Event Description

Requested by: 317-308-3246 Tankersley, Joseph OAQ / TOX JUSTIFICATION: These laboratory consumables are replacements for present connections. Swagelok connectors are needed to prevent external gas contamination. Swagelok connectors are used throughout our entire Air Monitoring Branch. These connections are used in the Urban Air Toxics Program which is monitored by OAQ as Part of the EnPPA/PPG agreement, as well as the Photochemical Air Monitoring Station.

General Comments

- Requested by: 317-308-3246 Tankersley, Joseph OAQ / TOX

JUSTIFICATION:
These laboratory consumables are replacements for present connections. Swagelok connectors are needed to prevent external gas contamination. Swagelok connectors are used throughout our entire Air Monitoring Branch. These connections are used in the Urban Air Toxics Program which is monitored by OAQ as Part of the EnPPA/PPG agreement, as well as the Photochemical Air Monitoring Station. Also, at our Ambient Field criteria monitoring sites throughout the State of Indiana, as well as our Quality Assurance section need these connections to keep the branch operating in compliance with 40 CFR 50 & 58. Swagelok is the only vendor that has all the parts and fits all of the requirements. 3 other quotes are attached from vendors who can fill portions of this requisition, but do not offer all the required parts. Restek does not work because they cannot fulfill many of the items in this requisition, and some of their parts do not meet our specifications. Sigma does not work because they cannot fulfill many of the items in this requisition and some of their parts are not the correct size. Fisher does not work because their parts are not guaranteed to be Swagelok parts that are compatible with the existing connections in our instruments potentially leading to instrument failure. They also cannot fulfill many of the items in this requisition.
