LIQUID MEMBRANE FORMING CURING COMPOUNDS

Specification Reference: 912.01(e)

SM Material Code 912M00150 & 912M00170

Test results from NTPEP Testing Lab indicate that the following materials are acceptable as white pigmented liquid membrane curing compounds for spray application on fresh PCC surface exposed to air.

Wax-based curing compounds shall be applied at a rate not less than 1 gal/150 sq ft in two applications, providing a uniform, solid, opaque coverage on all concrete surfaces, similar to a white sheet of paper.

Poly-alpha-methylstyrene (PAMS) curing compounds shall be applied at a rate of 1 gal/200 sq ft in one application, providing a uniform, solid, opaque coverage on all concrete surfaces, similar to a white sheet of paper.
