

### **Cost Assumptions, Conditions and Constraints**

The following cost assumption is related to the per hour rate submitted for Audio Description & Captioning on the “CAS” tab of Attachment D – Cost Proposal. As this service was not described in the RFP, LTC assumes that the State is referring to the creation of an SRT file. This type of file contains information regarding subtitles, including the start and end timecodes of the text to ensure the subtitles match the audio and the sequential number of subtitles.

The hourly rate for Audio Description & Captioning included in our Cost Proposal relates to this service only. Any additional services will be charged separately.
