Collapse agenda

About this event

The State Epidemiological Outcomes Workgroup (SEOW) uses epidemiological data and evidence-based practices to monitor substance use and behavioral health issues in Indiana. SEOW focuses on the trends and key findings on the prevalence and consequences of various substances (such as alcohol, tobacco, marijuana, opioids, and stimulants use) in Indiana and also on mental health. SEOW has been managed by Syra Health Corp since July 2021 and has been funded by the Indiana Department of Mental Health and Addiction through the SAMHSA block grant.

All the reports and data dashboard can be found in this link: <https://www.in.gov/fssa/dmha/substance-misuse-prevention-and-mental-health-promotion/prevention-partners/state-epidemiological-outcomes-workgroup/>.
