Paige,

Please see responses in blue.

FHWA has reviewed and we have the following questions.

1. What type of access control is Des # 2300691?

This is a project to obtain access/property to the areas immediate to the interchange. We will not be adding capacity.
The project is needed to protect the future safety and operations of the interchange of US 35 and I-69. The safety and operational performance can be jeopardized by development occurring in close proximity to the interchange terminal intersections. Currently there is not adequate Limited Access Right of Way (LARW) along US 35 in the area of the interchange. The purpose of the project is to protect the future safety and operations of the interchange of US 35 and I-69.

No new pavement is needed as a part of this project. Some repair to damaged shoulder pavement may be needed.

2. Will Des # 2401837 be adding any lanes or capacity? No, there will be no additional lanes or capacity.
