone values or whether emissions appear to be increasing. The study will evaluate whether the trend, if any, is likely to continue and, if so, the control measures necessary to reverse the trend taking into consideration ease and timing for implementation, as well as economic and social considerations. The study, including the applicable recommended next steps, shall be completed within 12 months from the close of the most recent ozone season.

Should it be determined through the Warning Level study that action is necessary to reverse the noted trend, the procedures for control selection and implementation outlined under "Action Level Response" shall be followed.

#### Action Level Response

An Action Level Response shall be prompted whenever a three (3)-year average fourth high monitored value of 85 ppb or greater occurs within the maintenance area. In the event that the Action Level is triggered and is not due to an exceptional event, malfunction, or noncompliance with a permit condition or rule requirement, IDEM will determine additional control measures needed to assure future attainment of NAAQS for ozone. In this case, measures that can be implemented in a short time will be selected in order to be in place within eighteen (18) months from the close of the ozone season that prompted the Action Level.

## Control Measure Selection and Implementation

Adoption of any additional control measures is subject to the necessary administrative and legal process. This process will include publication of notices, an opportunity for public hearing, and other measures required by Indiana law for rulemaking by state environmental boards.

If a new measure/control is already promulgated and scheduled to be implemented at the federal or state level, and that measure/control is determined to be sufficient to address the upward trend in air quality, additional local measures may be unnecessary. IDEM will submit to U.S. EPA an analysis to demonstrate the proposed measures are adequate to return the area to attainment.

## Contingency Measures

Contingency measures to be considered will be selected from a comprehensive list of measures deemed appropriate and effective at the time the selection is made. Listed below are example measures that may be considered. The selection of measures will be based upon cost-effectiveness, emission reduction potential, economic and social considerations or other factors that IDEM deems appropriate. IDEM will solicit input from all interested and affected persons in the maintenance area prior to selecting appropriate contingency measures. All of the listed contingency measures are potentially effective or proven methods of obtaining significant reductions of ozone precursor emissions. Because it is not possible at this time to determine what control measure will be appropriate at an unspecified time in the future, the list of contingency measures outlined below is not comprehensive. Indiana anticipates that only a few of these measures will be required.

- 1) Lower-reid vapor pressure gasoline program.
- 2) Broader geographic applicability of existing measures.
- 3) Tighten reasonably available control technology (RACT) on existing sources covered by U.S. EPA Control Technique Guidelines issued in response to the 1990 Clean Air Act Amendments.
- 4) Apply RACT to smaller existing sources.
- 5) A modern vehicle inspection/maintenance program.
- 6) One or more transportation control measures sufficient to achieve at least 0.5% reduction in actual area wide VOC emissions. Transportation measures will be selected from the following, based upon the factors listed above after consultation with affected local governments:

- a) Trip reduction programs, including, but not limited to, employer-based transportation management plans, area wide rideshare programs, work schedule changes, and telecommuting.
  - b) Transit improvements.
  - c) Traffic flow improvements.
  - d) Other new or innovative transportation measures not yet in widespread use that affects state and local governments deemed appropriate.
- 7) Alternative fuel and diesel retrofit programs for fleet vehicle operations.
  - 8) Controls on consumer products consistent with those adopted elsewhere in the United States.
  - 9) Require VOC or NO<sub>x</sub> emission offsets for new and modified major sources.
  - 10) Require VOC or NO<sub>x</sub> emission offsets for new and modified minor sources.
  - 11) Increase the ratio of emission offsets required for new sources.
  - 12) Require VOC or NO<sub>x</sub> controls on new minor sources (less than 100 tons).

No contingency measure shall be implemented without providing the opportunity for full public participation during which the relative costs and benefits of individual measures, at the time they are under consideration, can be fully evaluated.

### **Transportation Conformity**

Transportation conformity is required by section 176(c) of the CAA. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS (CAA 176(c)(1)(B)). The EPA's conformity rule at 40 CFR part 93 requires that transportation plans, programs and projects conform to SIPs and establish the criteria and procedures for determining whether they conform. The conformity rule generally requires a demonstration that emissions from the Regional Transportation Plan (RTP) and the Transportation Improvement Program (TIP) are consistent with the motor vehicle emissions budget (MVEB) contained in the control strategy SIP revision or maintenance plan (40 CFR 93.101, 93.118, and 93.124). A MVEB is defined as "that portion of the total allowable emissions defined in the submitted or approved control strategy implementation plan revision or maintenance plan for a certain date for the purpose of meeting reasonable further progress milestones or demonstrating attainment or maintenance of the NAAQS, for any criteria pollutant or its precursors, allocated to highway and transit vehicle use and emissions (40 CFR 93.101).

However, the South Coast II court decision upheld EPA's revocation of the 1997 ozone NAAQS, which was effective on April 6, 2015. EPA's current transportation conformity regulation requires a regional emissions analysis only during the time period beginning one year after a nonattainment designation for a particular NAAQS until the effective date of revocation of that NAAQS (40 CFR 93.109(c)). Therefore, pursuant to the conformity regulation, a regional emissions analysis using MVEBs is not required for conformity determinations for the 1997 ozone NAAQS because that NAAQS has been revoked (80 FR 12264). As no regional emissions analysis is required for the Indianapolis, IN area, transportation conformity for the 1997 ozone NAAQS can be demonstrated by an MPO and DOT for transportation plans and TIPs by showing that the remaining criteria contained in Table 1 in 40 CFR 93.109, and 40 CFR 93.108 have been met.

# **PUBLIC PARTICIPATION DOCUMENTATION**

Full Maintenance Plan Update for the Indianapolis,  
Indiana 1997 8-Hour Ozone Area

## **LEGAL NOTICE OF PUBLIC HEARING**

### **Draft Full Maintenance Plan Update for the Indianapolis, Indiana 1997 8-Hour Ozone Area**

#### **Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties, Indiana**

**Note: Legal notices for public hearings are no longer published in newspapers, but can be found on the Indiana Department of Environmental Management's web site at:**

**<https://www.in.gov/idem/5474.htm>**

Notice is hereby given under 40 Code of Federal Regulations (CFR) 51.102 that the Indiana Department of Environmental Management (IDEM) is accepting written comment and providing an opportunity for a public hearing regarding the *Draft Full Maintenance Plan Update for the Indianapolis, Indiana 1997 8-Hour Ozone Area* comprised of Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby Counties, Indiana. All interested persons are invited and will be given reasonable opportunity to express their views concerning this Draft Full Maintenance Plan Update.

Effective June 15, 2004, United States Environmental Protection Agency (U.S. EPA) designated the Indianapolis, IN area as nonattainment under the 1997 8-hour ozone National Ambient Air Quality Standard (NAAQS). The Indianapolis, IN area was redesignated to attainment on October 10, 2007, effective October 19, 2007 (72 FR 59210). As part of the redesignation action, Indiana adopted and U.S. EPA approved a maintenance plan for the area which demonstrated continued attainment of the 1997 8-hour ozone standard at least ten years after redesignation.

Under Section 175A(b) of the Clean Air Act, states must submit a revision to the first maintenance plan eight years after redesignation to provide for maintenance of the NAAQS for an additional ten years following the end of the first ten-year period (i.e. October 19, 2027).

Copies of the Draft Full Maintenance Plan Update will be available on or before May 8, 2019 to any person upon request at the following locations:

- Indiana Department of Environmental Management, Office of Air Quality, Indiana Government Center North, 100 North Senate Avenue, Room N1003, Indianapolis, Indiana 46204
- Marion County Public Library, West Indianapolis Branch, 1216 South Kappes Street, Indianapolis, Indiana 46221

The draft documents will also be available on the following web pages:

<https://www.in.gov/idem/airquality/2440.htm>

<https://www.in.gov/idem/airquality/2392.htm>

Any person may submit written comments on the *Draft Full Maintenance Plan Update for the Indianapolis, Indiana 1997 8-Hour Ozone Area*. Written comments should be directed to: Mrs. Michele Boner, Indiana Department of Environmental Management, Office of Air Quality, Room 1003, 100 North Senate Avenue, Indianapolis, IN 46204. Comments can also be submitted via fax (317) 233-5967 or email at [mboner@idem.in.gov](mailto:mboner@idem.in.gov). Comments must be submitted by June 7, 2019. Interested parties may also present oral or written comments at the public hearing, if held. Oral statements will be heard, but for the accuracy of the record, statements should be submitted in writing. Written statements may be submitted to the attendant designated to receive written comments at the public hearing.

A public hearing on the *Draft Full Maintenance Plan Update for the Indianapolis, Indiana 1997 8-Hour Ozone Area* will be held if a request is received by June 7, 2019. If a hearing is requested, the hearing will be held on June 12, 2019, and the comment period will be extended to June 19, 2019. The hearing will convene at 6:00 p.m. local time in the Marion County Public Library, West Indianapolis Branch, 1216 South Kappes Street, Indianapolis, Indiana 46221. If a request for a public hearing is not received by June 7, 2019, the hearing will be cancelled. Interested parties can check the online IDEM calendar at <http://calendar.in.gov/site/idem> or contact Mrs. Michele Boner at (317) 233-6844, after June 7, 2019, to see if the hearing has been cancelled or will convene.

If a hearing is held, a transcript of the hearing and all written submissions provided at the public hearing shall be open to public inspection at IDEM and copies may be made available to any person upon payment of reproduction costs. Any person heard or represented at the hearing or requesting notice shall be given written notice of actions resulting from the hearing.

For additional information contact Mrs. Michele Boner, at the Indiana Department of Environmental Management, Office of Air Quality, Room N1003, Indiana Government Center North, 100 North Senate Avenue, Indianapolis, IN 46204 or call (317) 233-6844 or (800) 451-6027 ext. 3-6844 (in Indiana).

.....

*Speech and hearing impaired callers may contact the agency via the Indiana Relay Service at 1-800-743-3333. Individuals requiring reasonable accommodations for participation in this hearing should contact the IDEM Americans with Disabilities Act (ADA) coordinator at: Attn: ADA Coordinator, Indiana Department of Environmental Management – Mail Code 50-10, 100 North Senate Avenue, Indianapolis, IN 46204-2251, or call (317) 233-1785 (voice) or (317) 233-6565 (TDD). Please provide a minimum of 72 hours notification.*

### CERTIFICATE OF PUBLICATION

This is to certify that the Indiana Department of Environmental Management (IDEM) Notice of the opportunity for a Public Hearing regarding the following:

- Draft Full Maintenance Plan Update for the Indianapolis, Indiana 1997 8-Hour Ozone Area (May, 2019)

was published on IDEM's web site on May 2, 2019. It is expected that it will remain posted on the site until at least June 7, 2019.

The notice in full was available online at the following web address, under "Central/Multi-County Notices":

<http://www.in.gov/idem/5474.htm>

The draft document was also posted online May 1, 2019 at the following web address:

<https://www.in.gov/idem/airquality/2440.htm>

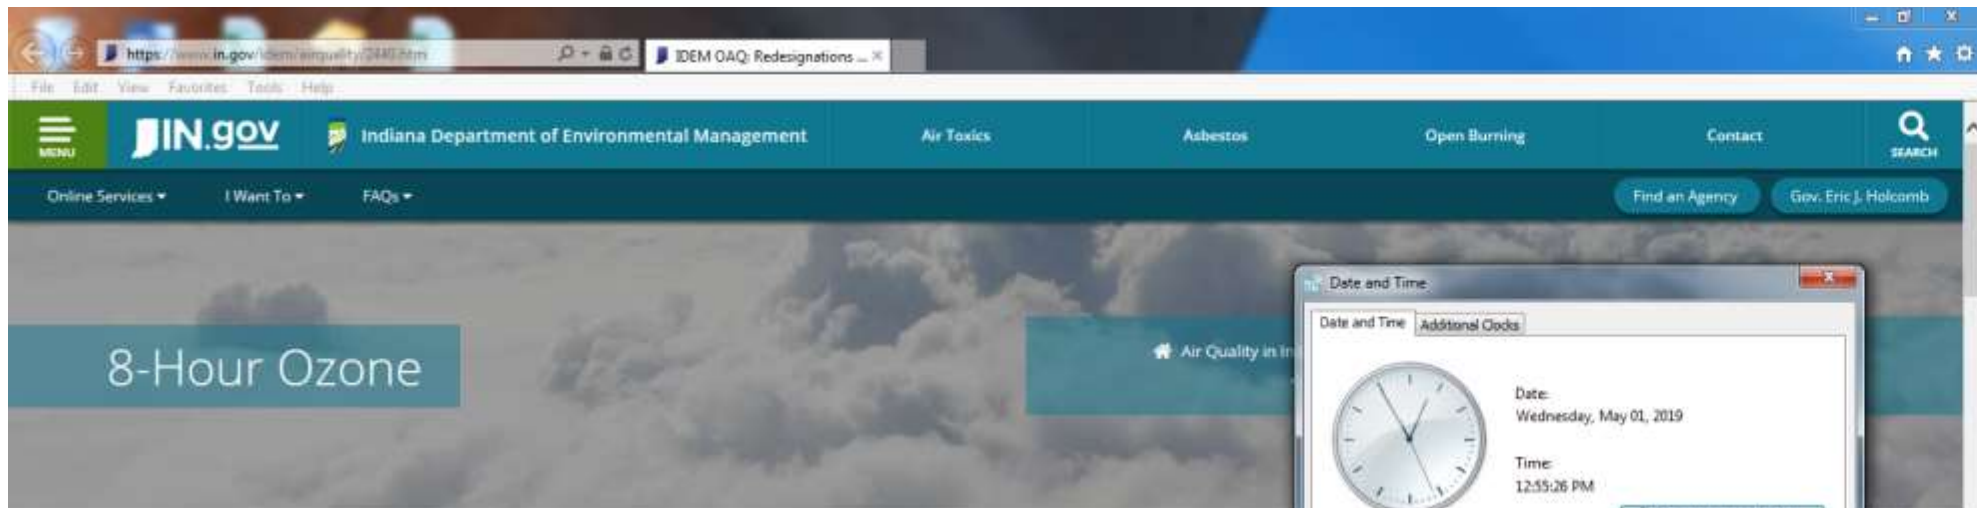

Web publication of the notice was at the request of Scott Deloney, Branch Chief, Programs Branch, Office of Air Quality, IDEM.

By:

Mike Finklestein  
IDEM Webmaster
