Indiana Public Retirement System

1977 Police Officers' and Firefighters' Pension and Disability Fund

Actuarial Valuation as of
June 30, 2014

December 8, 2014

Board of Trustees
Indiana Public Retirement System
1 North Capitol, Suite 001
Indianapolis, IN 46204

Re: Certification of the Actuarial Valuations of the Indiana Public Retirement System as of as of June 30, 2014

Dear Board of Trustees:

Actuarial valuations are performed annually for the Indiana Public Retirement System ("INPRS") defined benefit pension plans ("Plans"). The results of the latest actuarial valuations for all plans other than the Teachers' Retirement Fund were prepared as of June 30, 2014 and are presented in individual valuation reports pursuant to the engagement letter between INPRS and PricewaterhouseCoopers LLP ("PwC"), dated June 7, 2010. The reports are intended to provide the Board of Trustees ("Board") with information on the funded status of the Plans, development of the contribution rates, and certain financial statement disclosure information.

Under Indiana statutes, employer contribution rates and amounts, as applicable, are adopted annually for each Plan by the Board. The contributions are actuarially determined based on the funding policy, actuarial assumptions, and actuarial methods adopted by the Board. Contributions determined by the actuarial valuation become effective either twelve or eighteen months after the valuation date, depending on the applicable employer. Therefore, contribution rates and amounts determined by the June 30, 2014 actuarial valuation and adopted by the Board will become effective on either July 1, 2015 or January 1, 2016. If new legislation is enacted between the valuation date and the date the contributions become effective, the Board may adjust the recommended contributions before adopting them, in order to reflect this new legislation. Such adjustments are based on information supplied by the actuary.

Financing Objectives and Funding Policy

In setting contribution levels, the Board's principal objectives have been:

- To set contributions such that the unfunded actuarial accrued liability ("UAAL") will be amortized over a period not greater than 30 years.
- To set contributions such that they remain relatively level over time.

To accomplish this, the Board's funding policy requires that employer contributions be equal to the sum of the employer normal cost (which pays the current year cost of benefits accruing) and an amortization of the UAAL in equal installments.

Progress Toward Realization of Financing Objectives

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a standard measure of a Plan's funded status. In the absence of benefit improvements, it should increase over time, until it reaches 100%. The combined funded ratio for all Plans (excluding the Teachers' Retirement Fund) increased by 3.6% from the preceding year to 87.0%, primarily due to asset returns exceeding the 6.75% assumptions and cost-of-living adjustments being less than assumed.

Benefit Provisions

The benefit provisions reflected in the valuation reports are those which were in effect at June 30, 2014, as set forth in the related Indiana statutes. There were no material changes in benefit provisions since the 2013 valuations.

Assets and Member Data

The valuations were based on asset values of the trust funds as of June 30, 2014 and member census data as of June 30, 2013, adjusted for certain activity during fiscal year 2014. All asset information and member data were provided by INPRS. While certain checks for reasonableness were performed, the data was used unaudited. The accuracy of the results presented in the reports is dependent upon the accuracy and completeness of the underlying asset and census information.

PricewaterhouseCoopers LLP, One North Wacker, Chicago, IL 60606

T: (312) 298-2000, F: (312) 298-2001, www.pwc.com/

Actuarial Assumptions and Methods

The majority of the actuarial assumptions used in the June 30, 2014 valuations were adopted by the Board pursuant to the experience studies completed in September 2011, which reflected the experience period from July 1, 2005 through June 30, 2010, and were first used in the June 30, 2011 valuation. The actuarial assumptions for interest rate and mortality were updated for the June 30, 2012 valuation. Minor assumptions were updated for the June 30, 2013 valuation including the interest rate on member account balances and certain demographic assumptions for Prosecuting Attorneys' Retirement Fund due to plan changes. There were no updates to the actuarial assumptions for the June 30, 2014 valuation. However, the June 30, 2014 valuations are the first valuations that incorporate member census data as of a date one year prior to the valuation date. Standard actuarial techniques were used to roll forward valuation results from June 30, 2013 to June 30, 2014.

The actuarial assumptions and methods are summarized in the Actuarial Assumptions and Methods section of each valuation report. We believe the actuarial assumptions and methods are reasonable for the purposes of the valuation reports and comply with the parameters set forth in Statements No. 27, No. 50, No. 67 and No. 68 of the Governmental Accounting Standards Board ("GASB"). Different assumptions and methods may be reasonable for other purposes. As such, the results presented in the valuation reports should only be relied upon for the intended purpose.

Certification

We certify that the information presented herein is accurate and fairly portrays the actuarial position of each Plan administered by INPRS (other than the Teachers' Retirement Fund) as of June 30, 2014 based on the underlying census data, asset information and selected assumptions and methods. This information is presented in several schedules and exhibits in this report, including the following:

- Schedule of Funding Progress (Included in the Historical Summary)
- Summary of Actuarial Assumptions & Methods
- Analysis of Financial Experience (Unfunded Actuarial Accrued Liability Reconciliation)
- Solvency Test (Included in the Historical Summary)
- Schedule of Active Member Valuation Data
- Schedule of Retirants and Beneficiaries

This report contains certain accounting information required to be included in the System's Comprehensive Annual Financial Report. This information for the system has been prepared in accordance with our understanding of GASB No.67. This report also contains employer accounting information prepared in accordance with our understanding of GASB No. 27 and 50, as well as the new requirements under GASB No. 68.

To the best of our knowledge this actuarial statement is complete and accurate and has been prepared in accordance with generally accepted actuarial principles and practice and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with our understanding of the requirements of Indiana state law. The undersigned actuaries are members of the Society of Actuaries and other professional organizations, including the American Academy of Actuaries, and meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States relating to pension plans. There is no relationship between the PwC practitioners involved in this engagement and INPRS that may impair our objectivity.

This document has been prepared pursuant to an engagement letter between INPRS and PwC, and is intended solely for the use and benefits of INPRS and not for reliance by any other person.

Respectfully submitted,

Ms. Cindy Fraterrigo

SECTION I - EXECUTIVE SUMMARY

HIGHLIGHTS OF THE ACTUARY'S REPORT

This report presents the results of the actuarial valuation of the 1977 Police Officers' and Firefighters' Pension and Disability Fund (the "1977 Fund") and has been prepared to present the current funded status of the Plan, contribution requirements for calendar year 2016 (January 1, 2016 through December 31, 2016), and certain financial statement disclosure information. The valuation was performed using census data for plan members as of June 30, 2013, adjusted for certain activity during fiscal year 2014, as provided by INPRS and summarized in Section IV, asset information as of June 30, 2014 provided by INPRS, the actuarial assumptions and methods approved by the Board and summarized in Section V, and the plan provisions effective June 30, 2014 summarized in Section VI.

Contribution Rate

The Board sets, at its discretion, the applicable employer contribution rate upon considering the results of the actuarial valuation and other analysis as appropriate. The Board has approved an employer contribution rate of 19.70% for calendar year 2016, the same as 2015. The contribution rate becomes effective on January 1, 2016. Therefore, the actual dollar amount of employer cost will depend on the actual payroll during calendar year 2016. The approved rate exceeds the actuarially determined contribution rate for calendar year 2016 of 14.01%.

Members of the 1977 Fund contribute 6% of the compensation of a first class officer during their first 32 years of service. However, the employer may elect to "pick-up" all or part of the employee contribution. If a member terminates employment with less than 20 years of service, the accumulated contributions with interest can be withdrawn as a lump sum or the member may direct the 1977 Fund to make a direct rollover of the distribution amount. When a member becomes vested with at least 20 years of service, the member's account balance may not be refunded and is instead combined with the employer contributions in order to fund the member's future retirement annuity benefit.

Funded Status

The funded status of the 1977 Fund is measured by the funded ratio, which is the ratio of the assets available for benefits to a benefit liability measure for the 1977 Fund. While there are several such measures that could be appropriately used, the benefit liability measure that ties most closely to INPRS's funding strategy is the Actuarial Accrued Liability ("AAL").

Using the Actuarial Value of Assets ("AVA"), an asset value that smoothes the market gains and losses over four (4) years, the 1977 Fund AAL funded ratio increased from 95.2% at June 30, 2013 to 98.3% at June 30, 2014. The increase is primarily due to the recognition of an investment gain for 2013 in the AVA development.

Investment Experience

For the fiscal year ending June 30, 2014, the INPRS actual time-weighted return net of fees was 13.7%. Based on the value of assets allocated to the 1977 Fund as of the prior valuation date and contribution and benefit payment activity during the year, the allocation of returns to the 1977 Fund represent a return of approximately 13.7% on market value and 8.8% on actuarial value. The return on actuarial value is different due to the smoothing of returns greater or less than expected returns over four years.

SECTION I - EXECUTIVE SUMMARY

HIGHLIGHTS OF THE ACTUARY'S REPORT (CONTINUED)

Cost-of-Living Adjustment

Benefits for retired members are increased annually based on increases in the CPI-U index. The increase is subject to a 3% maximum and 0% minimum, and is assumed to be 2.25% annually. There was a 1.4% increase in monthly benefits provided to retired members, disabled members, and beneficiaries effective July 1, 2014. There was a 1.7% increase in monthly benefits provided to retired members, disabled members, and beneficiaries effective July 1, 2013.

Changes in Actuarial Assumptions

There were no assumption changes for the June 30, 2014 valuation.

Changes in Plan Provisions

It is our understanding that there were no changes to the Plan that impacted the pension benefits during the fiscal year.

Changes in Actuarial Methods

Member census data as of June 30, 2013 was used in the valuation and adjusted, where appropriate, to reflect changes between June 30, 2013 and June 30, 2014. Standard actuarial roll forward techniques were then used to project the liabilities computed as of June 30, 2013 to the June 30, 2014 measurement date.

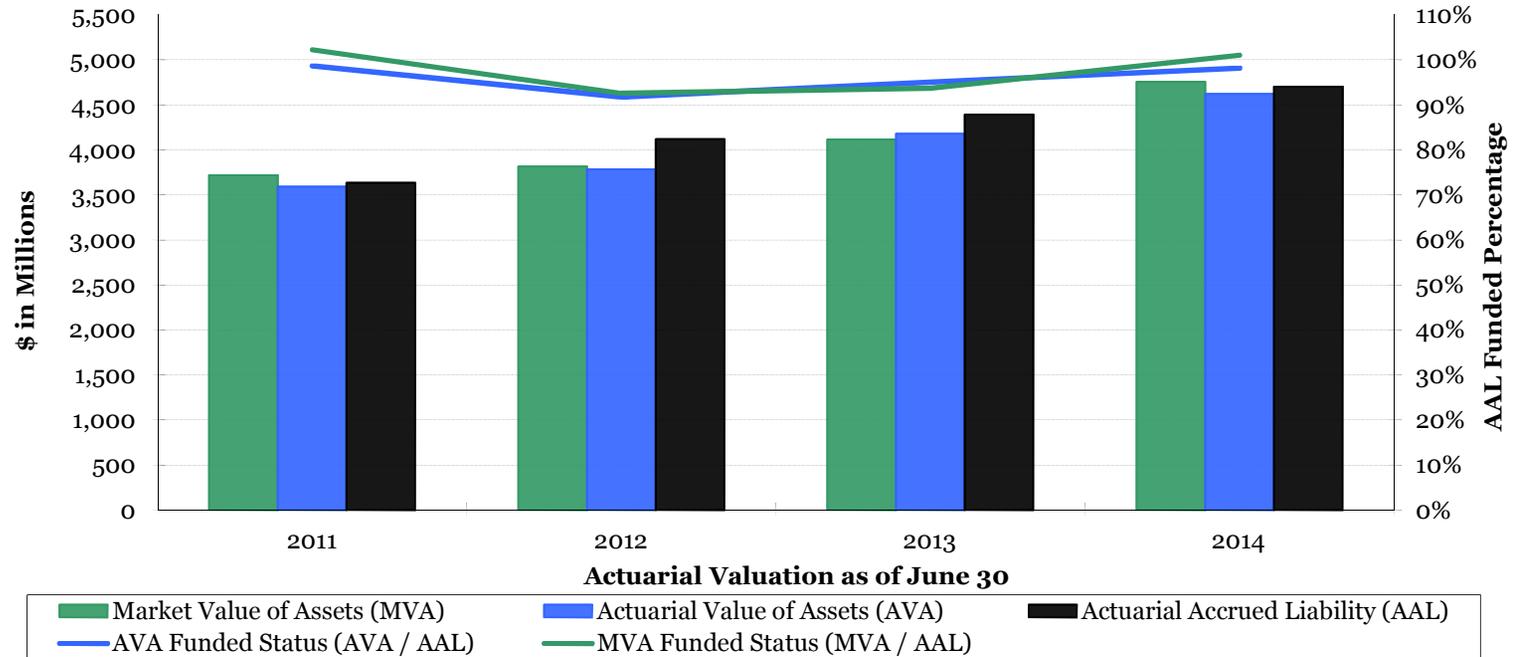

Governmental Accounting Standards

This report contains certain financial statement information, including notes and required supplemental information, prepared in accordance with our understanding of Governmental Accounting Standards No. 67 and No. 68 ("GASB 67" and "GASB 68") to assist INPRS with the implementation of the new standards. GASB 67 is effective for fiscal years beginning after June 15, 2013. GASB 68 is effective for employers sponsoring and/or participating in public pension plans for fiscal years beginning after June 15, 2014.

3. Unfunded Actuarial Accrued Liability, Current Year: (1) + (2)(h)	\$ 212,243,359	\$ 81,522,492

¹ A Cost-of-Living Adjustment (COLA) of 1.7% was effective as of July 1, 2013, rather than the assumed COLA of 2.25%.

² The interest crediting rate assumption on member contribution balances was lowered from 5.5% to 3.5%.

³ The valuation results as of June 30, 2014 were calculated using June 30, 2013 census data adjusted for certain activity during fiscal year 2014, which included a transfer from PERF to 1977 Fund. This did not affect the actuarial accrued liability as no service was transferred.

⁴ A Cost-of-Living Adjustment (COLA) of 1.4% was effective as of July 1, 2014, rather than the assumed COLA of 2.25%.

¹ Based on individual fund experience. Net of expenses and assuming cash flows occur at mid-year.

² Includes refunds of accumulated member contributions and net interfund transfers.

³ INPRS actual time-weighted rate of return net of fees for 2012-2014. PERF CRIF time-weighted rate of return reported as gross of fees for 2004-2011.

⁴ Figures shown are for the six-month period from January 1, 2009 to June 30, 2009.

SECTION II - FUNDING

K. Interest Rate Sensitivity

The investment return assumption (discount rate) should be based on an estimated long-term investment yield for the plan, with consideration given to the nature and mix of current and expected plan investments. Management and the Board continually monitor the investment rate of return assumption and the Board formally reviews the assumption and makes changes as appropriate. The Board last changed the assumption for the June 30, 2012 valuation from 7.0% to 6.75%.

To illustrate the importance of the investment rate of return, which is used to discount the actuarial liabilities of the Plan, the Funded Ratio and Actuarially Determined Contribution Rate (for the calendar year beginning January 1, 2016) are shown below at 6.75% (the current assumption), 6.0% (a three-fourths of a percent decrease), 6.5% (a one-fourth of a percent decrease), 7.5% (a three-fourths of a percent increase), and 8.0% (a one and one-fourth of a percent increase).

	0.75% Decrease: (6.0%)	0.25% Decrease: (6.5%)	Current Assumption: (6.75%)	0.75% Increase: (7.5%)	1.25% Increase: (8.0%)

Fiscal Year Established	Reason	Remaining Balance	Remaining Period	Annual Recognition	
1. Liability experience gains / (losses)					
a.	2014	Experience gain	\$ 11,754,267	9.29	\$ 1,265,261
		Sub-Total	\$ 11,754,267		\$ 1,265,261
2. Assumption change gains / (losses)					
	None	\$ -	9.29	\$ -	
		Sub-Total	\$ -		\$ -
3. Investment gains / (losses) ²					
a.	2014	Investment gain	\$ 256,190,326	5.00	\$ 51,238,066
		Sub-Total	\$ 256,190,326		\$ 51,238,066
4. Total collective deferred inflows / (outflows): (1) + (2) + (3)		\$	267,944,593		\$ 52,503,327

Amounts reported as collective deferred inflows / outflows of resources to be recognized in pension expense:

Year Ending June 30:

2014	\$ 52,503,327
2015	\$ 52,503,327
2016	\$ 52,503,327
2017	\$ 52,503,327
2018	\$ 52,503,323
2019	\$ 1,265,261
Thereafter	\$ 4,162,701

¹ The effort and cost to re-create financial statement information for 10 years was not practical. Information was prepared prospectively from June 30, 2013 for GASB #68 purposes.

² Net of investment expenses.

SECTION III - ACCOUNTING

EMPLOYER FINANCIAL STATEMENTS UNDER GASB #68

E. Collective Pension Expense under GASB #68 for the Year Ended June 30, 2014

1. Service cost		
a. Total service cost ¹	\$	133,074,656
b. Employee contributions		(41,791,345)
c. Administrative and Project Expenses		<u>1,787,845</u>
d. Net employer service cost: (1)(a) + (1)(b) + (1)(c)		93,071,156
2. Interest cost ²		301,824,523
3. Expected return on assets ³		(313,898,200)
4. Plan amendments		-
5. Recognition of deferred (inflows) / outflows of resources related to:		
a. Liability experience (gains) / losses		(1,265,261)
b. Assumption changes (gains) / losses		-
c. Investment (gains) / losses		<u>(51,238,066)</u>
d. Total: (5)(a) + (5)(b) + (5)(c)		(52,503,327)
6. Total collective pension expense: (1)(d) + (2) + (3) + (4) + (5)(d)	\$	28,494,152

¹ As of the beginning of the year.

² Includes interest of 6.75% on the beginning-of-year service cost.

³ 6.75% net of investment expenses and assuming cash flows occur at mid-year. Includes a half year of interest on employee contributions and administrative expenses.

SECTION III - ACCOUNTING

NOTES TO THE FINANCIAL STATEMENTS UNDER GASB #67 AND #68

F. Selected Notes to the Financial Statements under GASB #67 and #68

1. The 1977 Fund is a cost-sharing multiple-employer plan for GASB accounting purposes.
2. Significant actuarial assumptions and other inputs used to measure the total pension liability:
 - Measurement Date June 30, 2014
 - Valuation Date
 Assets: June 30, 2014

 Liabilities: June 30, 2013 - Member census data as of June 30, 2013 was used in the valuation and adjusted, where appropriate, to reflect changes between June 30, 2013 and June 30, 2014. Standard actuarial roll forward techniques were then used to project the total pension liability computed as of June 30, 2013 to the June 30, 2014 measurement date.
 - Inflation 3.0%
 - Future Salary Increases 3.25%
 - Cost-of-Living Increases 2.25% compounded annually, beginning July 1, 2015. Actual COLA increases at July 1, 2013 (1.7%) and July 1, 2014 (1.4%) are reflected in the valuation.
 - Mortality Assumption 2013 IRS Static Mortality Tables projected five (5) years with Scale AA
 - Experience Study The most recent comprehensive experience study was completed in 2011 and was based on member experience between June 30, 2005 and June 30, 2010. The demographic assumptions were updated as needed for the June 30, 2011 actuarial valuation based on the results of the study. The mortality assumption was further updated for the June 30, 2012 valuation.
 - Discount Rate The discount rate used to measure the total pension liability was 6.75% as of June, 30, 2014, and is equal to the long-term expected return on plan investments. The projection of cash flows used to determine the discount rate assumed that employer contributions would be made at the actuarially calculated rate computed in accordance with the current funding policy adopted by the Board, which requires payment of the normal cost and amortization of the unfunded actuarially accrued liability in level dollar installments over 30 years utilizing a closed period approach. Since the current funding policy was adopted, the employer contribution rate has been set by the Board at a level equal to or exceeding the actuarially calculated rate. Based on this assumption, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members.

SECTION III - ACCOUNTING

NOTES TO THE FINANCIAL STATEMENTS UNDER GASB #67 AND #68

F. Selected Notes to the Financial Statements under GASB #67 and #68 (Cont.)

	<u>1% Decrease (5.75%)</u>	<u>Current Rate (6.75%)</u>	<u>1% Increase (7.75%)</u>
- Discount Rate Sensitivity			
Net Pension Liability	\$ 691,739,098	\$ (50,980,323)	\$ (679,714,736)
3. Classes of plan members covered: ¹			
- Retired members, beneficiaries and disabled members receiving benefits:			\$ 3,491
- Terminated vested plan members entitled to but not yet receiving benefits:			129
- Terminated non-vested plan members entitled to a distribution of contributions:			796
- Active Plan Members:			<u>13,295</u>
- Total membership:			\$ 17,711
4. Money-weighted rate of return:			
The money-weighted rate of return equals investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested. For the fiscal year ending June 30, 2014, the money-weighted return on the plan assets is 13.7%.			
5. The components of the Net Pension Liability for the total 1977 Fund plan as of June 30, 2014, are as follows:			
- Total Pension Liability			\$ 4,706,997,462
- Plan Fiduciary Net Position			<u>4,757,977,785</u>
- Net Pension Liability			\$ (50,980,323)
- Plan Fiduciary Net Position as a Percentage of the Total Pension Liability			101.1%

¹ The valuation results as of June 30, 2014 were calculated using June 30, 2013 census data, adjusted for certain activity during fiscal year 2014.

SECTION IV - CENSUS DATA

G. Distribution of Retired Members, Beneficiaries, and Disabled Members by Age and Number of Years Retired ¹

Attained Age	Distribution of Retired Members, Beneficiaries, and Disabled Members by Age and Number of Years Retired as of June 30, 2013 ¹							Total
	Under 5 years	5 to 9 years	10 to 14 years	15 to 19 years	20 to 24 years	25 to 29 years	Over 30 years	
<40	44	22	21	10	9	1	1	108
40-44	33	23	19	2	3			80
45-49	30	48	27	10	4	2		121
50-54	266	48	31	30	13	8	3	399
55-59	564	265	57	46	20	16	3	971
60-64	172	271	127	59	28	23	7	687
65-69	33	52	164	66	52	25	12	404
70-74	2	4	4	237	36	24	10	317
75-79		1	2	63	105	22	11	204
80-84			1	23	34	36	5	99
85-89			1	5	18	35	19	78
90&Above				1	5	8	9	23
Total	1,144	734	454	552	327	200	80	3,491

¹ The valuation results as of June 30, 2014 were calculated using June 30, 2013 census data, adjusted for certain activity during fiscal year 2014.

SECTION IV - CENSUS DATA

H. Schedule of Benefit Recipients by Type of Benefit Option ¹

Number of Benefit Recipients by Benefit Option as of June 30, 2013 ¹

Amount of Monthly Benefit	Retiree Single Life Annuity	Retiree 60%		Survivors	Disability	Total
		Joint and Survivor Annuity				
\$ 1 - 500	0	0		13	0	13
501 - 1,000	0	10		138	30	178
1,001 - 1,500	24	120		312	102	558
1,501 - 2,000	77	398		101	230	806
2,001 - 3,000	211	1,064		48	317	1,640
over 3,000	41	218		9	28	296
Total	353	1,810		621	707	3,491

I. Schedule of Average Benefit Payments as of June 30, 2013 ^{1,2}

	Years of Credited Service							Total
	0-4	5-9	10-14	15-19	20-24	25-29	30+	
Average Monthly Defined Benefit	\$ 1,877	\$ 1,817	\$ 1,748	\$ 1,734	\$ 1,864	\$ 2,362	\$ 2,553	\$ 2,084
Average Final Average Salary	\$ 43,776	\$ 41,483	\$ 45,969	\$ 44,636	\$ 43,120	\$ 46,421	\$ 48,656	\$ 45,245
Number of Benefit Recipients	117	173	226	273	1,243	883	576	3,491

¹ The valuation results as of June 30, 2014 were calculated using June 30, 2013 census data adjusted for certain activity during fiscal year 2014. Monthly benefits reflect the 1.7% cost-of-living increase effective July 1, 2013, but do not reflect the 1.4% cost-of-living increase effective July 1, 2014.

² For some members average salary at retirement and years of credited service was not available. The average salary for each group excludes these members.

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

ACTUARIAL ASSUMPTIONS AND METHODS

	<u>Page</u>
A. Actuarial Assumptions	37
B. Actuarial Methods	40

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions

The assumptions used in the valuation were selected and approved by the INPRS Board of Trustees. The demographic assumptions are reviewed every five years through a study of actual experience. In this way, the actuary provides guidance to the Board in selecting the assumptions. The actuary and other economic and investment professionals also provide advice to the Board for selecting the economic assumptions. In our opinion, the assumptions are reasonable for purposes of this valuation.

Interest Rate / Investment Return

Funding	6.75% (net of administrative and investment expenses)
Accounting	6.75% (net of investment expenses)

Interest on Member Balances 3.5% per year

Future Salary Increases 3.25% per year

Inflation 3.0% per year

Cost of Living Increases 2.25% per year in retirement beginning July 1, 2015. Actual cost-of-living increases of 1.7% at July 1, 2013 and 1.4% at July 1, 2014 are reflected in the liability valuation at June 30, 2014.

Mortality (Healthy and Disabled) 2013 IRS Static Mortality projected five (5) years with Scale AA

Disability Based on 2005-2010 experience. Illustrative rates shown below:

<u>Age</u>	<u>Rate</u>
20	0.000%
25	0.075%
30	0.150%
35	0.200%
40	0.400%
45+	0.700%

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions (continued)

Termination

Based on 2005-2010 experience. Illustrative rates shown below:

<u>Service</u>	<u>Rate</u>	<u>Service</u>	<u>Rate</u>
0	40.0%	7-9	2.0%
1	20.0%	10-14	1.5%
2	5.0%	15-19	1.0%
3	4.0%	20+	1.5%
4	3.5%		
5	3.0%		
6	2.5%		

Retirement

Based on 2005-2010 experience. Illustrative rates shown below:

<u>Ages</u>	<u>Service <32</u>	<u>Service >=32</u>
45-51	10.0%	100.0%
52-57	10.0%	20.0%
58-61	15.0%	20.0%
62-64	20.0%	20.0%
65-69	50.0%	50.0%
70+	100.0%	100.0%

Decrement Timing

Decrements are assumed to occur at the beginning of the year.

Active Members in DROP

Members who are participating in the DROP are assumed to receive an annuity benefit commencing at the end of their DROP period as well as a lump sum payment equal to the number of years they were in the DROP times their annual annuity benefit. The annuity benefit is estimated based on salary and service at the time the member entered the DROP.

Spouse/Beneficiary

80% of male members and 50% of female members are assumed to be married or to have a dependent beneficiary. Male members are assumed to be three (3) years older than females and female members are assumed to be the same age as males.

Disability Retirement

For members hired after 1989 that become disabled, impairments are assumed to be 45% Class 1 (at 65% of salary), 10% Class 2 (at 50% of salary), and 45% Class 3 (at 36% of salary).

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

A. Actuarial Assumptions (continued)

Pre-Retirement Death	Of active member deaths, 10% are assumed to be in the line of duty and 90% are other than in the line of duty.
Data Assumptions	Actives and inactives with either no date of birth and/or no gender are assumed to be age 41 and/or male. Spouse gender is assumed to be the opposite gender of the member. Retirees and disabled members that are not married and do not have a retirement option listed are assumed to elect a single life annuity. Retirees and disabled members that are married and do not have a retirement option listed are assumed to be receiving a 60% joint and survivor annuity. Beneficiaries that do not have a retirement option listed are assumed to receive monthly payments for life.
Changes in Assumptions	There have been no changes in the actuarial assumptions since the June 30, 2013 valuation.

SECTION V - ACTUARIAL ASSUMPTIONS AND METHODS

B. Actuarial Methods

The actuarial methods used in this valuation were selected and approved by the Board. In general, the methods provide orderly funding of all benefits being accrued, as well as unfunded past-service benefit liabilities, over a period of thirty years. However, the smoothing methods employed in determining the Actuarial Value of Assets may accelerate or lengthen the effective funding period, depending on whether gains or losses are experienced. In our opinion, the actuarial methods are reasonable for the purposes of this valuation.

1. Actuarial Cost Method

The actuarial cost method is Entry Age Normal - Level Percent of Payroll.

The normal cost is calculated separately for each active member and is equal to the level percentage of payroll needed as an annual contribution from entry age to retirement age to fund projected benefits. The actuarial accrued liability on any valuation date is the accumulated value of such normal costs from entry age to the valuation date.

For funding, gains and losses occurring from census experience different than assumed, assumption changes, and benefit changes are amortized over a 30-year period with level payments each year. A new gain or loss base is established each year based on the additional gain or loss during that year and that base is amortized over a new 30-year period. The purpose of the method is to give a smooth progression of the costs from year to year and, at the same time, provide for an orderly funding of the unfunded liabilities.

For accounting, gains and losses occurring from census experience different than assumed and assumption changes are amortized into expense over the average expected future service of all plan participants (active and inactive). Gains and losses occurring from investment experience different from assumed are amortized into expense over a 5-year period. The effect of plan changes on the plan liability are fully recognized in expense in the year in which they occur.

2. Asset Valuation Method

Actuarial Value of Assets is equal to a four-year smoothing of gains and losses on the Market Value of Assets subject to a 20% corridor.

3. Employer Contribution Rate

Based on the assumptions and methods previously described, an actuarially determined contribution rate is computed. The Board considers this information, but has ultimate authority in setting the employer contribution rate.

4. Anticipated Payroll

The Anticipated Payroll of \$734,023,680 for the fiscal year beginning July 1, 2014 is equal to the actual 1st class officer salary at July 1, 2013 increased with one year of salary scale, plus the 1st class officer salary in effect at June 30, 2014 for one new unit, but does not include amounts for members who have reached the age at which retirement is assumed to occur immediately.

5. Changes in Actuarial Methods

Member census data as of June 30, 2013 was used in the valuation and adjusted, where appropriate, to reflect changes between June 30, 2013 and June 30, 2014. Standard actuarial roll forward techniques were then used to project the liabilities computed as of June 30, 2013 to the June 30, 2014 measurement date. Prior to the June 30, 2014 valuation, census data as of the valuation date was used.

SECTION VI - SUMMARY OF PLAN PROVISIONS

SUMMARY OF PLAN PROVISIONS

Page

Summary of Plan Provisions

41

SECTION VI - SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions

The benefit provisions for the 1977 Fund are set forth in IC 36-8-8. A summary of those defined pension benefit provisions is presented below:

Participation All full-time, fully-paid police officers and firefighters who work for employers participating in the 1977 Fund and who are hired or rehired after April 30, 1977.

Eligibility for Defined Pension Benefits

- a. Normal Retirement Age 52 with 20 or more years of creditable service
- b. Early Retirement Age 50 with 20 or more years of creditable service
- c. Late Retirement Subject to continued employment after normal retirement
- d. Disability Retirement As determined by a disability medical panel.
- e. Termination 20 or more years of creditable service and no longer active (i.e. vested inactive)
- f. Pre-Retirement Death Immediate

Amount of Benefits

- a. Normal Retirement The retirement benefit valued was 50% of the base salary (first-class salary) of a First Class Police Officer and Firefighter with 20 years of service, plus an additional 1% for each completed 6 months of service over 20 years up to a maximum of 74% with 32 years of service.
- b. Early Retirement Early retirement benefits are reduced by 7% per year for commencement between ages 50 and 52.
- c. Late Retirement The late retirement benefit is calculated in the same manner as the normal retirement benefit. Creditable service and earnings earned after normal retirement is included in the computation.

SECTION VI - SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions (continued)

Amount of Benefits (continued)

d. Disability Retirement

Hired Before 1990 This disability benefit is only available to members hired prior to January 1, 1990 and who do not choose to be covered by the disability benefit for members hired after 1989. The disability benefit is equal to the benefit the member would have received if the member had retired. If the member does not have 20 years of service or is not at least age 52 on the date of disability, the benefit is computed as if the member does have 20 years of service and is age 52 on the date of disability.

Hired after 1989 This disability benefit is for members hired after 1989, or hired prior to January 1, 1990, who have chosen to be covered by this disability benefit. The following describes the three different classes of impairments and the amount of base benefit for each class:

Class 1 Impairment:

A personal injury that occurs while on duty, while responding to an emergency, or due to an occupational disease. The disability benefit is equal to a base benefit of 45% of base salary, plus an additional amount between 10% and 45% of this salary based on degree of impairment. The benefit is payable for life, at which time the member is entitled to a retirement benefit based on the salary and service the member would have earned had the member remained in active service.

Class 2 Impairment:

A proven duty-related disease. The disability benefit is equal to a base benefit of 22% of base salary, plus an additional 0.5% of this salary for each year of service up to a maximum of 30 years of service, plus an additional amount between 10% and 45% of this salary based on degree of impairment. If the member's total benefit is less than 30% of this salary and the member has fewer than 4 years of service, then the benefit is payable for a period equal to the years of service of the member. Otherwise, the benefit is payable for life.

SECTION VI - SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions (continued)

Amount of Benefits (continued)

d. Disability Retirement (continued)

Hired after 1989
(continued)

Class 3 Impairment:

All other impairments that are not Class 1 or Class 2. The disability benefit is equal to a base benefit of 1% of base salary for each year of service up to a maximum of 30 years of service, plus an additional amount between 10% and 45% of this salary based on degree of impairment. If the member's total benefit is less than 30% of this salary and the member has fewer than 4 years of service, then the benefit is payable for a period equal to the years of service of the member. Otherwise, the benefit is payable until age 52, at which time the member is entitled to a retirement benefit based on 20 years of service.

e. Termination

If a member ends employment other than by death or disability before completing 20 years of active service, the member shall be entitled to the member's contributions plus accumulated interest. This benefit is not available to converted members.

If termination is after earning 20 years of service, the termination benefit is the accrued retirement benefit determined as of the termination date and payable commencing of the normal retirement date. The member may elect to receive a reduced early retirement benefit.

f. Pre-Retirement Death

Surviving Spouse

If a member dies other than in the line of duty, the spouse's benefit is equal to 60% of the monthly benefit the member was receiving or was entitled to receive on the date of death.

If a member dies in the line of duty, the spouse's benefit is equal to the monthly benefit the member was receiving or was entitled to receive on the date of death.

In either case, if the member does not have 20 years of service or is not at least age 52 on the date of death, the benefit is computed as if the member does have 20 years of service and is age 52 on the date of death.

SECTION VI - SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions (continued)

Amount of Benefits (continued)

f. Pre-Retirement Death (continued)

Children A payment shall be made to each child of a deceased member equal to 20% of the member's benefit until the later of (a) the date the child becomes age 18, or (b) the date the child becomes age 23 if enrolled in a qualified school. If a child is at least 18 and is mentally or physically incapacitated, the child is entitled to an amount equal to the greater of 30% of the base salary, or 55% of the member's benefit payable for the duration of the incapacity. If the member does not have 20 years of service or is not at least age 52 on the date of death, the benefit is computed as if the member does have 20 years of service and is age 52 on the date of death.

Dependent Parents If a deceased member leaves no surviving spouse and no qualified child but does leave a dependent parent or parents, an amount equal to 50% of the member's benefit shall be paid to the parent or parents jointly during their lifetime. If the member does not have 20 years of service or is not at least age 52 on the date of death, the benefit is computed as if the member does have 20 years of service and is age 52 on the date of death.

No Spouse or Dependent If a deceased member leaves no surviving spouse, no qualified dependent child, nor a dependent parent, a refund of the member's contributions plus accumulated interest will be made to the member's estate.

g. Additional Death Benefits A funeral death benefit is paid to the heirs or estate upon the member's death from any cause and is equal to at least \$12,000. An additional death benefit of \$150,000 is paid from the Pension Relief Fund to a surviving spouse, children, or parent(s) if death occurs in the line of duty.

Member Contributions Members are assumed to contribute at the rate of 6% of salary until they have completed 32 years of service.

SECTION VI - SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions (continued)

Withdrawal from Fund

If a member's employment is terminated prior to eligibility for a retirement annuity, the member may withdraw their contributions from the Fund.

Deferred Retirement Option Plan
("DROP")

The DROP is an optional form of benefit, which allows members who are eligible for an unreduced retirement benefit to continue to work and earn a salary while accumulating a DROP benefit payable in a lump sum or three annual installments. A member who elects to enter the DROP shall execute an irrevocable election to retire on the DROP retirement date. The member shall select a DROP retirement date not less than 12 months and not more than 36 months after the member's DROP entry date. While in the DROP, the member shall continue to make applicable fund contributions.

When a member enters the DROP, a "DROP frozen benefit" will be calculated. This is equal to the member's monthly retirement benefit based on accrued service and base salary as of the date member enters the DROP. Upon DROP retirement, the member is eligible to receive a lump sum equal to the amount of the DROP frozen benefit multiplied by the number of months in the DROP. You may elect to receive this amount in three annual installments instead of in a single lump sum. In addition, the member will receive a monthly retirement benefit equal to the DROP frozen benefit. The member will not continue to accrue service credit for the years in the DROP. Cost of living adjustments will not apply to the frozen monthly benefit while in the DROP. The cost of living adjustments will begin to be applied to the frozen monthly benefit, however, in the year after the year in which the member retires.

If the member elected to participate in the DROP, the member may, upon retirement, elect to forego DROP benefits, and instead receive monthly retirement benefits calculated as if the member never elected to participate in the DROP. These benefits would be based on accrued service and base salary as of the date the member retires.

SECTION VI - SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions (continued)

Forms of Payment

a. Single Life Annuity Member will receive a monthly benefit for life, but there are no monthly payments to anyone after death.

b. Joint with 60% Survivor Benefits Member will be paid a monthly benefit for life. After death, 60% of the benefit will be paid to the spouse or parent for their lifetime or the dependent until age 18.

Cost-of-Living Adjustments Benefits for retired members are increased annually based on increases in the CPI-U index. The increase is subject to a 3% maximum and 0% minimum.

Changes in Provisions No changes since prior valuation.

SECTION VII - DEFINITIONS OF TECHNICAL TERMS

DEFINITIONS OF TECHNICAL TERMS

Page

Definitions of Technical Terms

47

SECTION VII - DEFINITIONS OF TECHNICAL TERMS

Definitions of Technical Terms

Actuarial Accrued Liability (AAL)	That portion, as determined by a particular Actuarial Cost Method, of the Present Value of Future Benefits (PVFB) and expenses which is not provided for by future Normal Costs. Generally, the portion of the PVFB attributable to past service.
Actuarial Assumptions	Assumptions as to the occurrence of future events affecting pension costs, such as: mortality, withdrawal, disablement and retirement; changes in compensation and Government provided pension benefits; rates of investment earnings and asset appreciation or depreciation; procedures used to determine the Actuarial Value of Assets; characteristics of future entrants for Open Group Actuarial Cost Methods; and other relevant items.
Actuarial Cost Method	A mathematical procedure for allocating the Present Value of Future Benefits to service periods, usually in the form of a Normal Cost and an Actuarial Accrued Liability.
Actuarially Equivalent	Having the same Actuarial Present Value, based on a set of Actuarial Assumptions.
Actuarial Gain/(Loss)	The difference between actual Unfunded Actuarial Accrued Liability and anticipated Unfunded Actuarial Accrued Liability resulting from differences between actual and expected plan experience between two valuation dates.
Actuarial Present Value	The single amount that is equal to a payment or series of payments in the future. It is determined by discounting future payments using predetermined Actuarial Assumptions for interest and by probabilities of payment.
Actuarial Valuation	The determination, as of an Actuarial Valuation Date, of the Present Value of Future Benefits, Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values.
Actuarial Valuation Date	The date as of which an Actuarial Valuation is performed.
Actuarially Determined Contribution	The precise actuarial contribution rate (expressed as a percentage of covered payroll) or amount determined in accordance with a Funding Policy, which generally reflects the Normal Cost and amortization of any Unfunded Actuarial Accrued Liability.

SECTION VII - DEFINITIONS OF TECHNICAL TERMS

Definitions of Technical Terms (continued)

Amortization	The payment of a present value financial obligation on an installment basis over a future period.
Annual Required Contribution of the Employer (ARC)	The employer's periodic required contributions to a defined benefit pension plan, calculated in accordance with the plan provisions, Actuarial Assumptions, Actuarial Cost Method and other requirements prescribed by Governmental Accounting Standards No. 25 and No. 27.
Creditable Service	Service credited under the system that was rendered before the date of the actuarial valuation.
Funding Policy	A set of principles, often including a prescribed Actuarial Cost Method, Actuarial Assumptions, and/or Unfunded Actuarial Accrued Liability Amortization Method, that guide the calculation of the Actuarially Determined Contribution and management decisions regarding funding.
Level Dollar Amortization	Amortization where the installments are equal dollar amounts during each period.
Level Percent Amortization	Amortization where the installments are an equal percent of employee payroll during each period.
Normal Cost (NC)	That portion of the Present Value of Future Benefits which is allocated to the year following the Actuarial Valuation Date by the Actuarial Cost Method. The normal cost is specific to the cost method used.
Plan Assets	Resources, usually in the form of stocks, bonds, and other classes of investments, that have been segregated and restricted in a trust, or equivalent arrangement, in which (a) employer contributions to the plan are irrevocable, (b) assets are dedicated to providing benefits to retirees and their beneficiaries, and (c) assets are legally protected from creditors of the employer(s) or plan administrator, for the payment of benefits in accordance with the terms of the plan.
Plan Members	The individuals covered by the terms of a pension plan. The plan membership generally includes employees in active service, terminated employees who have accumulated benefits but are not yet receiving them, and retired employees and beneficiaries currently receiving benefits.

SECTION VII - DEFINITIONS OF TECHNICAL TERMS

Definitions of Technical Terms (continued)

Present Value of Future Benefits (PVFB)

Projected benefits estimated to be payable to plan members (retirees and beneficiaries, terminated employees entitled to benefits but not yet receiving them, and current active members upon retirement) as a result of their service through the valuation date and their expected future service. The actuarial present value of projected future benefits as of the valuation date is the present value of the cost to finance benefits payable in the future, discounted to reflect the expected effects of the time value (present value) of money and the probabilities of payment (taking into account mortality, turnover, probability of participating in plan retirement, etc.). Alternatively, it is the amount that would have to be invested on the valuation date so that the amount invested plus investment earnings will provide sufficient assets to pay the projected benefits when due.

Unfunded Actuarial Accrued Liability (UAAL)

The difference between the Actuarial Accrued Liability and Plan Assets as of a particular date. Plan assets may be market value or a smoothed value.

Unfunded Actuarial Accrued Liability Amortization Method

A predetermined process by which any Unfunded Actuarial Accrued Liability will be amortized for calculating the Actuarially Determined Contribution.
