A certified precast concrete producer is one who has complied with the requirements set out in the above referenced Indiana Test Method. A producer accepted into this program may supply precast products for all projects beginning with the date approved as a certified precast concrete producer.

It is the producer’s responsibility to review this list and ensure that the new audit documents are submitted within 16 months of the last audit date. If documents are not submitted within the required timeframe, the facility will be removed from this list per ITM 813, Section 10.5.
