TAM Plan

1. INTRODUCTION

In 2016, the Federal Transit Administration (FTA) published a rule, 49 CFR Part 625, to require public transit providers that receive Federal transit assistance to undertake certain transit asset management activities. Transit asset management is the strategic and systematic practice of procuring, operating, inspecting, maintaining, rehabilitating, and replacing transit capital assets to manage their performance, risks, and costs over their life cycles, for the purpose of providing safe, cost-effective, and reliable public transportation. Asset management is a cornerstone of effective performance management. By leveraging data to improve investment decision-making, asset management improves reliability, safety, cost management, and customer service.

BACKGROUND

Maintaining transit assets, such as rolling stock, infrastructure, equipment, and facilities, in a state of good repair is essential to maintaining safety, ensuring system reliability, and reducing long-term maintenance costs. Through research done to inform its [24th edition of the Conditions and Performance Report](#), U.S. DOT has found that as of 2016, an estimated 21 percent of buses and 10 percent of rail transit assets are in marginal or poor condition, with a backlog of \$105.1 billion in deferred maintenance and replacement. Transit agency customers, policymakers, and public agencies are holding agency management accountable for performance and increasingly expect more business-like management practices. The magnitude of these capital needs, performance expectations, and increased accountability requires agency managers and accountable executives to become better asset managers.

MAP-21 required the establishment of a National Transit Asset Management (TAM) System that would include a definition of “state of good repair;” requirements that recipients and subrecipients of federal transit funding develop transit asset management plans; state of good repair performance measure and reporting requirements; and annual reporting requirements. These requirements have continued with the passage of the 2021 Bipartisan Infrastructure Law. To ensure compliance with the requirements of MAP-21, the FTA published a final rule on TAM planning requirements on July 26, 2016. The final rule included a transit-specific asset management framework for managing assets individually and as a portfolio of assets that comprise an integrated system. Within that framework, the FTA has identified three potential roles in transit asset management planning:

- ◆ **Tier I Provider** is a recipient that owns, operates, or manages either (1) one hundred and one (101) or more vehicles in revenue service during peak regular service across all fixed route modes or in any one non-fixed route mode, or (2) rail transit. Tier I providers must develop their own, individual TAM plan.
- ◆ **Tier II Provider** is a recipient that owns, operates, or manages (1) one hundred (100) or fewer vehicles in revenue service during peak regular service across all non-rail fixed route modes or in any one non-fixed route mode, (2) a subrecipient under the 5311 Rural Area Formula Program, (3) or any American Indian tribe. Tier II providers can develop their own individual TAM plan or can be included in a group plan developed by a sponsor agency.

- ◆ **Sponsor Agency** is a State, a designated recipient, or a direct recipient that develops a group TAM for at least one tier II provider.

Asset management processes are ongoing and involve evaluating and managing the relationships between costs, risks, and performance over the asset's lifecycle. The transit asset management framework has three categories of business processes:

1. Asset Management Vision and Direction – agency-wide processes that establish the organization-wide asset management policy and strategy and drive resource allocation
2. Lifecycle Management – the processes involved in the lifecycle management of individual asset classes; these include managing the data (inventory), monitoring the assets' condition and performance, and developing lifecycle management plans
3. Cross-Asset Planning and Management – agency-wide processes that consider information from all asset classes to support the capital programming and operations and maintenance budgeting process

The fundamental concepts of asset management are straightforward; however, implementing the changes required to become a mature asset management organization requires careful planning and execution. In recognition of the potential administrative and planning burden facing small participating organizations, FTA, in 2016, established new guidelines and planning requirements for State Departments of Transportation.

Specifically, §625.27 requires that States, acting as sponsors, develop a group TAM plan for all subrecipients under the Rural Area Formula Program (Section 5311), including American Indian tribes. The sponsor is responsible for setting unified targets for the plan participants and share that information with MPOs that house their participating providers.

The Indiana group plan will include all Tier II provider subrecipients, except those subrecipients that also are direct recipients under the Urbanized Area Formula Program authorized at 49 U.S.C. 5307. Tier II providers may only participate in one group plan and must provide written notification to Indiana if they choose to opt-out and develop their own plan. Participants must also provide Indiana with any information necessary and relevant to completing the original plan and any future revisions.

TRANSIT ASSET MANAGEMENT PLAN REQUIREMENTS

Indiana has developed this Indiana Statewide Tier II Transit Asset Management Plan in accordance with the guidelines established by the FTA. Specifically, §625.25 requires that all TAM plans must include:

1. An inventory of the number and type of capital assets. (Appendix) The inventory must include all capital assets that the provider owns, except equipment with an acquisition value under \$50,000 that is not a service vehicle. The inventory also must include third-party owned or jointly procured exclusive-use maintenance facilities, passenger station

facilities, administrative facilities, rolling stock, and guideway infrastructure used by a provider in the provision of public transportation. The asset inventory must be organized at a level of detail commensurate with the level of detail in the provider's program of capital projects. See Chapter 3

2. A condition assessment of those inventoried assets for which a provider has direct capital responsibility. A condition assessment must generate information in a level of detail sufficient to monitor and predict the performance of the assets and to inform the investment prioritization. See Chapter 4
3. A description of analytical processes or decision-support tools used to estimate capital investment needs over time. See Chapter 5
4. A project-based prioritization of investments. See Chapter 6

In addition to required elements noted above, group plan sponsors, such as Indiana must ensure the following:

1. Coordination with the development of the plan with each Tier II provider's Accountable Executive; and
2. That the completed group plan is made available to all participants in a format that is easily accessible. See Chapter 2

DEFINITIONS

- ◆ *Accountable Executive* means a single, identifiable person who has ultimate responsibility for carrying out the safety management system of a public transportation agency; responsibility for carrying out transit asset management practices; and control or direction over the human and capital resources needed to develop and maintain both the agency's public transportation agency safety plan, in accordance with 49 U.S.C. 5329(d), and the agency's transit asset management plan in accordance with 49 U.S.C. 5326.
- ◆ *Asset category* means a grouping of asset classes, including a grouping of equipment, a grouping of rolling stock, a grouping of infrastructure, and a grouping of facilities. See Appendix A to this part.
- ◆ *Asset class* means a subgroup of capital assets within an asset category. For example, buses, trolleys, and cutaway vans are all asset classes within the rolling stock asset category. See Appendix A to this part.
- ◆ *Asset inventory* means a register of capital assets, and information about those assets.
- ◆ *Capital asset* means a unit of rolling stock, a facility, a unit of equipment, or an element of infrastructure used for providing public transportation.
- ◆ *Decision support tool* means an analytic process or methodology:
 1. To help prioritize projects to improve and maintain the state of good repair of capital assets within a public transportation system, based on available condition data and objective criteria; or

2. To assess financial needs for asset investments over time.

- ◆ *Direct recipient* means an entity that receives Federal financial assistance directly from the Federal Transit Administration.
- ◆ *Equipment* means an article of nonexpendable, tangible property having a useful life of at least one year.
- ◆ *Exclusive-use maintenance facility* means a maintenance facility that is not commercial and either owned by a transit provider or used for servicing their vehicles.
- ◆ *Facility* means a building or structure that is used in providing public transportation.
- ◆ *FTA* – Federal Transit Administration
- ◆ *Full level of performance* means the objective standard established by FTA for determining whether a capital asset is in a state of good repair.
- ◆ *Group TAM plan* means a single TAM plan that is developed by a sponsor on behalf of at least one tier II provider.
- ◆ *Horizon period* means the fixed period of time within which a transit provider will evaluate the performance of its TAM plan.
- ◆ *Implementation strategy* means a transit provider's approach to carrying out TAM practices, including establishing a schedule, accountabilities, tasks, dependencies, and roles and responsibilities.
- ◆ *Infrastructure* means the underlying framework or structures that support a public transportation system.
- ◆ *Investment prioritization* means a transit provider's ranking of capital projects or programs to achieve or maintain a state of good repair. An investment prioritization is based on financial resources from all sources that a transit provider reasonably anticipates will be available over the TAM plan horizon period.
- ◆ *Key asset management activities* mean a list of activities that a transit provider determines are critical to achieving its TAM goals.
- ◆ *Life-cycle cost* means the cost of managing an asset over its whole life.
- ◆ *INDOT* – Indiana Department of Transportation
- ◆ *Participant* means a tier II provider that participates in a group TAM plan.
- ◆ *Performance Measure* means an expression based on a quantifiable indicator of performance or condition that is used to establish targets and to assess progress toward meeting the established targets (*e.g.*, a measure for on-time performance is the percent of trains that arrive on time, and a corresponding quantifiable indicator of performance or

condition is an arithmetic difference between scheduled and actual arrival time for each train).

- ◆ *Performance target* means a quantifiable level of performance or condition, expressed as a value for the measure, to be achieved within a time period required by the Federal Transit Administration (FTA).
- ◆ *Public transportation system* means the entirety of a transit provider's operations, including the services provided through contractors.
- ◆ *Public transportation agency safety plan* means a transit provider's documented comprehensive agency safety plan that is required by 49 U.S.C. 5329.
- ◆ *Recipient* means an entity that receives Federal financial assistance under 49 U.S.C. Chapter 53, either directly from FTA or as a subrecipient.
- ◆ *Rolling stock* means a revenue vehicle used in providing public transportation, including vehicles used for carrying passengers on fare-free services.
- ◆ *Service vehicle* means a unit of equipment that is used primarily either to support maintenance and repair work for a public transportation system or for delivery of materials, equipment, or tools.
- ◆ *Sponsor* means a State, a designated recipient, or a direct recipient that develops a group TAM for at least one tier II provider.
- ◆ *State of good repair (SGR)* means the condition in which a capital asset is able to operate at a full level of performance.
- ◆ *Subrecipient* means an entity that receives Federal transit grant funds indirectly through a State or a direct recipient.
- ◆ *TERM scale* means the five (5) category rating system used in the Federal Transit Administration's Transit Economic Requirements Model (TERM) to describe the condition of an asset: 5.0—Excellent, 4.0—Good; 3.0—Adequate, 2.0—Marginal, and 1.0—Poor.
- ◆ *Tier I provider* means a recipient that owns, operates, or manages either (1) one hundred and one (101) or more vehicles in revenue service during peak regular service across all fixed route modes or in any one non-fixed route mode, or (2) rail transit.
- ◆ *Tier II provider* means a recipient that owns, operates, or manages (1) one hundred (100) or fewer vehicles in revenue service during peak regular service across all non-rail fixed route modes or in any one non-fixed route mode, (2) a subrecipient under the 5311 Rural Area Formula Program, (3) or any American Indian tribe.
- ◆ *Transit asset management (TAM)* means the strategic and systematic practice of procuring, operating, inspecting, maintaining, rehabilitating, and replacing transit capital assets to manage their performance, risks, and costs over their life cycles, for the purpose of providing safe, cost-effective, and reliable public transportation.

- ◆ *Transit asset management (TAM) plan* means a plan that includes an inventory of capital assets, a condition assessment of inventoried assets, a decision support tool, and a prioritization of investments.
- ◆ *Transit asset management (TAM) policy* means a transit provider's documented commitment to achieving and maintaining a state of good repair for all of its capital assets. The TAM policy defines the transit provider's TAM objectives and defines and assigns roles and responsibilities for meeting those objectives.
- ◆ *Transit asset management (TAM) strategy* means the approach a transit provider takes to carry out its policy for TAM, including its objectives and performance targets.
- ◆ *Transit asset management system* means a strategic and systematic process of operating, maintaining, and improving public transportation capital assets effectively, throughout the life cycles of those assets.
- ◆ *Transit provider (provider)* means a recipient or subrecipient of Federal financial assistance under 49 U.S.C. chapter 53 that owns, operates, or manages capital assets used in providing public transportation.
- ◆ *Useful life* means either the expected life cycle of a capital asset or the acceptable period of use in service determined by FTA.
- ◆ *Useful life benchmark (ULB)* means the expected life cycle or the acceptable period of use in service for a capital asset, as determined by a transit provider, or the default benchmark provided by FTA.

Tier II

2. TIER II TRANSIT SYSTEMS

The State of Indiana currently has 44 Tier II transit systems as defined by the Federal Transit Administration, FTA, participating in this plan. Those systems vary from demand response, fixed route and intercity service modes and do not include FTA 5307 funded agencies. Each system has requested to participate in the State Plan to ensure compliance with FTA 49 CFR Part 655. A detailed listing of all capital assets included in this plan are located in Appendix 1.

Table 1 TAM Plan Systems and Capital Assets Summary

INDOT 2022 TAM		
System	Vehicle Count	Facility Count
Boone County Commissioners - Boone Area Transit System	18	2
Brown County - ACCESS Brown County Transit	3	1
Cass County Commissioners - Cass Area Transit	36	1
City of Bedford - Transit Authority of Stone City (TASC)	5	1
City of Huntingburg - Huntingburg Transit System	3	3
City of Marion - Marion Transit System (MTS)	12	3
City of New Castle - New Castle Transit	8	1
City of Richmond - Rose View Transit	12	2
City of Seymour - Seymour Transit	11	2
City of Washington - Washington Transit System (WTS)	3	1
Clinton County Commissioners - Clinton County Transit	12	4
Dekalb County Commissioners - Dekalb Area Rural Transit (DART)	12	2
Fayette County Commissioners - Fayette County Public Transit	10	1
Franklin County Commissioners - Franklin County Public Transportation	10	1
Fulton County Commissioners - Fulton County Transportation	12	2
Harrison County Commissioners - Southern Indiana Transit System (SITS)	40	1
Hendricks County Commissioners - Hendricks County LINK - Morgan County CONNECT	35	1
Hendricks County Senior Services Inc	13	
Historic Hoosier Hills - Catch-A-Ride	32	1
Huntington County Commissioners - Huntington Area Transportation	18	2
Jasper County Community Services, Inc. KIRPC	8	1
Jay County Commissioners - The New InterUrban	27	1
Knox County Commissioners - YMCA VanGo Public Transit	22	1
Kosciusko County Commissioners - Kosciusko Area Bus Service (KABS)	12	1
LaGrange County Commissioners - LaGrange County Area Transit	14	1
Madison County Council of Governments	6	1
Marshall County Commissioners - Marshall County Transit	11	1
Miami County Commissioners - YMCA Public Transit	14	2
Monroe County Commissioners - Rural Transit	30	1
Newton County Community Services, Inc. KIRPC	13	1
Noble County Commissioners - Noble Transit System (NTS)	20	2
Orange County Commissioners - Orange County Transit	34	1
Pulaski County KIRPC	6	2
Rush County Commissioners - Ride Rush Public Transportation	6	1
Shelby County Commissioners	1	1
Southern Indiana Development District (SIDC) - Ride Solution	97	10
Starke County Community Services, Inc. KIRPC	9	1
Steuben County Commissioners - STAR Transportation	10	2
Tippecanoe County Commissioners - Tippecanoe County Transit	4	1
Union County Commissioners - Union County Transit	12	1
Wabash County Commissioners - Wabash County Transit	10	1
West Central Indiana Economic Development District, Inc. - WCIEDD Public Transit	7	1
Wells County Commissioners - Wells on Wheels (WOW)	14	1
White County Commissioners - White County Public Transit	7	1
Whitley County Commissioners - Whitley County Transit	13	2
Total Vehicles/Facilities	712	71

TAM PLAN INCLUSION

Under the requirement for TAM Plan inclusion, INDOT requires all Tier II public transit systems or transit systems providing transportation to the public or segment of the public to be included in this plan. All systems included are either recipients or sub-recipients of FTA 5311 funds who own, operate or manage public transportation capital assets used in the provision of public transportation.

A review of existing FTA 5310 grant recipients only found that none of the recipients provide transportation to the general public or the defined, “segment of the general public” according to age, disability or income. Several systems receive both 5311 and 5310 funds and are included in this plan.

TAM PLAN DEVELOPMENT PARTICIPATION

INDOT has provided training for all Tier II designated systems to educate and receive feedback from the systems on the following:

- ◆ Requirements of 49 CFR Part 625
- ◆ System role in the INDOT sponsored Plan,
- ◆ Designation and role of an Accountable Executive,
- ◆ Condition assessments,
- ◆ Impacts on annual data collection conducted by INDOT.
- ◆ Useful Life Benchmarks

Training was conducted by a National expert during the North/South Annual Training Conference.

Tier II systems will continue to receive updates on the Plan through program administrators. Additional training and feedback solicitation will be conducted again as INDOT updates the plan in four years.

As part of the TAM Plan review process, INDOT has made the Plan available to Metropolitan Planning Organizations (MPO’s) and Tier II systems through an online posting of the Plan on INDOT’s website. The Plan was posted for two months to encourage feedback before being finalized prior to October 1, 2022.

Each Tier II Accountable Executive is required to review the plan and submit the INDOT Accountable Executive Submittal form showing they have received and approve the Plan. A listing of those submittals is located in Appendix 4.

VEHICLE CLASSIFICATIONS

The Indiana Tier II Rolling Stock is predominantly Cutaways and Modified Vans. INDOT is using the Useful Life definition of 4 years/100,000 miles for those vehicles. The following chart represents the determination of Useful Life and Useful Miles as decision-making tools along with Condition Assessment addressed later in this plan.

Useful Life - Rolling Stock		
Rank	% of Life Scale	Definition
5	0-1	Vehicle age ranges from new to full useful life
4	1.01 - 1.25	Vehicle exceeds useful life by up to 25%
3	1.26-1.50	Vehicle exceeds useful life by up to 50%
2	1.51 - 1.75	Vehicle exceeds useful life by up to 75%
1	1.75 +	Vehicle exceeds useful life by greater than 75%

Useful Mileage - Rolling Stock		
Rank	% of Mile Scale	Definition
5	0-1	Vehicle mileage ranges from new to full useful life mileage equivalent
4	1.01 - 1.25	Vehicle exceeds useful life mileage equivalent by up to 50%
3	1.26-1.50	Vehicle exceeds useful life mileage equivalent by up to 100%
2	1.51 - 1.75	Vehicle exceeds useful life mileage equivalent by up to 150%
1	1.75 +	Vehicle exceeds useful life mileage equivalent by greater than 150%

Inventory

3. ASSET INVENTORY

DATA COLLECTION

The Indiana DOT Office of Public Transportation requires grant sub-recipients to submit rolling stock data once a year. The data collected in the past includes grant information on each asset as well as mileage, funding source, ownership and description of the asset. A form was used to collect the data to add vehicle condition, type of vehicle category, capacities and facility condition. An example of the form and user instructions is listed below in Table 2 3 and 5. The forms used to collect data are developed in Microsoft Excel and are easily completed by systems and electronically sent to INDOT.

INDOT requires all system facility data be completed using the Facility Assessment Tool shown in Table 5 and 6 and conduct facility assessments using the TERM modified form required under 49 CFR Part 625. Each system may refer to a Preventive Maintenance Guide developed five years ago to assist transit providers in maintaining capital assets and provides details of facility inspection areas similar to the Facility Assessment Tool.

Once data is collected, INDOT computes the performance measures for each of the three Tier II categories; Rolling Stock, Facilities and Equipment using an Excel Spreadsheet program with formulas relative to the States criteria for State of Good Repair.

A full listing of all 2022 assets is located in Appendix 1 and 2.

Table 2 INDOT Rolling Stock & Equipment Data Request Form

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P

Tutorial
The 5311 vehicle Inventory was developed pursuant to requirements of the INDOT Office of Transit 2016 State Management Review, the 5311 Program manual, the INDOT Annual Report, the FTA Transit Asset Management (TAM) requirements and the National Transit Database (NTD) Report requirements.
The Office of Transit 5311 Program has identified below, by an acronym, the entity requesting the information. Thereafter, is a brief data field description.
INDOT - Indiana Department of Transportation
NTD - National Transit Database
TAM - Federal Transit Administration - Transit Asset Management
The 5311 Program Staff hope this tutorial will help in clarifying questions and guide you through the inventory, the table is an Excel spreadsheet, and much of the requested data is self-explanatory.
Column "A" - INDOT - # - is for Office of Transit use - 1 identifies Todd system - 2 identifies Vickie system - 3 identifies Mike system
Column "B" - INDOT - NTD - TAM - Transit Name - Transit provider name
Column "C" - INDOT - TAM - is the vehicle identification number (VIN) - the VIN serves as the vehicle finger print as no two vehicles have the same VIN - make sure the VIN is correct
Column "D" - INDOT - NTD - TAM - Year - the year of original manufacture of the vehicle
Column "E" - INDOT - NTD - TAM - Vehicle Type - select from drop down box - AO is automobile - CU is cutaway - MV is minivan - VN is van - BS is bus
Column "F" - INDOT - NTD - TAM - Model - Ford - Chevy - Dodge - etc.
Column "G" - INDOT - Engine Type - Gasoline - Diesel - Alternative
Column "H" - INDOT - NTD - TAM - Seating Capacity - Number of passenger seats - including the driver's seat - manufactures generally cite this information in the specification of the vehicle
Column "I" - INDOT - NTD - TAM - Wheel Chair Capacity
Column "J" - INDOT - NTD - Vehicle Length - transit agencies must report the vehicle length for each fleet of vehicles - the NTD uses feet as the unit of measure
Column "K" - INDOT - ADA Accessible - select from drop down box - Lift - Ramp - N/A
Column "L" - NTD - Source of Funding - select from the drop down box
Column "M" - NTD - Ownership Code - select from the drop down box - LPPA is county commissioners hold title - OOPA - city - MPO - INDOT holds title - OPPE - non profit
Column "N" - INDOT - TAM - Mileage - mileage as of 12/31/00
Column "O" - INDOT - Planned Vehicle Replacement Year - identify year to be replaced based on 5 year replacement cycle
Column "P" - TAM - Useful Life Definition - is a numeric value - select from the drop box - (rank 5 = 0 to 4 years) - (rank 4 = 5 years) - (rank 3 = 6 years) - (rank 2 = 7 years) - (rank 1 = 8 + years)
Column "Q" - TAM - Useful Mileage Definition # - is a numeric value - select from the drop box - (rank 5 = 0 to 100,000 miles) - (rank 4 = 100,001 to 150,000 miles) - (rank 3 = 150,001 to 200,000 miles) - (rank 2 = 200,001 to 250,00 miles) - (rank 1 = 250,001 + miles)
Column "R" - TAM - Vehicle Condition - is a numeric value - see Condition descriptions in example section select from the drop box (rank 5 = Excellent)
Column "S" - INDOT - FTA Grant # - is for Office of Transit use
Column "T" - INDOT - Purchase Date - the date the transit system purchased the vehicle
Column "U" - INDOT - Placed in Revenue Service - the date the vehicle is available to the general public and there is the expectation of carrying passengers to generate revenue
Column "V" - INDOT - Total Cost Vehicle - reference the Invoice submitted to INDOT Office of Transit
Column "W" - INDOT - Funding Split - the Office of Transit will populate the data field - currently the capital program is 5339 funding source which is 80% federal and 20% local
Column "X" - INDOT - Useful Life - the Office of Transit will populate the data field
Column "Y" - INDOT - Removed from Revenue Service - the date when a vehicle is removed from generating revenue or the vehicle is not available to the general public with an expectation of carrying passengers
Column "Z" - INDOT - Disposition Date - the date the vehicle was sold , salvaged and removed from INDOT Office of Transit inventory
Column "AA" - INDOT - Sale Price - required to determine FTA/INDOT useful life threshold - sale of vehicle must be less than \$4,999
Column "AB" - INDOT - Fair Market Value - required to determine FTA/INDOT useful life threshold - estimate can be acquired by Midwest Transit - Kelley Blue Book or local dealership
Column "AC" - INDOT - Vehicle Identified in Application as the Replacement vehicle - this field is for Office of Transit use
Column "AD" - INDOT - Comments - is for INDOT Office of Transit use

Table 3 INDOT Facility Data Request Form

2017 Maintenance and Administration Facility (A-10)								
1	2	3	4		5	6	7	
NTD ID	Facility Name	Mark "X" if line item is section of larger facility	Street Address		City	State	Zip Code	
8	9	10	11	12	13	14	15	16
Primary Mode Served at Facility	Administrative and Maintenance Facility Type	Year Built or Reconstructed (as new)	Square Feet	Transit Agency Capital Responsibility	Estimated Useful Life Scale	Condition Assessment	Date of Condition Assessment	Notes

Transit Asset Management Facility Data
<p>The information collected for this reporting program is required by FTA 49 CFR Part 625 and 630. As part of the Transit Asset Management Final Rule, July 26, 2016 all public transit systems must determine useful life of facilities used in the delivery of public transit service. By using the attached Facility Assessment forms each system is expected to rate the condition of listed components of each facility to determine the overall condition of the facility on a scale of 1-5 with 5 being Excellent condition. There are no penalties for facilities with low ratings. INDOT and FTA need a true status of the state's infrastructure to help with planning and future funding requirements to help bring all facilities into a State of Good Repair (SGR).</p>
<p>The following tutorial will provide information for understanding and completing the following forms.</p>
<p>Facility Page - summary of the inventory of facilities</p>
<p>A-10 Form Instructions (by column number)</p>
<p>1. NTD ID - STATE ID (no data entry) - Four-digit number assigned to agency by FTA</p>
<p>2. Facility Name: Enter the name of the administrative or maintenance facility.</p>
<p>3. Section of a Larger Facility: Enter "X" if line-item entry reports a section of a larger facility. In situations where a major facility's age varies by section (due to significant rebuilding, addition, or retrofitting), agencies are encouraged to report the facility on several line items in order to more accurately represent its age.</p>
<p>4. Street Address: Enter the official street address - of the administrative or maintenance facility.</p>
<p>5. City: Enter the city in which the facility is located.</p>
<p>6. State: state in which the facility is located</p>
<p>7. Zip Code: Enter the zip code corresponding to the facility's street address.</p>
<p>8. Primary Mode Served at Facility: Use pull down menu to select DR demand response or MB fixed route (including dev. Fixed route) - Select the primary mode</p>
<p>9. Facility Type: Using pull down menu select the choice best describing the facility - Define the facility type by selecting one of six types of facilities for a maintenance facility or one of two types for an administrative facility.</p>
<p>10. Year Built or Reconstructed (as new): Report the year in which the facility (or section of a facility) was built or was substantially reconstructed as new. "Reconstructed as new" means that substantial changes have been made to the facility's interior floor plan, mechanical systems, etc. in order for the facility to better fulfill its administrative or maintenance functions. Changes to the building envelope (i.e., foundation and walls) typically do not constitute a facility being "Reconstructed as New." The year provided should best reflect the approximate age of the facility.</p>
<p>11. Square Feet: Enter the best available measurement for the total number of square feet in a facility (or section of a facility). Use the exact number of square feet if the figure is readily available, otherwise, round to the nearest thousands</p>
<p>12. Percent Capital Responsibility: Indicate your share of the facility's (or section of a facility's) estimated cost by entering a percent from zero to 100 in this field. (Do not enter a negative number or a number greater than 100).</p>
<p>a. For example, enter the number '100' in this field, if the transit agency owns the facility and is fully responsible for funding its replacement</p>
<p>b. If the transit agency is responsible for funding capital needs - but is unaware of the funding share - then use a proxy measure - square footage - to approximate its share of funding to replace the facility.</p>
<p>c. If a transit agency is responsible for funding the replacement cost of a facility per terms in a lease, then enter the percentage of funding responsibility from the lease terms or the share based on the collective cost of major components for which it is responsible to fund replacements.</p>
<p>d. Enter '0' if you are not responsible to fund a leased facility's replacement cost directly</p>
<p>13. Estimated Condition Assessment: Auto filled field that provides an estimated condition assessment rating based on facility age as reported from the original construction date.</p>
<p>14. Condition Assessment: Auto filled field with score from Facility Assmt forms completed - Enter the facility condition assessment based on either 1) the auto-populated condition assessment provided or 2) an agency conducted condition assessment based on FTA guidance.</p>
<p>15. Estimated Date of Condition Assessment: Auto filled field with date from Facility Assmt forms completed - Enter the month and year that the facility condition assessment was conducted. If no condition assessment has been conducted, you may leave this field blank.</p>
<p>16. Notes: Use if needed to clarify information</p>

#1-#4 M & A Facility Assmt Page(s)

Table 1

This table is to be used for completion of the facility assessment. It includes ten inspection areas requiring ratings (see Table 2) for each sub category. The score will automatically calculate the SGR score for the facility based on weighted averages of each inspection area. The score will automatically populate the Facility Page - Column 14. Use tabs #2-#4 for additional facility assets. If you need additional instruction on components in sub-categories to be inspected refer to the INDOT Facility Maintenance Guide.

Table 2

The Condition Assessment Rating Scale is used to reference the description for scores of 1-5 you will use to complete Table 1. This scale is taken from FTA's Transit Economic Requirements Model (TERM) scale, used primarily for facilities.

Table 3

This table should be completed to include the individual(s) who assess each component of the Facility Assessment form. A column on the form requires initials of the person completing that section of the assessment. Table 3 lists each person by name and title

Photos

Along with each Facility Assessment photos should be included to show exterior and interior of the facility at minimum. If the facility is a parking lot please take photos of a couple angles to include access to road.

Assessments

4. CONDITION ASSESSMENTS

Indiana DOT combines both system assessments for rolling stock and equipment and INDOT staff assessments for facilities.

ROLLING STOCK AND EQUIPMENT

Rolling stock assessments are based on the following premise in Table 4 and are conducted by transit management or operations supervisors using a scale of 1 to 5. To conduct a proper vehicle assessment the inspector is required to not only assess the physical vehicle, but also review the maintenance file. The reviewer will identify preventive maintenance inspections as well as maintenance repairs classified as minor or major repairs. Major repairs include substantial work to engine and drivetrain, electrical, body, lift replacement or computer. Minor repairs might include brakes, alignment, minor lift repairs, and other lower cost repairs not associated with preventive maintenance.

Equipment assessments are completed by the subrecipient using the same premise as the rolling stock assessment. This requires transit systems to maintain proper records of each piece of equipment used in the support of public transit service. Only equipment with an acquisition value greater than \$50,000 must be included in their TAM data. The exception is non-revenue service vehicles where value is not a factor. Examples of equipment include non-revenue vehicles, non-permanent facility equipment – movable bus wash system, portable lift systems, tire changing stations, digital bus arrival boards and other major equipment components not a part of the facility.

Table 4

Rolling Stock Condition Ranking
5 - Excellent - brand new - no major problems exist - only routine maintenance
4 - Good - elements are in good working order - requiring only nominal or infrequent minor repairs (greater than six months between repairs)
3 - Fair - requires frequent minor repairs (less than six months between repairs) or frequent major repairs (more than six months between major repairs)
2 - Poor - requires frequent major repairs (less than 6 months between major repairs)
1 - Bad - in poor condition that continued use presents potential problems

FACILITIES

As mentioned in the beginning of this section, all facility assessments are conducted by sub-recipients using a modified Transit Economic Recovery Model (TERM) assessment form developed by INDOT. The form includes 10 areas of concentration with sub-sections for each area. The rating systems uses a 1-5 rating scale as required by FTA. Facility assessments will be conducted every other year unless INDOT has reason to conduct the assessments more often. The assessment tool is shown in Table 5.

All facility assessments will be documented and entered in a data table to also include useful life data on each facility. Currently, INDOT is using the standard 40 year useful life for facilities and only includes facilities with a purchase price greater than \$50,000. Subrecipients are required to report data for facilities where they have capital responsibility. Facility types include any building or structure used in providing public transportation, including passenger stations, operations, maintenance and administrative facilities.

Capital responsibility is defined as the following:

You have direct capital responsibility	You do NOT have direct capital responsibility
You own the asset	You do not own the asset AND you are not responsible for replacing, overhauling, refurbishing, or conducting major repairs on that asset, or the costs of those activities are not itemized as a capital line item in your budget.
You jointly own the asset with another entity	
You are responsible for replacing, overhauling, refurbishing, or conducting major repairs on that asset, or the costs of those activities are itemized as a capital line item in your budget.	

For Maintenance and Administrative facilities:

- ◆ Any maintenance or administration facility under 100 square-ft. does not need to be included (e.g. security guard shack, stand-alone restroom, storage shelter in which no work is performed) in either of your inventories.
- ◆ If your vehicles are the only vehicles that the maintenance facility services, then it is considered an “exclusive use” facility and thus must be inventoried in your TAM plan.
- ◆ If the administrative office is in a building that has only incidental transit use (e.g. city hall), then it is not required to be included in either of your inventories.

For Passenger and Parking facilities:

- ◆ All passenger facilities must be inventoried in your TAM plan and reported to the NTD regardless of ownership.
- ◆ You must inventory all parking facilities for which you have direct capital responsibility, and that are immediately adjacent to a passenger facility (e.g. a park-and-ride lot or a garage).

Table 5 INDOT Conditional Assessment Tool

This table is to be used for completion of the facility assessment. It includes ten inspection areas requiring ratings (see Table 3) for each sub category. The score will automatically calculate the SGR score for the facility based on weighted averages of each inspection area.

Maintenance and Administrative Facility Conditional Assessment	SCORE	Assessor
Inspection Area		Intls.
Substructure		
Foundations: Walls, columns, pilings other structural components		
Basement: Materials, insulation, slab, floor underpinnings		
Shell		
Superstructure/structural frame: columns, pillars, walls		
Roof: Roof surface, gutters, eaves, skylights, chimney surrounds		
Exterior: Windows, doors, and all finishes (paint, masonry)		
Shell appurtenances: Balconies, fire escapes, gutters, downspouts		
Interiors		
Partitions: Walls, interior doors, fittings such as signage		
Stairs: Interior stairs and landings		
Finishes: Materials used on walls, floors and ceilings		
<i>This component covers all interior spaces, regardless of use</i>		
Conveyance (Elevators and Escalators)		
Elevators		
Escalators		
Lifts: any other such fixed apparatuses for the movement of goods or people		
Plumbing		
Fixtures		
Water distribution		
Sanitary Waste		
Rain water drainage		
HVAC (Heating, ventilation, and air conditioning)		
Energy supply		
Heat Generation and distribution systems		
Cooling generation and distribution systems		
Testing, balancing, controls and instrumentation		
Chimneys and vents		
Fire Protection		
Sprinklers		
Standpipes		
Hydrants and other fire protection specialties		
Electrical		
Electrical service and distribution		
Lighting & branch wiring (interior and exterior)		
Communications and security		
Other electrical system-related pieces such as lighting protection, generators, and emergency lighting		
Equipment/Fare Collection		
Equipment related to the function of the facility, including maintenance or vehicle service equipment		
For clarity, includes items valued above \$10,000 and related to facility function		
Site		
Roadways/driveways and associated signage, markings and equipment		
Parking lots and associated signage, markings and equipment		
Pedestrian areas and associated signage, markings, and equipment		
Site development such as fences, walls, and miscellaneous structures		
Site Utilities		
Overall Assessment Score	#DIV/0!	

The Condition Assessment Rating Scale is used to reference the description for scores of 1-5 you will use to complete Table 1. This scale is taken from FTA's Transit Economic Requirements Model (TERM) scale, used primarily for facilities.

Condition Assessment Rating Scale		
Rating	Condition	Description
4.8-5.0	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4.0-4.7	Good	defective or deteriorated component(s), but is overall functional
3.0-3.9	Adequate	Moderately deteriorated or defective components; but has not exceeded useful life
2.0-2.9	Marginal	Defective or deteriorated component(s) in need or replacement; exceeded useful life
1.0-1.9	Poor	Critically damaged component(s) or in need of immediate repair; well past useful life

This table should be completed to include the individual(s) who assess each component of the Facility Assessment form. A column on the form requires initials of the person completing that section of the assessment. Table 3 lists each person by name and title

Instructions		
Each Inspection Area requires initials of the staff person conducting the inspection. All staff responsible for the facility inspection must be listed in Table 2		
Date	Transit System Assessor	Title

Support Tools

5. DECISION SUPPORT TOOLS

In an effort to determine the State of Good Repair (SGR) that truly reflects the condition of the asset, INDOT uses a three-factor analysis to determine SGR for rolling stock and equipment. The factors include useful life, useful mileage and condition assessment. Each factor uses a 1-5 scale and utilizes the useful life and miles taken from Table 2 in the beginning of this plan. Taking an average of the three factors allows INDOT to identify rolling stock or equipment that may have not have met its useful life but due to extremely high mileage or adverse operating conditions may not be fit for its intended purpose. Conversely, a vehicle exceeding its useful life may have low mileage and is in good condition and is fit for its intended purpose.

INDOT uses the three-factor analysis on each asset in Rolling Stock and Equipment resulting in an average which is then used in determining replacement priority. A sample of the analysis is below in Table 6. The full listing of the INDOT fleet is located in the Appendix.

Table 6 – Three Factor Analysis to Determine SGR for Rolling Stock

Identification # VIN	Year	Vehicle Type	Vehicle Length	Mileage	Planned Vehicle Replacement Year	TAM Useful Life Definition #	TAM Useful Mileage Definition #	TAM Vehicle Condition #	TAM State of Good Repair Score	INDOT Useful Life
3A4FY58B67T507966	2007	AO	15	74875	2012	1	5	4	3.33	4 YR/100,000 miles

2C7WDGBG0GR144281	2016	MV	17	19270	2021	5	5	4	4.67	4 YR/100,000 miles

In determining the State of Good Repair for Facilities, INDOT uses two performance measures or factors to obtain a realistic assessment of the facility's SGR. The first factor is Useful Life. The below scale shows the formula INDOT uses to determine, on a scale of 1-5, the useful life of a facility.

Useful Life Rating Scale		
5	Excellent	Facility is less than 10 years old
4	Good	Facility is less than 20 years old
3	Adequate	Facility is less than 30 years old
2	Marginal	Facility is less than 40 years old
1	Poor	Facility is 40 + years old

The second factor is condition assessment and is based on a modified Term Lite scale and explained in the Section: Condition Assessment, but scale is below.

Condition Assessment Rating Scale		
Rating	Condition	Description
4.8-5.0	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4.0-4.7	Good	defective or deteriorated component(s), but is overall functional
3.0-3.9	Adequate	Moderately deteriorated or defective components; but has not exceeded useful life
2.0-2.9	Marginal	Defective or deteriorated component(s) in need or replacement; exceeded useful life
1.0-1.9	Poor	Critically damaged component(s) or in need of immediate repair; well past useful life

By taking an average of these two factors INDOT is able to determine the SGR for each facility and, in turn rank them in their Investment Priority Table.

Based on the three-factor analysis for Rolling Stock and two-factor analysis for Facilities, INDOT is able to calculate annual benchmarks to be submitted to FTA as part of the NTD reporting cycle. The benchmarks are listed below in Table 7.

Considerations given to determining benchmarks include:

- ◆ Existing assets on replacement list
- ◆ Assets to be replaced in the next year
- ◆ Additional assets added not designated as replacements
- ◆ Recalculation of SGR

Formula to be used annually:

(priority replacement list – authorized replacements) + additional non-replacements
 Recalculate SGR and develop benchmarks based on anticipated replacements for next year.

Table 7 – INDOT FY 2023 Targets

Asset Category	Asset Class	2023 SGR	ULB
Rolling Stock	Auto (AO)	47%	4 Years
	Mini Van (MV)	76%	4 Years
	Van (VN)	48%	4 Years
	Cutaway (CU)	75%	4 Years
Facility	General Purpose Maintenance Facility/Depot	100%	40 Years
	Administrative Office/Sales Office	94%	40 Years
	Bus Transfer Center	100%	40 Years
	Combined Administrative and Maintenance	90%	40 Years
	Surface Parking Lot	33%	40 Years
	Parking Structure	100%	40 Years
	Other	100%	40 Years
Equipment	Support Vehicles		
	Maintenance Equipment		

Prioritization

6. INVESTMENT PRIORITIZATION

Through the process laid out in earlier sections of this plan, INDOT is able to generate a listing of capital assets in need of replacement or rehabilitation. In an effort to achieve an increased level of State of Good Repair (SGR) and assure transit riders and transit employees the vehicles they are riding or operating are safe and reliable, INDOT annually generates the following list to provide guidance for future investment projects by INDOT and subrecipients.

Other factors may have an impact on the ability to replace the assets on this list, but because of the list INDOT is able to plan more effectively for the next fiscal year.

INDOT reviews applications for capital improvements, replacements and expansions as part of the process of improving the State-wide State of Good Repair through the grant making process. In some cases, assets listed as not being in SGR are not replaced due to lack of local match funds. The State makes every attempt to encourage grantees to replace these assets. The below chart shows the anticipated Rolling Stock inventory changes based on applications received.

As a result of the Covid-19 Pandemic beginning in 2020, INDOT has seen an increase in rolling stock replacement costs due to manufacturer production challenges. As of 2022 the U.S. transit industry has seen 25% increase in new vehicle costs, delivery times up to two years, and spare parts demand outpacing supply. It is anticipated these factors will impact INDOT subrecipients managing their vehicle replacement needs through extended life of vehicles meeting or exceeding INDOT Useful Life Benchmarks (ULB)s.

INDOT is working with subrecipients to educate them on best practices for maintaining fleet reliability and safety standards while recognizing additional investment planning may be necessary given the current supply chain challenges.

The following Table 8 and 9 provide a summary of INDOT Rolling Stock and Facilities SGR based on ULB performance measures and additional assessment factors of each asset.

Table 8 – 9 Rolling Stock and Facility SGR for 2022

INDOT Rolling Stock					INDOT Facilities		2022 Count	2022 SGR
Vehicle Class	Total	SGR	Non-SGR	Non SGR %				
AO	23	13	10	43%	General Purpose Maintenance Facility/Depot		17	94%
MV	310	235	75	24%	Administrative Office/Sales Office		37	89%
VN	27	13	14	52%	Bus Transfer Center		1	100%
CU	352	263	89	25%	Combined Administrative and Maintenance Facility		10	90%
Total	712	524	188	26%	Surface Parking Lot		3	33%
					Parking Structure		3	100%
					Total Facilities		71	84%

Tables 10 and 11 show a list of capital assets scoring the lowest score based on the three-factor analysis for rolling stock and two-factor analysis for facilities. Rolling stock assets include any vehicle with an average score of 2 or below, facilities an average of 3 or below.
