Nature of Business Relationship with Agency:

Vertafore develops software used in the insurance industry. Vertafore owns Sircon Corporation ("Sircon"). Sircon has a contract with the IDOI to provide various types of software to the State, including producer licensing, company admissions, and rate and form filings. Sircon also provides online services to the public on behalf of the State, including insurance producer license applications and renewals, and continuing and pre-licensing provider course approval applications.

State Why Acceptance is in the Public Interest:

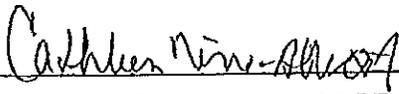

As Sircon is contracted to provide various types of software services to the IDOI, it is imperative that IDOI staff keep up-to-date with new company and software developments, especially since

it is the software that is used by the agency and the public we serve. IDOI staff have previously attended this event with a gift waiver.

It is also in the public interest to develop and maintain good relationships with Sircon representatives in order to keep the lines of communication open to the benefit of all. In addition, Recipient's attendance will allow Recipient the opportunity to connect with insurance regulators from other states. Recipient's attendance will also allow him the opportunity to provide valuable feedback to Vertafore on the company's plans to address, in person, any questions or concerns he may have regarding the products and services Sircon provides to the IDOI. Recipient's attendance at the SIRC Summit helps to achieve all of these important objectives and is in the public interest.
