

Toon Boom Animation - Working with PQC Trains

To whom it may concern,

From the initial interactions with the PQC Trains Community Coordinator, Elizabeth Dodson, we saw the dedication towards creating a pathway for students to be ready for a career.

This pathway includes a detailed learning of our software and gives the opportunity to the students to pass a certification that proves the understanding of our softwares.

This is especially important for career opportunities in the future. With the mix of both of our products, PQC Trains is ensuring that the students have the most doors open to them within Entertainment, Marketing and other fields of work and not only limited to 2D Animation.

With this vision in mind, Todd Heard, the teacher for the Toon Boom training, brings 30 years of experience, which I have personally worked with in the past. He leads his classroom with a strong attention to the students needs and offers insight from his past experiences.

PQC Trains have not only done this pathway for themselves, as they were able to approve this graduation pathway with the IDOE/Indiana Department of Education CTE (Career and Technical Education). This has allowed other highschools to benefit from the graduation program offering even more possibilities to students in the State of Indiana.

In summary, the working relationship between Toon Boom and PQC Trains will allow current and future students to be prepared to apply to the workforce and have the industry alignment they need to succeed.

Best regards,

Mathieu Lewis
