Date of Request for Information Release: September 5th, 2013

# **SCOPE OF WORK**

## **Office of Road Inventory**

### **OBJECTIVE**

This document is a Request for Information (RFI) regarding the collection and measurement of pavement condition data.

INDOT is looking for information on technology, best practices, limitations, and means of delivery of data for pavement condition data. This data should include: International Roughness Index, Rutting, Faulting, Cracking - % low, % medium, %high for the following: Transverse, longitudinal, alligator, and block. In addition to the aforementioned, INDOT is interested in average crack width, average crack depth, and an estimation of relative cracking length in feet per mile.

### **Presentation of information**

INDOT would like interested parties to submit a brief technical brief discussing their technologies, and processes no later than October 10<sup>th</sup>, 2013.

INDOT reserves the right to request in-person discussions and possible demonstrations.
