

SAY GOODBYE TO PAPER

The Economic Opportunity Division will be working with INDOT's Management Information Systems (MIS) department to convert several of our old paper and Excel reporting systems into electronic reporting. Starting in January 2020, our MIS department will begin converting our annual PR-1391 reports, the On-the-Job Training Program, and the DBE-3 program into ITAP applications. As these programs are converted there will be a period of testing and training, then released to allow the contractors a smoother and quicker way to submit their information to INDOT.

We are currently working with MIS department to update our Subcontractor Payment Tracking (SPT) System. This updated program will be available for all to use in 2020. One of the added features to this program will allow all subcontractor and DBE, MBE, WBE, and IVOSB haulers and suppliers to verify their payments that they have received from the prime contractor. This enhancement will allow better monitoring of the Prompt Payment requirement on INDOT contracts.
