The Applicant agrees to erect and maintain all necessary barricades, detour signs, warning lights, and/or any other devices required to safely direct traffic over or around the work until acceptable to The Board of County Commissioners and/or their duly appointed representative, and in accordance with section "D" of the "Indiana Manual of Uniform Traffic Control Devices."

The Applicant agrees roads will not be blocked from Traffic, except in accordance with an acceptable schedule of time and dates. This schedule shall be submitted to the County Commissioners 48 Hours or more in advance of the schedule blockages.

The Applicant further agrees to remove all residue and construction material, that might be hazardous to traffic, at the end of each day.

The Applicant agrees to assume all liability for any injury or damage to property resulting directly or indirectly from work permitted and/or performed by this Applicant.

The Applicant agrees that said work will not interfere with any existing structure and/or utility, along or across said roadway, without permission from the owner of said structure or utility.

The Applicant agrees to stop work at any time upon direction by The Posey County Highway Superintendent or his duly appointed representative.

The Applicant agrees that a copy of this permit will be maintained on the site while work is in progress.

The Applicant agrees to guarantee said construction for a minimum of 365 days from the date of completion.

On any work to install a permanent utility plant, or other structure, sketches will be included that denote all baffles, shoring, or bulkheads left in place and with dimensions relative to edge of roadway.

Finished road surfaces will be compatible to existing surfaces and straight to a plane within 1/8" IN 10'.

All utility lines are to be installed in a straight line, and within the boundaries prescribed.

#### PARALLEL TO ROADBED (SHOULDER) CUTS

The trench shall be compacted with original excavated material to within 9" of the finished surface.

The uppermost 9" shall consist of compactible aggregate or originally excavated material compacted using mechanical (Wacker) methods or hand tampers until satisfactory compaction is obtained. The Lower fill material shall be placed in maximum 12" lifts and compacted by the above methods.

No Excessive Mounds Or Depressions will be accepted.

#### IN ROADBED CUTS

Backfill Material: Flowable Fill is preferred but "B" borrow is acceptable unless otherwise Directed by the Posey County Supervisor or his Representative.

Concrete Streets: Total concrete depth shall be 9 ¼". Concrete Streets shall be saw cut a Minimum of 1" prior to removal.

H.A.C. Streets: H.A.C. surface shall be placed to a depth of 1 ½" and tacked on top pf 7 ½" of H.A.C. Base. The base shall be compacted in 2 different lifts.
