IV.3 Energy Savings

Method used to calculate savings: <input checked="" type="checkbox"/> WAP algorithm <input type="checkbox"/> Other (describe below)			
	Units	Savings Calculator (MBtus)	Energy Savings
This Year Estimate	693	29.3	20305
Prior Year Estimate	859	29.3	25169
Prior Year Actual	51	29.3	1494

Method used to calculate savings description:

2020 Allocation Amount \$8,886,940.00 plus \$800,000 carryover, minus:

Grantee Admin (\$399,912.30)

Grantee T&TA (\$1,352,261)

Yields \$7,934,766.70 to the Network

Program Operation: \$5,082,374

Health and Safety: \$1,511,753 (20% of subgrant grant award)

Sub-grantee Admin \$755,876 (10% of subgrant grant award incl. 3% unspent admin from prior years to = 10% on carryover)

Liability Insurance \$139.175

Fiscal Audits \$ 76,588

Based on the average cost per home allowance in PY2021 of \$7,300, Indiana's weatherization network is projected to complete 693 units during the 2021-2022 program year.

693 units weatherized multiplied by 29.3 MMBTU yields the total estimated energy saved for this year by DOE funded weatherization work as 20,304 per year.

IV.4 DOE-Funded Leveraging Activities

At this time we do not set aside DOE funds for a leveraging program.
However, sub-grantees routinely leverage their funds against other programs and utility funds in order to weatherize more homes.
Indiana reports units weatherized using DOE guidelines and priority measures--including homes utilizing a combination of DOE, LIHEAP, and utility funds--on the Quarterly Production Report.

The Policy Advisory Council comes together only for the purpose of reviewing and making recommendations on Indiana's Weatherization State Plan.

The January 2017 Subgrantee Customer Satisfaction Survey Report noted the following key findings:

- The Indiana Customer Satisfaction Index is 69, compared to the DOE WAP National Customer Satisfaction Index of 67. This is above the Federal

Government average for 2016 of 68, but still suggests room for improvement.

- The first of two areas in greatest need for improvement for Indiana involves Subgrantee feedback in our State Plan, scoring of 33 out of 80. Nationally this scored low, with a national average score of 44 out of 80.
- The second area in need of improvement involves State Monitoring and Corrective Action, scoring 58 out of 100. This is below the national average of 70.
- The area receiving the highest score was in Third Party Training. Steps will be taken to ensure this and other higher scores are maintained.
- Technical Assistance is a high-impact area with a considerable amount of influence on overall satisfaction. Indiana's Technical Assistance is moderately low, at 68. Additional focus on the "clarity and consistency of assistance provided" (62) and the "timeliness of receiving requested information" (62) will help drive Technical Assistance improvements moving forward.
- Communication is the driver with the highest impact, and therefore the most influence on satisfaction. Overall, Indiana's communication score is moderately low, at 68. However, the areas relating to the "clarity of communications" (65), and the "frequency of communication" (66) score relatively lower. Improvement efforts will be made here to further strengthen Indiana's communication.
- A few other areas in which Indiana scored higher than the average: Distribution of Funds, Partnerships, Mission Fulfillment, and Meeting Organization Needs.

Indiana has worked with the network over the past several months to address these items, and that will be a continued focus during the next program year. We collected a lot of feedback from the network which was used to inform policies that we changed in this State Plan. We also have a new monitor who has received many complimentary remarks. At our Semi Annual Managers Meeting March 21 and 22, 2018 Hutson Homes did a presentation and afterwards Lauren Perry received many positive remarks about the change in monitoring approach.
