

Geographic Breakdown of Indiana's APS Cases

Please note that the State is unable to verify the quality or accuracy of the data provided due to a variety of factors but hopes this information aids Respondents in estimating the scale of APS operations. The case numbers provided are not an indicator of future numbers as intake reports that were screened out before becoming a case are not included. The State is aware of screen-in rates ranging from below 10% in one of the most populous units to above 90% in another unit.
