

## Responses to Water Loss Audit and Validation Training RFP Questions

Received: 5/6/2019

*On both Phase I and Phase II RFPs, under "Tasks" it states: "4. Conduct all registration activities, including payment." Are we to charge registration fees for folks to attend the workshops? If so, what costs should we factor in when determining the fees vs. what costs IFA will cover? In the past, when we were under contract with IFA or other State entities, we were unable to charge registration fees to the workshop attendees.*

IFA is determining if there are licensing related fees that should be charged to Validation training attendees. Fees related to room rental, food or supplies will not be charged to attendees. If the IFA determines that a fee related to the issuance of the license is required, the RFP awardee will collect it on behalf of the IFA. Water loss audit training will be free of charge to attendees.

Task 1.4 in Section B of Phase II should read: "Conduct all registration activities". A corrected RFP will be posted online at: <https://www.in.gov/ifa/3013.htm>.

*The new version of the AWWA FWAS (Version 6) will be released later in 2019. Currently it is under beta tests and review. Does IFA want this Version 6 of the Free Water Audit Software to be used for both the Audit Classes and the Validation courses?*

IFA prefers to use the most up-to-date software, as long as the release of said program does not interfere with the overarching timeline described in the RFP.
