INTRODUCTION

The 2019 annual juvenile detention facility evaluations conducted by the IDOC, Division of Youth Services consisted of three on-site facility inspections; staff and youth interviews; and an audit of policy and procedure and supportive documentation of practice showing compliance with the state detention standards. There are two hundred and eighty-six proposed new Indiana Juvenile Detention Facility Standards that are in the process of being promulgated. Detention Facilities had the option to be audited on three hundred one (301) current detention standards or the corresponding two hundred and thirty-three (233) proposed new juvenile detention facility standards and four (4) current standards that will be deleted when the new standards are promulgated, for a total of two hundred and thirty-seven (237) standards.

The proposed standards include both the requirements of the current standards and new requirements not in effect; therefore, compliance for this year's audit was determined by a facility proving compliance with only the current requirements. However, facilities opting to be audited on the proposed standards did provide documentation on those new requirements and received feedback on their progress implementing them. There are two hundred and eight-six (286) total proposed standards, fifty-three (53) having exclusively new requirements. This year, facilities had the option of also providing documentation on their effort to implement these fifty-three (53) new standards. Since the proposed new requirements and new standards are not yet in

effect, the facility’s progress on them is not referenced in this report, though its effort, if applicable, will be recognized in the next paragraph.

Vigo County Juvenile Justice Center chose to be audited on the two hundred and thirty-seven (237) proposed juvenile detention facility standards in 2019, for their 23rd annual detention inspection. Of the two hundred and thirty-seven (237) standards audited, sixteen (16) standards require mandatory compliance and the remaining two hundred and twenty-one (221) are recommended standards. Compliance with 100% of the mandatory standards and 90% of the recommended standards is required to attain “Full Compliance.” Again, Centers that chose to be audited on the proposed detention standards were only required to meet the expectation of the current detention standards. Vigo County Juvenile Justice Center chose to also provide documentation on the extra standards with exclusively new requirements. The breakdown of each audit listed below is only reflective of the current standards.
