Introductions

- Scott Manning, INDOT
  - Director of Intergovernmental Affairs
- Joe Guerre, HNTB
  - Indiana Planning Group Director
- Diane Newton, HNTB
  - National Practice Consultant
- Peter Flynn, HNTB
  - Senior Project Engineer
- Kerri Garvin, Greater Indiana Clean Cities Incorporated
  - Executive Director
Where we are today?

- **2020**
  - INDOT Partners with Purdue to study EVs in Indiana

- **2021**
  - Bipartisan Infrastructure Law Passed

- **2022**
  - February – Initial Federal NEVI Guidance provided
  - March to July – State planning process
  - August 1 – State plans due to FHWA
NEVI Program Overview
NEVI Program Overview

- **Source:** 2021 Bipartisan Infrastructure Law (BIL)
- **Goal:** create nationwide network of 500,000 EV chargers by 2030
  - *Initial funding is directed to Alternative Fuel Corridors (AFC)*
  - *Establish minimum standards for EV chargers within 180 days of enactment*
  - *Compliance with the Justice40 Initiative*
- **Funding:**
  - $7.5B ($5B formula, $2.5B discretionary) over 5 years
  - Indiana = $99,605,738
- **Schedule:**
  - Round 6 AFC nominations due May 13, 2022
  - State plans due August 1, 2022
  - Federal Highway Administration (FHWA) approves by September 30, 2022
NEVI – Key Requirements

• EV charging infrastructure must be located every 50 miles along State’s interstate highway system, within 1 mile of the Interstate

• EV charging infrastructure must include at least four 150KW Direct Current (DC) Fast Chargers

• Rest areas are not eligible locations

• States are allowed to contract with private entities for installation, operations and maintenance
## EV Charging Infrastructure

### Level 1 Charging
- **Approximately 5 miles of range per 1 hour of charging**
- J1772 connector

### Level 2 Charging
- **Approximately 25 miles of range per 1 hour of charging**
- J1772 connector
- Tesla connector

### DC Fast Charging
- **Approximately 100 to 200+ miles of range per 30 minutes of charging**
- CCS connector
- CHAdeMO connector
- Tesla connector

Approach

Review existing research

Purdue SPR 4509: A Strategic Assessment of Needs and Opportunities for Wider Adoption of EVs in Indiana
Journal of Transportation Technologies: Analysis of Electric and Hybrid Vehicle Usage in Proximity to Charging Infrastructure in Indiana

Stakeholder engagement

Request for information
Virtual event(s)
Online survey
In-person meetings
One-on-one meetings (as requested)

Plan development

Map existing research to relevant sections
Identify gaps
Stakeholder engagement results to drive content development
Map existing and planned locations
Workshop with INDOT to finalize plan content
FAQs

• Have preliminary locations been selected?
• What is the RFP process and timing?
• What are INDOT roles and responsibilities?
• What is the difference between the formula and discretionary NEVI program?
• Is the grid ready for this infrastructure?
Indiana EV Plan Overview
INDOT NEVI Vision and Priorities

- **Vision:**
  - Collaboratively plan, build, and maintain safe and innovative EV infrastructure that enhances quality of life, drives economic growth, and facilitates the movement of people and goods.

- **Priorities:**
  - Resolve 50-mile gaps on alternative fuel corridors.
  - Provide service in high demand areas, exceeding requirements when warranted.
  - Provide service in disadvantaged communities and rural areas.
  - Leverage existing access to utility service.
INDOT NEVI Goals and Outcomes

- Deliver great service. **Collaborate and communicate with internal and external stakeholders regarding EV infrastructure deployment.**

- Enhance Indiana’s economic competitiveness and quality of life. **Eliminate range anxiety for EV travel.**

- Execute a 20-year road and bridge plan. **Deliver the EV plan to provide a robust, reliable and sustainable charging network.**

- Develop INDOT’s 21st century workforce. **Enable the private sector to ensure continued operation of EV charging infrastructure funded by NEVI and reduce the need for future public funding.**

</tbody>
</table>
Contracting Overview

**Strategy:**
- Competitive procurement process
- Incremental release of RFPs
- Multiple sites in each release

**Assumptions:**
- 20% match - leverage private sector contributions
- INDOT will not operate or maintain
- 5-year minimum O&M

**2022-2023**
- Prioritization of preliminary sites

**2023-2024**
- Procurement of Phase 1 sites

**2024-2025**
1. Implementation of Phase 1 sites
2. Procurement of Phase 2 sites

**2025-2027**
1. Implementation of Phase 2 sites
2. Procurement for Phase 3
3. Full build out of AFCs

*NOTE: TIMEFRAME IS APPROXIMATE*
Indiana Alternative Fuel Corridors

- Designated AFCs:
  - All interstates
  - US 31
- Round 6 nominations:
  - I-469
  - I-265
Existing Charging Infrastructure

- **ALL EV CHARGING LOCATIONS**: 241
- **DC FAST CHARGER LOCATIONS**: 23
- **NEVI COMPLIANT CHARGER LOCATIONS**: 4
National Electric Vehicle Infrastructure

Existing Charging Infrastructure - NEVI

- Four EV charging stations
- Most existing charging locations exceed the NEVI requirements for power and number of chargers
- Charging locations exceed the spacing required to meet the NEVI requirements
- None of the existing or proposed AFC’s have sufficient charging location coverage to demonstrate a complete corridor EV corridor.
Preliminary Charging Infrastructure

- Existing charging locations are shown in blue with light green service areas
- Preliminary charging locations are shown in green with dark green service areas
- Service area shapes represent a 25-mile range
- Overlapping service areas along the EV corridors demonstrate the AFC meets the NEVI criteria
- 44 Preliminary EV charging locations
With all preliminary charging locations shown, nearly the entire state of Indiana will be within 50-miles of a DCFC charging location.

98% of Indiana residents will be within 35-miles of a DCFC location.
Disadvantaged and Rural Communities

- Justice 40 Initiative (January 2021)
  - At least 40 percent of the overall benefits of certain Federal investments flow to disadvantaged communities (DACs).
  - NEVI is a Justice40 covered program

- USDOT DAC Definition*
  - Transportation access
  - Environmental
  - Resilience
  - Equity

- Approximately 59% of Indiana residents live in a DAC area

*https://www.transportation.gov/equity-Justice40
100% of the preliminary sites are in or within 15-miles of at least one DAC area

62% the preliminary sites are in or within 5 miles of DAC area

https://www.anl.gov/es/electric-vehicle-charging-equity-considerations
Regional View of Preliminary Infrastructure

- 25-mile service area
- AFC’s in LaPorte and Ft. Wayne Districts
- 12 preliminary sites are in this region
Public Engagement
Strategy

- **Gain insight:** into market motivations that drive investment and activity into EV charging.
- **Gauge the level of interest:** in funding opportunities, participation, and engagement with other federal funding sources.
- **Identify key planning considerations:** for EV charging buildout.
- **Identify gaps:** gauging which communities are likely to be underserved, as outlined by the Justice40 Initiative.
- **Assess readiness:** where are we at today and where do we need to go to successfully implement EV charging programs.
- **Define success:** Gain insight into metrics and performance monitoring techniques.
- **Clarity on INDOT’s role:** how can we support implementation?
- **Identify unknowns:** determine other considerations INDOT should be aware of.
Who are the stakeholders?

- **General Public:**
  - Community-based organizations
  - Grassroots EV chapters
  - Underserved/underrepresented communities

- **Government:**
  - State agencies
  - General Assembly
  - Metropolitan planning organizations
  - Municipal and county governments
  - Public transit organizations
  - EV Product Commission
  - 21st Century Energy Task Force
  - REV Midwest member states

- **Labor Organizations**

- **Private Sector:**
  - Charging providers
  - Original equipment manufacturers
  - Infrastructure and energy alternatives

- **Consumer- and Investor-Owned Utilities**

- **Freight and Logistics**

- **Academia**
Activities to Date

- Request for Information (closed April 29)
- Virtual open house May 11
  - Recording: https://register.gotowebinar.com/recording/166089350942842380
- Public Survey (closed May 27):
  - Over 2,000 responses received
- Utility questionnaire (INDOT and OED) responses due June 8
- INDOT On the DOT podcast Episode 29: https://soundcloud.com/indotpod/may-2022
Preliminary Public Survey Results

- Primary barrier to EV adoption:
  - Availability of charging stations

- Key amenities sought at EV charging stations:
  - 24-hour access
  - Safety
  - Lighting
  - Restrooms

- Prioritizing AFCs:
  - Addressing gaps in the existing charging network
  - Total traffic volumes
  - EV traffic volumes
  - Increasing EV charging in rural Indiana
Upcoming Opportunities

- In-person meetings by region:
  - Northern Indiana – 6/2/22
    - Time: 3-5 p.m. ET
    - Location: Plymouth, IN
  - Central Indiana – 6/9/22
    - Time: 3-5 p.m. ET
    - Location: Indianapolis, IN
  - Southern Indiana – 6/14/22
    - Time: 3-5 p.m. ET
    - Location: Seymour, IN
- Request one-on-one meeting with INDOT
- COMING SOON: Comment on INDOT NEVI Program Webpage
