- Serialized for identification
- Assembled or Manufactured in the USA

- **Must fit in a Safariland 6280-77421 series hostler with Sig P227**

Requirements for Bid

The Indiana State Police is requesting the trade in value (562) good working condition and (82) poor or damaged condition Remington 870 shotguns.

An attached list with descriptions for the (82) poor conditions will be attached.

The (562) working shotguns were taken from the field and replaced by a patrol rifle. These shotguns are all in good working order.

If the bidder would like to view the above listed shotguns, contact information is listed below. ISP will make every effort to allow for viewing of poor condition shotguns and a sampling of good working condition shotguns. Inspection of all shotguns will not be available.

The trade in credit would be used to purchase the following items:

- (1100) Streamlight RM2

- (200) Streamlight TLR1 HL

- (200) Safariland 6280-77421-49X Hi-gloss finish for TLR1 light.

- RH & LT Holsters TBD and provided to vendor.

The requested quantity of items may change based on overall project cost restrictions.

The selected bidder will be required to inspect, verify serial numbers, and take possession of all items from ISP Logistics Division at 8500 E 21st St., Indianapolis, IN 46219 within 30 days of the purchase order being awarded.

The Indiana State Police would request that the bidder allow for ISP personnel to purchase their assigned shotgun back at a price set by the bidder. ISP is requesting the bidder provide information as to how this transaction would be accomplished and overall purchase price for the shotgun buy-back.

ISP would provide a list of serial numbers and corresponding Troopers to whom the shotgun was assigned. ISP would not be part of the transaction process except for providing the document listed above.
