To

The IDOA review committee,

Re: Letter of Support for Syra Health Corp, RFP-22-71589

I am writing on behalf of Advocating Children to Succeed to express our support for Syra Health's proposal for RFP-22-71589 - DCS Competency Attainment Services. This project will provide DCS Competency Attainment Services to Hoosier children deemed not competent to stand trial.

We believe that Syra Health is well positioned to successfully implement the goals of this proposal because of its strong leadership team, experience in executing State of Indiana projects, and efficient operational structure.

Advocating Children to Succeed has extensive experience working with DCS on community based interventions for several years. With our partnership with Syra Health team, we will provide advisory services, guidance, and other tasks based on the needs of the DCS Competency Attainment Services statement of work.

We look forward to continued support to DCS alongside Syra Health.

Please reach out to me for any further details or clarifications.

Thank you

Larry Brunson
