General needs:

- At every service clean and disinfect all frequently touched hard surfaces such as doors, restroom fixtures and partitions, tables and chairs, counters, appliances, etc. If surfaces are dirty, clean them using a detergent or soap and water before disinfecting them.
- Cleaning refers to the removal of germs, dirt, and impurities from surfaces. Cleaning does not kill germs, but by removing them, it lowers their numbers and the risk of spreading infection. Cleaning is typically performed using soap, detergents, cleansers and clean water before using a disinfecting method.
- **Disinfecting** refers to using chemicals to kill germs on surfaces. This process does not necessarily clean dirty surfaces or remove germs, but by killing germs on a surface after cleaning, it can further lower the risk of spreading infection. Disinfecting is typically performed using approved commercial or household disinfecting solutions.
